Was this vent or flare a result of downstream activity	No
Was notification of downstream activity received by this operator	Not answered.
Downstream OGRID that should have notified this operator	Not answered.
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Hydrates in fuel gas caused compressors to go down.
Steps taken to limit the duration and magnitude of vent or flare	Operators worked on fuel gas and keeping compressors online and curtailing production to reduce inlet pressure and mitigate flaring. Field was ultimately shut in until fuel gas issue was resolved.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	corrective measures focused on reducing gas production as quickly and safely as possible to minimize the duration and volume of gas flared
