RE: RJ Unit #106  
API No. 30-015-03153  
Reclamation and Seeding Closure Report

To Whom it May Concern:

Spur Energy Partners has retained Energy Staffing Services (ESS) to perform final reclamation for the above said location per NMOCD and BLM Reclamation Objectives and Procedures.

### **Plugging and Reclamation Procedures**

On December 17, 2020 COG Operating submitted form 3160-5 (Sundry Notices and Reports on Wells). The report indicated that the final tag was set at 60' to surface with 35 sacks of cement and the wellhead was cut off and the dry-hole marker was welded in place.

On July 18 of 2021, ESS conducted a full regulatory background and field inspection on behalf of Spur Energy, operator of record. No open spills or releases were found and no evidence of hydrocarbon or chloride impacted soils were observed. Once the pipe and rods were moved off of the location, reclamation began.

ESS reclaimed the site utilizing the rip and flip procedure. The site had plenty of topsoil under the production pad to obtain 4' of vadose zone coverage for proper vegetation of the site. The pad measured approximately 6206 sq. ft. on the north side of the road and 3058 sq. ft. on the south side of the road, to cover the production pad surface. The lease road splits both sections of the pad and was left in place as it is used as access other production sites in the area. After the reclamation was completed, a 3' berm was placed around both sides of the road to prevent future access to the reclaimed site. Due to the current forecast in the upcoming days, seeding of the site commenced. BLM #3 seed was broadcasted over the entire reclaimed pad.

### Conclusion

On behalf of Spur Energy Partners, ESS would like to request final reclamation closure of this site for the RJ Unit #106. If you have any questions or concerns, please contact the undersigned.
