Enduring Resources, LLC

Variance Request for 19.15.34 NMAC

New Mexico Oil Conservation Division
Attn: Victoria Venegas

RE: 3RF-50 – W Escavada Unit #300H – Facility ID fVV2123855557

Enduring Resources is requesting variances to the below listed items as outlined in 19.15.34.16 NMAC. This Recycling Containment/Facility will consist of self-contained free-standing structures instead of a lined earthen pit. The variances requested below will provide equal or better protection of fresh water, public health, and the environment.

Variance Requests:

Liner Anchoring: Enduring Resources requests a variance to **NMAC 19.15.34.12 (3)** which applies to a lined earthen pit. This statute is not applicable to a circular steel AST with liners clamped to the top of the steel shell. We believe this will provide equal or better protection than the requirements listed in 19.15.34.12. NMAC.

Inside/Outside Levee Slopes: Enduring Resources requests a variance to **NMAC 19.15.34.12 (2)** which applies to a lined earthen pit. The containment is an AST and not an in-ground pond and therefore will not have inside/outside levee slopes. The AST is a self-contained free-standing structure that will provide equal or better protection than the requirements listed in 19.15.34.12 NMAC.
