Re: Dugan Production Corp
Presley # 1
API: 30-045-29061

Given the TOC at 125', we request permission to perforate at 120' and attempt to break circulation to surface. If a rate cannot be established, we request to perforate again at 100' and re-attempt given 2-7/8" slim-hole casing.

If the request is acceptable to BLM & NMOCD, please let us know and we will proceed accordingly
