Type of Submission: Notice of Intent

Date Sundry Submitted: 03/01/2021

Date proposed operation will begin: 01/01/2021

Type of Action: Other

Time Sundry Submitted: 10:37

Procedure Description: NOI to install/use Gas Lift, Coriolis, Magmeter & LACT Unit DJR received BLM approval for use of Coriolis Meters, Liquids Commingling and use of LACT Unit on 09/30/20. The subject well is one of two wells on a pad and is part of DJRs Chaco Trunk Gathering System. DJR intends to install Gas Lift and has assigned the following meter types. Wellhead, Injection/Gas Lift, Buyback, Sales into pipeline. For allocation purposes only, after separation, oil and produced water will be measured on Lease using a Coriolis Meter and Electromagnetic Flow Meter. Oil and produced water will be commingled in the well pad tank battery. Commingled oil and produced water will leave the tank battery and be measured midstream using a on lease Coriolis Meter. Natural gas and commingled liquids will be pumped from the well pad through a pipeline system to DJRs North Alamito Unit Central Liquids Facility where the oil and produced water will be received and separated. Custody transfer of oil sold directly to Marathon Petroleum Corporation will be measured at the LACT Meter. Natural gas will be measured and sold directly to Enterprise. DJR intends to dispose/inject produced water from this well into DJRs North Alamito Unit SWD #001, SWD-2255, API 30-045-38185. Gas meters will be calibrated in accordance with BLM Onshore Order 5 and LACT Unit will meet BLM requirements of Onshore Order 4 respectively. Attached is a schematic of the well pad showing process flow, placement of on lease Coriolis Meters, Magmeters. North Alamito Unit Central Liquids Facility block flow diagram, and initial LACT Meter Proving Data.

Surface Disturbance

Is any additional surface disturbance proposed?: No
