Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Loss of power to facility due to weather causing vrus to go down. Tanks vented during power outage. As soon as power was restored, VRUs placed back online and venting stopped.
Steps taken to limit the duration and magnitude of vent or flare	All production going to this facility were shut in during the power outage to prevent additional venting. All of the facilities and emissions control devices at this site are operating as designed and, where applicable, are authorized. Chevron field personnel will execute practicable measures to minimize emissions.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Corrective measures focused on reducing gas production as quickly and safely as possible to minimize the duration and volume of gas vented.
