Driftwood Oil would like to Pull this well and clean out perforations and well bore to PBTD. While working on this well we will stimulate and possibly acidize the current perforations.

1. MIRU well service unit. Unset existing packer and pull well to surface evaluating all equipment.

2. pick up Well New Hydro tool and RIH to perforations and stimulate existing perforations, then Clean the well to PBTD with hydro tool or a reverse unit if needed. evaluate the clean out and determine if acid is needed.

3 acid ize if needed.

4. pull down hole equipment, if ok rerun packer to OCD spec's and Do a post work over MIT test. OCD will be notified of all chart test 24 hours n in advance of test.

5. well will be returned to production.

6. estimate start date First week August 2023.

**Condition of Approval: notify
 OCD Hobbs office 24 hours
 prior of running MIT Test & Chart**

To Whom these concerns,

Driftwood oil 213843 Just bought these from EXTEX oil Co and there isn't any current well bore diagrams available in the well file. Driftwood OIL hasn't pulled these wells since the purchase of the wells so, we will build a well bore diagram after the well has been cleaned out and an accurate update can be obtained. Thanks Mike Dennis
