Recommended response to following

- 1) San Juan 27-4 Unit 30P; API: 30-039-31184; SESW; sec.32, T.27N., R.4W.; Rio Arriba County, New Mexico; Lease NMNM78408B.

Drilled in May 2017 no paperwork about DSI status.

Hilcorp has visited the requested site and documented with the following photos:

There is no indication of a well ever being drilled, only a capped PVC pipe estimated as either

Initial measurement of depth of hole is 5.66' and estimated length of PVC is 6'. The diameter if the PVC pipe is approximately 14.5".

Hilcorp's preference is to pull the PVC pipe and top off the hole with approximately 5.6 cu ft or whatever is required to fill the hole to surface.

In the event Hilcorp cannot feasibly pull the PVC pipe, we would plan to fill the pipe approximately 5.3 cu ft or whatever is required to fill the hole to surface after cutting off the top of pipe to ground level.

Fill material will be local area soil.

Final Reclamation Plan

Onsite Completed on 6/20/2024 with JJ Miller and Bryan Hall

1. Location consists of a 56"x16" hole. Fill hole and compact until hole is filled. No other reclamation is required.
