13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Temp Housing Request:

SIMCOE is requesting approval to utilize the SIMCOE-operated NEBU 605 well pad to accommodate five temporary living quarters for up to 25 drilling rig employees. This location is essential to support drilling operations scheduled to begin on March 18, 2025, and continue through November 2025. SIMCOE has received a Wildlife Stipulation Exception, allowing operations to start on March 18, 2025. The use of this site will significantly enhance safety by reducing the number of personnel on the active drilling site, thereby lowering the potential for injury during emergency events. It will also alleviate onsite congestion, minimizing the risk of accidents or damage. Furthermore, housing personnel at the well pad will reduce traffic by minimizing daily commutes to and from nearby communities. The living quarters will be fully self-contained, featuring an integrated waste and water system. Adequate lighting will be provided to ensure safety, and the living quarters will be positioned as far from the producing equipment as possible. Safety barriers will be installed around the equipment to prevent any damage that could potentially lead to the release of water or gas. Enclosed trash containers will be provided onsite to maintain cleanliness, and the workforce will conduct daily inspections and cleanup. SIMCOE will also regularly inspect the site and address any issues that may arise. All equipment will be removed from the site prior to the winter closure on December 1, 2025.
