ORDER NO. AG-N-44-1

SUPPLEMENTAL GAS PRORATION ORDER FOR THE MONTH
OF APRIL, 1982

This cause came on for public hearing before the Division's Examiner, Richard L. Stamets, at Santa Fe, New Mexico, at 9 a.m. on March 16, 1982, pursuant to legal notice for the purpose of setting the allowable production of gas from the following four gas pools in San Juan, Rio Arriba, and Sandoval Counties, New Mexico, for the month of April, 1982:

Basin-Dakota, Blanco-Mesaverde, Blanco-Pictured Cliffs, South, and Tapacito-Pictured Cliffs.

NOW, on this 19th day of March, 1982, the Division Director, having considered the supplemental nominations of purchasers, the capacity of producing wells, and the recommendations of the Examiner, and being otherwise fully advised in the premises,

FINDS:

(1) That the total nomination of purchasers of gas produced from the above-listed four gas pools for the month of April, 1982, is 41,150,900 Mcf. The individual pool nominations are as follows:

Basin-Dakota	14,884,900 Mcf
Blanco-Mesaverde	23,664,800 Mcf
Blanco-Pictured Cliffs, South	2,057,800 Mcf
Tapacito-Pictured Cliffs	543,400 Mcf

(2) That the potential producing capacity of all gas wells in the four gas pools listed above is in excess of the nominations of purchasers of gas, and in order to prevent waste and protect correlative rights, the production of gas from the above-listed four gas pools should be limited, allocated, and distributed during the month of April, 1982.

(3) That all the producing gas wells, together with the expected completed or recompleted wells in the four gas pools listed above, can produce a total of 41,150,900 Mcf without causing waste during the month of April, 1982, and an allocation based upon such production would be reasonable and would protect correlative rights.
