**Actual Procedure:** EOG Resources is proposing a gas production calculation for the Ford Unit #203H well, short term while the additive nitrogen content used as the primary medium for the completion of the well decreases and normalizes to a naturally occurring level. EOG’s standard practice is to pay royalty on all gas volumes flared as a good steward and in our attempts to fully understand this well and the reservoir we are requesting your consideration of this calculation to do just that. Estimated time frame 90 days. Attached proposed gas production calculation
