UPSET FLARING EVENT SPECIFIC JUSTIFICATIONS FORM**Facility:** Falcon Ridge CPF**Flare Date:** 04/28/2024**Duration of Event:** 30 Minutes**MCF Flared:** 98**Start Time:** 09:20 PM**End Time:** 09:50 PM**Cause:** Emergency Flare > Third Party Vendor Activity > Solaris > Power Outage**Method of Flared Gas Measurement:** Gas Flare Meter**1. Reason why this event was beyond Operator's control:**

In this case, Solaris water disposal company had an unexpected power outage which caused our facility to shut in, which then triggered a flaring event to occur, when compression equipment shut down as a result. Due to the design of the facility, during an emergency shutdown, as in this case, all gas from the compression equipment is tied to the flare, which is why the emergency flare was triggered. Oxy field personnel were able to shut in several wells to minimize the flaring. Once Solaris was able to open back up, Oxy field personnel were able to slowly open the wells back up, restart the compression equipment and slowly cease the flaring. This event is out of OXY's control, yet OXY made every effort to control and minimize emissions as much as possible.

2. Steps Taken to limit duration and magnitude of venting or flaring:

It is OXY's policy to route its stranded gas to a flare during an unforeseen and unavoidable emergency or malfunction, that is beyond Oxy's control to avoid, prevent or foresee, to minimize emissions as much as possible as part of the overall steps taken to limit duration and magnitude of flaring. In this case, Solaris water disposal company had an unexpected power outage which caused our facility to shut in, which then triggered a flaring event to occur, when compression equipment shut down as a result. Due to the design of the facility, during an emergency shutdown, as in this case, all gas from the compression equipment is tied to the flare, which is why the emergency flare was triggered. Oxy field personnel were able to shut in several wells to minimize the flaring. Once Solaris was able to open back up, Oxy field personnel were able to slowly open the wells back up, restart the compression equipment and slowly cease the flaring. This event is out of OXY's control, yet OXY made every effort to control and minimize emissions as much as possible.

3. Corrective Actions taken to eliminate the cause and reoccurrence of venting or flaring:

Oxy is unable to take any corrective actions to eliminate the cause and potential reoccurrence of a third-party owned and operated vendor issue, as this is out of Oxy's control to foresee, avoid, prevent from happening or reoccur. OXY makes every effort to control and minimize emissions as much as possible. The only actions that Oxy can take and handle that is within its control, is to continually communicate with Solaris personnel, during these types of circumstances.

DEFINITIONS

Action 343954

DEFINITIONS

Operator: OXY USA INC P.O. Box 4294 Houston, TX 772104294	OGRID: 16696
	Action Number: 343954
	Action Type: [C-129] Venting and/or Flaring (C-129)

DEFINITIONS

For the sake of brevity and completeness, please allow for the following in all groups of questions and for the rest of this application:

- this application's operator, hereinafter "this operator";
- venting and/or flaring, hereinafter "vent or flare";
- any notification or report(s) of the C-129 form family, hereinafter "any C-129 forms";
- the statements in (and/or attached to) this, hereinafter "the statements in this";
- and the past tense will be used in lieu of mixed past/present tense questions and statements.

QUESTIONS

Prerequisites	
<i>Any messages presented in this section, will prevent submission of this application. Please resolve these issues before continuing with the rest of the questions.</i>	
Incident Well	Unavailable.
Incident Facility	[fAPP2331575145] Falcon Ridge Tankless CPF

Determination of Reporting Requirements*Answer all questions that apply. The Reason(s) statements are calculated based on your answers and may provide additional guidance.*

Was this vent or flare caused by an emergency or malfunction	Yes
Did this vent or flare last eight hours or more cumulatively within any 24-hour period from a single event	No
Is this considered a submission for a vent or flare event	Yes, minor venting and/or flaring of natural gas.

An operator shall file a form C-141 instead of a form C-129 for a release that, includes liquid during venting and/or flaring that is or may be a major or minor release under 19.15.29.7 NMAC.

Was there at least 50 MCF of natural gas vented and/or flared during this event	Yes
Did this vent or flare result in the release of ANY liquids (not fully and/or completely flared) that reached (or has a chance of reaching) the ground, a surface, a watercourse, or otherwise, with reasonable probability, endanger public health, the environment or fresh water	No
Was the vent or flare within an incorporated municipal boundary or within 300 feet from an occupied permanent residence, school, hospital, institution or church in existence	No

Equipment Involved

Primary Equipment Involved	Other (Specify)
Additional details for Equipment Involved. Please specify	Emergency Flare > Third Party Vendor Activity > Solaris > Power Outage

Representative Compositional Analysis of Vented or Flared Natural Gas*Please provide the mole percent for the percentage questions in this group.*

Methane (CH4) percentage	75
Nitrogen (N2) percentage, if greater than one percent	1
Hydrogen Sulfide (H2S) PPM, rounded up	5
Carbon Dioxide (CO2) percentage, if greater than one percent	1
Oxygen (O2) percentage, if greater than one percent	0

If you are venting and/or flaring because of Pipeline Specification, please provide the required specifications for each gas.

Methane (CH4) percentage quality requirement	<i>Not answered.</i>
Nitrogen (N2) percentage quality requirement	<i>Not answered.</i>
Hydrogen Sulfide (H2S) PPM quality requirement	<i>Not answered.</i>
Carbon Dioxide (CO2) percentage quality requirement	<i>Not answered.</i>
Oxygen (O2) percentage quality requirement	<i>Not answered.</i>

QUESTIONS (continued)

Operator: OXY USA INC P.O. Box 4294 Houston, TX 772104294	OGRID: 16696
	Action Number: 343954
	Action Type: [C-129] Venting and/or Flaring (C-129)

QUESTIONS

Date(s) and Time(s)	
Date vent or flare was discovered or commenced	04/28/2024
Time vent or flare was discovered or commenced	09:20 PM
Time vent or flare was terminated	09:50 PM
Cumulative hours during this event	1

Measured or Estimated Volume of Vented or Flared Natural Gas	
Natural Gas Vented (Mcf) Details	<i>Not answered.</i>
Natural Gas Flared (Mcf) Details	Cause: Other Other (Specify) Natural Gas Flared Released: 98 Mcf Recovered: 0 Mcf Lost: 98 Mcf.
Other Released Details	<i>Not answered.</i>
Additional details for Measured or Estimated Volume(s). Please specify	Gas Flare Meter
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.

Venting or Flaring Resulting from Downstream Activity	
Was this vent or flare a result of downstream activity	Yes
Was notification of downstream activity received by this operator	No
Downstream OGRID that should have notified this operator	[371643] SOLARIS WATER MIDSTREAM, LLC
Date notified of downstream activity requiring this vent or flare	<i>Not answered.</i>
Time notified of downstream activity requiring this vent or flare	<i>Not answered.</i>

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	In this case, Solaris water disposal company had an unexpected power outage which caused our facility to shut in, which then triggered a flaring event to occur, when compression equipment shut down as a result. Due to the design of the facility, during an emergency shutdown, as in this case, all gas from the compression equipment is tied to the flare, which is why the emergency flare was triggered. Oxy field personnel were able to shut in several wells to minimize the flaring. Once Solaris was able to open back up, Oxy field personnel were able to slowly open the wells back up, restart the compression equipment and slowly cease the flaring. This event is out of OXY's control, yet OXY made every effort to control and minimize emissions as much as possible.
Steps taken to limit the duration and magnitude of vent or flare	It is OXY's policy to route its stranded gas to a flare during an unforeseen and unavoidable emergency or malfunction, that is beyond Oxy's control to avoid, prevent or foresee, to minimize emissions as much as possible as part of the overall steps taken to limit duration and magnitude of flaring. In this case, Solaris water disposal company had an unexpected power outage which caused our facility to shut in, which then triggered a flaring event to occur, when compression equipment shut down as a result. Due to the design of the facility, during an emergency shutdown, as in this case, all gas from the compression equipment is tied to the flare, which is why the emergency flare was triggered. Oxy field personnel were able to shut in several wells to minimize the flaring. Once Solaris was able to open back up, Oxy field personnel were able to slowly open the wells back up, restart the compression equipment and slowly cease the flaring. This event is out of OXY's control, yet OXY made

	every effort to control and minimize emissions as much as possible.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Oxy is unable to take any corrective actions to eliminate the cause and potential reoccurrence of a third-party owned and operated vendor issue, as this is out of Oxy's control to foresee, avoid, prevent from happening or reoccur. OXY makes every effort to control and minimize emissions as much as possible.
