JUSTIFICATION OF ALLOCATION: Hilcorp requests that production for the downhole commingle be allocated using the subtraction method in agreement with local agencies. The base formation is the Dakota and the added formations to be commingled is the Fruitland Coal/Pictured Cliffs. The subtraction method applies an average monthly production forecast to the base formation using historic production. All production from this well exceeding the forecast will be allocated to the new formations. After 3 years production will stabilize. A production average will be gathered during the 4 th year and will be utilized to create a fixed percentage based allocation. (No Change from Approved DHC)																							
Oil production will be allocated based on average formation yields from offset wells and will be a fixed rate for 4 years. DK-100%, FRC-0%, PC-0% (No Change from Approved DHC) After 4 years oil will be reevaluated and adjusted as needed based on average formation yields and new fixed gas allocation.

Gas Allocation:

Production for the downhole commingle will be allocated using the subtraction method in agreement with local agencies. The base formation is the Dakota and the added formation to be commingled is the Fruitland Coal/Pictured Cliffs. The subtraction method applies an average monthly production forecast to the base formation using historic production. All production from this well exceeding the forecast will be allocated to the new formation.

After 3 years production will stabilize. A production average will be gathered during the 4th year and will be utilized to create a fixed percentage based allocation.

New zones will be allocated using a fixed allocation. The split between FR/PC is based on the ratio of forecasted reserves as shown in the table below.

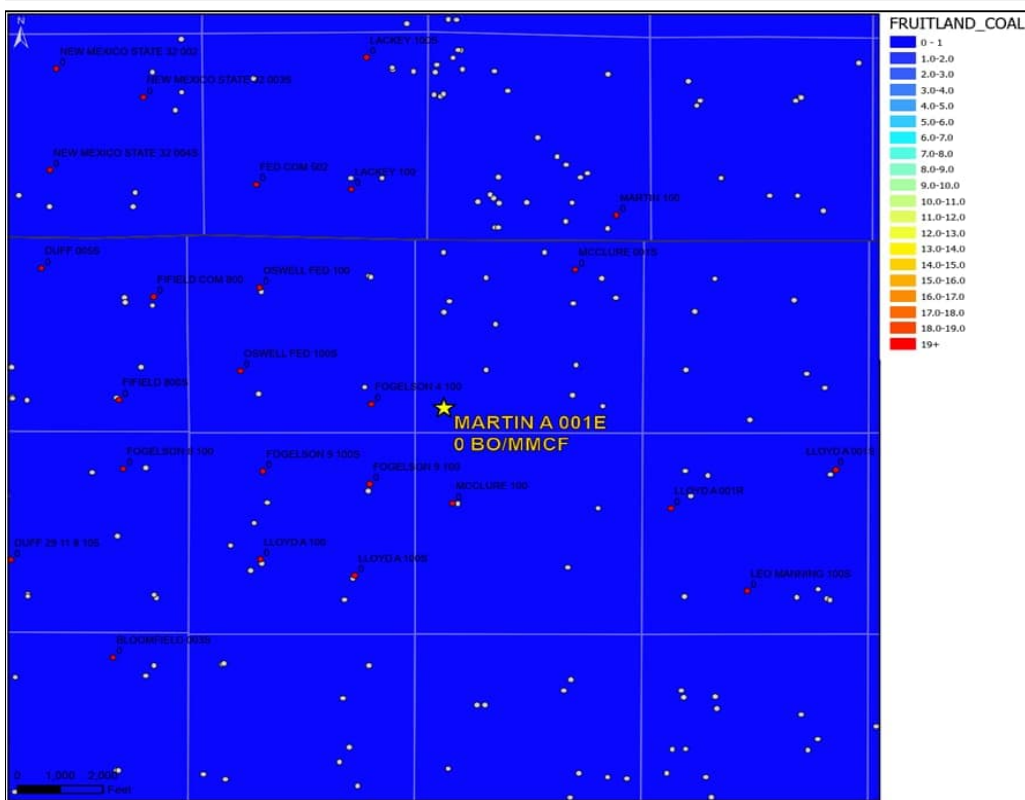

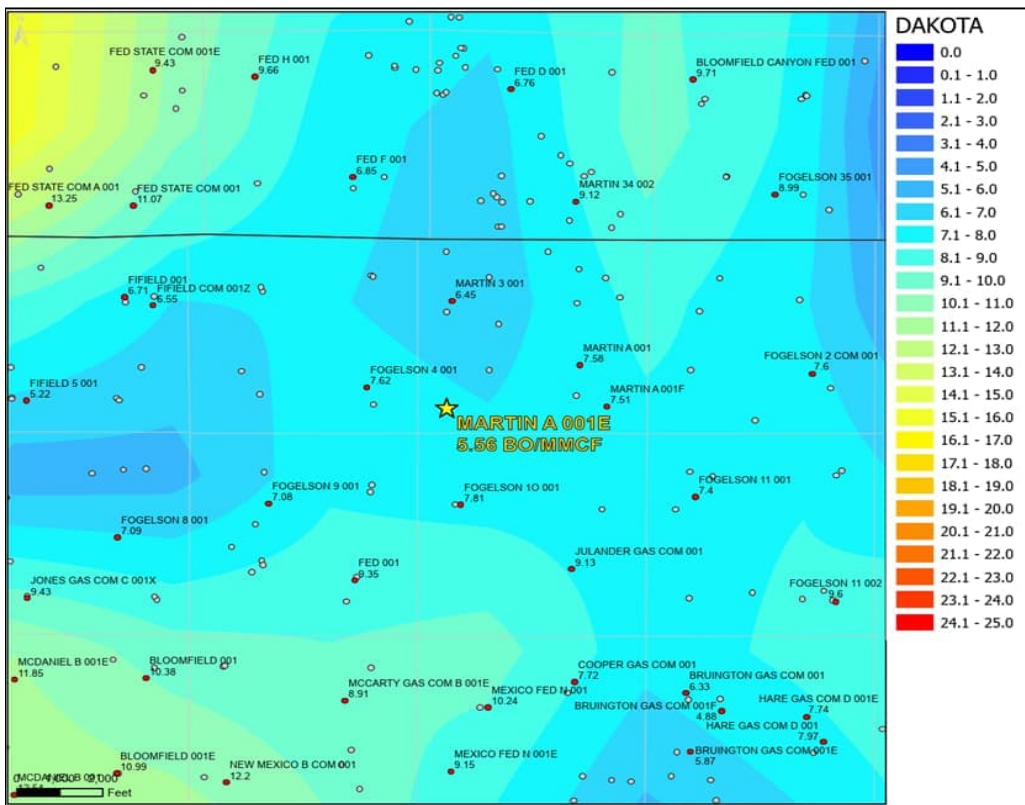

Formation	Remaing Reserves	Allocation
PC	286	16%
FRC	1552	84%

Oil Allocation:

Oil production will be allocated based on average formation yields from offset wells and will be a fixed rate for 4 years.

Formation	Yield (bbl/MM)	Remaining Reserves (MMcf)	% Oil Allocation
DK	5.56	571	100%
FRC	0	1552	0%
PC	0	286	0%
			100%
