**RE: Flaring Calculation / Justification for Volumes
COATES AB C&D**

To Whom It May Concern,

Scout Energy Management LLC reports a flaring event at the Coates AB C&D Battery that occurred from July 13, 2026, at approximately 1:05 p.m. through August 5, 2026, at approximately 12:00 p.m.

No calculation was necessary, as the flaring volumes were determined using true meter readings. The recorded volume for this event is as follows:

- Coates AB C&D Battery = 2810 MCF (total)

**RE: Application for Exception to 19.15.27 NMAC
Scout Energy Management LLC (330949)
COATES AB C&D
Lea County, New Mexico**

To Whom It May Concern,

Scout Energy Management LLC requests approval under 19.15.27 NMAC to temporarily flare casinghead gas from the Coates AB C&D Battery in Lea County, New Mexico. The flaring occurred from July 13, 2026, at approximately 1:05 p.m. through August 5, 2026, at approximately 12:00 p.m.

Scout evaluated multiple alternatives to offload gas to another purchaser, but due to current infrastructure limitations and economic constraints, routing the gas was not economically feasible at this time. Temporary flaring was necessary to allow continued production of recoverable oil from the subject wells and to prevent operational disruption.

If you have any questions or need any additional information, please feel free to contact me at (469) 485-3122.

Thanks,
