Additional details for Measured or Estimated Volume(s). Please specify	Metered
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.

Venting or Flaring Resulting from Downstream Activity	
Was this vent or flare a result of downstream activity	Yes
Was notification of downstream activity received by this operator	No
Downstream OGRID that should have notified this operator	[221115] FRONTIER FIELD SERVICES, LLC
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	The gas plant where this gas goes is operated by Durango Midstream. They experience intermittent compressor problems causing compressor downtime. This causes our well's static pressure to go up, thus sending all gas to flare. Durango does not notify us of problems. We only know there is a problem when our well goes to flare.
Steps taken to limit the duration and magnitude of vent or flare	This is an emergency caused by downstream third-party problems. There isn't anything we can do to limit duration or magnitude short of shutting in the well.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	This is an emergency caused by downstream third-party problems. We as operator have no control over Durango's gas plant.
