**APPLICATION OF DEVON ENERGY PRODUCTION
COMPANY, L.P., FOR A HORIZONTAL SPACING UNIT
AND COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22185

APPLICATION

Devon Energy Production Company, L.P. (“Devon”), OGRID No. 6137, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, Section 70-2-17, for an order (1) creating, a standard 800-acre, more or less, spacing and proration unit comprised of the NW/4 of Section 26 and the N/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico, and (2) pooling all uncommitted mineral interests in the Bone Spring formation, designated as an oil pool, underlying said unit.

In support of its Application, Devon states the following:

1. Devon is a working interest owner in the proposed horizontal spacing and proration unit (“HSU”) and has a right to drill a well thereon.
2. Devon proposes and dedicates to the HSU the **Burton Flat 26-28 Fed State Com 331H Well**, the **Burton Flat 26-28 Fed State Com 332H Well**, and the **Burton Flat 26-28 Fed State Com 333H Well**, as initial wells.
3. Devon proposes the **Burton Flat 26-28 Fed State Com 331H Well**, an oil well, to be horizontally drilled from a surface location in NE/4 NW/4 (Unit C) of Section 26, to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 28.

4. Devon proposes the **Burton Flat 26-28 Fed State Com 332H Well**, an oil well, to be horizontally drilled from a surface location in NE/4 NW/4 (Unit C) of Section 26, to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 28. The **Burton Flat 26-28 Fed State Com 332H Well** is the proximity well that is positioned in the unit to allow for the use of proximity tracts in the SW/4 NW/4 of Section 26 and the S/2 N/2 of Sections 27 and 28.

5. Devon proposes the **Burton Flat 26-28 Fed State Com 333H Well**, an oil well, to be horizontally drilled from a surface location in SE/4 NW/4 (Unit F) of Section 26, to a bottom hole location in the SW/4 NW/4 (Unit E) of Section 28.

6. The wells are orthodox in their location, and their take points and laterals comply with Statewide Rules for setbacks.

7. Devon has sought in good faith, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the wells or in the commitment of their interests to the wells for its development within the proposed HSU.

8. The pooling of all interests in the Bone Spring formation within the proposed HSU, and creation of the spacing unit, will avoid the drilling of unnecessary wells, prevent waste and protect correlative rights.

9. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Devon requests that all uncommitted interests in this HSU be pooled and that Devon be designated the operator of the proposed horizontal wells and HSU.

WHEREFORE, Devon requests that this Application be set for hearing on October 7, 2021, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

A. Approving the creation of a standard 800-acre, more or less, spacing and proration unit comprised of the NW/4 of Section 26 and the N/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico;

B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying the proposed HSU.

C. Approving the **Burton Flat 26-28 Fed State Com 331H Well**, the **Burton Flat 26-28 Fed State Com 332H Well**, and the **Burton Flat 26-28 Fed State Com 333H Well** as the wells for the HSU.

D. Designating Devon as operator of this HSU and the horizontal wells to be drilled thereon;

E. Authorizing Devon to recover its costs of drilling, equipping, and completing the wells;

F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Setting a 200% charge for the risk assumed by Devon in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

OIL CONSERVATION DIVISION**

**APPLICATION OF DEVON ENERGY PRODUCTION
COMPANY, L.P., FOR A HORIZONTAL SPACING UNIT
AND COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22187

APPLICATION

Devon Energy Production Company, L.P. (“Devon”), OGRID No. 6137, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, Section 70-2-17, for an order (1) creating, a standard 400-acre, more or less, spacing and proration unit comprised of the S/2 NW/4 of Section 26 and the S/2 N/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico, and (2) pooling all uncommitted mineral interests in the Wolfcamp formation, designated as a wildcat oil pool, underlying said unit.

In support of its Application, Devon states the following:

1. Devon is a working interest owner in the proposed horizontal spacing and proration unit (“HSU”) and has a right to drill a well thereon.
2. Devon proposes and dedicates to the HSU the **Burton Flat 26-28 Fed State Com 622H Well**, as an initial well.
3. Devon proposes the **Burton Flat 26-28 Fed State Com 622H Well**, an oil well, to be horizontally drilled from a surface location in the SE/4 NW/4 (Unit F) of Section 26, to a bottom hole location in the SW/4 NW/4 (Unit E) of Section 28.

4. The well is orthodox in its location, and its take points and lateral comply with Statewide Rules for setbacks.

5. Devon has sought in good faith, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for its development within the proposed HSU.

6. The pooling of all interests in the Wolfcamp formation within the proposed HSU, and creation of the spacing unit, will avoid the drilling of unnecessary wells, prevent waste and protect correlative rights.

7. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Devon requests that all uncommitted interests in this HSU be pooled and that Devon be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Devon requests that this Application be set for hearing on October 7, 2021, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

A. Approving the creation of a standard 400-acre, more or less, spacing and proration unit comprised of the S/2 NW/4 of Section 26 and the S/2 N/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico;

B. Pooling all uncommitted mineral interests in the Wolfcamp formation underlying the proposed HSU.

C. Approving the **Burton Flat 26-28 Fed State Com 622H Well** as the well for the HSU.

D. Designating Devon as operator of this HSU and the horizontal well to be drilled thereon;

E. Authorizing Devon to recover its costs of drilling, equipping, and completing the well;

F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Setting a 200% charge for the risk assumed by Devon in drilling and completing the well in the event a working interest owner elects not to participate in the well.

Respectfully submitted,

AND COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22185

AFFIDAVIT OF ANDY D. BENNETT

STATE OF OKLAHOMA)
) ss.
COUNTY OF OKLAHOMA)

I, being duly sworn on oath, state the following:

1. I am over the age of eighteen years and have the capacity to execute this Affidavit, which is based on my personal knowledge.
2. I am employed as a Senior Staff Landman with Devon Energy Production Company, L.P. ("Devon"), and I am familiar with the subject application and the lands involved. My credentials as an expert witness in petroleum land matters have been accepted by the New Mexico Oil Conservation Division ("Division") and made a matter of record.
3. This affidavit is submitted in connection with the filing by Devon of the above-referenced spacing and compulsory pooling application pursuant to 19.15.4.12.A(1).
4. Devon seeks an order pooling all uncommitted mineral interest in the Bone Spring formation (Avalon; Bone Spring, East; Pool Code: 3713) underlying a standard 800-acre, more or less, horizontal spacing and proration unit comprised of the NW/4 of Section 26 and the N/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico.
5. Under Case No. 22185, Devon seeks to dedicate to the unit three initial wells: **Burton**

**EXHIBIT
A**

Flat 26-28 Fed State Com 331H Well, the **Burton Flat 26-28 Fed State Com 332H Well**, and the **Burton Flat 26-28 Fed State Com 333H Well**.

6. The **Burton Flat 26-28 Fed State Com 331H Well** (API 30-015-pending) is to be horizontally drilled from a surface location in the NE/4 NW/4 (Unit C) of Section 26, to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 28; approximate TVD of 8,827'; approximate TMD of 21,327'; FTP in Section 26: approximately 440' FNL, 2,553' FWL; LTP in Section 28: approximately 440' FNL, 100' FWL.

7. The **Burton Flat 26-28 Fed State Com 332H Well** is to be horizontally drilled from a surface location in the NE/4 NW/4 (Unit C) of Section 26, to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 28; approximate TVD of 8,912'; approximate TMD of 21,412'; FTP in Section 26: approximately 1,310' FNL, 2,553' FWL; LTP in Section 28: approximately 1,310' FNL, 100' FWL. The **Burton Flat 26-28 Fed State Com 332H Well** is the proximity well that is positioned in the unit to allow for the use of proximity tracts in the SW/4 NW/4 of Section 26 and the S/2 N/2 of Sections 27 and 28.

8. The **Burton Flat 26-28 Fed State Com 333H Well** is to be horizontally drilled from a surface location in the SE/4 NW/4 (Unit F) of Section 26, to a bottom hole location in the SW/4 NW/4 (Unit E) of Section 28; approximate TVD of 8,837'; approximate TMD of 21,337'; FTP in Section 26: approximately 2,200' FNL, 2,552' FWL; LTP in Section 28: approximately 2,200' FNL, 100' FWL.

9. The proposed C-102 for each well is attached as **Exhibit A-1**.

10. A general location plat outlining the unit being pooled is attached hereto as **Exhibit A-2**, which shows the location of the proposed wells within the unit. The location of each well is orthodox and meets the Division's offset requirements for horizontal wells under statewide rules.

11. The parties being pooled, the nature of their interests, and their last known addresses are listed on **Exhibit A-2** attached hereto. **Exhibit A-2** includes information regarding working interest owners and overriding royalty interest owners.

12. There are no depth severances in the Bone Spring formation in this acreage.

13. I provided the law firm of Abadie & Schill P.C. a list of names and addresses for the uncommitted ORRI owners shown on **Exhibit A-2**. In compiling these addresses, I conducted a diligent search of the public records in Eddy County, New Mexico, where the wells are located, including phone directories and did computer searches to locate the contact information for parties entitled to notice. Fourteen mailings to ORRI owners are still listed as in-transit; therefore, the locations cannot yet be confirmed for: Aaron Heimke, Britt Trowbridge, Christopher C Bynum Sep Prop, Estate of Gwendolyn P Rutledge Alexis A Scott Personal Rep, John Halagan, Jorie B Lamb Revocable Trust Jorie B Lamb TTEE, Kathleen M Bynum Sep Pro, Mary Curtiss Mayfield, Patricia Marr Sep Prop, Robert Thomas Frankot Rev Lvg Tr DTD 10-08-2014 Robert Thomas Frankot TTEE, Rosina C Schutz, Sudie Marie Adams, Ter-Mack LP, and Tyler Trowbridge. Devon published notice in the Carlsbad Current Argus, a newspaper of general circulation in Eddy County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

14. Devon has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the wells or in the commitment of their interests to the wells for their development within the proposed

horizontal spacing unit. **Exhibit A-4** provides a chronology and history of contacts with the owners.

15. The interest owners being pooled have been contacted regarding the proposed wells but have failed or refused to voluntarily commit their interest in the wells. However, Devon has been in ongoing discussions with some of the interest owners to voluntarily enter into a Joint Operating Agreement (JOA). A number of major working interest owners have expressed their willingness to enter the JOA as proposed; others currently are working with us to consider changes. If a mutually agreeable JOA is reached between Devon and another interest owner or owners, Devon requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

16. **Exhibit A-3** is a sample proposal letter which includes the AFEs for each proposed well. The estimated cost of the wells set forth in the AFEs is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

17. Devon requests overhead and administrative rates of \$8,000/month for drilling each well and \$800/month for producing each well. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of southeastern New Mexico. Devon requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

18. Devon requests the maximum cost, plus a 200% risk charge be assessed against non-consenting working interest owners.

19. Devon requests that it be designated operator of the unit and wells.

20. Special considerations of this particular case: As described herein, these wells have a proposed unit for pooling that traverses the NW/4 of Section 26 and the N/2 of Sections 27 and

28; therefore, the unit proposed to the Division in the pooling application in the above-referenced case describes the entire 800-acre, more or less, unit for purposes of notice to the parties of the size and scope of the unit, pursuant to NMAC 19.15.4.9A, which Devon respectfully submits was satisfied, and for purposes of determining prevention of waste and the protection of correlative rights in the 800-acre standard unit under consideration. The unit itself encompasses lands that are part of a Federal Exploratory Unit (FEU) and lands that are outside the FEU, to create a “Straddle Comm” unit for the wells. Devon has been working closely with both the BLM and NM State Land Office to construct this unit as a standard spacing unit. Pursuant to the Division’s recommendation that the unit will prevent waste and protect correlative rights, the BLM plans to issue a Communitization Agreement (CA) for the unit that will cover the NW/4 of Section 26 and the N/2 of Sections 27 and 28, same as the spacing and proration unit requested herein, for allocation of revenue and payment among the interest owners. The BLM will then establish a Participation Area (PA), upon Devon’s showing of paying well determinations, such that the PA will match and correspond to the size of the CA and spacing unit.

21. Devon is respectfully requesting that the Division acknowledge the spacing unit encompassing the NW/4 of Section 26 and the N/2 of Sections 27 and 28 for purposes of the prevention of waste and protection of correlative rights. If the Division should find that it may need to segment the spacing unit based on lands inside and outside the FEU, in order to obtain proper interaction between the federal and non-federal lands, Devon requests that the Division make such segmentations with the acknowledgement that the proposed spacing unit as a whole is standard.

22. Devon respectfully submits that any segmentation of lands outside the FEU, in the N/2 of Section 28, would be built upon contiguous tracts of quarter-quarter sections in relation to the

quarter-quarter sections penetrated by the well intervals in the remainder of the unit, pursuant to NMAC 19.15.16.15B(1)(a) and – B(1)(d), thus having a standard-unit designation under statewide rules. Since the completed intervals of the wells are not wholly within the FEU, but are Straddle Comm wells, Devon submits that any separation of the proposed spacing unit from the FEU, pursuant to 19.15.16.15B(8), would be conditional rather than absolute; and therefore, the Division's acknowledgement of the standard 800-acre spacing unit should be appropriate with the incorporation of any adjustments the Division deems necessary, pursuant to the Division's broad authority in NMSA 1978 Section 70-2-11A.

23. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

24. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights, and will avoid the drilling of unnecessary wells.

25. The foregoing is correct and complete to the best of my knowledge and belief.

- Burton Flat 26-28 Fed Com 622H as a horizontal well to an approximate landing TVD of 9,100', bottom hole TVD' of 8,883', and approximate TMD of 21,640' into the Wolfcamp formation at an approximate SHL of 1,951' FNL and 2,518' FWL of Section 26-T20S-R28E and an approximate BHL of 1,870' FNL and 20' FWL of Section 28-T20S-R28E, Eddy County, New Mexico (collectively with all five proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.

Devon reserves the right to modify the locations and drilling plans described above in order to address surface and subsurface concerns. Devon will advise of any such modifications.

Each of the Wells will be drilled within a horizontal spacing unit that includes lands lying outside the boundaries of the Burton Flat Deep Unit ("BFDU") with lands lying within the boundaries of the BFDU. Since a portion of the wellbore lateral will traverse lands lying outside the boundaries of the BFDU, the Unit Operating Agreement dated July 1, 1972 for the BFDU is not applicable. Consequently, Devon proposes that the parties enter into a new Operating Agreement covering the NW/4 of Section 26 and the N/2 of Sections 27 and 28, T20S-R28E, Eddy County, New Mexico limited the Bone Spring and Wolfcamp formations. This new Operating Agreement would only apply to wellbores that traverse lands outside and inside the boundaries of the BFDU. Any wellbores that traverse lands lying totally within the boundaries of the BFDU would still be governed by the Unit Operating Agreement dated July 1, 1972.

In order to develop this horizontal spacing unit, Devon must have a voluntary agreement (such as the new Operating Agreement) or a compulsory pooling order in place for each working interest owner. If a voluntary agreement cannot be reached within 30 days of receipt of this letter, Devon will apply to the New Mexico Oil Conversation Division for an order pooling your interest into the horizontal spacing unit for the Wells, if uncommitted at such time.

Please indicate your election to participate in the drilling and completion of each of the Wells in the spaces provided below, within 30 days of receipt, by signing and returning one (1) copy of this letter and AFE, along with your well data requirements sheet. A Communization Agreement for said Wells will be supplied for your review and execution at a later date.

If your election is to participate, a copy of the new Operating Agreement and a cash call invoice will be sent following receipt of a timely election.

I understand this is a unique scenario that may elicit a lot of questions, so please do not hesitate to contact me at (405) 552-8002 or via email at Andy.Bennett@devon.com if you have any questions concerning this proposal.

Very truly yours,

Chronology of Contacts between Devon Energy Production Company, L.P. (“Devon”) and the Uncommitted Interest Owners in Case No. 22185, 22186, 22187, 22188, 22189 & 22190:

1. Well Proposal Letter Burton Flat 26-28 Fed State Com 331H-336H and 621H-624H Wells from Devon to all the working interest owners in May and July of 2021 (Exhibit A-3).
2. Initial email with discussion of agreements/drafts between Devon Energy Production Company, L.P. and the working interest owners, occurred in May and July 2021, following the mailing of the proposal letter.
3. Follow up email and phone call efforts with working interest owners, in July through September 2021, were not reciprocated and the interests remained uncommitted. Some working interest owners, such as Sabinal and ConocoPhillips, among others, have indicated a desire to enter into a mutually agreeable Joint Operating Agreement, and Devon is in negotiations with those owners as we speak.
4. Emailed with Sabinal Energy, LLC on September 30, 2021. They responded that they have entered an appearance in the Cases, but do not object to the Cases moving forward on October 7, 2021.

**APPLICATIONS OF DEVON ENERGY PRODUCTION
COMPANY, L.P., FOR A HORIZONTAL SPACING UNIT
AND COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22186

AFFIDAVIT OF ANDY D. BENNETT

STATE OF OKLAHOMA)
) ss.
COUNTY OF OKLAHOMA)

I, being duly sworn on oath, state the following:

1. I am over the age of eighteen years and have the capacity to execute this Affidavit, which is based on my personal knowledge.
2. I am employed as a Senior Staff Landman with Devon Energy Production Company, L.P. ("Devon"), and I am familiar with the subject application and the lands involved. My credentials as an expert witness in petroleum land matters have been accepted by the New Mexico Oil Conservation Division ("Division") and made a matter of record.
3. This affidavit is submitted in connection with the filing by Devon of the above-referenced spacing and compulsory pooling application pursuant to 19.15.4.12.A(1).
4. Devon seeks an order pooling all uncommitted mineral interest in the Wolfcamp formation (WC Burton Flat Upper Wolfcamp; Pool Code: 98315) underlying a standard 400-acre, more or less, spacing and proration unit comprised of the N/2 NW/4 of Section 26 and the N/2 N/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico.

**EXHIBIT
A**

5. Under Case No. 22186, Devon seeks to dedicate to the unit the **Burton Flat 26-28 Fed State Com 621H Well**, as an initial well. The **Burton Flat 26-28 Fed State Com 621H Well** (API 30-015-pending) is to be horizontally drilled from a surface location in the NE/4 NW/4 (Unit C) of Section 26, to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 28; approximate TVD of 9,071'; approximate TMD of 21,571'; FTP in Section 26: approximately 875' FNL, 2,553' FWL; LTP in Section 28: approximately 875' FNL, 100' FWL.

6. The proposed C-102 for the well is attached as **Exhibit A-1**.

7. A general location plat outlining the unit being pooled is attached hereto as **Exhibit A-2**, which shows the location of the proposed well within the unit. The location of the well is orthodox and meets the Division's offset requirements for horizontal wells under statewide rules.

8. The parties being pooled, the nature of their interests, and their last known addresses are listed on **Exhibit A-2** attached hereto. **Exhibit A-2** includes information regarding working interest owners and overriding royalty interest owners.

9. There are no depth severances in the Wolfcamp formation in this acreage.

10. I provided the law firm of Abadie & Schill P.C. a list of names and addresses for the uncommitted ORRI owners shown on **Exhibit A-2**. In compiling these addresses, I conducted a diligent search of the public records in Eddy County, New Mexico, where the well is located, including phone directories and did computer searches to locate the contact information for parties entitled to notice. Fourteen mailings to ORRI owners are still listed as in-transit, therefore the locations cannot yet be confirmed for: Aaron Heimke, Britt Trowbridge, Christopher C Bynum Sep Prop, Estate of Gwendolyn P Rutledge Alexis A Scott Personal Rep, John Halagan, Jorie B Lamb Revocable Trust Jorie B Lamb TTEE, Kathleen M Bynum Sep Pro, Mary Curtiss Mayfield, Patricia Marr Sep Prop, Robert Thomas Frankot Rev Lvg Tr DTD 10-08-2014 Robert Thomas

Frankot TTEE, Rosina C Schutz, Sudie Marie Adams, Ter-Mack LP, and Tyler Trowbridge. Devon published notice in the Carlsbad Current Argus, a newspaper of general circulation in Eddy County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

11. Devon has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for its development within the proposed horizontal spacing unit. **Exhibit A-4** provides a chronology and history of contacts with the owners.

12. The interest owners being pooled have been contacted regarding the proposed well but have failed or refused to voluntarily commit their interest in the well. However, Devon has been in ongoing discussions with some of the interest owners to voluntarily enter into a Joint Operating Agreement (JOA). A number of major working interest owners have expressed their willingness to enter the JOA as proposed; others currently are working with us to consider changes. If a mutually agreeable JOA is reached between Devon and another interest owner or owners, Devon requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

13. **Exhibit A-3** is a sample proposal letter which includes the AFEs for the proposed well. The estimated cost of the well set forth in the AFEs is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

14. Devon requests overhead and administrative rates of \$8,000/month for drilling the well and \$800/month for producing the well. These rates are fair and comparable to the rates charged by

other operators for wells of this type in this area of southeastern New Mexico. Devon requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

15. Devon requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners.

16. Devon requests that it be designated operator of the unit and well.

17. Special considerations of this particular case: As described herein, this well has a proposed unit for pooling that traverses the N/2 NW/4 of Section 26 and the N/2 N/2 of Sections 27 and 28; therefore, the unit proposed to the Division in the above-referenced case describes the entire 400-acre, more or less, unit for purposes of notice to the parties of the size and scope of the unit, pursuant to NMAC 19.15.4.9A, which Devon respectfully submits was satisfied, and for purposes of determining prevention of waste and the protection of correlative rights in the 400-acre standard unit under consideration. The unit itself encompasses both lands that are part of a Federal Exploratory Unit (FEU) and lands that are outside the FEU, to create a "Straddle Comm" unit for the well. Devon has been working closely with both the BLM and NM State Land Office to construct this unit as a standard spacing unit. Pursuant to the Division's recommendation that the unit will prevent waste and protect correlative rights, the BLM plans to issue a Communitization Agreement (CA) for the unit that will cover the N/2 NW/4 of Section 26 and the N/2 N/2 of Sections 27 and 28, same as the spacing and proration unit requested herein, for allocation of revenue and payment among the interest owners. The BLM will then establish a Participation Area (PA), upon Devon's showing of paying well determinations, such that the PA will match and correspond to the size of the CA and spacing unit.

18. Devon is respectfully requesting that the Division acknowledge the spacing unit encompassing the N/2 NW/4 of Section 26 and the N/2 N/2 of Sections 27 and 28 for purposes of

the prevention of waste and protection of correlative rights. If the Division should find that it may need to segment the spacing unit based on lands inside and outside the FEU, in order to obtain proper interaction between the federal and non-federal lands, Devon requests that the Division make such segmentations with the acknowledgement that the proposed spacing unit as a whole is standard.

19. Devon respectfully submits that any segmentation of lands outside the FEU, in the N/2 N/2 of Section 28, would be built upon contiguous tracts of quarter-quarter sections in relation to the quarter-quarter sections penetrated by the well interval in the remainder of the unit, pursuant to NMAC 19.15.16.15B(1)(a) and – B(1)(d), thus having a standard-unit designation under statewide rules. Since the completed intervals of the well is not wholly within the FEU, but is a Straddle Comm well, Devon submits that any separation of the proposed spacing unit from the FEU, pursuant to 19.15.16.15B(8), would be conditional rather than absolute; and therefore, the Division's designation of the standard 400-acre spacing unit should be appropriate with the incorporation of any adjustments the Division deems necessary, pursuant to the Division's broad authority in NMSA 1978 Section 70-2-11A.

20. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

21. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights, and will avoid the drilling of unnecessary wells.

22. The foregoing is correct and complete to the best of my knowledge and belief.

- Burton Flat 26-28 Fed Com 622H as a horizontal well to an approximate landing TVD of 9,100', bottom hole TVD' of 8,883', and approximate TMD of 21,640' into the Wolfcamp formation at an approximate SHL of 1,951' FNL and 2,518' FWL of Section 26-T20S-R28E and an approximate BHL of 1,870' FNL and 20' FWL of Section 28-T20S-R28E, Eddy County, New Mexico (collectively with all five proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.

Devon reserves the right to modify the locations and drilling plans described above in order to address surface and subsurface concerns. Devon will advise of any such modifications.

Each of the Wells will be drilled within a horizontal spacing unit that includes lands lying outside the boundaries of the Burton Flat Deep Unit ("BFDU") with lands lying within the boundaries of the BFDU. Since a portion of the wellbore lateral will traverse lands lying outside the boundaries of the BFDU, the Unit Operating Agreement dated July 1, 1972 for the BFDU is not applicable. Consequently, Devon proposes that the parties enter into a new Operating Agreement covering the NW/4 of Section 26 and the N/2 of Sections 27 and 28, T20S-R28E, Eddy County, New Mexico limited the Bone Spring and Wolfcamp formations. This new Operating Agreement would only apply to wellbores that traverse lands outside and inside the boundaries of the BFDU. Any wellbores that traverse lands lying totally within the boundaries of the BFDU would still be governed by the Unit Operating Agreement dated July 1, 1972.

In order to develop this horizontal spacing unit, Devon must have a voluntary agreement (such as the new Operating Agreement) or a compulsory pooling order in place for each working interest owner. If a voluntary agreement cannot be reached within 30 days of receipt of this letter, Devon will apply to the New Mexico Oil Conversation Division for an order pooling your interest into the horizontal spacing unit for the Wells, if uncommitted at such time.

Please indicate your election to participate in the drilling and completion of each of the Wells in the spaces provided below, within 30 days of receipt, by signing and returning one (1) copy of this letter and AFE, along with your well data requirements sheet. A Communization Agreement for said Wells will be supplied for your review and execution at a later date.

If your election is to participate, a copy of the new Operating Agreement and a cash call invoice will be sent following receipt of a timely election.

I understand this is a unique scenario that may elicit a lot of questions, so please do not hesitate to contact me at (405) 552-8002 or via email at Andy.Bennett@dvn.com if you have any questions concerning this proposal.

Very truly yours,

Devon Energy Production Company, L.P.

3. This affidavit is submitted in connection with the filing by Devon of the above-referenced spacing and compulsory pooling application pursuant to 19.15.4.12.A(1).
4. Devon seeks an order pooling all uncommitted mineral interest in the Wolfcamp formation (WC Burton Flat Upper Wolfcamp; Pool Code: 98315) underlying a standard 400-acre, more or less, spacing and proration unit comprised of the S/2 NW/4 of Section 26 and the S/2 N/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico.

**EXHIBIT
A**

5. Under Case No. 22187, Devon seeks to dedicate to the unit the **Burton Flat 26-28 Fed State Com 622H Well**, as an initial well. The **Burton Flat 26-28 Fed State Com 622H Well** (API 30-015-pending), to be horizontally drilled from a surface location in the SE/4 NW/4 (Unit F) of Section 26, to a bottom hole location in the SW/4 NW/4 (Unit E) of Section 28; approximate TVD of 9,100'; approximate TMD of 21,640'; FTP in Section 26: approximately 1,870' FNL, 2,553' FWL; LTP in Section 28: approximately 1,870' FNL, 100' FWL.

6. The proposed C-102 for the well is attached as **Exhibit A-1**.

7. A general location plat outlining the unit being pooled is attached hereto as **Exhibit A-2**, which shows the location of the proposed well within the unit. The location of the well is orthodox, and meets the Division's offset requirements for horizontal wells under statewide rules.

8. The parties being pooled, the nature of their interests, and their last known addresses are listed on **Exhibit A-2** attached hereto. **Exhibit A-2** includes information regarding working interest owners and overriding royalty interest owners.

9. There are no depth severances in the Wolfcamp formation in this acreage.

10. I provided the law firm of Abadie & Schill P.C. a list of names and addresses for the uncommitted ORRI owners shown on **Exhibit A-2**. In compiling these addresses, I conducted a diligent search of the public records in Eddy County, New Mexico, where the well is located, including phone directories and did computer searches to locate the contact information for parties entitled to notice. Fourteen mailings to ORRI owners are still listed as in-transit, therefore the locations cannot yet be confirmed for: Aaron Heimke, Britt Trowbridge, Christopher C Bynum Sep Prop, Estate of Gwendolyn P Rutledge Alexis A Scott Personal Rep, John Halagan, Jorie B Lamb Revocable Trust Jorie B Lamb TTEE, Kathleen M Bynum Sep Pro, Mary Curtiss Mayfield, Patricia Marr Sep Prop, Robert Thomas Frankot Rev Lvg Tr DTD 10-08-2014 Robert Thomas

Frankot TTEE, Rosina C Schutz, Sudie Marie Adams, Ter-Mack LP, and Tyler Trowbridge. Devon published notice in the Carlsbad Current Argus, a newspaper of general circulation in Eddy County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

11. Devon has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for its development within the proposed horizontal spacing unit. **Exhibit A-4** provides a chronology and history of contacts with the owners.

12. The interest owners being pooled have been contacted regarding the proposed well but have failed or refused to voluntarily commit their interest in the well. However, Devon has been in ongoing discussions with some of the interest owners to voluntarily enter into a Joint Operating Agreement (JOA). A number of major working interest owners have expressed their willingness to enter the JOA as proposed; others currently are working with us to consider changes. If a mutually agreeable JOA is reached between Devon and another interest owner or owners, Devon requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

13. **Exhibit A-3** is a sample proposal letter which includes the AFEs for the proposed well. The estimated cost of the well set forth in the AFEs is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

14. Devon requests overhead and administrative rates of \$8,000/month for drilling the well and \$800/month for producing the well. These rates are fair and comparable to the rates charged by

other operators for wells of this type in this area of southeastern New Mexico. Devon requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

15. Devon requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners.

16. Devon requests that it be designated operator of the unit and well.

17. Special considerations of this particular case: As described herein, this well has a proposed unit for pooling that traverses the S/2 NW/4 of Section 26 and the S/2 N/2 of Sections 27 and 28; therefore, the unit proposed to the Division in the above-referenced case describes the entire 400-acre, more or less, unit for purposes of notice to the parties of the size and scope of the unit, pursuant to NMAC 19.15.4.9A, which Devon respectfully submits was satisfied, and for purposes of determining prevention of waste and the protection of correlative rights in the 400-acre standard unit under consideration. The unit itself encompasses both lands that are part of a Federal Exploratory Unit (FEU) and lands that are outside the FEU, to create a "Straddle Comm" unit for the well. Devon has been working closely with both the BLM and NM State Land Office to construct this unit as a standard spacing unit. Pursuant to the Division's recommendation that the unit will prevent waste and protect correlative rights, the BLM plans to issue a Communitization Agreement (CA) for the unit that will cover the S/2 NW/4 of Section 26 and the S/2 N/2 of Sections 27 and 28, same as the spacing and proration unit requested herein, for allocation of revenue and payment among the interest owners. The BLM will then establish a Participation Area (PA), upon Devon's showing of paying well determinations, such that the PA will match and correspond to the size of the CA and spacing unit.

18. Devon is respectfully requesting that the Division acknowledge the spacing unit encompassing the S/2 NW/4 of Section 26 and the S/2 N/2 of Sections 27 and 28 for purposes of

the prevention of waste and protection of correlative rights. If the Division should find that it may need to segment the spacing unit based on lands inside and outside the FEU, in order to obtain proper interaction between the federal and non-federal lands, Devon requests that the Division make such segmentations with the acknowledgement that the proposed spacing unit as a whole is standard.

19. Devon respectfully submits that any segmentation of lands outside the FEU, in the S/2 N/2 of Section 28, would be built upon contiguous tracts of quarter-quarter sections in relation to the quarter-quarter sections penetrated by the well interval in the remainder of the unit, pursuant to NMAC 19.15.16.15B(1)(a) and – B(1)(d), thus having a standard-unit designation under statewide rules. Since the completed intervals of the well is not wholly within the FEU, but is a Straddle Comm well, Devon submits that any separation of the proposed spacing unit from the FEU, pursuant to 19.15.16.15B(8), would be conditional and not absolute; and therefore, the Division's acknowledgement of the standard 400-acre spacing unit should be appropriate with the incorporation of any adjustments the Division deems necessary, pursuant to the Division's broad authority in NMSA 1978 Section 70-2-11A.

20. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

21. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights, and will avoid the drilling of unnecessary wells.

22. The foregoing is correct and complete to the best of my knowledge and belief.

- Burton Flat 26-28 Fed Com 622H as a horizontal well to an approximate landing TVD of 9,100', bottom hole TVD' of 8,883', and approximate TMD of 21,640' into the Wolfcamp formation at an approximate SHL of 1,951' FNL and 2,518' FWL of Section 26-T20S-R28E and an approximate BHL of 1,870' FNL and 20' FWL of Section 28-T20S-R28E, Eddy County, New Mexico (collectively with all five proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.

Devon reserves the right to modify the locations and drilling plans described above in order to address surface and subsurface concerns. Devon will advise of any such modifications.

Each of the Wells will be drilled within a horizontal spacing unit that includes lands lying outside the boundaries of the Burton Flat Deep Unit ("BFDU") with lands lying within the boundaries of the BFDU. Since a portion of the wellbore lateral will traverse lands lying outside the boundaries of the BFDU, the Unit Operating Agreement dated July 1, 1972 for the BFDU is not applicable. Consequently, Devon proposes that the parties enter into a new Operating Agreement covering the NW/4 of Section 26 and the N/2 of Sections 27 and 28, T20S-R28E, Eddy County, New Mexico limited the Bone Spring and Wolfcamp formations. This new Operating Agreement would only apply to wellbores that traverse lands outside and inside the boundaries of the BFDU. Any wellbores that traverse lands lying totally within the boundaries of the BFDU would still be governed by the Unit Operating Agreement dated July 1, 1972.

In order to develop this horizontal spacing unit, Devon must have a voluntary agreement (such as the new Operating Agreement) or a compulsory pooling order in place for each working interest owner. If a voluntary agreement cannot be reached within 30 days of receipt of this letter, Devon will apply to the New Mexico Oil Conversation Division for an order pooling your interest into the horizontal spacing unit for the Wells, if uncommitted at such time.

Please indicate your election to participate in the drilling and completion of each of the Wells in the spaces provided below, within 30 days of receipt, by signing and returning one (1) copy of this letter and AFE, along with your well data requirements sheet. A Communization Agreement for said Wells will be supplied for your review and execution at a later date.

If your election is to participate, a copy of the new Operating Agreement and a cash call invoice will be sent following receipt of a timely election.

I understand this is a unique scenario that may elicit a lot of questions, so please do not hesitate to contact me at (405) 552-8002 or via email at Andy.Bennett@devon.com if you have any questions concerning this proposal.

Very truly yours,

Chronology of Contacts between Devon Energy Production Company, L.P. (“Devon”) and the Uncommitted Interest Owners in Case No. 22185, 22186, 22187, 22188, 22189 & 22190:

1. Well Proposal Letter Burton Flat 26-28 Fed State Com 331H-336H and 621H-624H Wells from Devon to all the working interest owners in May and July of 2021 (Exhibit A-3).
2. Initial email with discussion of agreements/drafts between Devon Energy Production Company, L.P. and the working interest owners, occurred in May and July 2021, following the mailing of the proposal letter.
3. Follow up email and phone call efforts with working interest owners, in July through September 2021, were not reciprocated and the interests remained uncommitted. Some working interest owners, such as Sabinal and ConocoPhillips, among others, have indicated a desire to enter into a mutually agreeable Joint Operating Agreement, and Devon is in negotiations with those owners as we speak.
4. Emailed with Sabinal Energy, LLC on September 30, 2021. They responded that they have entered an appearance in the Cases, but do not object to the Cases moving forward on October 7, 2021.

Case No. 22185

AFFIDAVIT OF JOE DIXON

I, Joe Dixon, being duly sworn on oath, state the following:

1. I am over the age of 18, and I have personal knowledge of the matters stated herein.
2. I am employed as a petroleum geologist for Devon Energy Production Company, L.P. (“Devon”), and I am familiar with the subject application and the geology involved.
3. This affidavit is submitted in connection with the filing by Devon of the above-referenced compulsory pooling application pursuant to 19.15.4.12.A(1) NMAC.
4. I have testified previously by affidavit before the Oil Conservation Division (“Division”) as an expert petroleum geologist; my credentials have been made a matter of record, and I have been qualified as an expert by the Division.
 - a. I have a Bachelor of Science Degree in Geology from Purdue University and a Master of Science Degree in Geology from Oklahoma State University.
 - b. I have worked on New Mexico Oil and Gas matters since November 2020.
5. **Exhibit B-1** is a structure map showing the depth (subsea) to the top of the Wolfcamp formation, a marker that defines the base of the target interval for the proposed

well. Contour interval is 20'. The unit being pooled is outlined by red rectangle. The structure map shows that there is a regional down-dip to the East-Southeast. I do not observe any faulting, pinchouts, or other geologic impediments to developing this targeted interval.

6. **Exhibit B-2** is a stratigraphic cross-section flattened on the Wolfcamp top. Each well in the cross-section contains a gamma ray, resistivity, and porosity log. The cross-section demonstrates continuity and consistent thickness across the target zone. The well logs on the cross-section give a representative sample of the 3rd Bone Spring Sand. The landing zone is highlighted by the well number.

7. Additional exhibits for the benefit of the Division's review include **Exhibit B-3**, a gross isochore of the 3rd Bone Spring Sand, as well as **Exhibits B-4 and B-5**. **Exhibit B-4** is a gun barrel representation of the unit, and **Exhibit B-5** is a structural cross section built along the wellbore trajectory.

8. I conclude from the attached exhibits that:

- a. The horizontal spacing and proration unit is justified from a geologic standpoint.
- b. There are no structural impediments or faulting that will interfere with horizontal development.
- c. Each quarter-quarter section in the unit will contribute more or less equally to production.

9. The preferred well orientation in this area is East-West so that the wells run sub-perpendicular to the inferred orientation of the maximum horizontal stress.

10. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

11. The granting of this Application is in the interests of conservation, the prevention of waste and the drilling of unnecessary wells, and the protection of correlative rights.

12. The foregoing is correct and complete to the best of my knowledge and belief.

Case No. 22187

AFFIDAVIT OF JOE DIXON

I, Joe Dixon, being duly sworn on oath, state the following:

1. I am over the age of 18, and I have personal knowledge of the matters stated herein.
2. I am employed as a petroleum geologist for Devon Energy Production Company, L.P. (“Devon”), and I am familiar with the subject application and the geology involved.
3. This affidavit is submitted in connection with the filing by Devon of the above-referenced compulsory pooling application pursuant to 19.15.4.12.A(1) NMAC.
4. I have testified previously by affidavit before the Oil Conservation Division (“Division”) as an expert petroleum geologist; my credentials have been made a matter of record, and I have been qualified as an expert by the Division.
 - a. I have a Bachelor of Science Degree in Geology from Purdue University and a Master of Science Degree in Geology from Oklahoma State University.
 - b. I have worked on New Mexico Oil and Gas matters since November 2020.
5. **Exhibit B-1** is a structure map showing the depth (subsea) to the top of the Wolfcamp formation, a marker that defines the top of the target interval for the proposed

well. Contour interval is 20'. The unit being pooled is outlined by red rectangle. The structure map shows that there is a regional down-dip to the East-Southeast. I do not observe any faulting, pinchouts, or other geologic impediments to developing this targeted interval.

6. **Exhibit B-2** is a stratigraphic cross-section flattened on the Wolfcamp top. Each well in the cross-section contains a gamma ray, resistivity, and porosity log. The cross-section demonstrates continuity and consistent thickness across the target zone. The well logs on the cross-section give a representative sample of the Wolfcamp formation. The landing zone is highlighted by the well number.

7. Additional exhibits for the benefit of the Division's review include **Exhibit B-3**, a gross isochore of the Wolfcamp XY, as well as **Exhibits B-4 and B-5**. **Exhibit B-4** is a gun barrel representation of the unit, and **Exhibit B-5** is a structural cross section built along the wellbore trajectory.

8. I conclude from the attached exhibits that:

- a. The horizontal spacing and proration unit is justified from a geologic standpoint.
- b. There are no structural impediments or faulting that will interfere with horizontal development.
- c. Each quarter-quarter section in the unit will contribute more or less equally to production.

9. The preferred well orientation in this area is East-West so that the wells run sub-perpendicular to the inferred orientation of the maximum horizontal stress.

10. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

11. The granting of this Application is in the interests of conservation, the prevention of waste and the drilling of unnecessary wells, and the protection of correlative rights.

12. The foregoing is correct and complete to the best of my knowledge and belief.

Also to be considered will be the cost of drilling and completing the wells and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the wells and units; and a 200% charge for the risk involved in drilling and completing the wells. AND COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22188

APPLICATION

Devon Energy Production Company, L.P. (“Devon”), OGRID No. 6137, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, Section 70-2-17, for an order (1) creating, a standard 800-acre, more or less, spacing and proration unit comprised of the SW/4 of Section 26 and the S/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico, and (2) pooling all uncommitted mineral interests in the Bone Spring formation, designated as an oil pool, underlying said unit.

In support of its Application, Devon states the following:

1. Devon is a working interest owner in the proposed horizontal spacing and proration unit (“HSU”) and has a right to drill a well thereon.
2. Devon proposes and dedicates to the HSU the **Burton Flat 26-28 Fed State Com 334H Well**, the **Burton Flat 26-28 Fed State Com 335H Well**, and the **Burton Flat 26-28 Fed State Com 336H Well**, as initial wells.
3. Devon proposes the **Burton Flat 26-28 Fed State Com 334H Well**, an oil well, to be horizontally drilled from a surface location in the SE/4 NW/4 (Unit F) of Section 26, to a bottom hole location in the NW/4 SW/4 (Unit L) of Section 28.

4. Devon proposes the **Burton Flat 26-28 Fed State Com 335H Well**, an oil well, to be horizontally drilled from a surface location in SE/4 SW/4 (Unit N) of Section 26, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 28. The **Burton Flat 26-28 Fed State Com 335H Well** is the proximity well that is positioned in the unit to allow for the use of proximity tracts in the N/2 SW/4 of Section 26 and the N/2 S/2 of Sections 27 and 28.

5. Devon proposes the **Burton Flat 26-28 Fed State Com 336H Well**, an oil well, to be horizontally drilled from a surface location in (SE/4 SW/4) (Unit N) of Section 26, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 28.

6. The wells are orthodox in their location, and their take points and laterals comply with Statewide Rules for setbacks.

7. Devon has sought in good faith, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the wells for its development within the proposed HSU.

8. The pooling of all interests in the Bone Spring formation within the proposed HSU, and creation of the spacing unit, will avoid the drilling of unnecessary wells, prevent waste and protect correlative rights.

9. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Devon requests that all uncommitted interests in this HSU be pooled and that Devon be designated the operator of the proposed horizontal wells and HSU.

WHEREFORE, Devon requests that this Application be set for hearing on October 7, 2021, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

- A. Approving the creation of a standard 800-acre, more or less, spacing and proration unit comprised of the SW/4 of Section 26 and the S/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico;
- B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying the proposed HSU.
- C. Approving the **Burton Flat 26-28 Fed State Com 334H Well**, the **Burton Flat 26-28 Fed State Com 335H Well**, and the **Burton Flat 26-28 Fed State Com 336H Well** as the wells for the HSU.
- D. Designating Devon as operator of this HSU and the horizontal wells to be drilled thereon;
- E. Authorizing Devon to recover its costs of drilling, equipping, and completing the wells;
- F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- G. Setting a 200% charge for the risk assumed by Devon in drilling and completing the wells in the event a working interest owner elects not to participate in the well.

ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATION OF DEVON ENERGY PRODUCTION
COMPANY, L.P., FOR A HORIZONTAL SPACING UNIT
AND COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22190

APPLICATION

Devon Energy Production Company, L.P. (“Devon”), OGRID No. 6137, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, Section 70-2-17, for an order (1) creating, a standard 400-acre, more or less, spacing and proration unit comprised of the S/2 SW/4 of Section 26 and the S/2 S/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico, and (2) pooling all uncommitted mineral interests in the Wolfcamp formation, designated as a wildcat oil pool, underlying said unit.

In support of its Application, Devon states the following:

1. Devon is a working interest owner in the proposed horizontal spacing and proration unit (“HSU”) and has a right to drill a well thereon.
2. Devon proposes and dedicates to the HSU the **Burton Flat 26-28 Fed State Com 624H Well**, as an initial well.
3. Devon proposes the **Burton Flat 26-28 Fed State Com 624H Well**, an oil well, to be horizontally drilled from a surface location in the SE/4 SW/4 (Unit N) of Section 26, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 28.

4. The well is orthodox in its location, and its take points and lateral comply with Statewide Rules for setbacks.

5. Devon has sought in good faith, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for its development within the proposed HSU.

6. The pooling of all interests in the Wolfcamp formation within the proposed HSU, and creation of the spacing unit, will avoid the drilling of unnecessary wells, prevent waste and protect correlative rights.

7. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Devon requests that all uncommitted interests in this HSU be pooled and that Devon be designated the operator of the proposed horizontal wells and HSU.

WHEREFORE, Devon requests that this Application be set for hearing on October 7, 2021, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

A. Approving the creation of a standard 400-acre, more or less, spacing and proration unit comprised of the S/2 SW/4 of Section 26 and the S/2 S/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico;

B. Pooling all uncommitted mineral interests in the Wolfcamp formation underlying the proposed HSU.

C. Approving the **Burton Flat 26-28 Fed State Com 624H Well** as the well for the HSU.

D. Designating Devon as operator of this HSU and the horizontal well to be drilled thereon;

E. Authorizing Devon to recover its costs of drilling, equipping, and completing the well;

F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Setting a 200% charge for the risk assumed by Devon in drilling and completing the well in the event a working interest owner elects not to participate in the well.

Respectfully submitted,

AND COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22188

AFFIDAVIT OF ANDY D. BENNETT

STATE OF OKLAHOMA)
) ss.
COUNTY OF OKLAHOMA)

I, being duly sworn on oath, state the following:

1. I am over the age of eighteen years and have the capacity to execute this Affidavit, which is based on my personal knowledge.
2. I am employed as a Senior Staff Landman with Devon Energy Production Company, L.P. ("Devon"), and I am familiar with the subject application and the lands involved. My credentials as an expert witness in petroleum land matters have been accepted by the New Mexico Oil Conservation Division ("Division") and made a matter of record.
3. This affidavit is submitted in connection with the filing by Devon of the above-referenced spacing and compulsory pooling application pursuant to 19.15.4.12.A(1).
4. Devon seeks an order pooling all uncommitted mineral interest in the Bone Spring formation (Avalon; Bone Spring, East; Pool Code: 3713) underlying a standard 800-acre, more or less, horizontal spacing and proration unit comprised of the SW/4 of Section 26 and the S/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico.
5. Under Case No. 22188, Devon seeks to dedicate to the unit three initial wells: **Burton**

**EXHIBIT
A**

Flat 26-28 Fed State Com 334H Well, the **Burton Flat 26-28 Fed State Com 335H Well**, and the **Burton Flat 26-28 Fed State Com 336H Well**.

6. The **Burton Flat 26-28 Fed State Com 334H Well** (API 30-015-pending) is to be horizontally drilled from a surface location in the SE/4 NW/4 (Unit F) of Section 26, to a bottom hole location in the NW/4 SW/4 (Unit L) of Section 28; approximate TVD of 8,922'; approximate TMD of 21,422'; FTP in Section 26: approximately 2,200' FSL, 2,552' FWL; LTP in Section 28: approximately 2,200' FSL, 100' FWL.

7. The **Burton Flat 26-28 Fed State Com 335H Well** is to be horizontally drilled from a surface location in the SE/4 SW/4 (Unit N) of Section 26, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 28; approximate TVD of 8,872'; approximate TMD of 21,372'; FTP in Section 26: approximately 1,310' FSL, 2,551' FWL; LTP in Section 28: approximately 1,310' FSL, 100' FWL. The **Burton Flat 26-28 Fed State Com 335H Well** is the proximity well that is positioned in the unit to allow for the use of proximity tracts in the N/2 SW/4 of Section 26 and the N/2 S/2 of Sections 27 and 28.

8. The **Burton Flat 26-28 Fed State Com 336H Well** is to be horizontally drilled from a surface location in the SE/4 SW/4 (Unit N) of Section 26, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 28; approximate TVD of 8,922'; approximate TMD of 21,422'; FTP in Section 26: approximately 440' FSL, 2,550' FWL; LTP in Section 28: approximately 440' FSL, 100' FWL.

9. The proposed C-102 for each well is attached as **Exhibit A-1**.

10. A general location plat outlining the units being pooled is attached hereto as **Exhibit A-2**, which show the locations of the proposed wells within the unit. The location of each well is orthodox and meets the Division's offset requirements for horizontal wells under statewide rules.

11. The parties being pooled, the nature of their interests, and their last known addresses are listed on **Exhibit A-2** attached hereto. **Exhibit A-2** includes information regarding working interest owners and overriding royalty interest owners.

12. There are no depth severances in the Bone Spring formation in this acreage.

13. I provided the law firm of Abadie & Schill P.C. a list of names and addresses for the uncommitted ORRI owners shown on **Exhibit A-2**. In compiling these addresses, I conducted a diligent search of the public records in Eddy County, New Mexico, where the wells are located, including phone directories and did computer searches to locate the contact information for parties entitled to notice. Fourteen mailings to ORRI owners are still listed as in-transit; therefore, the locations cannot yet be confirmed for: Aaron Heimke, Britt Trowbridge, Christopher C Bynum Sep Prop, Estate of Gwendolyn P Rutledge Alexis A Scott Personal Rep, John Halagan, Jorie B Lamb Revocable Trust Jorie B Lamb TTEE, Kathleen M Bynum Sep Pro, Mary Curtiss Mayfield, Patricia Marr Sep Prop, Robert Thomas Frankot Rev Lvg Tr DTD 10-08-2014 Robert Thomas Frankot TTEE, Rosina C Schutz, Sudie Marie Adams, Ter-Mack LP, and Tyler Trowbridge. Devon published notice in the Carlsbad Current Argus, a newspaper of general circulation in Eddy County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

14. Devon has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the wells or in the commitment of their interests to the wells for their development within the proposed

horizontal spacing unit. **Exhibit A-4** provides a chronology and history of contacts with the owners.

15. The interest owners being pooled have been contacted regarding the proposed wells but have failed or refused to voluntarily commit their interest in the wells. However, Devon has been in ongoing discussions with some of the interest owners to voluntarily enter into a Joint Operating Agreement (JOA). A number of major working interest owners have expressed their willingness to enter the JOA as proposed; others currently are working with us to consider changes. If a mutually agreeable JOA is reached between Devon and another interest owner or owners, Devon requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

16. **Exhibit A-3** is a sample proposal letter which includes the AFEs for each proposed well. The estimated cost of the wells set forth in the AFEs is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

17. Devon requests overhead and administrative rates of \$8,000/month for drilling each well and \$800/month for producing each well. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of southeastern New Mexico. Devon requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

18. Devon requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners.

19. Devon requests that it be designated operator of the unit and wells.

20. Special considerations in this particular case: As described herein, these wells have a proposed unit for pooling that traverses the SW/4 of Section 26 and the S/2 of Sections 27 and 28;

therefore, the unit proposed to the Division in the above-referenced case describes the entire 800-acre, more or less, unit for purposes of notice to the parties of the size and scope of the unit, pursuant to NMAC 19.15.4.9A, which Devon respectfully submits was satisfied, and for purposes of determining prevention of waste and the protection of correlative rights in the 800-acre standard unit under consideration. The unit itself encompasses both lands that are part of a Federal Exploratory Unit (FEU) and lands that are outside the FEU, to create a “Straddle Comm” unit for the wells. Devon has been working closely with both the BLM and NM State Land Office to construct this unit as a standard spacing unit. Pursuant to the Division’s recommendation that the unit will prevent waste and protect correlative rights, the BLM plans to issue a Communitization Agreement (CA) for the unit that will cover the SW/4 of Section 26 and the S/2 of Sections 27 and 28, same as the spacing and proration unit requested herein, for allocation of revenue and payment among the interest owners within the unit. The BLM will then establish a Participation Area (PA), upon Devon’s showing of paying well determinations, such that the PA will match and correspond to the size of the CA and spacing unit.

21. Devon is respectfully requesting that the Division acknowledge the spacing unit encompassing the SW/4 of Section 26 and the S/2 of Sections 27 and 28 for purposes of the prevention of waste and protection of correlative rights. If the Division should find that it may need to segment the spacing unit based on lands inside and outside the FEU, in order to obtain proper interaction between the federal and non-federal lands, Devon requests that the Division make such segmentations with the acknowledgement that the proposed spacing unit as a whole is standard.

22. Devon respectfully submits that any segmentation of lands outside the FEU, in the SW/4 of Section 28, would be built upon contiguous tracts of quarter-quarter sections in relation to the

quarter-quarter sections penetrated by the well intervals in the remainder of the unit, pursuant to NMAC 19.15.16.15B(1)(a) and – B(1)(d), thus having a standard-unit designation under statewide rules. Since the completed intervals of the wells are not wholly within the FEU, but are Straddle Comm wells, Devon submits that any separation of the proposed spacing unit from the FEU, pursuant to 19.15.16.15B(8), would be conditional and not absolute; and therefore, the Division's acknowledgment of the standard 800-acre spacing unit should be appropriate with the incorporation of any adjustments the Division deems necessary, pursuant to the Division's broad authority in NMSA 1978 Section 70-2-11A.

23. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

24. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights, and will avoid the drilling of unnecessary wells.

25. The foregoing is correct and complete to the best of my knowledge and belief.

- Burton Flat 26-28 Fed Com 624H as a horizontal well to an approximate landing TVD of 9,140', bottom hole TVD' of 8,888', and approximate TMD of 21,640' into the Wolfcamp formation at an approximate SHL of 806' FSL and 2,438' FWL of Section 26-T20S-R28E and an approximate BHL of 875' FSL and 20' FWL of Section 28-T20S-R28E, Eddy County, New Mexico (collectively with all five proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.

Devon reserves the right to modify the locations and drilling plans described above in order to address surface and subsurface concerns. Devon will advise of any such modifications.

Each of the Wells will be drilled within a horizontal spacing unit that includes lands lying outside the boundaries of the Burton Flat Deep Unit ("BFDU") with lands lying within the boundaries of the BFDU. Since a portion of the wellbore lateral will traverse lands lying outside the boundaries of the BFDU, the Unit Operating Agreement dated July 1, 1972 for the BFDU is not applicable. Consequently, Devon proposes that the parties enter into a new Operating Agreement covering the SW/4 of Section 26 and the S/2 of Sections 27 and 28, T20S-R28E, Eddy County, New Mexico limited the Bone Spring and Wolfcamp formations. This new Operating Agreement would only apply to wellbores that traverse lands outside and inside the boundaries of the BFDU. Any wellbores that traverse lands lying totally within the boundaries of the BFDU would still be governed by the Unit Operating Agreement dated July 1, 1972.

In order to develop this horizontal spacing unit, Devon must have a voluntary agreement (such as the new Operating Agreement) or a compulsory pooling order in place for each working interest owner. If a voluntary agreement cannot be reached within 30 days of receipt of this letter, Devon will apply to the New Mexico Oil Conversation Division for an order pooling your interest into the horizontal spacing unit for the Wells, if uncommitted at such time.

Please indicate your election to participate in the drilling and completion of each of the Wells in the spaces provided below, within 30 days of receipt, by signing and returning one (1) copy of this letter and AFE, along with your well data requirements sheet. A Communization Agreement for said Wells will be supplied for your review and execution at a later date.

If your election is to participate, a copy of the new Operating Agreement and a cash call invoice will be sent following receipt of a timely election.

I understand this is a unique scenario that may elicit a lot of questions, so please do not hesitate to contact me at (405) 552-8002 or via email at Andy.Bennett@devon.com if you have any questions concerning this proposal.

Very truly yours,

Chronology of Contacts between Devon Energy Production Company, L.P. (“Devon”) and the Uncommitted Interest Owners in Case No. 22185, 22186, 22187, 22188, 22189 & 22190:

1. Well Proposal Letter Burton Flat 26-28 Fed State Com 331H-336H and 621H-624H Wells from Devon to all the working interest owners in May and July of 2021 (Exhibit A-3).
2. Initial email with discussion of agreements/drafts between Devon Energy Production Company, L.P. and the working interest owners, occurred in May and July 2021, following the mailing of the proposal letter.
3. Follow up email and phone call efforts with working interest owners, in July through September 2021, were not reciprocated and the interests remained uncommitted. Some working interest owners, such as Sabinal and ConocoPhillips, among others, have indicated a desire to enter into a mutually agreeable Joint Operating Agreement, and Devon is in negotiations with those owners as we speak.
4. Emailed with Sabinal Energy, LLC on September 30, 2021. They responded that they have entered an appearance in the Cases, but do not object to the Cases moving forward on October 7, 2021.

Case No. 22189

AFFIDAVIT OF ANDY D. BENNETT

STATE OF OKLAHOMA)
) ss.
COUNTY OF OKLAHOMA)

I, being duly sworn on oath, state the following:

1. I am over the age of eighteen years and have the capacity to execute this Affidavit, which is based on my personal knowledge.
2. I am employed as a Senior Staff Landman with Devon Energy Production Company, L.P. ("Devon"), and I am familiar with the subject application and the lands involved. My credentials as an expert witness in petroleum land matters have been accepted by the New Mexico Oil Conservation Division ("Division") and made a matter of record.
3. This affidavit is submitted in connection with the filing by Devon of the above-referenced spacing and compulsory pooling application pursuant to 19.15.4.12.A(1).
4. Devon seeks an order pooling all uncommitted mineral interest in the Wolfcamp formation (WC Burton Flat Upper Wolfcamp; Pool Code: 98315) underlying a standard 400-acre, more or less, spacing and proration unit comprised of the N/2 SW/4 of Section 26 and the N/2 S/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico.

**EXHIBIT
A**

5. Under Case No. 22189, Devon seeks to dedicate to the unit the **Burton Flat 26-28 Fed State Com 623H Well**, as an initial well. The **Burton Flat 26-28 Fed State Com 623H Well** (API 30-015-pending), to be horizontally drilled from a surface location in the SE/4 SW/4 (Unit N) of Section 26, to a bottom hole location in the NW/4 SW/4 (Unit L) of Section 28; approximate TVD of 9,128'; approximate TMD of 21,628'; FTP in Section 26: approximately 1,870' FSL, 2,552' FWL; LTP in Section 28: approximately 1,870' FSL, 100' FWL.

6. The proposed C-102 for the well is attached as **Exhibit A-1**.

7. A general location plat outlining the unit being pooled is attached hereto as **Exhibit A-2**, which shows the location of the proposed well within the unit. The location of the well is orthodox and meets the Division's offset requirements for horizontal wells under statewide rules.

8. The parties being pooled, the nature of their interests, and their last known addresses are listed on **Exhibit A-2** attached hereto. **Exhibit A-2** includes information regarding working interest owners and overriding royalty interest owner.

9. There are no depth severances in the Wolfcamp formation in this acreage.

10. I provided the law firm of Abadie & Schill P.C. a list of names and addresses for the uncommitted ORRI owners shown on **Exhibit A-2**. In compiling these addresses, I conducted a diligent search of the public records in Eddy County, New Mexico, where the well is located, including phone directories and did computer searches to locate the contact information for parties entitled to notice. Fourteen mailings to ORRI owners are still listed as in-transit, therefore the locations cannot yet be confirmed for: Aaron Heimke, Britt Trowbridge, Christopher C Bynum Sep Prop, Estate of Gwendolyn P Rutledge Alexis A Scott Personal Rep, John Halagan, Jorie B Lamb Revocable Trust Jorie B Lamb TTEE, Kathleen M Bynum Sep Pro, Mary Curtiss Mayfield, Patricia Marr Sep Prop, Robert Thomas Frankot Rev Lvg Tr DTD 10-08-2014 Robert Thomas

Frankot TTEE, Rosina C Schutz, Sudie Marie Adams, Ter-Mack LP, and Tyler Trowbridge. Devon published notice in the Carlsbad Current Argus, a newspaper of general circulation in Eddy County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

11. Devon has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for its development within the proposed horizontal spacing unit. **Exhibit A-4** provides a chronology and history of contacts with the owners.

12. The interest owners being pooled have been contacted regarding the proposed well but have failed or refused to voluntarily commit their interest in the well. However, Devon has been in ongoing discussions with some of the interest owners to voluntarily enter into a Joint Operating Agreement (JOA). A number of major working interest owners have expressed their willingness to enter the JOA as proposed; others currently are working with us to consider changes. If a mutually agreeable JOA is reached between Devon and another interest owner or owners, Devon requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

13. **Exhibit A-3** is a sample proposal letter which includes the AFEs for the proposed well. The estimated cost of the well set forth in the AFEs is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

14. Devon requests overhead and administrative rates of \$8,000/month for drilling the well and \$800/month for producing the well. These rates are fair and comparable to the rates charged by

other operators for wells of this type in this area of southeastern New Mexico. Devon requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

15. Devon requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners to the extent needed.

16. Devon requests that it be designated operator of the unit and well.

17. Special considerations for this particular case: As described herein, this well has a proposed unit for pooling that traverses the N/2 SW/4 of Section 26 and the N/2 S/2 of Sections 27 and 28; therefore, the unit proposed to the Division in the above-referenced case describes the entire 400-acre, more or less, unit for purposes of notice to the parties of the size and scope of the unit, pursuant to NMAC 19.15.4.9A, which Devon respectfully submits was satisfied, and for purposes of determining prevention of waste and the protection of correlative rights in the 400-acre standard unit under consideration. The unit itself encompasses both lands that are part of a Federal Exploratory Unit (FEU) and lands that are outside the FEU, to create a "Straddle Comm" unit for the well. Devon has been working closely with both the BLM and NM State Land Office to construct this unit as a standard spacing unit. Pursuant to the Division's recommendation that the unit will prevent waste and protect correlative rights, the BLM plans to issue a Communitization Agreement (CA) for the unit that will cover the N/2 SW/4 of Section 26 and the N/2 S/2 of Sections 27 and 28, same as the spacing and proration unit requested herein, for allocation of revenue and payment among the interest owners. The BLM will then establish a Participation Area (PA), upon Devon's showing of paying well determinations, such that the PA will match and correspond to the size of the CA and spacing unit.

18. Devon is respectfully requesting that the Division acknowledge the spacing unit encompassing the N/2 SW/4 of Section 26 and the N/2 S/2 of Sections 27 and 28 for purposes of

the prevention of waste and protection of correlative rights. If the Division should find that it may need to segment the spacing unit based on lands inside and outside the FEU, in order to obtain proper interaction between the federal and non-federal lands, Devon requests that the Division make such segmentations with the acknowledgement that the proposed spacing unit as a whole is standard.

19. Devon respectfully submits that any segmentation of lands outside the FEU, in the N/2 SW/4 of Section 28, would be built upon contiguous tracts of quarter-quarter sections in relation to the quarter-quarter sections penetrated by the well interval in the remainder of the unit, pursuant to NMAC 19.15.16.15B(1)(a) and – B(1)(d), thus having a standard-unit designation under statewide rules. Since the completed intervals of the well is not wholly within the FEU, but is a Straddle Comm well, Devon submits that any separation of the proposed spacing unit from the FEU, pursuant to 19.15.16.15B(8), should be conditional and not absolute; and therefore, the Division's acknowledgement of the standard 400-acre spacing unit should be appropriate with the incorporation of any adjustments the Division deems necessary, pursuant to the Division's broad authority in NMSA 1978 Section 70-2-11A.

20. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

21. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights, and will avoid the drilling of unnecessary wells.

22. The foregoing is correct and complete to the best of my knowledge and belief.

- Burton Flat 26-28 Fed Com 624H as a horizontal well to an approximate landing TVD of 9,140', bottom hole TVD' of 8,888', and approximate TMD of 21,640' into the Wolfcamp formation at an approximate SHL of 806' FSL and 2,438' FWL of Section 26-T20S-R28E and an approximate BHL of 875' FSL and 20' FWL of Section 28-T20S-R28E, Eddy County, New Mexico (collectively with all five proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.

Devon reserves the right to modify the locations and drilling plans described above in order to address surface and subsurface concerns. Devon will advise of any such modifications.

Each of the Wells will be drilled within a horizontal spacing unit that includes lands lying outside the boundaries of the Burton Flat Deep Unit ("BFDU") with lands lying within the boundaries of the BFDU. Since a portion of the wellbore lateral will traverse lands lying outside the boundaries of the BFDU, the Unit Operating Agreement dated July 1, 1972 for the BFDU is not applicable. Consequently, Devon proposes that the parties enter into a new Operating Agreement covering the SW/4 of Section 26 and the S/2 of Sections 27 and 28, T20S-R28E, Eddy County, New Mexico limited the Bone Spring and Wolfcamp formations. This new Operating Agreement would only apply to wellbores that traverse lands outside and inside the boundaries of the BFDU. Any wellbores that traverse lands lying totally within the boundaries of the BFDU would still be governed by the Unit Operating Agreement dated July 1, 1972.

In order to develop this horizontal spacing unit, Devon must have a voluntary agreement (such as the new Operating Agreement) or a compulsory pooling order in place for each working interest owner. If a voluntary agreement cannot be reached within 30 days of receipt of this letter, Devon will apply to the New Mexico Oil Conversation Division for an order pooling your interest into the horizontal spacing unit for the Wells, if uncommitted at such time.

Please indicate your election to participate in the drilling and completion of each of the Wells in the spaces provided below, within 30 days of receipt, by signing and returning one (1) copy of this letter and AFE, along with your well data requirements sheet. A Communization Agreement for said Wells will be supplied for your review and execution at a later date.

If your election is to participate, a copy of the new Operating Agreement and a cash call invoice will be sent following receipt of a timely election.

I understand this is a unique scenario that may elicit a lot of questions, so please do not hesitate to contact me at (405) 552-8002 or via email at Andy.Bennett@devon.com if you have any questions concerning this proposal.

Very truly yours,

2. Initial email with discussion of agreements/drafts between Devon Energy Production Company, L.P. and the working interest owners, occurred in May and July 2021, following the mailing of the proposal letter.
3. Follow up email and phone call efforts with working interest owners, in July through September 2021, were not reciprocated and the interests remained uncommitted. Some working interest owners, such as Sabinal and ConocoPhillips, among others, have indicated a desire to enter into a mutually agreeable Joint Operating Agreement, and Devon is in negotiations with those owners as we speak.
4. Emailed with Sabinal Energy, LLC on September 30, 2021. They responded that they have entered an appearance in the Cases, but do not object to the Cases moving forward on October 7, 2021.

**APPLICATIONS OF DEVON ENERGY PRODUCTION
COMPANY, L.P., FOR A HORIZONTAL SPACING UNIT
AND COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22190

AFFIDAVIT OF ANDY D. BENNETT

STATE OF OKLAHOMA)
) ss.
COUNTY OF OKLAHOMA)

I, being duly sworn on oath, state the following:

1. I am over the age of eighteen years and have the capacity to execute this Affidavit, which is based on my personal knowledge.
2. I am employed as a Senior Staff Landman with Devon Energy Production Company, L.P. ("Devon"), and I am familiar with the subject application and the lands involved. My credentials as an expert witness in petroleum land matters have been accepted by the New Mexico Oil Conservation Division ("Division") and made a matter of record.
3. This affidavit is submitted in connection with the filing by Devon of the above-referenced spacing and compulsory pooling application pursuant to 19.15.4.12.A(1).
4. Devon seeks an order pooling all uncommitted mineral interest in the Wolfcamp formation (WC Burton Flat Upper Wolfcamp; Pool Code: 98315) underlying a standard 400-acre, more or less, spacing and proration unit comprised of the S/2 SW/4 of Section 26 and the S/2 S/2 of Sections 27 and 28, Township 20 South, Range 28 East, NMPM, Eddy County, New Mexico.

**EXHIBIT
A**

5. Under Case No. 22190, Devon seeks to dedicate to the unit the **Burton Flat 26-28 Fed State Com 624H Well**, as an initial well. The **Burton Flat 26-28 Fed State Com 624H Well** (API 30-015-pending), to be horizontally drilled from a surface location in the SE/4 SW/4 (Unit N) of Section 26, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 28; approximate TVD of 9,140'; approximate TMD of 21,640'; FTP in Section 26: approximately 875' FSL, 2,551' FWL; LTP in Section 28: approximately 875' FSL, 100' FWL.

6. The proposed C-102 for each well is attached as **Exhibit A-1**.

7. A general location plat and a plat outlining the unit being pooled is attached hereto as **Exhibit A-2**, which show the location of the proposed well within the unit. The location of the well is orthodox and meets the Division's offset requirements for horizontal wells under statewide rules.

8. The parties being pooled, the nature of their interests, and their last known addresses are listed on **Exhibit A-2** attached hereto. **Exhibit A-2** includes information regarding working interest owners and overriding royalty interest owner.

9. There are no depth severances in the Wolfcamp formation in this acreage.

10. I provided the law firm of Abadie & Schill P.C. a list of names and addresses for the uncommitted ORRI owners shown on **Exhibit A-2**. In compiling these addresses, I conducted a diligent search of the public records in Eddy County, New Mexico, where the well is located, including phone directories and did computer searches to locate the contact information for parties entitled to notice. Fourteen mailings to ORRI owners are still listed as in-transit, therefore the locations cannot yet be confirmed for: Aaron Heimke, Britt Trowbridge, Christopher C Bynum Sep Prop, Estate of Gwendolyn P Rutledge Alexis A Scott Personal Rep, John Halagan, Jorie B Lamb Revocable Trust Jorie B Lamb TTEE, Kathleen M Bynum Sep Pro, Mary Curtiss Mayfield,

Patricia Marr Sep Prop, Robert Thomas Frankot Rev Lvg Tr DTD 10-08-2014 Robert Thomas Frankot TTEE, Rosina C Schutz, Sudie Marie Adams, Ter-Mack LP, and Tyler Trowbridge. Devon published notice in the Carlsbad Current Argus, a newspaper of general circulation in Eddy County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

11. Devon has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for its development within the proposed horizontal spacing unit. **Exhibit A-4** provides a chronology and history of contacts with the owners.

12. The interest owners being pooled have been contacted regarding the proposed well but have failed or refused to voluntarily commit their interest in the well. However, Devon has been in ongoing discussions with some of the interest owners to voluntarily enter into a Joint Operating Agreement (JOA). A number of major working interest owners have expressed their willingness to enter the JOA as proposed; others currently are working with us to consider changes. If a mutually agreeable JOA is reached between Devon and another interest owner or owners, Devon requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

13. **Exhibit A-3** is a sample proposal letter which includes the AFEs for the proposed well. The estimated cost of the well set forth in the AFEs is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

14. Devon requests overhead and administrative rates of \$8,000/month for drilling the well and \$800/month for producing the well. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of southeastern New Mexico. Devon requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

15. Devon requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners to the extent needed.

16. Devon requests that it be designated operator of the unit and well.

17. Special considerations of this particular case: As described herein, this well has a proposed unit for pooling that traverses the S/2 SW/4 of Section 26 and the S/2 S/2 of Sections 27 and 28; therefore, the unit proposed to the Division in the above-referenced case describes the entire 400-acre, more or less, unit for purposes of notice to the parties of the size and scope of the unit, pursuant to NMAC 19.15.4.9A, which Devon respectfully submits was satisfied, and for purposes of determining prevention of waste and the protection of correlative rights in the 400-acre standard unit under consideration. The unit itself encompasses both lands that are part of a Federal Exploratory Unit (FEU) and lands that are outside the FEU, to create a "Straddle Comm" unit for the well. Devon has been working closely with both the BLM and NM State Land Office to construct this unit as a standard spacing unit. Pursuant to the Division's recommendation that the unit will prevent waste and protect correlative rights, the BLM plans to issue a Communitization Agreement (CA) for the unit that will cover the S/2 SW/4 of Section 26 and the S/2 S/2 of Sections 27 and 28, same as the spacing and proration unit requested herein, for allocation of revenue and payment among the interest owners. The BLM will then establish a Participation Area (PA), upon Devon's showing of paying well determinations, such that the PA will match and correspond to the size of the CA and spacing unit.

18. Devon is respectfully requesting that the Division acknowledge the spacing unit encompassing the S/2 SW/4 of Section 26 and the S/2 S/2 of Sections 27 and 28 for purposes of the prevention of waste and protection of correlative rights. If the Division should find that it may need to segment the spacing unit based on lands inside and outside the FEU, in order to obtain proper interaction between the federal and non-federal lands, Devon requests that the Division make such segmentations with the acknowledgement that the proposed spacing unit as a whole is standard.

19. Devon respectfully submits that any segmentation of lands outside the FEU, in the S/2 SW/4 of Section 28, would be built upon contiguous tracts of quarter-quarter sections in relation to the quarter-quarter sections penetrated by the well interval in the remainder of the unit, pursuant to NMAC 19.15.16.15B(1)(a) and – B(1)(d), thus having a standard-unit designation under statewide rules. Since the completed intervals of the well is not wholly within the FEU, but is a Straddle Comm well, Devon submits that any separation of the proposed spacing unit from the FEU, pursuant to 19.15.16.15B(8), would be conditional and not absolute; and therefore, the Division's designation of the standard 400-acre spacing unit is appropriate with the incorporation of any adjustments the Division deems necessary to account for the FEU, pursuant to the Division's broad authority in NMSA 1978 Section 70-2-11A.

20. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

21. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights, and will avoid the drilling of unnecessary wells.

22. The foregoing is correct and complete to the best of my knowledge and belief.

- Burton Flat 26-28 Fed Com 624H as a horizontal well to an approximate landing TVD of 9,140', bottom hole TVD' of 8,888', and approximate TMD of 21,640' into the Wolfcamp formation at an approximate SHL of 806' FSL and 2,438' FWL of Section 26-T20S-R28E and an approximate BHL of 875' FSL and 20' FWL of Section 28-T20S-R28E, Eddy County, New Mexico (collectively with all five proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.

Devon reserves the right to modify the locations and drilling plans described above in order to address surface and subsurface concerns. Devon will advise of any such modifications.

Each of the Wells will be drilled within a horizontal spacing unit that includes lands lying outside the boundaries of the Burton Flat Deep Unit ("BFDU") with lands lying within the boundaries of the BFDU. Since a portion of the wellbore lateral will traverse lands lying outside the boundaries of the BFDU, the Unit Operating Agreement dated July 1, 1972 for the BFDU is not applicable. Consequently, Devon proposes that the parties enter into a new Operating Agreement covering the SW/4 of Section 26 and the S/2 of Sections 27 and 28, T20S-R28E, Eddy County, New Mexico limited the Bone Spring and Wolfcamp formations. This new Operating Agreement would only apply to wellbores that traverse lands outside and inside the boundaries of the BFDU. Any wellbores that traverse lands lying totally within the boundaries of the BFDU would still be governed by the Unit Operating Agreement dated July 1, 1972.

In order to develop this horizontal spacing unit, Devon must have a voluntary agreement (such as the new Operating Agreement) or a compulsory pooling order in place for each working interest owner. If a voluntary agreement cannot be reached within 30 days of receipt of this letter, Devon will apply to the New Mexico Oil Conversation Division for an order pooling your interest into the horizontal spacing unit for the Wells, if uncommitted at such time.

Please indicate your election to participate in the drilling and completion of each of the Wells in the spaces provided below, within 30 days of receipt, by signing and returning one (1) copy of this letter and AFE, along with your well data requirements sheet. A Communization Agreement for said Wells will be supplied for your review and execution at a later date.

If your election is to participate, a copy of the new Operating Agreement and a cash call invoice will be sent following receipt of a timely election.

I understand this is a unique scenario that may elicit a lot of questions, so please do not hesitate to contact me at (405) 552-8002 or via email at Andy.Bennett@devon.com if you have any questions concerning this proposal.

Very truly yours,

Chronology of Contacts between Devon Energy Production Company, L.P. (“Devon”) and the Uncommitted Interest Owners in Case No. 22185, 22186, 22187, 22188, 22189 & 22190:

1. Well Proposal Letter Burton Flat 26-28 Fed State Com 331H-336H and 621H-624H Wells from Devon to all the working interest owners in May and July of 2021 (Exhibit A-3).
2. Initial email with discussion of agreements/drafts between Devon Energy Production Company, L.P. and the working interest owners, occurred in May and July 2021, following the mailing of the proposal letter.
3. Follow up email and phone call efforts with working interest owners, in July through September 2021, were not reciprocated and the interests remained uncommitted. Some working interest owners, such as Sabinal and ConocoPhillips, among others, have indicated a desire to enter into a mutually agreeable Joint Operating Agreement, and Devon is in negotiations with those owners as we speak.
4. Emailed with Sabinal Energy, LLC on September 30, 2021. They responded that they have entered an appearance in the Cases, but do not object to the Cases moving forward on October 7, 2021.

Case No. 22188

AFFIDAVIT OF JOE DIXON

I, Joe Dixon, being duly sworn on oath, state the following:

1. I am over the age of 18, and I have personal knowledge of the matters stated herein.
2. I am employed as a petroleum geologist for Devon Energy Production Company, L.P. (“Devon”), and I am familiar with the subject application and the geology involved.
3. This affidavit is submitted in connection with the filing by Devon of the above-referenced compulsory pooling application pursuant to 19.15.4.12.A(1) NMAC.
4. I have testified previously by affidavit before the Oil Conservation Division (“Division”) as an expert petroleum geologist; my credentials have been made a matter of record, and I have been qualified as an expert by the Division.
 - a. I have a Bachelor of Science Degree in Geology from Purdue University and a Master of Science Degree in Geology from Oklahoma State University.
 - b. I have worked on New Mexico Oil and Gas matters since November 2020.
5. **Exhibit B-1** is a structure map showing the depth (subsea) to the top of the Wolfcamp formation, a marker that defines the base of the target interval for the proposed

well. Contour interval is 20'. The unit being pooled is outlined by red rectangle. The structure map shows that there is a regional down-dip to the East-Southeast. I do not observe any faulting, pinchouts, or other geologic impediments to developing this targeted interval.

6. **Exhibit B-2** is a stratigraphic cross-section flattened on the Wolfcamp top. Each well in the cross-section contains a gamma ray, resistivity, and porosity log. The cross-section demonstrates continuity and consistent thickness across the target zone. The well logs on the cross-section give a representative sample of the 3rd Bone Spring Sand. The landing zone is highlighted by the well number.

7. Additional exhibits for the benefit of the Division's review include **Exhibit B-3**, a gross isochore of the 3rd Bone Spring Sand, as well as **Exhibits B-4 and B-5**. **Exhibit B-4** is a gun barrel representation of the unit, and **Exhibit B-5** is a structural cross section built along the wellbore trajectory.

8. I conclude from the attached exhibits that:

- a. The horizontal spacing and proration unit is justified from a geologic standpoint.
- b. There are no structural impediments or faulting that will interfere with horizontal development.
- c. Each quarter-quarter section in the unit will contribute more or less equally to production.

9. The preferred well orientation in this area is East-West so that the wells run sub-perpendicular to the inferred orientation of the maximum horizontal stress.

10. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

11. The granting of this Application is in the interests of conservation, the prevention of waste and the drilling of unnecessary wells, and the protection of correlative rights.

12. The foregoing is correct and complete to the best of my knowledge and belief.
