

NOTE TO FILE:

January 17, 2007

API 30-059-20412
OXY USA Inc.
Well No. 19-35-042L

It is unclear at this time what will be done with this well. Huge amount of water produced may prove to be prohibitive when it comes to the commerciality of this well.

In June or July of 2007, OXY will work on this well when equipment is available onsite for their 2007 drilling program. OXY will try to squeeze off the water and put this well on production.

Whether successful or not, OXY will submit a C-105 (and a C-104 if producible) at that time. If operations are not successful, well will probably be plugged and abandoned.
