OIL CONSERVATION DIVISION

APPLICATION OF 3R OPERATING, LLC  
FOR COMPULSORY POOLING,  
LEA COUNTY, NEW MEXICO.

CASE NO. 25991

SELF-AFFIRMED STATEMENT  
OF KYLE MENDEZ

1. I am a Land Advisor with 3R Operating, LLC (“3R”). I am over 18 years of age, have personal knowledge of the matters addressed herein, and am competent to provide this Self-Affirmed Statement. I have not previously testified before the New Mexico Oil Conservation Division (“Division”). I have a Bachelor’s degree in political science and have over 7 years of experience as a landman in the petroleum industry. A copy of my resume is attached as **Exhibit A-1**.

2. Copies of 3R’s application and proposed hearing notice are attached as **Exhibit A-2**.

3. None of the parties proposed to be pooled in this case indicated opposition to this matter proceeding by affidavit; therefore, I do not expect any opposition at the hearing.

4. 3R seeks to pool all uncommitted interests in the Woodford formation underlying a 240-acre, more or less, standard horizontal spacing unit comprised of the W/2 SW/4 of Section 20 and the W/2 W/2 of Section 29, Township 26 South, Range 37 East, Lea County, New Mexico (“Unit”).

5. The Unit will be dedicated to the **Atlas 20 29 Fed Com 951H** well (“Well”), which will be drilled from a surface hole location in the NW/4 SW/4 (Unit L) of Section 20 to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 29.

6. The completed interval of the Well will be orthodox.

7. **Exhibit A-3** contains the C-102 for the Well.

8. **Exhibit A-4** contains a plat identifying ownership by tract in the Unit. This exhibit also includes any applicable lease numbers, a unit recapitulation, and the interests 3R seeks to pool highlighted in yellow.

9. 3R has conducted a diligent search of all county public records, including phone directories and computer databases, as well as internet searches, to locate the interest owners it seeks to pool. While 3R believes it located valid addresses for most of the parties it seeks to pool, some of the parties are unlocatable. 3R has provided the names, and last known addresses where applicable, to our outside counsel, Hardy McLean LLC, so that they could attempt notice through certified mail and by publication in the local newspaper.

10. **Exhibit A-5** contains a sample well proposal letter and AFEs sent to working interest owners for the Well. The estimated costs reflected on the AFE are fair and reasonable and comparable to the cost of other wells of similar depth and length drilled in the subject formation in the area.

11. In my opinion, 3R made a good-faith effort to reach voluntary joinder of uncommitted interests in the Well as indicated by the chronology of contact described in **Exhibit A-6**.

12. 3R requests overhead and administrative rates of \$10,000 per month while the Well is being drilled and \$1,000 per month while the Well is producing. These rates are fair and are comparable to the rates charged by 3R and other operators in the vicinity.

13. The Ownership Commitment Exhibit is attached as **Exhibit A-7**. This exhibit includes a list of all owners in the Unit and identifies each owner's ownership status, whether the owner has committed to the proposed spacing unit, and the type of commitment, i.e., whether a

signed letter of commitment, joinder agreement, or verbal agreement. Exhibit C also identifies when notice of this hearing was sent to each interest owner by our outside counsel, Hardy McLean LLC.

14. The attached exhibits were either prepared by me or under my supervision or were compiled from company business records.

15. In my opinion, the granting of 3R's application would serve the interests of conservation, the protection of correlative rights, and the prevention of waste.

16. I understand this Self-Affirmed Statement will be used as written testimony in this case. I affirm that my testimony above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date next to my electronic signature below.

STATE OF NEW MEXICO  
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES  
OIL CONSERVATION DIVISION

APPLICATION OF 3R OPERATING, LLC  
FOR COMPULSORY POOLING,  
LEA COUNTY, NEW MEXICO.

CASE NO. 25991

SELF-AFFIRMED STATEMENT  
OF BRIAN ATWELL

1. I am a geologist with 3R Operating, LLC (“3R”). I am over 18 years of age, have personal knowledge of the matters addressed herein, and am competent to provide this Self-Affirmed Statement. I have previously testified before the New Mexico Oil Conservation Division (“Division”) and my credentials as an expert in petroleum land matters were accepted and made a matter of record.

2. I am familiar with the geological matters that pertain to the above-referenced case.

3. **Exhibit B-1** is a regional locator map that identifies the Atlas project area, in proximity to the Capitan Reef within the Delaware Basin, for the Woodford horizontal spacing units that are the subject of these applications.

4. **Exhibit B-2** is a cross-section location map for the proposed horizontal spacing unit within the Woodford formation. The approximate wellbore path for the proposed **Atlas 20 29 Fed Com 951H** well (“Well”) is represented by a dashed orange line. Existing producing wells in the targeted interval are represented by solid orange lines. This map identifies the cross-section running from A-A’ with the cross-section wells name and a purple line in proximity to the proposed Well.

5. **Exhibit B-3** is a Subsea Structure map of the Woodford formation in TVD subsea with a contour interval of 500 ft. The map identifies the approximate wellbore path for the proposed Well with a dashed orange line. It also identifies the location of the cross-section running

3R Operating, LLC  
Case No. 25991  
Exhibit B

from A-A' in proximity to the proposed Well. The data points are indicated by red triangles. The map demonstrates the formation dips to the southwest in this area. Faulting is present in the development area; however, I do not observe any pinch-outs or geologic impediments to developing the targeted interval with horizontal wells.

6. **Exhibit B-4** identifies two wells penetrating the targeted interval, which I used to construct a stratigraphic cross-section from A to A'. It contains gamma ray, resistivity, and porosity logs. The cross section is oriented from north to south and is hung on the top of the Woodford formation. The proposed landing zone for the Well is labeled on the exhibit (LZ). This cross-section demonstrates the target interval is continuous across the Unit and thickens from east to west.

7. **Exhibit B-5** is a gun barrel diagram that shows the proposed Well in the Woodford formation. The spacing unit is defined by a blue box and is labeled with the case number.

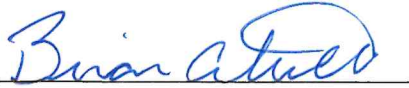

8. In my opinion, a stand-up orientation for the Well is appropriate to properly develop the subject acreage because of consistent rock properties throughout the Unit and the preferred fracture orientation in this portion of the trend.

9. Based on my geologic study of the area, the targeted interval underlying the Unit is suitable for development by horizontal wells and the tracts comprising the Unit will contribute more or less equally to the production of the Well.

10. In my opinion, the granting of 3R's applications will serve the interests of conservation, the protection of correlative rights, and the prevention of waste.

11. The exhibits attached hereto were either prepared by me or under my supervision or were compiled from company business records.

12. I understand this Self-Affirmed Statement will be used as written testimony in this case. I affirm my testimony above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date identified next to my signature below.
