BEFORE THE OIL CONSERVATION COMMISSION
OF THE STATE OF NEW MEXICO

ORDER NO. A-201

STATEWIDE OIL PRORATION ORDER FOR AUGUST, 1966

The Oil Conservation Commission held public hearing at Santa Fe, New Mexico, on July 13, 1966, at 9 a.m., pursuant to legal notice for the purpose of setting the allowable production of oil within the state of New Mexico for the month of August, 1966.

NOW, on this 14th day of July, 1966, the Commission, a quorum being present, having considered the testimony adduced as to probable market demand, the nominations of purchasers, the capacities of producing wells, together with the anticipated newly completed or re-completed wells, and being otherwise fully advised in the premises,

FINDS:

(1) That the reasonable market demand for oil produced in the state of New Mexico during the month of August, 1966, is approximately 408,390 barrels per day, which total includes a demand for approximately 380,738 barrels of oil per day from the counties of Lea, Eddy, Chaves, and Roosevelt, and a demand for approximately 27,652 barrels of oil per day from the counties of San Juan, McKinley, Rio Arriba, and Sandoval.

(2) That the potential producing capacity of all oil wells in the state is in excess of such reasonable market demand, and in order to prevent waste the production of oil should be limited, allocated, and distributed for the month of August, 1966.

(3) That all the producing oil wells, together with the expected completed or recompleted wells in the state within the proration period, can produce a total of approximately 408,390 barrels per day without causing waste, and an allocation based upon such production would be reasonable and would protect correlative rights.

(4) That the demand for oil from each of the above-described areas is separate and distinct and cannot be reasonably met by the production of oil from the other area, and that the production allowable for each of the said areas should be based upon the demand for oil from that area.

(5) That a total Southeast New Mexico production allowable of 380,738 barrels per day, which includes 5,000 barrels per day supplemental allowable for new production and 19 barrels of back allowable, can be produced without waste by a distribution and allocation of such production among the oil wells in Lea, Eddy, Chaves, and Roosevelt Counties, by the establishment of a normal unit allowable for those counties of 45 barrels per unit per day.

(6) That a total Northwest New Mexico production allowable of 27,652 barrels per day, which includes 500 barrels per day supplemental allowable for new production, can be produced without waste by a

distribution and allocation of such production among the oil wells in San Juan, McKinley, Rio Arriba, and Sandoval Counties, New Mexico, by the establishment of a normal unit allowable for those counties of 70 barrels per unit per day.

(7) That application for back allowable totalling approximately 578 barrels has been received by the Commission from Allen K. Trobaugh, an operator in the North Bagley-Middle Pennsylvanian Pool, Lea County, New Mexico, as the result of underproduction incurred as the result of the inability of Western Oil Transportation and Pan American Petroleum Corporation to run oil at the allowable rate. That said 578 barrels of applied for back allowable should be authorized for production during August, 1966.

IT IS THEREFORE ORDERED:

(1) For the month of August, 1966, a normal unit allowable for production of oil in the allocated pools within Lea, Eddy, Chaves, and Roosevelt Counties, New Mexico, is hereby set at 45 barrels per unit per day; provided that each well in the Knowles Pool in Lea County, New Mexico, under 80-acre spacing Order No. R-40 (except as amended by Order No. R-52) is allocated 90 barrels per 80 acres, with deep-pool adaptation. Provided further that the top unit allowable for the North Mason-Delaware Pool in Lea and Eddy Counties, New Mexico, is hereby set at 31 barrels per unit per day, in accordance with the provisions of Order No. R-944. Provided further that the top unit allowable for the South Carter-San Andres Pool in Lea County, New Mexico, is hereby set at 44 barrels per unit per day in accordance with the provisions of Order No. R-1012. The allocation hereby set for said month in the allocated pools of Lea, Eddy, Chaves, and Roosevelt Counties, New Mexico, shall be in accordance with Rules 502, 505, and 506 of the Commission's Rules and Regulations, and subject to and as modified by any valid orders of the Commission relating directly to any well, areas, or pools, and the assignment of allowable thereto.

(2) A Southeast New Mexico proration schedule duly prepared by the Commission and thereafter adopted for the month of August, 1966, is hereto attached and made a part hereof. Said proration schedule distributes and allocates the allowable production among the oil wells in Lea, Eddy, Chaves, and Roosevelt Counties, New Mexico, for the period stated. The sale, purchase, or acquisition, or the transporting, refining, processing, or handling in any other way of oil produced in excess thereof is hereby prohibited, and such oil is thereafter contraband.

(3) For the month of August, 1966, approximately 578 barrels of supplemental allowable is hereby authorized for production at the rate of approximately 19 barrels per day by a certain well in the North Bagley-Middle Pennsylvanian Pool, Lea County, New Mexico. The oil well listed in this supplemental proration schedule being the top allowable well which incurred underproduction as the result of purchaser prorationing by Western Oil Transportation and Pan American Petroleum Corporation during June, 1966.

ORDER NO. A-201

IT IS FURTHER ORDERED:

(1) For the month of August, 1966, a normal unit allowable for production of oil in the allocated pools within San Juan, McKinley, Rio Arriba, and Sandoval Counties, New Mexico, is hereby set at 70 barrels per unit per day; provided that each well in the Bisti-Lower Gallup Oil Pool in San Juan County, New Mexico, to which has been dedicated 80 acres is allocated 140 barrels per 80 acres, in accordance with the provisions of Order No. R-1069-B. The allocation hereby set for said month in the allocated pools of San Juan, McKinley, Rio Arriba, and Sandoval Counties, New Mexico, shall be in accordance with Rules 502, 505, and 506 of the Commission's Rules and Regulations and subject to and as modified by any valid orders of the Commission relating directly to any well, areas, or pools, and the assignment of allowable thereto.

(2) A Northwest New Mexico proration schedule duly prepared by the Commission and thereafter adopted for the month of August, 1966, is hereto attached and made a part hereof. Said proration schedule distributes and allocates the allowable production among the oil wells in San Juan, McKinley, Rio Arriba, and Sandoval Counties, New Mexico, for the period stated. The sale, purchase, or acquisition, or the transporting, refining, processing, or handling in any other way of oil produced in excess thereof is hereby prohibited and such oil is thereafter contraband.

The foregoing order shall remain effective until further order of the Commission.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
