---

Mr. Jones,

We have finally got a rig for my work at BDU. We are planning on starting the P/A on the 2031-241F tomorrow morning. It's should only take one day to complete. We will then move to the 1930-241F on Friday and T/A that well with a CIBP and 5sx CMT via a dump bailer

Let me know if you are going to try and make it out.

Thanks

Brian Holladay
