**RE: Liner Inspection and Closure Report**  
**Tex Mack 11 Federal #3 Battery**  
**API No. 30-015-36835**  
**GPS: Latitude 32.85518 Longitude -103.84818**  
**UL- D, Section 11, Township 17S, Range 31E**  
**NMOCD Reference No. nAPP2333127555 and nAPP2301130080**

Spur Energy Partners (Spur) has contracted Edge Safety (Edge) to perform a liner inspection and prepare this closure report for the release of oil and produced water that happened at the Tex Mack 11 Federal #3 Battery (Tex Mack). On January 9, 2023 and November 25, 2023, the initial C-141s were formally submitted. The corresponding releases received the designation Incident IDs nAPP2333127555 and nAPP2301130080 from the New Mexico Oil Conservation Division (NMOCD).

#### Site Information and Site Characterization

The Tex Mack is located approximately 6 miles west of Maljamar, NM. This spill site is in Unit D, Section 11, Township 17S, Range 31E, Latitude 32.85518 Longitude -103.84818, Eddy County, NM. A Location Map can be found in Figure 1.

Based on the well water data from the New Mexico Office of the State Engineer, the depth to the nearest groundwater in this vicinity measures 55 feet below grade surface (BGS), positioned roughly 0.73 miles away from the Tex Mack, drilled on May 11, 2023. For detailed references to water surveys and the precise locations of water wells, please refer to Appendix A, inclusive of the relevant maps. Notably, Tex Mack is situated within an area with a low potential for karst, as illustrated in Figure 3. Additionally, a comprehensive Topographic Map is available for reference in Figure 2.

#### Release Information

**nAPP2301130080:** On January 9, 2023, an overload on a transfer pump caused tank overflow, leading to the release of approximately 62 barrels of produced water into the lined containment. Efforts to recover from the spill resulted in the retrieval of approximately 62 barrels. The total release area measured approximately 2600 square feet.

**nAPP2333127555:** On November 25, 2023, pump failure caused a tank to overflow, leading to the release of 65 barrels of oil & produced water into the lined containment. Efforts to recover from the spill resulted in the retrieval of approximately 60 barrels. The remaining liquids were retrieved during contaminated material removal. The total release area measured approximately 2100 square feet.

A Site Map can be found in Figure 4.

#### Site Assessment and Liner Inspection

From January 2 to January 19, 2024, Edge personnel mobilized their team to the Tex Mack site to conduct remediation efforts within the lined containment area. Utilizing handheld tools to preserve the integrity of the liner, all affected gravel inside the containment was meticulously removed. A thorough cleaning spanning 4200 square feet was completed, with approximately 45 cubic yards of impacted material successfully extracted. Ensuring proper disposal, all contaminated material was transported and disposed of at R360, an approved disposal facility sanctioned by NMOCD.

After removing all contaminated gravel from the affected area, a power washing unit was used to clean any remaining oil or residue from the exposed plastic liner. A vacuum truck was deployed to extract standing fluid, and this process was repeated until all oil and produced water residue was thoroughly eliminated. Following this, a detailed inspection for tears and rips was conducted. Upon confirming the absence of any tears or rips, an inspection was conducted to validate the integrity of the liner.

On April 11, 2024, Spur personnel submitted a notification for a liner inspection, due to new policies in place unbeknown to Edge. The details of the 48-hour notification can be referenced in Appendix C.

On January 19, 2024, Edge Safety conducted a liner inspection at this location. We concluded that this liner and containment maintained its integrity and was able to retain the fluids. The liner inspection form and photographic documentation can be found in Appendix C.

#### Closure Request

After careful review, Edge requests that these incidents nAPP2301130080 and nAPP2333127555 be closed. Spur has complied with the applicable closure requirements.

Should you have any questions or need additional information, please feel free to contact Jennifer Mendoza at 575-748-4929 or [jennifer.m@edgesafetyllc.com](mailto:jennifer.m@edgesafetyllc.com).

| <b>Nature and Volume of Release (continued)</b>                                                                                                                |                                                                                                                                                |
| Is this a gas only submission (i.e. only significant Mcf values reported)                                                                                      | <b>No, according to supplied volumes this does not appear to be a "gas only" report.</b>                                                       |
| Was this a major release as defined by Subsection A of 19.15.29.7 NMAC                                                                                         | <b>Yes</b>                                                                                                                                     |
| Reasons why this would be considered a submission for a notification of a major release                                                                        | <b>From paragraph A. "Major release" determine using:<br/>(1) an unauthorized release of a volume, excluding gases, of 25 barrels or more.</b> |
| <i>With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.</i> |                                                                                                                                                |

**Initial Response**

*The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.*

|                                                                                                                    |      |
|--------------------------------------------------------------------------------------------------------------------|------|
| The source of the release has been stopped                                                                         | True |
| The impacted area has been secured to protect human health and the environment                                     | True |
| Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices | True |
| All free liquids and recoverable materials have been removed and managed appropriately                             | True |
| If all the actions described above have not been undertaken, explain why                                           | N/A  |

*Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

| A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes  | Between 1 and 5 (mi.)          |
| Any other fresh water well or spring                                                                                       | Between 1 and 5 (mi.)          |
| Incorporated municipal boundaries or a defined municipal fresh water well field                                            | Between 1 and 5 (mi.)          |
| A wetland                                                                                                                  | Between ½ and 1 (mi.)          |
| A subsurface mine                                                                                                          | Greater than 5 (mi.)           |
| An (non-karst) unstable area                                                                                               | Between ½ and 1 (mi.)          |
| Categorize the risk of this well / site being in a karst geology                                                           | Low                            |
| A 100-year floodplain                                                                                                      | Between ½ and 1 (mi.)          |
| Did the release impact areas not on an exploration, development, production, or storage site                               | No                             |

**Remediation Plan**

Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

|                                                                                                                                                                                                                                                                                                                                                                                |            |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Requesting a remediation plan approval with this submission                                                                                                                                                                                                                                                                                                                    | Yes        |
| Attach a comprehensive report demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined, pursuant to 19.15.29.11 NMAC and 19.15.29.13 NMAC.                                                                                                                                                                        |            |
| Have the lateral and vertical extents of contamination been fully delineated                                                                                                                                                                                                                                                                                                   | Yes        |
| Was this release entirely contained within a lined containment area                                                                                                                                                                                                                                                                                                            | Yes        |
| Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.                                                                        |            |
| On what estimated date will the remediation commence                                                                                                                                                                                                                                                                                                                           | 01/02/2024 |
| On what date will (or did) the final sampling or liner inspection occur                                                                                                                                                                                                                                                                                                        | 01/19/2024 |
| On what date will (or was) the remediation complete(d)                                                                                                                                                                                                                                                                                                                         | 01/19/2024 |
| What is the estimated surface area (in square feet) that will be remediated                                                                                                                                                                                                                                                                                                    | 4200       |
| What is the estimated volume (in cubic yards) that will be remediated                                                                                                                                                                                                                                                                                                          | 45         |
| These estimated dates and measurements are recognized to be the best guess or calculation at the time of submission and may (be) change(d) over time as more remediation efforts are completed.                                                                                                                                                                                |            |
| The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required. |            |

**QUESTIONS****Remediation Plan (continued)**

Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

**This remediation will (or is expected to) utilize the following processes to remediate / reduce contaminants:**

(Select all answers below that apply.)

|                                                                                |     |
|--------------------------------------------------------------------------------|-----|
| Is (or was) there affected material present needing to be removed              | Yes |
| Is (or was) there a power wash of the lined containment area (to be) performed | Yes |
| OTHER (Non-listed remedial process)                                            | No  |

Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

| Was all the impacted materials removed from the liner                                                   | Yes        |
| What was the liner inspection surface area in square feet                                               | 4200       |

**Remediation Closure Request**

*Only answer the questions in this group if seeking remediation closure for this release because all remediation steps have been completed.*

|                                                                                 |                                                                           |
|---------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| Requesting a remediation closure approval with this submission                  | Yes                                                                       |
| Have the lateral and vertical extents of contamination been fully delineated    | Yes                                                                       |
| Was this release entirely contained within a lined containment area             | Yes                                                                       |
| What was the total surface area (in square feet) remediated                     | 4200                                                                      |
| What was the total volume (cubic yards) remediated                              | 45                                                                        |
| Summarize any additional remediation activities not included by answers (above) | LINER WAS CLEANED AND INSPECTED AND FOUND TO BE IN GOOD WORKING CONDITION |

*The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (in .pdf format) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.

|                                                    |                                                                                                                |
