

Production Date: May 2021  
Location: Jackson B 6

| Analysis       |         |        |
|----------------|---------|--------|
| Components     | Mol %   | GPM    |
| Helium         | 0.0000  |        |
| Nitrogen       | 1.9970  |        |
| Carbon Dioxide | 1.7400  |        |
| H2S            | 0.3000  |        |
| Other Inerts   | 0.0000  |        |
| Methane        | 67.7830 |        |
| Ethane         | 14.4920 | 3.8930 |
| Propane        | 7.5430  | 2.0870 |
| Iso Butane     | 0.9270  | 0.3040 |
| Nor Butane     | 2.3800  | 0.7530 |
| Iso Pentane    | 0.6470  | 0.2380 |
| Nor Pentane    | 0.7060  | 0.2570 |
| Hexanes Plus   | 1.4810  | 0.6130 |
| Totals         | 99.9960 | 8.1450 |

Burnett Oil Co. Inc.  
Flaring Volume Calculation Method

Last 7 day sales average – sales volume of day of flare event = Amount flared for day.

For example:

| prior 7 Day<br>Sales Avg |   | Sales Day of<br>Flare Event |   | Volume<br>to Flare |
|--------------------------|---|-----------------------------|---|--------------------|
| 1,500                    | - | 1,000                       | = | 500                |

**QUESTIONS****Determination of Reporting Requirements**

Answer all questions that apply. The Reason(s) statements are calculated based on your answers and may provide additional guidance.

|                                                                                                                                                                                                                                                                                          |                                               |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| Was or is this venting or flaring caused by an emergency or malfunction                                                                                                                                                                                                                  | No                                            |
| Did or will this venting or flaring last eight hours or more cumulatively within any 24-hour period from a single event                                                                                                                                                                  | Yes                                           |
| Is this considered a submission for a notification of a major venting or flaring                                                                                                                                                                                                         | Yes, minor venting or flaring of natural gas. |
| The operator shall file a form C-141 instead of a form C-129 for a release that includes liquid during venting or flaring that is or may be a major or minor release under 19.13.297 NMAC                                                                                                |                                               |
| Was there or will there be at least 50 MCF of natural gas vented or flared during this event                                                                                                                                                                                             | Yes                                           |
| Did this venting or flaring result in the release of ANY liquids (not fully and/or completely flared) that reached (or has a chance of reaching) the ground, a surface, a watercourse, or otherwise, with reasonable probability, endanger public health, the environment or fresh water | No                                            |

**Unregistered Facility Site**

Please provide the facility details, if the venting or flaring occurred or is occurring at a facility that does not have an Facility ID (##) yet.

|                       |                     |
|-----------------------|---------------------|
| Facility or Site Name | Jackson B 6 Battery |
| Facility Type         | Tank Battery - (TB) |

**Equipment Involved**

|                                                           |               |

| Additional details for Equipment Involved. Please specify | Not answered. |

**Representative Compositional Analysis of Vented or Flared Natural Gas**

Please provide the mole percent for the percentage questions in this group.

|                                                                                                                               |               |
|-------------------------------------------------------------------------------------------------------------------------------|---------------|
| Methane (CH4) percentage                                                                                                      | 68            |
| Nitrogen (N2) percentage, if greater than one percent                                                                         | 2             |
| Hydrogen Sulfide (H2S) PPM, rounded up                                                                                        | 0             |
| Carbon Dioxide (CO2) percentage, if greater than one percent                                                                  | 2             |
| Oxygen (O2) percentage, if greater than one percent                                                                           | 0             |
| If you are venting and/or flaring because of Pipeline Specification, please provide the required specifications for each gas. |               |
| Methane (CH4) percentage quality requirement                                                                                  | Not answered. |
| Nitrogen (N2) percentage quality requirement                                                                                  | Not answered. |
| Hydrogen Sulfide (H2S) PPM quality requirement                                                                                | Not answered. |
| Carbon Dioxide (CO2) percentage quality requirement                                                                           | Not answered. |
| Oxygen (O2) percentage quality requirement                                                                                    | Not answered. |

**Date(s) and Time(s)**

|                                                                                     |               |
|-------------------------------------------------------------------------------------|---------------|
| Date venting or flaring was discovered or commenced                                 | 07/10/2021    |
| Time venting or flaring was discovered or commenced                                 | 12:00 AM      |
| Is the venting or flaring event complete                                            | No            |
| Date venting or flaring was terminated                                              | Not answered. |
| Time venting or flaring was terminated                                              | Not answered. |
| Total duration of venting or flaring in hours, if venting or flaring has terminated | Not answered. |
| Longest duration of cumulative hours within any 24-hour period during this event    | 24            |

**Measured or Estimated Volume of Vented or Flared Natural Gas**

|                                                                        |                                                                                                                     |
|------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| Natural Gas Vented (Mcf) Details                                       | Not answered.                                                                                                       |
| Natural Gas Flared (Mcf) Details                                       | Cause: Separation Flowback   Separator   Natural Gas Flared   Spilled: 180 Mcf   Recovered: 0 Mcf   Lost: 180 Mcf ] |
| Other Released Details                                                 | Not answered.                                                                                                       |
| Additional details for Measured or Estimated Volume(s). Please specify | Not answered.                                                                                                       |
| Is this a gas only submission (i.e. only Mcf values reported)          | Yes, according to supplied volumes this appears to be a "gas only" report.                                          |

**Venting or Flaring Resulting from Downstream Activity**

|                                                                        |               |
|------------------------------------------------------------------------|---------------|
| Was or is this venting or flaring a result of downstream activity      | Not answered. |
| Date notified of downstream activity requiring this venting or flaring | Not answered. |
| Time notified of downstream activity requiring this venting or flaring | Not answered. |

**Steps and Actions to Prevent Waste**

|                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|--------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For this event, the operator could not have reasonably anticipated the current event and it was beyond the operator's control. | False                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Please explain reason for why this event was beyond your operator's control                                                    | Not answered.                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Steps taken to limit the duration and magnitude of venting or flaring                                                          | Flared within allowed timeframe as per rule                                                                                                                                                                                                                                                                                                                                                                                              |
| Corrective actions taken to eliminate the cause and reoccurrence of venting or flaring                                         | Flaring reported on this report falls under 19.15.27.8.C.(2) NMAC which allows for the flaring of natural gas during separation flowback period of completion and recompletion operations when not doing so poses a risk to safe operations and personnel safety. Since the quantity flared was under 500MCF, this flaring event does not meet the definition of a major event as outlined in 19.15.27.8.G.(1)(a)(ii) or 19.15.29.7 NMAC |
