Was this vent or flare caused by an emergency or malfunction	Yes
Did this vent or flare last eight hours or more cumulatively within any 24-hour period from a single event	No
Is this considered a submission for a vent or flare event	Yes, minor venting and/or flaring of natural gas.

An operator shall file a form C-141 instead of a form C-129 for a release that, includes liquid during venting and/or flaring that is or may be a major or minor release under 19.15.29.7 NMAC.

Was there at least 50 MCF of natural gas vented and/or flared during this event	Yes
Did this vent or flare result in the release of ANY liquids (not fully and/or completely flared) that reached (or has a chance of reaching) the ground, a surface, a watercourse, or otherwise, with reasonable probability, endanger public health, the environment or fresh water	No
Was the vent or flare within an incorporated municipal boundary or withing 300 feet from an occupied permanent residence, school, hospital, institution or church in existence	No

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Salt Creek, our midstream provider, saw high line pressure off and on most of the day/night. Due to this Tap Rock flare numbers spiked larger than regulated volumes. Once Salt Creek can solve their issue, Tap Rock should see normal operations.
Steps taken to limit the duration and magnitude of vent or flare	Salt Creek, our midstream provider, saw high line pressure off and on most of the day/night. Due to this Tap Rock flare numbers spiked larger than regulated volumes. Once Salt Creek can solve their issue, Tap Rock should see normal operations. Wells have been cut back during this time.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	N/A as this is a midstream problem
