ORDER NO. AG-N-41-4

SUPPLEMENTAL GAS PRORATION ORDER FOR THE MONTH
OF JULY, 1979

This cause came on for public hearing before the Division's Examiner, Daniel S. Nutter, at Santa Fe, New Mexico, at 9 a.m. on June 13, 1979, pursuant to legal notice for the purpose of setting the allowable production of gas from the following four gas pools in San Juan, Rio Arriba, and Sandoval Counties, New Mexico, for the month of July, 1979:

Basin-Dakota, Blanco-Mesaverde, Blanco-Pictured Cliffs, South, and Tapacito-Pictured Cliffs.

NOW, on this 21st day of June, 1979, the Division Director, having considered the supplemental nominations of purchasers, the capacity of producing wells, and the recommendations of the Examiner, and being otherwise fully advised in the premises,

FINDS:

(1) That the total nomination of purchasers of gas produced from the above-listed four gas pools for the month of July, 1979, is 38,766,900 Mcf. The individual pool nominations are as follows:

Basin-Dakota	10,604,400 Mcf
Blanco-Mesaverde	25,228,400 Mcf
Blanco-Pictured Cliffs, South	2,360,500 Mcf
Tapacito-Pictured Cliffs	573,600 Mcf

(2) That the potential producing capacity of all gas wells in the four gas pools listed above is in excess of the nominations of purchasers of gas, and in order to prevent waste and protect correlative rights, the production of gas from the above-listed four gas pools should be limited, allocated, and distributed during the month of July, 1979.

(3) That all the producing gas wells, together with the expected completed or recompleted wells in the four gas pools listed above, can produce a total of 38,766,900 Mcf without causing waste during the month of July, 1979, and an allocation based upon such production would be reasonable and would protect correlative rights.
