**Re: Dugan production Corp**

**API: 30-045-26778**

**Olympic # 2**

Based on the CBL, the TOC appear to be approximately at 170'. We request the following changes to the original approved NOI

- **Plug V, Kirtland-Ojo Alamo-Surface, 0'-380':** Perforate at 160'. Attempt to break circulation to surface. If a rate cannot be established to surface will perforate at 110' and will re-attempt. Run EOT to 380' to fill up 5 ½" casing and circulate cement to surface through BH through squeeze holes.

Will do all other plugs as approved/required in the original approved NOI to P & A

Please let us know if the requested changes are acceptable to BLM & NMOCD and we will proceed accordingly.

Regards,  
Aliph Reena
