Re: Sand Dunes Recycling Facility (2RF-129); Closure Report for Above-Ground Storage Tanks T-2101 and T-2102

To Whom It May Concern,

Oxy USA Inc. submits this closure report for the two synthetically lined above-ground storage tanks (ASTs) having a capacity of 6,000 barrels each (T-2101 and T-2102) as described in the modification package to the Sand Dunes Recycling Facility (2RF-129) registration, dated May 23, 2018. In accordance with *NMAC 19.15.34.14 Closure and Site Reclamation Requirements for Recycling Containments*, Oxy USA Inc. has completed containment closure for the ASTs and submits the C-147S closure report along with analytical results for closure sampling.

Please note, the submitted C-147S includes information for the Sand Dunes Recycling Facility, however, closure has only been completed for the two ASTs, as described above. The recycling facility and remaining containments will continue to operate. The referenced ASTs, including all fluids and liners, have been removed, and the soils beneath have been tested in accordance to *NMAC 19.15.34.14*. Revegetation and reclamation as required by *NMAC 19.15.34.14* will be deferred until the closure of the entirety of the Sand Dunes Recycling Facility.

Should you have any questions or require additional information, please contact me at your convenience.

Sincerely,

A handwritten signature in blue ink that reads "Chantill Recker".
