of starting any proposed work). SEE RULE 19.15.7.14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Drilled to a depth of 970' hole became tight at approximately 600' pipe became stuck, after several days of working the pipe we ended up free pointing the pipe, made several attempts to fish out one 8" collar and bit sub with 17 ½" bit we were unsuccessful at retrieving the fish, top of fish is at 930'. Conditioned hole for casing job. Ran casing 13 3/8" to a depth of 630' lower hole bridged off, pumped 790 sks of cement, it did not circulate to surface. Rigged up loggers and ran a temp. log, top of cement at 282', pumped a top set job of 147 sks to surface.

At this time Kinder Morgan is requesting TA status for this well.
