Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Gas was routed to flare when a downstream facility operated by Durango shut down; the shutdown caused discharge pressure to increase and gas was automatically routed to flare. The Durango facility is the sole outlet for the gas at the Vada Compressor Station. Gas was routed to flare to protect personnel and equipment.
Steps taken to limit the duration and magnitude of vent or flare	Gas was flared until the downstream shutdown was ended and normal operations resumed.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	There was no corrective action required by Targa; this event was the result of the actions of a third party and was outside Targa's control.
