

To the New Mexico Oil Conservation Division,

On behalf of Permian Resources Operating, LLC, Diamondback Disposal Services, Inc. has drafted this cover letter in support of the resubmittal of the Remediation Completion Report for Release No. nAPP2510824226 at the Mezcal Michelada 3 CTB 1 location. This resubmittal includes revised application materials and supplemental documentation intended to address the items identified in the denial notice dated December 2, 2025.

Item 1. The release coordinates originally reported were incorrect and have been corrected within the OCD portal. The resubmitted C 141 application and associated report now reflect the corrected release location, and all site characterization and distance calculations included in this resubmittal are based on the corrected release coordinates.

Item 2. The minimum distance to the nearest significant watercourse has been re evaluated using the corrected release location. Gatuna Canyon, identified on the USGS 7.5 minute topographic quadrangle map, is located approximately 0.61 miles northeast of the release area. The C 141 application and report have been updated to reflect the correct significant watercourse and distance category.

Item 3. The closest lateral extent of the release to any lakebed, sinkhole, or playa lake measured from the ordinary high water mark is approximately 0.46 miles northwest of the release footprint, where a freshwater pond is located. This feature also represents the nearest freshwater source and the nearest wetland to the site. The application and report have been updated accordingly.

Item 4. The risk of the site being in karst geology has been updated to reflect that the site lies within a high karst designation area. Applicable remediation and closure criteria were applied based on this classification.

Item 5. The closest lateral extent of the release to a mapped 100 year floodplain is approximately 0.45 miles northeast of the release footprint, based on review of the USA Flood Hazard Areas Map. The C 141 application and report have been updated to reflect this distance.

Item 6. Although the separator was located within lined containment at the time of failure, released fluids were discharged outside of the lined containment and did not enter the containment area. A liner inspection was conducted on January 23, 2026 as a precautionary measure. The inspection confirmed that the liner was clean and well maintained, with no tears or visible staining observed. The original release projected over the containment wall, and no released material was present within the lined containment. Documentation of the liner inspection is included as a separate attachment to the project file.

Item 7. Ground view photographs documenting the full excavation extent prior to backfill are not available for this project. These photographs were either not collected or were subsequently lost or deleted. The only available photographic documentation consists of aerial imagery collected during remediation and backfill activities. This was discussed with Shelly Wells of the New Mexico Oil Conservation Division, and this explanation is provided in response to the denial. Future remediation projects will include ground level photographs documenting excavation extents prior to backfill in accordance with 19.15.29.12.E NMAC.

Item 8. The Backfill Sample Summary table has been updated to include the reported chloride concentration from the associated laboratory analysis.

Item 9. Proper sampling notification pursuant to 19.15.29.12.D.(1)(a) NMAC was not provided for confirmation samples collected on August 27, 2025. This error is acknowledged and resulted from the assumption that acceptance of the notice within the system indicated compliance. Going forward, additional care will be taken to ensure that the full two business day notification requirement is met prior to sampling activities.

The enclosed materials are provided for review based on the documentation available for this release and in response to the denial notice. Diamondback Disposal Services, Inc. respectfully requests reconsideration of closure approval for Release No. nAPP2510824226 based on the information provided.

Please contact the undersigned should additional clarification or documentation be required.

Sincerely,

PERMIAN

Executive Summary

This executive summary provides an overview of the remediation and reclamation activities conducted at the Mezcal/Michelada 3 CTB 1 site under Release Number nAPP2510824226. Diamondback Disposal Services, Inc. (Diamondback) performed cleanup and restoration on behalf of Permian Resources Operating, LLC (Permian) in response to a crude oil release that occurred on April 17, 2025, following a separator equipment failure. Approximately 45 barrels of crude oil were discharged outside of lined containment; 14 barrels were recovered, and the remaining 31 barrels required remediation.

The site is located at coordinates 32.59287, -103.947871 (NAD83) in Eddy County, New Mexico, approximately 8.5 miles northeast of the City of Carlsbad. The release area lies within federal jurisdiction and is regulated by the New Mexico Oil Conservation Division (NMOCD) and the Bureau of Land Management (BLM). The lease is designated for oil and gas operations under federal management, with permitted use restricted to oil and gas development.

Remediation activities were conducted between August 20 and September 5, 2025, under NMOCD notification dated August 25, 2025. Excavation was performed to remove approximately 1,024 cubic yards of impacted soil, which was transported to Lea Land LLC for disposal. Clean material was backhauled and stockpiled onsite for backfilling. Confirmation sampling was conducted on August 27, August 28, and September 8, 2025, with final analytical results received on September 12, 2025, confirming compliance with the Recommended Remediation Action Levels (RRALs) outlined in Table 1 of 19.15.29.12 NMAC.

Following confirmation that all RRALs were met, the stockpiled clean material was used for backfill, and the pad was graded to restore operational contour and drainage. No seeding was performed, as all impacts were confined within the operational pad limits. All remediation activities were completed in accordance with the most stringent closure criteria due to groundwater occurring at approximately 40 feet below ground surface and the site's location within a critical karst designation area. No further reclamation will be performed until the facility is decommissioned.

Diamondback Disposal Services, Inc. respectfully requests closure approval for Release Number nAPP2510824226 from the NMOCD and BLM. Supporting analytical data, field documentation, and regulatory correspondence are included in the appendices of this report.

Introduction

This report documents remediation and reclamation activities at the Mezcal/Michelada 3 CTB 1 site. Diamondback Disposal Services, Inc. (Diamondback) completed cleanup and site restoration on behalf of Permian Resources Operating, LLC (Permian) under Release Number nAPP2510824226. The release occurred on April 17, 2025, following a separator equipment failure that discharged approximately 45 barrels of crude oil outside of containment. After the release was stopped, a light scrape of the affected area was performed to mitigate potential soil impact. Approximately 14 barrels were recovered, and the remaining 31 barrels required remediation.

The site is located at coordinates 32.59287, -103.947871 (NAD83), in Eddy County, New Mexico, approximately 8.5 miles northeast of the City of Carlsbad. The release area lies within federal jurisdiction and is subject to regulatory oversight by the New Mexico Oil Conservation Division (NMOCD) and the Bureau of Land Management (BLM). The lease is designated for oil and gas operations under federal management, and the permitted use of the lease is restricted to oil and gas development. All remediation activities were conducted in accordance with the closure criteria of 19.15.29 NMAC and the BLM Surface Operating Standards and Guidelines for Oil and Gas Exploration and Development (Gold Book).

The site can be accessed from the intersection of NM-360 and Crazy Horse Road:

- Follow Crazy Horse Road east for approximately 3.0 miles, continuing along the winding lease route past several active locations (note that the road is not accurately represented on Google Maps) until reaching the Mezcal/Michelada 3 CTB 1 entrance.

A map is located in appendix B

Site Characterization

Remediation and reclamation activities were confined to the production area of the well pad, with all impacts occurring outside of lined containment but remaining within the overall pad limits.

Environmental and regulatory reviews were completed to confirm that the release did not extend beyond the location and that all corrective actions met applicable federal and state requirements.

Water Resources and Remediation Considerations

(See Appendix A for floodplain and karst mapping; all other maps are provided in Appendix B – Reference Materials)

- The shallowest depth to groundwater beneath the area affected by the release is estimated to be approximately 40 feet below ground surface (bgs), based on historical well data from State Engineer Well Record CP-775, located 0.6 miles southeast of the site. This record is deprecated and shown for illustration purposes only, as no recent groundwater data are available for this area.
- The nearest significant watercourse is Gatuna Canyon, which is identified on the USGS 7.5 minute topographic quadrangle map and is located approximately 0.61 miles northeast of the release area
- The closest lateral extent of the release to any lakebed, sinkhole, or playa lake measured from the ordinary high water mark is approximately 0.46 miles northwest of the release footprint, where a freshwater pond is located. This pond also represents both the nearest freshwater source and the nearest wetland feature to the site.
- The closest lateral extent of the release to a spring or private domestic freshwater well used by fewer than five households for domestic or stock watering purposes is approximately 3.4 miles southwest of the site, coinciding with the nearest ranch residence. No freshwater wells or springs are located closer to the release area.
- The closest lateral extent of the release to incorporated municipal boundaries or a defined municipal freshwater well field is approximately 8.9 miles southwest of the site, where the Carlsbad municipal water field is located.
- The closest lateral extent of the release to a subsurface mine is approximately 17.8 miles south of the site, corresponding to the Mosaic Potash mining operations near Carlsbad, New Mexico.
- The risk of this site being in karst geology was evaluated, and the site lies within a high karst designation area. Remediation standards were applied in accordance with applicable closure criteria.
- FEMA flood mapping designates the site within Zone X. A mapped 100-year floodplain (Zone A) occurs approximately 0.45 miles northwest of the release extent.
- The NRCS soil survey identifies the site soils as the Reeves–Gypsum Land complex, mapped within loamy ecological sites. The soils are well drained and non-hydric, with low available water capacity. The release occurred entirely on pad and is landlocked from the surrounding area; therefore, revegetation will not be necessary until full site reclamation is conducted.

Soil Remediation Standards

All identified contamination was remediated using the most stringent closure criteria listed in Table 1 of 19.15.29.12 NMAC. The site requires application of the most stringent standards due to groundwater occurring at approximately 40 feet below ground surface and its location within a critical karst designation area.

Table 1: NMAC 19.15.29.12 Closure Criteria

| Groundwater Depth | Chloride (mg/kg) | TPH (GRO+DRO+MRO) (mg/kg) | GRO+DRO (mg/kg) | BTEX (mg/kg) | Benzene (mg/kg) |
|-------------------|------------------|---------------------------|-----------------|--------------|-----------------|
| <50 feet | 600 | 100 | N/A | 50 | 10 |

Remediation/Reclamation Activities

Initial excavation and reclamation activities were conducted from August 20 through August 25, 2025, under the supervision of Diamondback Disposal Services, Inc. Impacted soil was removed from the production area outside of lined containment. A total of approximately 1,024 cubic yards of impacted material was excavated and transported to the Lea Land LLC facility for disposal. Clean material was backhauled and stockpiled onsite during excavation for later use as backfill. Excavation was completed using standard field methods, with ongoing field screening to confirm removal limits and guide adjustments during removal.

The New Mexico Oil Conservation Division (NMOCD) was notified on August 25, 2025, of the intent to conduct confirmation sampling for Incident ID nAPP2510824226. Sampling events were conducted on August 27, 2025, and August 28, 2025, beginning at 08:00 hours, as documented in the approved NMOCD C-141N notices (Appendix E). Floor and wall samples were collected as five-point composites representing no more than 200 square feet per sample. All samples were packaged, labeled, and submitted under full chain of custody to an accredited third-party laboratory for analysis.

Analytical results from these two sampling events indicated that most samples were below the Recommended Remediation Action Levels (RRALs) listed in Table 1 of 19.15.29.12 NMAC, with isolated areas showing marginal impacts remaining in limited portions of the excavation. These findings guided an additional excavation phase.

Additional excavation was completed by September 5, 2025, to remove the remaining impacted material identified during the first sampling events. A final confirmation sampling event was conducted on September 8, 2025, at 08:00 hours, following completion of this additional excavation. Floor and wall samples were collected as five-point composites representing no more than 200 square feet per sample and submitted under maintained chain of custody to the same accredited third-party laboratory for analysis.

Laboratory results for the final confirmation samples were received on September 12, 2025, confirming that all samples were below the RRALs for chloride, BTEX, and Total Petroleum Hydrocarbons (TPH). No exceedances were identified, and all analytical results met the closure criteria specified in Table 1 of 19.15.29.12 NMAC.

Following confirmation that RRALs were met, the previously stockpiled and backhauled clean material was used for backfill. Placement and grading were completed immediately after verification of results, restoring the pad to its operational condition. The surface was bladed to existing contour to maintain drainage and ensure continued safe use as an active production site. No seeding was required, as the disturbance remained confined to an operational pad.

All remediation objectives for the site were achieved under the most stringent closure criteria specified in Table 1 of 19.15.29.12 NMAC. These standards were applied based on groundwater occurring at approximately 40 feet below ground surface and the site's location within a critical karst designation area. The release was fully remediated and remained contained within the well pad boundaries, with no off-site impacts identified. No further reclamation activities will be performed until the decommissioning of the facility.

Conclusion

Remediation activities at the Mezcal/Michelada 3 CTB 1 site, located in Eddy County at coordinates 32.59287, -103.947871 (NAD83), within the Artesia District, have been completed in accordance with all applicable regulatory requirements. The project addressed a release associated with a separator equipment failure that resulted in the discharge of approximately 45 barrels of crude oil outside of lined containment. Diamondback Disposal Services, Inc. excavated approximately 1,024 cubic yards of impacted material, which was transported and disposed of at the Lea Land LLC facility. This figure does not include material removed during the initial response actions performed immediately after the release.

Diamondback Disposal Services, Inc. conducted excavation, field screening, and confirmation sampling to ensure compliance with closure criteria under 19.15.29.12 NMAC. The site was remediated to the most stringent standards due to groundwater occurring at approximately 40 feet below ground surface and its location within a critical karst designation area. Chain of custody was maintained throughout all sampling activities, and final laboratory results confirmed compliance with the Recommended Remediation Action Levels (Appendix C; originals in Appendix F).

Backfill and site restoration were completed using verified clean material that had been stockpiled onsite during excavation. The disturbed areas were graded and bladed to existing contour to restore the pad to its operational condition and maintain proper drainage. No seeding was performed, as the release was confined entirely within the active production area, and no further reclamation will be conducted until the facility is decommissioned.

Diamondback Disposal Services, Inc. has completed all remediation activities associated with Release Number nAPP2510824226 and respectfully requests closure approval from the New Mexico Oil Conservation Division (NMOCD) and the Bureau of Land Management (BLM). If any additional information or clarification is needed, please contact our office at your convenience.

Communications

-EXTERNAL- The Oil Conservation Division (OCD) has accepted the application, Application ID: 498814

From: OCDOnline@state.nm.us <OCDOnline@state.nm.us>

To: Matthew Taylor <Matthew.Taylor@permianres.com>

Date: Mon, 25 Aug 2025 15:46:48 +0000 (08/25/2025 09:46:48 AM)

WARNING: The sender of this email could not be validated and may not match the person in the "From" field.

To whom it may concern (c/o Matthew Taylor for Permian Resources Operating, LLC),

The OCD has received the submitted *Notification for (Final) Sampling of a Release* (C-141N), for incident ID (n#) nAPP2510824226.

The sampling event is expected to take place:

When: 08/27/2025 @ 08:00

Where: D-11-20S-30E 0 FNL 0 FEL (32.59287,-103.947871)

Additional Information: Jason Owsley
575.602.5998

Additional Instructions: 32.59287,-103.947871

An OCD representative may be available onsite at the date and time reported. In the absence or presence of an OCD representative, sampling pursuant to 19.15.29.12.D NMAC is required. Sampling must be performed following an approved sampling plan or pursuant to 19.15.29.12.D.(1).(c) NMAC. Should there be a change in the scheduled date and time of the sampling event, then another notification should be resubmitted through OCD permitting as soon as possible.

- **Failure to notify the OCD of sampling events including any changes in date/time per the requirements of 19.15.29.12.D.(1).(a) NMAC, may result in the remediation closure samples not being accepted.**
- **If confirmation sampling is going to take place over multiple days, individual C-141N applications must be submitted for each sampling date. Date ranges are not currently accepted on the C-141N application.**

If you have any questions regarding this application, or don't know why you have received this email, please contact us.

Incident Events

| Date | Detail |
|------------|--|
| 04/22/2025 | The (04/22/2025, C-141) application [453758] was accepted by OCD. The operator was emailed with details of this event. |
| 04/21/2025 | The (04/22/2025, C-141) application [453758] was assigned to this incident. |
| 04/18/2025 | The (04/18/2025, NOR) application [453339] was assigned to this incident. |
| 04/18/2025 | New incident created by the operator, upon the submission of notification of release. |
| 04/17/2025 | Release discovered by the operator. |

Incident Severity

| | |
|--|--|
| Major release as defined by 19.15.29.7(A) NMAC? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No | From paragraph A. "Major release" determine using: (1) an unauthorized release of a volume, excluding gases, of 25 barrels or more. |
|--|--|

Incident Corrective Actions

Initial Response

- The source of the release has been stopped.
- The impacted area has been secured to protect human health and the environment.
- Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices.
- All free liquids and recoverable materials have been removed and managed appropriately.

If all the actions described above have not been undertaken, explain why:

No site characterization data was found for this incident.

Remediation Plan

| | |
|---|---|
| Have the lateral and vertical extents of contamination been fully delineated? | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |
| On what estimated date will the remediation commence? | |
| On what date will (or did) the final sampling occur? | |
| On what date will (or was) the remediation complete(d) | |

Release is indicated as not yet fully delineated. Any Deferral Requests received may not be granted for this incident.

No remediation closure report data was found for this incident.

RE: MEZCAL MICHELADA

Enclosed are the results of analyses for samples received by the laboratory on 08/28/25 8:13.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

- Method EPA 552.2 Haloacetic Acids (HAA-5)
- Method EPA 524.2 Total Trihalomethanes (TTHM)
- Method EPA 524.4 Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

JUSTIN ROBERTS

DIAMONDBACK DISPOSAL SERVICE INC.

P. O. BOX 2491

HOBBS, NM 88241

RE: MEZCAL MICHELADA

Enclosed are the results of analyses for samples received by the laboratory on 08/28/25 8:13.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

| | |
|------------------|------------------------------|
| Method EPA 552.2 | Haloacetic Acids (HAA-5) |
| Method EPA 524.2 | Total Trihalomethanes (TTHM) |
| Method EPA 524.4 | Regulated VOCs (V1, V2, V3) |

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Celey D. Keene

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

RE: MEZCAL MICHELADA

Enclosed are the results of analyses for samples received by the laboratory on 09/08/25 16:09.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

| | |
|------------------|------------------------------|
| Method EPA 552.2 | Haloacetic Acids (HAA-5) |
| Method EPA 524.2 | Total Trihalomethanes (TTHM) |
| Method EPA 524.4 | Regulated VOCs (V1, V2, V3) |

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

RE: MEZCAL MICHELADA

Enclosed are the results of analyses for samples received by the laboratory on 09/08/25 16:09.

Cardinal Laboratories is accredited through Texas NELAP under certificate number TX-C25-00101. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

| | |
|------------------|------------------------------|
| Method EPA 552.2 | Haloacetic Acids (HAA-5) |
| Method EPA 524.2 | Total Trihalomethanes (TTHM) |
| Method EPA 524.4 | Regulated VOCs (V1, V2, V3) |

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Notes and Definitions

- S-06 The recovery of this surrogate is outside control limits due to sample dilution required from high analyte concentration and/or matrix interference's.
- S-04 The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
- QR-03 The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.
- QM-07 The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
- ND Analyte NOT DETECTED at or above the reporting limit
- RPD Relative Percent Difference
- ** Samples not received at proper temperature of 6°C or below.
- *** Insufficient time to reach temperature.
- Chloride by SM4500Cl-B does not require samples be received at or below 6°C
Samples reported on an as received basis (wet) unless otherwise noted on report

Liner Inspection Report

Site Name: Mezcal/Michelada 3 CTB 1
Site Location: Eddy County

Inspection Date: 1/23/26
GPS: 32.59298158,-103.94768786

Inspection Parameters as Outlined in 19.15.29.11(5) NMAC

Prior to Inspection

Two(2) Business day notification of inspection to appropriate division office
Date of Notice:

Material covering liner removed
Release was contained to lined containm

Yes/No/NA
Yes/No/NA

Inspection

Liner thoroughly inspected
All damaged areas observed in white paint on liner
Liner integrity was maintained
Release was contained to lined containment area
Liner was able to contain the release

Yes/No
Yes/No/NA
Yes/No
Yes/No
Yes/No

If YES:

Certify on C-141 Form that liner remains intact

If NO:

Responsible Party must delineate the horizontal and vertical extent of release.
See table 1 19.15.29.12 NMAC
See subparagraph (E) Paragraph (5) of subsection 19.15.29.11 NMAC

Additional Comments:

The liner was clean and well maintained. The containment consisted of a series of three separate lined areas. No tears or visible staining were observed. The original release projected over the wall, with no material landing within the containment.

Good morning Matt,

So just to confirm with you, the location of the MEZCAL/MICHELADA 3 CTB 1 is at 32.59287,-103.947871 in D-11-20S-30E? This location is where the release also occurred.

Thank you,

Shelly

Good morning Shelly,

The GPS coordinates provided on the NOR and closure report reflect the tank battery. The coordinates you provided reflect the location of the wells. Hope this helps, let me know if you have any other questions.

Thank you,

Matthew Taylor

Subject: -EXTERNAL- nAPP2510824226 MEZCAL/MICHELADA CTB Closure Questions

Hi Matt,

I am reviewing the resubmitted closure report for the release at nAPP2510824226 MEZCAL/MICHELADA CTB and have questions regarding Item 1. In the report was written the following: "The release coordinates originally reported were incorrect and have been corrected within the OCD portal. The resubmitted C 141 application and associated report now reflect the corrected release location, and all site characterization and distance calculations included in this resubmittal are based on the corrected release coordinates."

However, the release coordinates provided on the NOR were 32.59287,-103.947871 which is what is written in the closure report. I just wanted to confirm that the location of the facility Mezcal/Michelada 3 CTB 1 is indeed at this same location. According to OCD records, Mezcal/Michelada 3 CTB 1 is at 32.590000001,-103.940000001. If these are incorrect, please let me know, so that the facility's location may be updated. I look forward to hearing back from you when you have the time.

Kind regards,

Shelly

QUESTIONS, Page 2

Action 547579

QUESTIONS (continued)

| | |
|---|---|
| Operator: Permian Resources Operating, LLC 300 N. Marienfeld St Ste 1000 Midland, TX 79701 | OGRID: 372165 |
| | Action Number: 547579 |
| | Action Type: [C-141] Remediation Closure Request C-141 (C-141-v-Closure) |

QUESTIONS

| | |
|---|--|
| Nature and Volume of Release (continued) | |
| Is this a gas only submission (i.e. only significant Mcf values reported) | No, according to supplied volumes this does not appear to be a "gas only" report. |
| Was this a major release as defined by Subsection A of 19.15.29.7 NMAC | Yes |
| Reasons why this would be considered a submission for a notification of a major release | From paragraph A. "Major release" determine using: (1) an unauthorized release of a volume, excluding gases, of 25 barrels or more. |

With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.

Initial Response

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.

| | |
|--|---------------|
| The source of the release has been stopped | True |
| The impacted area has been secured to protect human health and the environment | True |
| Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices | True |
| All free liquids and recoverable materials have been removed and managed appropriately | True |
| If all the actions described above have not been undertaken, explain why | Not answered. |

Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

QUESTIONS

Site Characterization
Please answer all the questions in this group (only required when seeking remediation plan approval and beyond). This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

| | |
|--|--------------------------------------|
| What is the shallowest depth to groundwater beneath the area affected by the release in feet below ground surface (ft bgs) | Between 26 and 50 (ft.) |
| What method was used to determine the depth to ground water | NM OSE iWaters Database Search |
| Did this release impact groundwater or surface water | No |
| What is the minimum distance, between the closest lateral extents of the release and the following surface areas: | |
| A continuously flowing watercourse or any other significant watercourse | Between ½ and 1 (mi.) |
| Any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark) | Between 1000 (ft.) and ½ (mi.) |
| An occupied permanent residence, school, hospital, institution, or church | Between 1 and 5 (mi.) |
| A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes | Between 1 and 5 (mi.) |
| Any other fresh water well or spring | Between ½ and 1 (mi.) |
| Incorporated municipal boundaries or a defined municipal fresh water well field | Greater than 5 (mi.) |
| A wetland | Between 1000 (ft.) and ½ (mi.) |
| A subsurface mine | Between 1 and 5 (mi.) |
| An (non-karst) unstable area | Zero feet, overlying, or within area |
| Categorize the risk of this well / site being in a karst geology | High |
| A 100-year floodplain | Between 1000 (ft.) and ½ (mi.) |
| Did the release impact areas not on an exploration, development, production, or storage site | No |

Remediation Plan
Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

| | |
|--|-----|
| Requesting a remediation plan approval with this submission | Yes |
| <i>Attach a comprehensive report demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined, pursuant to 19.15.29.11 NMAC and 19.15.29.13 NMAC.</i> | |
| Have the lateral and vertical extents of contamination been fully delineated | Yes |
| Was this release entirely contained within a lined containment area | No |

Soil Contamination Sampling: (Provide the highest observable value for each, in milligrams per kilograms.)

| | |
|---|-------|
| Chloride (EPA 300.0 or SM4500 Cl B) | 1010 |
| TPH (GRO+DRO+MRO) (EPA SW-846 Method 8015M) | 11103 |
| GRO+DRO (EPA SW-846 Method 8015M) | 8756 |
| BTEX (EPA SW-846 Method 8021B or 8260B) | 107 |
| Benzene (EPA SW-846 Method 8021B or 8260B) | 0 |

Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.

| | |
|---|------------|
| On what estimated date will the remediation commence | 08/20/2025 |
| On what date will (or did) the final sampling or liner inspection occur | 09/08/2025 |
| On what date will (or was) the remediation complete(d) | 09/06/2025 |
| What is the estimated surface area (in square feet) that will be reclaimed | 8761 |
| What is the estimated volume (in cubic yards) that will be reclaimed | 992 |
| What is the estimated surface area (in square feet) that will be remediated | 8761 |
| What is the estimated volume (in cubic yards) that will be remediated | 1024 |

These estimated dates and measurements are recognized to be the best guess or calculation at the time of submission and may (be) change(d) over time as more remediation efforts are completed. The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.

QUESTIONS

Remediation Plan (continued)

Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

This remediation will (or is expected to) utilize the following processes to remediate / reduce contaminants:

(Select all answers below that apply.)

| | |
|---|--|
| (Ex Situ) Excavation and off-site disposal (i.e. dig and haul, hydrovac, etc.) | Yes |
| Which OCD approved facility will be used for off-site disposal | fEEM0112342028 LEA LAND LANDFILL |
| OR which OCD approved well (API) will be used for off-site disposal | Not answered. |
| OR is the off-site disposal site, to be used, out-of-state | Not answered. |
| OR is the off-site disposal site, to be used, an NMED facility | Not answered. |
| (Ex Situ) Excavation and on-site remediation (i.e. On-Site Land Farms) | Not answered. |
| (In Situ) Soil Vapor Extraction | Not answered. |
| (In Situ) Chemical processing (i.e. Soil Shredding, Potassium Permanganate, etc.) | Not answered. |
| (In Situ) Biological processing (i.e. Microbes / Fertilizer, etc.) | Not answered. |
| (In Situ) Physical processing (i.e. Soil Washing, Gypsum, Disking, etc.) | Not answered. |
| Ground Water Abatement pursuant to 19.15.30 NMAC | Not answered. |
| OTHER (Non-listed remedial process) | Not answered. |

Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. |--|---|
| <i>Only answer the questions in this group if seeking remediation closure for this release because all remediation steps have been completed.</i> | |
| Requesting a remediation closure approval with this submission | Yes |
| Have the lateral and vertical extents of contamination been fully delineated | Yes |
| Was this release entirely contained within a lined containment area | No |
| All areas reasonably needed for production or subsequent drilling operations have been stabilized, returned to the sites existing grade, and have a soil cover that prevents ponding of water, minimizing dust and erosion | Yes |
| What was the total surface area (in square feet) remediated | 8761 |
| What was the total volume (cubic yards) remediated | 1024 |
| All areas not reasonably needed for production or subsequent drilling operations have been reclaimed to contain a minimum of four feet of non-waste contain earthen material with concentrations less than 600 mg/kg chlorides, 100 mg/kg TPH, 50 mg/kg BTEX, and 10 mg/kg Benzene | Yes |
| What was the total surface area (in square feet) reclaimed | 8761 |
| What was the total volume (in cubic yards) reclaimed | 992 |
| Summarize any additional remediation activities not included by answers (above) | Remediation activities have been completed at the site. |

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (in .pdf format) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.
