	NORT	HWEST NEWMEXICO	PACKER LEAKAGE	E TEST INSTRUCTIO	NS
 A packer leakage test shall be com completion of the well, and annually the Such tests shall also be commenced on a chemical or fracture treatment, and whe the tubing have been disturbed. Tests sh 	Il multiple completions within seven day never remedial work has been done on a	izing the multiple completion. s following recompletion and well during which the packer	for Flow Te for remain shut- or	st No. 2 is to be the same a	ed even though no leak was indicated during Flow Test No. 1. Procedure is for Flow Test No. 1 except that the previously produced zone shall as previously shut-in is produced.
 At least 72 hours prior to the comm Division in writing of the exact time the 	nencement of any packer leakage test, th	e operator shall notify the	 Pressur intervals as intervals dur immediately flow period, 	follows: 3 hours tests: imming the first hour thereof, a prior to the conclusion of at least one time during early a statement of the statemen	be measured on each zone with a deadweight pressure gauge at time ediately prior to the beginning of each flow period, at fifteen-minute and at hourly intervals thereafter, including one pressure measurement each flow period. 7-day tests: immediately prior to the beginning of each ch flow period (at approximately the midway point) and immediately prior
 The packer leakage test shall comm stabilization. Both zones shall remain sh however, that they need not remain shut 	nence when both zones of the dual comp nut-in until the well-head pressure in each	letion are shut-in for pressure	which have 24-hou with recordi once at the completion,	previously shown question r oil zone tests: all pressur ng pressure gauges the acc end of each test, with a dea	Other pressures may be taken as desired, or may be requested on wells able test data. es, throughout the entire test, shall be continuously measured and recorde uracy of which must be checked at least twice, once at the beginning and dweight pressure gauge. If a well is a gas-oil or an oil-gas dual be required on the oil zone only, with deadweight pressures as required
 For Flow Test No. 1, one zone of 1 while the other zone remains shut-in. Su 24 hours in the case of an oil well. Note atmosphere due to lack of a pipeline con 	ich test shall be continued for seven days i: if, on an initial packer leakage test, a gi	s in the case of a gas well and as well is being flowed to the	for 8. The re: test. Tests s Northwest M	sults of the above-described shall be filed with the Azteo New Mexico Packer Leaka	d tests shall be filed in triplicate within 15 days after completion of the District Office of the New Mexico Oil Conservation Division on ge Test Form Revised 10-01-78 with all deadweight pressures indicated ures (gas zones only) and gravity and GOR (oil zones only).
5. Following completion of Flow Test above.	No. 1, the well shall again be shut-in, in	accordance with Paragraph 3		B temperu
