Subject: [EXTERNAL] Jal Landfarm Background and Release Response

Hello Brad,

I hope you had a good New Years and were able to take some time off. I just left you a voicemail on your desk line and wanted to follow up with an email. The purpose of the call was two-fold, one item was to confirm that you are in receipt of the background sampling report that was submitted in Nov 2021, and whether you had any questions or if there were status updates you could advise of on review.

The second was to notify you of the Second SA sampling results for the Chevron Jal Landfarm (collected in December 2021). Detections above the currently recognized background value for chloride (10 mg/kg) were observed in 5 cells, and one detection above the laboratory reporting limit for DRO was observed in a cell. As a result we will begin preparing for and implementing release response sampling per Part 36.

If you get an opportunity, please advise on the background report as the newly presented background values would reduce the number of cells requiring release response sampling if approved.
