| loren.diede | Notify the OCD inspection supervisor via email 24 hours prior to beginning Plug & Abandon (P&A) operations.                                                                                                                                                                                                                                                                                                                                                      | 10/23/2025     |
| loren.diede | NMOCD does not consider this well to be within the LPCH restricted area and an above ground P&A marker is required. NMOCD requires that plug (s) be added to cover the 7 Rivers = (945') and Yates = (720') formation tops. Submit photo and GPS coordinates of the P&A marker with the final P&A reports. The API# on the marker is to be clearly legible. Run CBL from CIBP to surface. Submit the CBL tif file to NMOCD for uploading into the Well Log File. | 10/23/2025     |
