Form C-144  
Revised October 11, 2022

Pit, Below-Grade Tank, or  
Proposed Alternative Method Permit or Closure Plan Application

Pit1

Type of action: ☐ Below grade tank registration  
☐ Permit of a pit or proposed alternative method  
☐ Closure of a pit, below-grade tank, or proposed alternative method  
☒ Modification to an existing permit/or registration  
☐ Closure plan only submitted for an existing permitted or non-permitted pit, below-grade tank, or proposed alternative method

**Instructions: Please submit one application (Form C-144) per individual pit, below-grade tank or alternative request**

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

Joseph Kennedy,

On behalf of Avant Natural Resources, LLC (Avant), CDH Consulting, LLC (CDH) is submitting this Pit Closure Report in accordance with 19.15.17.13 New Mexico Administrative Code (NMAC) to the New Mexico Department of Energy, Minerals, and Natural Resources-Oil Conservation Division (NMOCD) detailing protocols and procedures closing the permitted closed-loop tanks (Attachment A) formerly utilized at the Lea Federal Unit TR #029 (API #30-025-39077) well production location (Figure 1).

Avant discovered that the Lea Federal Unit TR #029 had an approved C-144 for a closed-loop tank (Pit Permit #P1-00284) during a recent acquisition. The original application was submitted by Samson Resources Company on May 14, 2008. As the current operator of the Lea Federal Unit TR #029, and in an effort to be good stewards of the land, Avant's goal is to properly close the closed-loop pit tank system as soon as possible. Recent communication with NMOCD regarding closure of closed-loop tank systems confirmed the following: *the NMOCD does not require sampling for a closed-loop system consisting of only above ground storage containers unless there was a release/spill from the closed-loop system.* The Lea Federal Unit TR #029 did not have a release reported from the closed-loop system, therefore sampling for closure is not required.

Below is the modification request (to current pit rule requirements) and results from the recent closed-loop system inspection.

#### **MODIFICATION TO AN EXISTING PERMIT/OR REGISTRATION**

Avant requests the NMOCD revise the registration to meet the current pit rule requirements and sampling limits (19.15.17.13 NMAC).

[www.CDHConsult.com](http://www.CDHConsult.com)

**PIT PERMIT CLOSURE**

On February 21, 2024, CDH personnel were onsite to complete a closed-loop inspection of the surface in the area where above ground closed-loop tanks were previously located. During the site inspection, no soil staining or signs of a release were observed in the former location of the closed-loop tanks (Attachment B). As no soil staining or signs of a leak or release were observed during the closed-loop inspection, no closure samples were collected.

CDH, on behalf of Avant, requests the NMOCD approve the closure of Pit Permit #P1-00284.

Please do not hesitate to contact me at (303) 501-3415 or [KTrantowLim@CDHConsult.com](mailto:KTrantowLim@CDHConsult.com) if you have any questions or require additional information.

Proposed Alternative Method Permit or Closure Plan Application

Type of action: ☐ Permit of a pit, closed-loop system, below-grade tank, or proposed alternative method  
☐ Closure of a pit, closed-loop system, below-grade tank, or proposed alternative method

**Instructions: Please submit one application (Form C-144) per individual pit, closed-loop system, below-grade tank or alternative request**

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

Submittal of an exception request is required. Exceptions must be submitted to the Santa Fe Environmental Bureau office for consideration of approval.

**Administrative Approvals and Exceptions:**  
Justifications and/or demonstrations of equivalency are required. Please refer to 19.15.17 NMAC for guidance.  
**Please check a box if one or more of the following is requested, if not leave blank:**  
☐ Administrative approval(s): Requests must be submitted to the appropriate division district or the Santa Fe Environmental Bureau office for consideration of approval.  
☐ Exception(s): Requests must be submitted to the Santa Fe Environmental Bureau office for consideration of approval.

**Siting Criteria (regarding permitting):** 19.15.17.10 NMAC

**Instructions:** The applicant must demonstrate compliance for each siting criteria below in the application. Recommendations of acceptable source material are provided below. Requests regarding changes to certain siting criteria may require administrative approval from the appropriate district office or may be considered an exception which must be submitted to the Santa Fe Environmental Bureau office for consideration of approval. Applicant must attach justification for request. Please refer to 19.15.17.10 NMAC for guidance. Siting criteria does not apply to drying pads or above-grade tanks associated with a closed-loop system.

Ground water is less than 50 feet below the bottom of the temporary pit, permanent pit, or below-grade tank.

## **CLOSED LOOP SYSTEM**

### **Design Plan**

Equipment list

- 2-250 BBL tanks to hold fluid
- 2-CRI Bins with track system
- 2-500 BBL frac tanks for fresh water
- 2-500 BBL frac tanks for brine water

### **Operation and Maintenance**

Closed Loop equipment will be inspected daily by each tour and any necessary maintenance performed

Any leak in system will be repaired and/or contained immediately

OCD notified within 48 hours

Remediation process started

### **Closure Plan**

During drilling operations all liquids, drilling fluids and cuttings

Will be hauled off via CRI (Controlled Recovery Incorporated Permit R-9166).

### **Completion**

1-Steel tank for flowback

1-Steel tank for cleanout

Fluids Disposed by CRI Permit R-9166

Solids Disposed at CRI
