13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Hilcorp TA'd the wellbore by dump bailing 4 sacks, 35' of cement on top of the CIBP already in the wellbore. This cement was placed in the well on 7/2/2025. Once it was determined that the crew did not order the witnessed MIT after the cement being placed, we requested a witnessed MIT. There was approximately a two month wait to get a representative on-site. The witnessed MIT was performed on 9/24/2025. This well failed the witnessed MIT due to a surface leak. The leak was repaired and the SR was approved.

We were then informed that we did not follow the correct filing channels and had to refile our NOI and SR for CIBP and NOI to TA, in addition to passing an additional witnessed MIT. Our witnessed MIT was performed and passed on 10/20/2025.

A copy of the passing MIT chart, current wellbore diagram, and our development plan are attached.

CIBP @ 3319', TOC @ 3284', 64' OF 2.875" TUBING IN THE HOLE.

A Mechanical Integrity Test (M.I.T.) was performed on, Well RED LAKE 28 K STATE #003

 M.I.T. is **successful**, the original chart has been retained by the Operator on site. Submit a **legible** scan of the chart with an attached **Original C-103Z Form** indicating reason for the test. A scanned image will appear on line via NMOCD website.

 M.I.T. is **unsuccessful**, the original chart is returned to the Operator. Repairs will be made; Operator is to schedule for a re-test within a 90-day period. If this is a test of a repaired well currently in non-compliance, all dates and requirements of the original are still in effect.

No expectation of extension should be construed because of this test.

X **M.I.T. for Temporary Abandonment**, shall include a detailed description on **Form C-103**, including the location of the CIBP and any other tubular goods in the well including the Operator's request for TA status timeline.

 M.I.T. is **successful**, after the secondary request of a scheduled M.I.T. is performed. Therefore, Operator has within a 30-day period from the M.I.T. to submit a current C-103 along with a legible scan of the Chart, including a detailed description of the repair(s). **Only after receipt of the C-103 will the non-compliance be closed.**

 M.I.T. is **successful**, Initial of an injection well, you must submit a **form C-103** to NMOCD within 30 days. A **C-103 form** must include a detailed description of the work performed on this well including the position of the packer, tubing Information, the date of first Injection, the tubing pressure and Injection volume.

Please ensure all documentation requirements are in place prior to injection process.

If I can be of additional assistance, please feel free to contact me at (575) 703-4641

INSTRUCTIONS ON BACK OF THIS FORM

Development Plan for:

Red Lake 28 K State #001	30-015-33740
Red Lake 28 K State #002	30-015-34005
Red Lake 28 K State #003	30-015-35560
Red Lake 28 K State #004	30-015-35541
Red Lake 28 N State #002	30-015-34002
Red Lake 28 N State #003	30-015-34382
Red Lake 28 N State #004	30-015-35540

Hilcorp Energy Company is requesting a TA permit for these wells while we work to implement our long-term plan. We plan to recomplete the Red Lake N wells into the San Andres formation and restimulate the Red Lake K wells in the Yeso formation. To efficiently do this we are seeking a surface commingle permit. Our process has been initiated, and we plan to do this work upon approval of our surface commingle permit and related filings. We are ready to file for the permit as soon as we get our surveys back to apply for the right of way access. To keep these wells off the demand inactive list we are wanting to TA the wellbore till this work is performed.
