SR for Repair:

Devon moved a workover rig in on 10/19/22 – 11/17/22 to pull all 4-1/2" injection tubing then ran bit and scrapers in the 9-5/8" x 7" production casings, set a retrievable bridge plug down in the 7", and pressure tested all of the casing against that plug when we performed this MIT. We are still waiting on the new injection tubing to arrive, fiberglass lining installed, and all tools fabricated so that we can install this new injection string and perform the final MIT to bring the well back on injection. Attached is the MIT ran even though we still have to finish the workover on the well and will perform another MIT.
