Recycling Facility/Containment Cessation Request for 19.15.34 NMAC

New Mexico Oil Conservation Division Attn: Victoria Venegas

Enduring Resources is requesting a cessation of operations for the Nageezi Unit L26 Staging and G-Tank Area (3RF-74) Water Recycling Facility. In accordance with 19.15.34.13.C NMAC, "A recycling containment shall be deemed to have ceased operations if less than twenty percent of the total fluid capacity is used every six months following the first withdrawal of produced water for use. The operator must report cessation of operations to the division."

Enduring is requesting a cessation of operations from 6/2025 through the end of 11/2025. The division may grant an extension to this determination of cessation of operations not to exceed six months. Enduring has included records for the last 6 months of inspections at this facility. Note, during the last 6 months, water storage tanks have been temporarily removed from the facility and will be reinstalled before operations resume. Enduring will follow all regulations set forth under NMAC 19.15.34 for operations at this facility.

Thank You,

Heather Huntington

Revised April 3, 2017

Recycling Facility and/or Recycling Containment

Type of Facility: ☒ Recycling Facility ☒ Recycling Containment*
Type of action: ☐ Permit ☐ Registration
☐ Modification ☐ Extension
☐ Closure ☒ Other (explain) Cessation Request 06/2025-11/2025

* At the time C-147 is submitted to the division for a Recycling Containment, a copy shall be provided to the surface owner.

Be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

1.
Operator: DJR Operating, LLC (For multiple operators attach page with information) OGRID #: 371838
Address: 200 Energy Court, Farmington, New Mexico 87401
Facility or well name (include API# if associated with a well): Nageezi Unit L26 Staging and G-Tank Area
OCD Permit Number: 3RF-74 (For new facilities the permit number will be assigned by the district office)

4.

Bonding:

- ☒ Covered under bonding pursuant to 19.15.8 NMAC per 19.15.34.15(A)(2) NMAC (These containments are limited to only the wells owned or operated by the owners of the containment.)
- ☐ Bonding in accordance with 19.15.34.15(A)(1). Amount of bond \$ _____ (work on these facilities cannot commence until bonding amounts are approved)
- ☐ Attach closure cost estimate and documentation on how the closure cost was calculated.

5.

Fencing:

- ☐ Four foot height, four strands of barbed wire evenly spaced between one and four feet
- ☒ Alternate. Please specify See variance request in registration package Exhibit H

6.

Signs:

- ☒ 12"x 24", 2" lettering, providing Operator's name, site location, and emergency telephone numbers
- ☐ Signed in compliance with 19.15.16.8 NMAC

7.

Variances:

Justifications and/or demonstrations that the proposed variance will afford reasonable protection against contamination of fresh water, human health, and the environment.

Check the below box only if a variance is requested:

- ☒ Variance(s): Requests must be submitted to the appropriate division district for consideration of approval. If a Variance is requested, include the variance information on a separate page and attach it to the C-147 as part of the application.

If a Variance is requested, it must be approved prior to implementation.

8.

Siting Criteria for Recycling Containment

Instructions: The applicant must provide attachments that demonstrate compliance for each siting criteria below as part of the application. Potential examples of the siting attachment source material are provided below under each criteria.

General siting

Ground water is less than 50 feet below the bottom of the Recycling Containment.

NM Office of the State Engineer - iWATERS database search; USGS; Data obtained from nearby wells

☐ Yes ☒ No
☐ NA

Within incorporated municipal boundaries or within a defined municipal fresh water well field covered under a municipal ordinance adopted pursuant to NMSA 1978, Section 3-27-3, as amended.

- Written confirmation or verification from the municipality; written approval obtained from the municipality

☐ Yes ☒ No
☐ NA

Within the area overlying a subsurface mine.

- Written confirmation or verification or map from the NM EMNRD-Mining and Minerals Division

☐ Yes ☒ No

Within an unstable area.

- Engineering measures incorporated into the design; NM Bureau of Geology & Mineral Resources; USGS; NM Geological Society; topographic map

☐ Yes ☒ No

Within a 100-year floodplain. FEMA map

☐ Yes ☒ No

Within 300 feet of a continuously flowing watercourse, or 200 feet of any other significant watercourse, or lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark).

- Topographic map; visual inspection (certification) of the proposed site

☐ Yes ☒ No

Within 1000 feet from a permanent residence, school, hospital, institution, or church in existence at the time of initial application.

- Visual inspection (certification) of the proposed site; aerial photo; satellite image

☐ Yes ☒ No

Within 500 horizontal feet of a spring or a fresh water well used for domestic or stock watering purposes, in existence at the time of initial application.

- NM Office of the State Engineer - iWATERS database search; visual inspection (certification) of the proposed site

☐ Yes ☒ No

Within 500 feet of a wetland.

- US Fish and Wildlife Wetland Identification map; topographic map; visual inspection (certification) of the proposed site

Subject: DJR Operating Nageezi Unit L26 Staging and G-Tank Area AST Notice of Cessation of Operations
Date: Tuesday, June 10, 2025 2:00:00 PM

Good afternoon Mr. Tafoya,

Enduring Resources is requesting a cessation of operations from NMOCD for the DJR Operating Nageezi Unit L26 Staging and G-Tank Area. In accordance with 19.15.34.10.A NMAC, Enduring Resources is required to notify the surface owner of the request, which in this case is BLM. Please consider this email as surface owner notification of this extension request. The requested extension is in accordance with 19.15.34.13.C NMAC, "A recycling containment shall be deemed to have ceased operations if less than twenty percent of the total fluid capacity is used every six months following the first withdrawal of produced water for use. The operator must report cessation of operations to the division."

Enduring is requesting a cessation of operations from 06/2025 through the end of 11/2025.

There have been no indications that the leak detection system integrity is compromised.

Enduring will continue to operate the facility per regulations in 19.15.34 NMAC.

This email is the surface owner notification of this permit extension request. Enduring Resources, LLC & DJR Operating, LLC are wholly owned subsidiaries of Enduring Resources, LLC. Leases, rights of way, wells, and other property interests will continue to be held in their current entity names.

Please let us know if you have any questions.

Thank you,

Heather Huntington

3RF-74 - NAGEEZI UNIT L26 STAGING AND G-TANK AREA RECYCLING [fVV2425351283]

Good afternoon Ms. Huntington.

The NMOCD has reviewed the cessation of operations extension request and related documents, submitted by [371838] DJR OPERATING, LLC on 6/10/2025, Application ID **472852**, for 3RF-74 - NAGEEZI UNIT L26 STAGING AND G-TANK AREA RECYCLING [fVV2425351283] in I-27-24N-09W, San Juan County, New Mexico. The extension of the cessation of operations is approved with the following conditions of approval:

- 3RF-74 - NAGEEZI UNIT L26 STAGING AND G-TANK AREA RECYCLING [fVV2425351283] extension of cessation of operations is approved from June 1, 2025, to December 1, 2025. **However, if after this 6-month period, the containment was not utilized at a minimum of 20% fluid capacity, no additional extensions would be granted, and the operator would be directed to remove all fluids and proceed with the closure requirements.**
- [371838] DJR OPERATING, LLC will maintain a liquid level in the containment that is at least equal to the weight of the liner plus 20%. [371838] DJR OPERATING, LLC may maintain a higher liquid level if they choose.
- [371838] DJR OPERATING, LLC will provide written notice to OCD Permitting at least 72 hours, but no more than one week, prior to the recommencement of operations. Recommencement of recycling operations means that the operator plans to resume moving fluids through the containment and discharging fluids from the containment.
 - At the resumption of recycling operations, [371838] DJR OPERATING, LLC is required to perform an incremental fluid level test for containment liquid levels above the minimum liquid level.
 - [371838] DJR OPERATING, LLC will fill the containment. [371838] DJR OPERATING, LLC will pause filling operations at every 10% of total fluid capacity above the minimum level.
 - [371838] DJR OPERATING, LLC will maintain the liquid level for each 10% volume increase for 24 hours and inspect and operate the leak detection system at the end of the 24-hour period.
 - If there are no liquids present in the leak detection system, [371838] DJR OPERATING, LLC may proceed to fill the next 10% volume and repeat the process until the containment full design capacity minus the 3-feet of freeboard is reached.
 - If liquids are present, [371838] DJR OPERATING, LLC should immediately cease the incremental fill test and perform a liner inspection. [371838] DJR OPERATING, LLC should provide written notice of the fluid detection and liner inspection findings to OCD via OCD Permitting using a C-147 Long with the "Other" box checked and "Notice of fluid detection" written as the explanation of "Other."
 - If the detected fluid is confirmed to be produced water, [371838] DJR OPERATING, LLC must comply with 19.15.34.13 [371838] DJR OPERATING, LLC must provide written notification to OCD Permitting on the actions taken to comply with 19.15.34.13 NMAC.
 - After fluid is detected in the leak detection system, the incremental fill test cannot continue until after a written approval to proceed is issued by the OCD.
 - [371838] DJR OPERATING, LLC must submit copies of the detailed containment inspection records for the prior three months and a report detailing the incremental fluid level test process and results

through OCD Permitting using a C-147 (long form) with the "Other" box checked. "Recommendment of Operations - Incremental Fluid Level Test" should be written as the explanation of "Other." Form C-147 must be completed and include information in sections 1 General Information, 2 Recycling Facility, 3 Recycling Containment, 4 Bonding, and 10 Operator Application Certification. Section 9 Recycling Facility and/or Containment Checklist may also need to be partially completed. Operators should verify that the resumption of operations notification does not result in any changes to the recycling containment operating and maintenance plan or the closure plan. If the recommencement of operations affects the operating and maintenance plan or closure plan, operators should check those boxes in section 9 and provide updated plans or plan addendums as attachments to the C-147.

- [371838] DJR OPERATING, LLC will continue to operate, maintain, and close 3RF-74 - NAGEEZI UNIT L26 STAGING AND G-TANK AREA RECYCLING [fVV2425351283] in compliance with 19.15.34 NMAC, to include but not limited detailed inspection records, removal of trash/oil from containment, and monthly C-148 reporting (even if there is zero activity).
- A minimum of 3-feet freeboard must always be maintained in the recycling containment during operations.

Please let me know if you have any additional questions.
