Re: Milestone Progress Report
Milestone #5
Sundance Services, Inc. Facility Closure
Eunice, New Mexico

Dear Mr. Griswold:

On behalf of Sundance Services, Inc. (SSI), Daniel B. Stephens & Associates, Inc. (DBS&A) is pleased to submit the following information regarding the completion of Milestone #5 to the New Mexico Energy, Minerals and Natural Resources Department Oil Conservation Division (OCD). The milestone requires: "East landfill slopes must be at final grades on or before December 31, 2021."

Currently, the eastern slope of the landfill is to the final grade needed to prepare for final closure. The eastern slope is to within +/- 2 feet of the approved closure grade, which will allow for consistent placement of final cover over the entire landfill. It is anticipated that final cover placement will require some additional grading to offset any erosion, tie in to contours in the surrounding area, and accommodate final stormwater management features.

The work to accomplish this grading was performed primarily in early to mid-2019. Enviroworks, LLC of Edgewood, NM utilized heavy equipment, including an excavator, bulldozer, three 40 ton haul trucks and a water truck to move and place approximately 462,000 cubic yards of material. The material for the grading was relocated from various locations on the SSI site. Since that time, SSI personnel periodically maintain the slope in the event of erosion or rilling due to large storm events.

Survey of the SSI landfill area was performed by Atkins Engineering of Roswell, NM in late July 2021 to verify the current grade on the eastern slope of the landfill. Comparison was made to the approved final grading plan using AutoCAD Civil 3D software and is show in the attached figure.
