Pursuant to 19.15.27.8(E), Spur Energy Partners LLC requests approval from the division to set an enclosed combustor within 100' of the storage tanks. Justification for the approval is as follows:

1. Setting the combustor at 75' will not require the relocation of the facility road.
2. The combustor will only handle low-pressure gas off the storage tanks.
3. The combustor flame will be enclosed and the stack height will be a minimum for allowing for safe operations.
