2024 Annual Groundwater Monitoring Report
Darr Angell No. 2
Plains All American Pipeline, L.P.
Lea County, New Mexico
New Mexico Oil Conservation Division Abatement Permit No. AP-007
Incident Number nAPP2108852096

Dear Mr. Buchanan:

On behalf of Plains All American Pipeline, L.P. (Plains), GHD Services Inc. (GHD) is submitting the *2024 Annual Groundwater Monitoring Report* (Report) for the above-referenced property (Site) to the New Mexico Oil Conservation Division (NMOCD). The Report summarizes activities performed at the Site during 2024 in accordance with the NMOCD's recommendations in response to the *2023 Annual Groundwater Monitoring Report*.

Should you have any questions or comments regarding this submittal, please don't hesitate to contact the undersigned.

Regards,

Adrianna Copeland
Project Manager

1. Introduction and Site History

This report presents the results of the groundwater monitoring activities conducted during 2024 at the Plains All American Pipeline, L.P. (Plains) Darr Angell No. 2 release Site (Site) by GHD Services Inc. (GHD). The Site is located approximately 11.9 miles northeast of Lovington and in the SW ¼, SE ¼ Section 11, Township 15 South, Range 37 East; and NW ¼, NE ¼, Section 14, Township 15 South, Range 37 East in Lea County, New Mexico. The coordinates of this Site are 33.0242° N and 103.1668° W. The location of the Site is shown on Figure 1. A detailed map of the Site is provided on Figure 2. The property affected by the release is currently managed by Plains. The Site is regulated by the New Mexico Oil Conservation Division (NMOCD) under Abatement Permit (AP)-007 and is associated with incident number nAPP2108852096.

A crude oil release occurred on July 29, 1999, from an 8-inch Enron Oil Trading and Transportation (EOTT) pipeline. The cause of the release was due to external pipeline corrosion. July 29, 1999, an Initial Release Notification and Corrective Action, Form C-141 was submitted to the NMOCD and the release was assigned AP No. AP-007. A copy of the Release Notification and Corrective Action, Form C-141 is attached as Appendix A.

Initial remediation activities began in August 1999 and consisted of 40 soil borings installed within and around the area of surface staining. In April and May 2000, a contractor for EOTT excavated the impacted area. Excavation activity resumed in April and May 2001 with additional removal of impacted soil. Between April 2000 and December 2002, ten monitor wells (MW-1 through MW-10) and seven recovery wells (RW-1 through RW-7) were drilled and installed to delineate the extent of groundwater contamination and light non-aqueous phase liquid (LNAPL) and to monitor the concentrations of constituents of concern (COCs). On March 11, 2002, partial backfilling of the open excavation was conducted subsequent to NMOCD approval of a backfill request. On May 2, 2011, Conestoga-Rovers & Associates, Inc. (CRA, now known as GHD) assumed Site groundwater project management and remediation responsibilities. Results of groundwater monitoring events and LNAPL recovery prior to May 2, 2011, were provided by Plains.

In October 2014, GHD provided oversight of the installation of one monitor well (MW-4R) and four recovery wells (RW-7R, RW-8, RW-9, and RW-10) to further delineate the extent of the LNAPL plume and COCs in groundwater. In February 2017, GHD provided oversight of the installation of one monitor well (MW-12) and two recovery wells (RW-11 and RW-12) to further delineate the extent of the LNAPL plume and COCs in groundwater. In February 2020, GHD provided oversight of the plugging and abandonment (P&A) of nine monitor wells (MW-1, MW-2, MW-3, MW-6, MW-7, MW-8, MW-9, MW-10, and MW-11) and one recovery well (RW-4) and the installation of seven new monitor wells (MW-3R, MW-6R, MW-7R, MW-8R, MW-9R, MW-10R, and MW-13) and three recovery wells (RW-4R, RW-13, and RW-14) to further delineate the extent of the LNAPL plume and COCs in groundwater. All Site monitoring and recovery wells were installed by a licensed New Mexico well driller with NMOCD approval.

Currently, the Site has a network of twenty-three monitoring and recovery wells, which were monitored quarterly in 2024 to evaluate the concentrations of COCs in impacted groundwater and to delineate the extent of the LNAPL plume. The COCs are benzene, toluene, ethylbenzene, and total xylenes (BTEX) and polycyclic aromatic hydrocarbons (PAHs). A detailed map of the Site with monitoring and recovery well locations depicted is provided on Figure 2.

In previous years, groundwater samples were analyzed for PAHs by the United States Environmental Protection Agency (USEPA) Method SW846-8270C-SIM on an annual basis for monitoring or recovery wells that did not previously meet the criteria of two consecutive years of PAH concentrations below the New Mexico Water Quality Control Commission (NMWQCC) standards and below 0.001 milligrams per liter (mg/L) for PAH compounds with no NMWQCC standard, as required by the NMOCD. Due to prior analytical results meeting criteria of 2 consecutive years with concentrations less than NMWQCC Human Health Standard for PAH compounds, groundwater samples were not collected for analysis of PAH compounds in 2024. Historical PAH data is summarized in Table 3.

2. Groundwater Monitoring

Quarterly groundwater monitoring events were performed on February 8 through 9, May 8, August 7, and November 5, 2024. A supplemental sampling event was performed on June 17, 2024, to confirm the analytical results of one well (MW-12). The monitoring program included quarterly groundwater gauging and sampling of monitoring and recovery wells.

2.1 Monitoring Well Gauging

On February 8 through 9, May 8, June 17, August 7, and November 5, 2024, GHD personnel measured the depth to groundwater in monitoring and recovery wells using an electronic oil/water interface probe (IP). The IP was cleaned with laboratory grade soap and purified water prior to gauging each monitoring or recovery well.

Based on the data collected in 2024, groundwater flow is generally southeast and is consistent with historical data for the Site. The groundwater gradient was calculated at 0.0017 foot per linear foot (ft/ft) in February, 0.031 ft/ft in May, 0.033 ft/ft in August, and 0.035 ft/ft in November 2024. The potentiometric surface indicates groundwater elevations declined an average of 0.91 feet (ft) between November 2023 and November 2024. Fluctuations in the elevation of the potentiometric surface are attributed to seasonal weather conditions. Groundwater potentiometric surface maps are presented as Figures 3 through 6.

Thirteen (RW-1, RW-2, RW-3, RW-4R, RW-5, RW-7R, RW-8, RW-9, RW-10, RW-11, RW-12, RW-13, and RW-14) of the twenty-three monitor and recovery wells at the Site contained LNAPL throughout 2024 with measurable thicknesses ranging from 0.01 ft in multiple wells on various dates to 7.23 ft. in recovery well RW-14 during November 2024. LNAPL thickness increased an average of 1.0 ft. between November 2023 and November 2024. Depth to groundwater, LNAPL thickness, and calculated groundwater elevations are summarized in Tables 1a and 1b and represented on Figures 3 through 6.

2.2 Groundwater Sampling

Following gauging during each quarterly monitoring event in February, May, August, and November 2024, as well as the monitor well MW-12 resampling event on June 17, 2024, GHD utilized a monsoon pump to purge a minimum of three well volumes of groundwater or until the well was dry. The well was given time to recover before collecting a groundwater sample. Purged water recovered during the monitoring events was disposed into the Site's above-ground storage tank (AST) pending disposal. Purge water was periodically transported off-Site to a NMOCD-approved disposal facility. Disposal records are available upon request.

Groundwater samples were collected using disposable polyethylene bailers, placed in laboratory-provided sample containers, packed in a cooler with ice, and transported under Chain-of-Custody documentation to Pace Analytical Laboratory in Mt. Juliet, Tennessee in February and ALS Environmental in Houston, Texas in May, August, and November. Samples collected for each quarterly monitoring event were submitted for analysis of BTEX by the USEPA Method SW846-8021B for the February event and by the USEPA Method SW846-8260 for the May, August, and November events.

2.3 Quality Assurance/Quality Control

During each groundwater monitoring event, a field duplicate was collected as a Quality Assurance/Quality Control (QA/QC) sample and subsequently submitted for laboratory analysis. A trip blank was also included with each cooler submitted to the laboratory as a QA/QC sample for each groundwater monitoring event.

2.4 Analytical Results

The NMWQCC mandates that groundwater quality in New Mexico be protected, and has issued groundwater quality standards in Title 20, Chapter 6, Part 2, Section 3103 of the New Mexico Administrative Code (NMAC) 20.6.2.3103 . Groundwater quality standards have been set for the protection of human health, domestic water supply, and irrigation use.

Groundwater analytical results are summarized in Tables 2a and 2b. The corresponding laboratory analytical reports from 2024 are included in Appendix B. COC concentration maps are presented as Figures 7 through 10. Analytical results are summarized as follows:

- Benzene concentrations in samples taken from monitor well MW-12 exceeded the NMWQCC Groundwater Remediation and Delineation Limit in the second, third, fourth, and supplemental groundwater monitoring events. Prior to May 2024, samples from monitor well MW-12 had not exceeded NMWQCC standards since August 2021.
- Toluene, ethylbenzene, and xylenes concentrations were below the NMWQCC Groundwater Remediation and Delineation Limit in all groundwater samples collected from monitoring and recovery wells at the Site during all four quarters in 2024.

3. Remediation Activities

A trailer-mounted mobile dual-phase extraction (MDPE) unit was installed and began operation at the Site in October 2012. LNAPL and impacted groundwater recovery is conducted daily via trailer-mounted, automated system, which operates four total-fluid recovery pumps with vacuum for enhanced fluid recovery (EFR). The pumps were installed and operated in recovery wells RW-4R, RW-10, RW-13, and RW-14 throughout 2024. GHD field personnel performed routine operation and maintenance (O&M) activities each week to maintain efficient system operation and fluid recovery. O&M activities included inspections of well-heads and flow lines, servicing the air supply, vacuum and total fluid pumps, adjustment of pump depths, gauging of recovered fluid levels in the storage tank, and general housekeeping tasks. In 2024, the remediation system operated for 165 days with approximately 1,198 gallons of LNAPL and approximately 60,034 gallons of impacted groundwater being recovered in the on-Site AST. All recovered fluids were later transported off-Site to a NMOCD-approved disposal facility. Disposal records are available upon request.

4. Summary and Recommendations

4.1 Summary

The following summarizes the information and data presented in this report:

- LNAPL was gauged in thirteen of the twenty-three monitoring wells at the Site with measurable thicknesses ranging from 0.01 ft in multiple wells on various dates to 7.23 ft in recovery well RW-14 during November 2024. Overall, the LNAPL thickness increased by a net average of 1.0 ft between November 2023 and November 2024.
- The potentiometric surface indicates groundwater elevations have declined an average of 0.91 ft between November 2023 and November 2024.
- Benzene concentrations from monitor well MW-12 samples exceeded NMWQCC criteria in May, June, August, and November 2024 monitoring events. No other samples exhibited benzene exceedances in 2024.

- Toluene, ethylbenzene, and xylene concentrations were below NMWQCC criteria for all monitoring and recovery wells sampled in 2024.
- The on-Site remediation system operated for 165 days. Remediation pumps operated in four recovery wells and recovered approximately 1,198 gallons of LNAPL and 60,034 gallons of impacted groundwater.

4.2 Recommendations

Based on the results of the 2024 groundwater monitoring events, GHD recommends the following in 2025:

- Following the NMOCD approval on July 24, 2024, of the semi-annual sampling schedule proposed in the *2023 Annual Groundwater Monitoring Report*, initiate semi-annual groundwater monitoring events in 2025. Perform semi-annual groundwater monitoring events for sampling of groundwater and analysis of BTEX by USEPA Method SW846-8260 for all Site monitoring wells.
- Continue operation and maintenance of the trailer mounted, automated remediation system.

5. Scope and Limitations

This report: has been prepared by GHD for Plains All American Pipeline, L.P. and may only be used and relied on by Plains All American Pipeline, L.P. for the purpose agreed between GHD and Plains All American Pipeline, L.P.

GHD otherwise disclaims responsibility to any person other than Plains All American Pipeline, L.P. arising in connection with this report. GHD also excludes implied warranties and conditions, to the extent legally permissible.

The services undertaken by GHD in connection with preparing this report were limited to those specifically detailed in the report and are subject to the scope limitations set out in the report.

The opinions, conclusions and any recommendations in this report are based on conditions encountered and information reviewed at the date of preparation of the report. GHD has no responsibility or obligation to update this report to account for events or changes occurring subsequent to the date that the report was prepared.

The opinions, conclusions and any recommendations in this report are based on assumptions made by GHD described in this report. GHD disclaims liability arising from any of the assumptions being incorrect.

Notes:

1. All dates are in the format: MM/DD/YY.
2. --: No gauging data collected on corresponding date.
3. Dry: No fluid column measured in corresponding monitoring or recovery well.
4. LNAPL: Light Non-Aqueous Phase Liquids.
5. Elevations of the potentiometric surface were calculated using a LNAPL specific gravity of 0.81 gram/cubic centimeter (g/cc).

Notes:

1. All dates are in the format: MM/DD/YY.
2. --: No gauging data collected on corresponding date.
3. Dry: No fluid column measured in corresponding monitoring or recovery well.
4. LNAPL: Light Non-Aqueous Phase Liquids.
5. Elevations of the potentiometric surface were calculated using a LNAPL specific gravity of 0.81 gram/cubic centimeter (g/cc).

Summary of Groundwater Analytical Results (2021-2024)**Plains All American Pipeline, L.P.****Darr Angell No. 2****SRS LF 1999-62**

Monitoring Well ID	Sample Date	Sample Type	Benzene	Toluene	Ethylbenzene	Xylenes (total)
New Mexico Water Quality Control Commission (NMWCC) Human Health Standards			0.01	0.75	0.75	0.62
RW-12	11/8/22	DUP	0.0284	0.000933 J	0.0244	0.0195
RW-12	11/8/22		0.0267	0.000845 J	0.0234	0.0174

Notes:

1. Analytical results are presented in milligrams per liter (mg/L).
2. All dates are in the format: MM/DD/YY.
3. Shaded results indicates results exceeding their respective New Mexico Water Quality Control Commission (NMWCC) Human Health Standards limits.
4. Bolded results indicate analyte was detected above the laboratory detection limit.
5. <: Analyte was not detected at or above the laboratory reporting limit.
6. J: Concentration is less than the quantitation limit and is an estimated value.
7. B: The sample matrix interfered with the ability to make any accurate determination or the analyte was detected in the associated blank.
8. -: Not Analyzed.
9. DUP: Duplicate Sample.
10. LNAPL: Light Non-Aqueous Phase Liquids.

Notes:

1. Analytical results are presented in milligrams per liter (mg/L).
2. All dates are in the format: MM/DD/YY.
3. Shaded results indicates results exceeding their respective New Mexico Water Quality Control Commission (NMWCC) Human Health Standards limits.
4. Bolded results indicate analyte was detected above the laboratory detection limit.
5. <: Analyte was not detected at or above the laboratory reporting limit.
6. J: Concentration is less than the quantitation limit and is an estimated value.
7. B: The sample matrix interfered with the ability to make any accurate determination or the analyte was detected in the associated blank.
8. -: Not Analyzed.
9. DUP: Duplicate Sample.
10. LNAPL: Light Non-Aqueous Phase Liquids.

Release Notification and Corrective Action

OPERATOR

 Initial Report Final Report

Facility Name 80TT Energy PipeLine	Owner Lennah FROST
Address PO Box 1660	Telephone No. 915/6843467
Facility Type Pipeline	

Surface Owner State of New Mexico	Mineral Owner	Lease No.
---	---------------	-----------

LOCATION OF RELEASE

Line Number	Section	Township	RANGE	Feet from the	North/South Line	Feet from the	East/West Line	County
L	32	19S	37E					Lea

NATURE OF RELEASE

Type of Release Crude oil	Volume of Release 260 bbls	Volume Recovered 200 bbls
Source of Release Crude oil pipeline	Date and Time of Occurrence 7/18/99 1pm	Date and Hour of Discovery 7/18/99 1pm
Are Environmental Notices Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Chris Williams	
By Whom? Lennah Frost	Date and Time 7/18/99 - 2:30p	
Who & When were Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse	

* Watercourse was impacted. Describe fully. (Attach Additional Sheets If Necessary)

Specific Cause of Pollution and Remedial Action Taken. (Attach Additional Sheets If Necessary)
Internal Corrosion - Leak clamped off will replace pipe ASAP

Specific Area Affected and Cleanup Action Taken. (Attach Additional Sheets If Necessary)
Spill occurred in a previously remediated site. Will evaluate for cleanup this week

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NM OQCD rules and regulations all operators are required to report and/or file certain releases notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NM OQCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate situations that pose a threat to ground water, surface waters, human health or the environment. In addition, NM OQCD acceptance of a C-141 report, does not reduce the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

Abbreviations and Definitions

MDL	Method Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
RDL	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state "ND" (Not Detected) or "BDL" (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Uncertainty (Radiochemistry)	Confidence level of 2 sigma.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier Description

B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.

Houston, TX 77079

Work Order: **HS24050543**

Laboratory Results for: **12604523 - Darr Angell No.2**

Dear Chris Knight,

ALS Environmental received 11 sample(s) on May 09, 2024 for the analysis presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested. Results are expressed as "as received" unless otherwise noted.

QC sample results for this data met EPA or laboratory specifications except as noted in the Case Narrative or as noted with qualifiers in the QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained by ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

If you have any questions regarding this report, please feel free to call me.

Sincerely,

Generated By: JUMOKE.LAWAL

Laboratory Results for: **Darr Angell No.2**

Dear Chris Knight,

ALS Environmental received 2 sample(s) on Jun 18, 2024 for the analysis presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested. Results are expressed as "as received" unless otherwise noted.

QC sample results for this data met EPA or laboratory specifications except as noted in the Case Narrative or as noted with qualifiers in the QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained by ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

If you have any questions regarding this report, please feel free to call me.

Sincerely,

Generated By: DAYNA.FISHER

CASE NARRATIVE

Work Order Comments

- Login Comments: Trip Blank not Listed on COC, Placed On Hold.

GCMS Volatiles by Method SW8260

Batch ID: R470603

Sample ID: HS24061055-12MSD

- MSD is for an unrelated sample

Batch ID: R469956,R469956

- The test results meet requirements of the current NELAP standards, state requirements or programs where applicable.
-

**QUALIFIERS,
ACRONYMS, UNITS**

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
M	Manually integrated, see raw data for justification
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL/SDL

Acronym	Description
DCS	Detectability Check Study
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitaion Limit
SD	Serial Dilution
SDL	Sample Detection Limit
TRRP	Texas Risk Reduction Program

Unit Reported	Description
mg/L	Milligrams per Liter

Work Order: **HS24080684**

Laboratory Results for: **Darr Angell No.2**

Dear Chris Knight,

ALS Environmental received 11 sample(s) on Aug 09, 2024 for the analysis presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested. Results are expressed as "as received" unless otherwise noted.

QC sample results for this data met EPA or laboratory specifications except as noted in the Case Narrative or as noted with qualifiers in the QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained by ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

If you have any questions regarding this report, please feel free to call me.

Sincerely,

Generated By: JUMOKE.LAWAL

Re: **HS24080684**

Work Order: **24080622**

Dear Luis,

ALS Environmental received 11 samples on 16-Aug-2024 09:00 AM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 24.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA
PHONE: +1 (616) 399-6070 FAX: +1 (616) 399-6185

Sincerely,

A handwritten signature in blue ink that reads "Chelsey Cook".

Electronically approved by: Chelsey Cook

QUALIFIERS, ACRONYMS, UNITS

<u>Qualifier</u>	<u>Description</u>
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
Hr	BOD/CBOD - Sample was reset outside Hold Time, value should be considered estimated.
J	Analyte is present at an estimated concentration between the MDL and Report Limit
n	Analyte accreditation is not offered
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

<u>Acronym</u>	<u>Description</u>
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)
LOQ	Limit of Quantitation (see PQL)
MBLK	Method Blank
MDL	Method Detection Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
TDL	Target Detection Limit
TNTC	Too Numerous To Count
A	APHA Standard Methods
D	ASTM
E	EPA
SW	SW-846 Update III

<u>Units Reported</u>	<u>Description</u>
mg/L	Milligrams per Liter

Work Order: 24080622

Case Narrative

Samples for the above noted Work Order were received on 08/16/2024. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.

Volatile Organics:

Batch R409954c, Method SW8260D, Samples (24080622-09A, -10A, -11A): The Continuing Calibration Verification did not meet acceptance criteria with low bias. Instrument sensitivity was verified as sufficient through the analysis of a low-level standard. The following non-detects are reported without qualification: Vinyl acetate.

No other deviations or anomalies were noted.

Work Order: **HS24110262**

Laboratory Results for: **Darr Angell No.2 SRS #LF 1999-62**

Dear Chris Knight,

ALS Environmental received 11 sample(s) on Nov 06, 2024 for the analysis presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental and for only the analyses requested. Results are expressed as "as received" unless otherwise noted.

QC sample results for this data met EPA or laboratory specifications except as noted in the Case Narrative or as noted with qualifiers in the QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained by ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

If you have any questions regarding this report, please feel free to call me.

Sincerely,

**QUALIFIERS,
ACRONYMS, UNITS**

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
M	Manually integrated, see raw data for justification
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL/SDL

Acronym	Description
DCS	Detectability Check Study
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitaion Limit
SD	Serial Dilution
SDL	Sample Detection Limit
TRRP	Texas Risk Reduction Program

Unit Reported	Description
mg/L	Milligrams per Liter

CONDITIONS

Operator: PLAIN MARKETING L.P. 333 Clay Street Suite 1900 Houston, TX 77002	OGRID:	
	34053	
	Action Number:	
	498428	

Action Type:
[UF-GWA] Ground Water Abatement (GROUND WATER ABATEMENT)**CONDITIONS**

Created By	Condition	Condition Date
shanna.smith	Pursuant to 19.15.30 NMAC, update Stage 2 Abatement Plan dated September 2002. Plan will be submitted as a report by October 24, 2025.	9/24/2025
shanna.smith	Pursuant to 19.15.30.13 C.2.a "site investigation should define the vertical and horizontal extent and magnitude of vadose zone and ground-water contamination". The release site is not fully delineated.	9/24/2025
shanna.smith	Pursuant to 19.15.30.11 Subsection A states "Unless otherwise provided by 19.15.30 NMAC responsible persons who are abating, or who are required to abate, water pollution in excess of the standards and requirements set forth in 19.15.30.9 NMAC shall do so pursuant to an abatement plan the director approves. When the director has approved an abatement plan, the responsible person's actions leading to and including abatement shall be consistent with the abatement plan's terms and conditions."	9/24/2025
shanna.smith	Pursuant to 19.15.30.11 Subsection B paragraph 3 states "If the director determines that the designated responsible person has failed to conduct the actions 19.15.30 NMAC requires, the director shall notify all responsible persons of this failure in writing and allow them 30 days, or longer for good cause shown, to conduct the required actions before setting a show cause hearing requiring those responsible persons to appear and show cause why they should not be ordered to comply, a penalty should not be assessed, a civil action should not be commenced in district court or the division should not take other appropriate action."	9/24/2025
shanna.smith	Continue submitting quarterly monitoring and sampling reports.	9/24/2025
shanna.smith	14 monitor wells out of 23 monitor wells contain NAPL or contained NAPL before going dry. 8 recovery wells have 1.27' to 7.23' NAPL after 26 years.	9/24/2025
shanna.smith	Continue to sample for BTEX EPA Method 8260 and add Total Dissolved Solids (TDS) and pH to sampling events/plan for all wells applicable.	9/24/2025
shanna.smith	2024 AGWMR approval does not relieve the owner/operator of responsibility for compliance with OCD, federal, state, or local laws and/or regulations.	9/24/2025
