completion of the well, and annually the Such tests shall also be commenced on a chemical or fracture treatment, and whe	menced on each multiply completed well reafter as prescribed by the order authori all multiple completions within seven day never remedial work has been done on a real also be taken at any time that commu-	izing the multiple completion. s following recompletion and well during which the packer	for Flow Tes //or remain shut- or	st No. 2 is to be the same a	ed even though no leak was indicated during Flow Test No. 1. Procedure is for Flow Test No. 1 except that the previously produced zone shall as previously shut-in is produced.	
 the tubing have been disturbed. Tests shall also be taken at any time that communication is suspected or when requested by the Division. At least 72 hours prior to the commencement of any packer leakage test, the operator shall notify the Division in writing of the exact time the test is to be commenced. Offset operators shall also be so notified. 			 Pressur intervals as f intervals dur immediately flow period, to the conchertion 	7. Pressures for gas-zone tests must be measured on each zone with a deadweight pressure gauge at time intervals as follows: 3 hours tests: immediately prior to the beginning of each flow period, at fifteen-minute intervals during the first hour thereof, and at hourly intervals thereafter, including one pressure measurement immediately prior to the conclusion of each flow period. 7-day tests: immediately prior to the beginning of eac flow period, at least one time during each flow period (at approximately the midway point) and immediately prior to the conclusion of each flow period. Other pressures may be taken as desired, or may be requested on wells which have previously shown questionable test data.		
	nence when both zones of the dual comp nut-in until the well-head pressure in each -in more than seven days.		24-hou with recordin once at the e completion,	r oil zone tests: all pressure ng pressure gauges the acc end of each test, with a dea	able test data. es, throughout the entire test, shall be continuously measured and record uracy of which must be checked at least twice, once at the beginning and dweight pressure gauge. If a well is a gas-oil or an oil-gas dual be required on the oil zone only, with deadweight pressures as required	
while the other zone remains shut-in. So 24 hours in the case of an oil well. Note	the dual completion shall be produced at uch test shall be continued for seven days e: if, on an initial packer leakage test, a g nection the flow period shall be three ho	s in the case of a gas well and as well is being flowed to the	for 8. The res Tests shall b New Mexico	e filed with the Aztec Distr Packer Leakage Test For	I tests shall be filed in triplicate within 15 days after completion of the test rict Office of the New Mexico Oil Conservation Division on Northwest m Revised 10-01-78 with all deadweight pressures indicated thereon as ones only) and gravity and GOR (oil zones only).	
 Following completion of Flow Test above. 	t No. 1, the well shall again be shut-in, in	accordance with Paragraph 3	3
