**Subject:** FW: NE LYBROOK COM 262H

Good Morning Shaw / Heather,

Attached are the CBL logs for the NE Lybrook Unit 262H well. Cement was not seen at surface, but the log shows good cement at 700', and weak cement into surface casing with some spotty cement so surface. Both Virgil Lucero with the BLM and Monica Kuehling with the NMOCD were verbally notified and both gave their approval to drill and complete the well. Monica would like us to perform a braden head test approximately one month after completion.

Shaw, Logs are attached for filing with the agencies if you would please.  
Heather, would you mind scheduling the braden head test for the NMOCD?

Greatly appreciated,

Greg Olson
