13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

The JCSAU 24 injection well recently failed an MIT. Ridgeway Arizona Oil Corp. plans to workover the well to repair the failed MIT and increase injection volume capacity. The plan forward is to MIRU a pulling unit and pull the 2-3/8" IPC tubing and packer. We will then pick up a work string and run in hole with a bit, tag for fill, and clean out if necessary. We will then RIH with wireline and add additional perforations between the existing interval of 4,443' and 4,369'. We will then RIH with a work string and a service packer and pump a 10,000 gallon acid job with two rock salt blocks. We will then RBIH with a new packer and 3.5" FSJ IPC tubing, setting the packer within 100' of the top perforation. The well will then be returned to production.
