	NORT	HWEST NEWMEXICO	PACKER LEAKAGE	E TEST INSTRUCTIO	NS
 A packer leakage test shall be comm completion of the well, and annually then Such tests shall also be commenced on al 	eafter as prescribed by the order author	izing the multiple completion	n. for Flow Tes	st No. 2 is to be the same a	ed even though no leak was indicated during Flow Test No. 1. Procedure is for Flow Test No. 1 except that the previously produced zone shall as previously shut-in is produced.
chemical or fracture treatment, and when the tubing have been disturbed. Tests sha	ever remedial work has been done on a	well during which the packe	r or	in white the 20th which we	as provously share in is produced.
requested by the Division.		·	intervals as i	follows: 3 hours tests: imm	be measured on each zone with a deadweight pressure gauge at time ediately prior to the beginning of each flow period, at fifteen-minute
2. At least 72 hours prior to the comm			immediately	prior to the conclusion of	and at hourly intervals thereafter, including one pressure measurement each flow period. 7-day tests: immediately prior to the beginning of each
Division in writing of the exact time the t	est is to be commenced. Offset operato	ors shall also be so notified.	to the conch		the flow period (at approximately the midway point) and immediately prior Other pressures may be taken as desired, or may be requested on wells able test data
 The packer leakage test shall comm 	ence when both zones of the dual comm	letion are shut-in for pressur	24-hou	r oil zone tests: all pressur	es, throughout the entire test, shall be continuously measured and recorded uracy of which must be checked at least twice, once at the beginning and
stabilization. Both zones shall remain shu- however, that they need not remain shut-	ut-in until the well-head pressure in eacl		once at the completion,	the recording gauge shall b	dweight pressure gauge. If a well is a gas-oil or an oil-gas dual be required on the oil zone only, with deadweight pressures as required
4 For Flow Test No. 1 and a set	a dual completion shall be used by the	the normal rate of any in the	-	taken on the gas zone.	
 For Flow Test No. 1, one zone of the while the other zone remains shut-in. Su 24 hours in the case of an oil well. Note: 	ch test shall be continued for seven days	s in the case of a gas well and	d for	sults of the above-described	d tests shall be filed in triplicate within 15 days after completion of the
atmosphere due to lack of a pipeline com			test. Tests s Northwest N	shall be filed with the Azteo New Mexico Packer Leakag	District Office of the New Mexico Oil Conservation Division on ge Test Form Revised 10-01-78 with all deadweight pressures indicated
				vell as the flowing temperat	tures (gas zones only) and gravity and GOR (oil zones only).
Following completion of Flow Test above.	No. 1, the well shall again be shut-in, ir	accordance with Paragraph	3
