Date: Thursday, August 6, 2026 3:37:00 PM

The sampling plan is approved.

1. Horizontal delineation must meet the requirements of the reclamation standards 19.15.29.13 NMAC (600 mg/kg Cl, 100 mg/kg TPH, 50 mg/kg BTEX, 10 mg/kg benzene)
2. Soil standards below 4 feet must be delineated/remediated to Table I Closure Criteria for the approved site-specific depth to groundwater. Laboratory data must be provided as evidence of delineation efforts.
3. Please keep a copy of this communication for inclusion within the appropriate reporting documentation.

Thank you and please let me know if you have any questions,
Scott

Scott,

Please review the revised map and see if this looks more accurate. It is partially in unit A, but mostly in Unit B. I don't see anything else in the area that could be it.

Thank you,

Good afternoon,

This sampling plan is denied. The incident details page for this incident states that the release was from a 4" gathering line in unit B. The current proposed sampling plan shows that samples would be collected from a pipeline ROW in units F,G and J.

Thank you and please contact me with any questions that you might have,
Scott

Good morning,

Pima is submitting the attached sampling plan on behalf of XTO for review and approval regarding the historical incident above. I have no information beyond what is provided on the NMOCD website. I used my best judgement to determine the incident's location based on aerial imagery. Your feedback is greatly appreciated.

Thank you,
