

**BEFORE THE OIL CONSERVATION DIVISION
EXAMINER HEARING NOVEMBER 5, 2021**

CASE NOS. 21727-21730

*PALMILLO 29-30 STATE COM #271H-274H WELLS
PALMILLO 29-30 STATE COM #375H-378H WELLS*

EDDY COUNTY, NEW MEXICO

**STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION**

**APPLICATION OF APACHE CORPORATION
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO.**

CASE NO. 21727

APPLICATION

Apache Corporation (“Apache” or “Applicant”) (OGRID No. 873), through its undersigned attorneys, hereby files this application with the Oil Conservation Division, pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal spacing unit comprised of the N/2 N/2 of Sections 29 and 30, Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico. In support of its application, Apache states:

1. Applicant is a working interest owner in the proposed horizontal spacing unit and has the right to drill thereon.
2. Applicant seeks to dedicate the above-referenced horizontal spacing unit to the following proposed initial wells: (1) the **Palmillo 29-30 State Com #271H well** (API No. 30-015-pending), and (2) the **Palmillo 29-30 State Com #375H well** (API No. 30-015-pending), to be drilled from a common surface hole location in NE/4 NE/4 (Unit A) of Section 25, Township 19 South, Range 27 East, to bottom hole locations in the NE/4 NE/4 (Unit A) of said Section 29.
3. The completed intervals for these wells will comply with the statewide setbacks for oil wells.

**BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. A
Submitted by: Apache Corporation
Hearing Date: November 05, 2021
Case Nos. 21727-21730**

4. Applicant has sought and been unable to obtain voluntary agreement for the development of these lands from all the interest owners in the subject spacing unit.

5. The pooling of interests will avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

6. In order to permit Applicant to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this horizontal spacing unit should be pooled and Applicant should be designated the operator of the proposed horizontal well spacing unit.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division, on March 4, 2021, and, after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interests in the horizontal spacing unit;
- B. Approving the initial wells in the horizontal spacing unit;
- C. Designating Applicant as the operator of this spacing unit and the horizontal wells to be drilled thereon;
- D. Authorizing Applicant to recover its costs of drilling, equipping, and completing the wells;
- E. Approving the actual operating charges and costs of supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- F. Imposing a 200% charge for the risk assumed by Applicant in drilling and completing the wells against any working interest owner who does not voluntarily participate in the drilling of the wells.

Respectfully submitted,

HOLLAND & HART LLP

OVERVIEW PALMILLO 29-30 STATE COM DEVELOPMENT

29/30-T19S-R28E Eddy Co, NM

- **Approximately 11 miles north of the City of Carlsbad (dark grey area)**

- **Palmillo 29-30 Development Planned Targets**
 - (4) 2nd Bone Spring Sand
 - (4) 3rd Bone Spring Sand

Apache plans to develop sections 29 and 30 with 2 mile laterals, 4 - 2nd Bone Spring Sand wells and 4 - 3rd Bone Spring Sand wells. The laterals will be drilled off of 3 pads from West to East

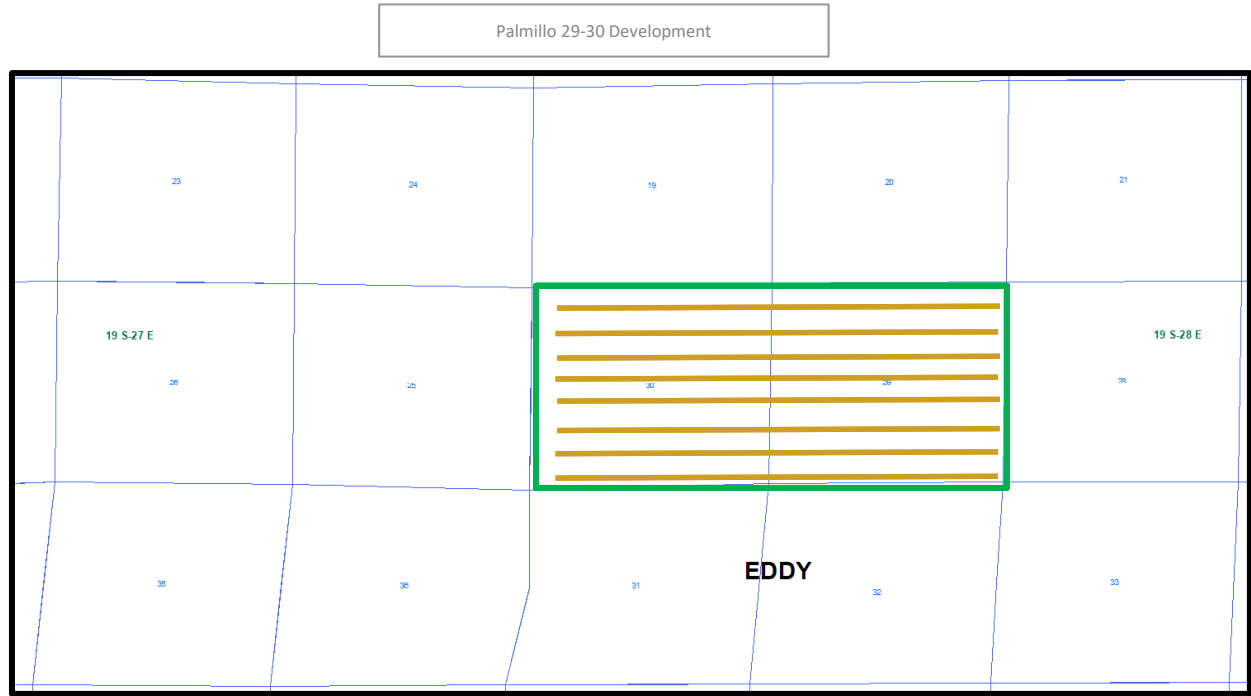

APACHE DEVELOPMENT

- ▶ Apache controls 34.5% of the 1280 development compared to Colgates 17%.
- ▶ 12.3% of the Working Interest Supports Apache including EOG and Cimarex
- ▶ Apache and Marathon have verbally agreed to a trade which would increase Apache's position by 11.3%
- ▶ Total Apache WI, Support and Marathon acreage = 58.18%
- ▶ Colgate WI= 17.16%
- ▶ Apache's development prevents waste using dual well pads for Camacho and Palmillo development- 3 vs 8
- ▶ Apache is prepared to drill wells. Surface Work, Title work ETC

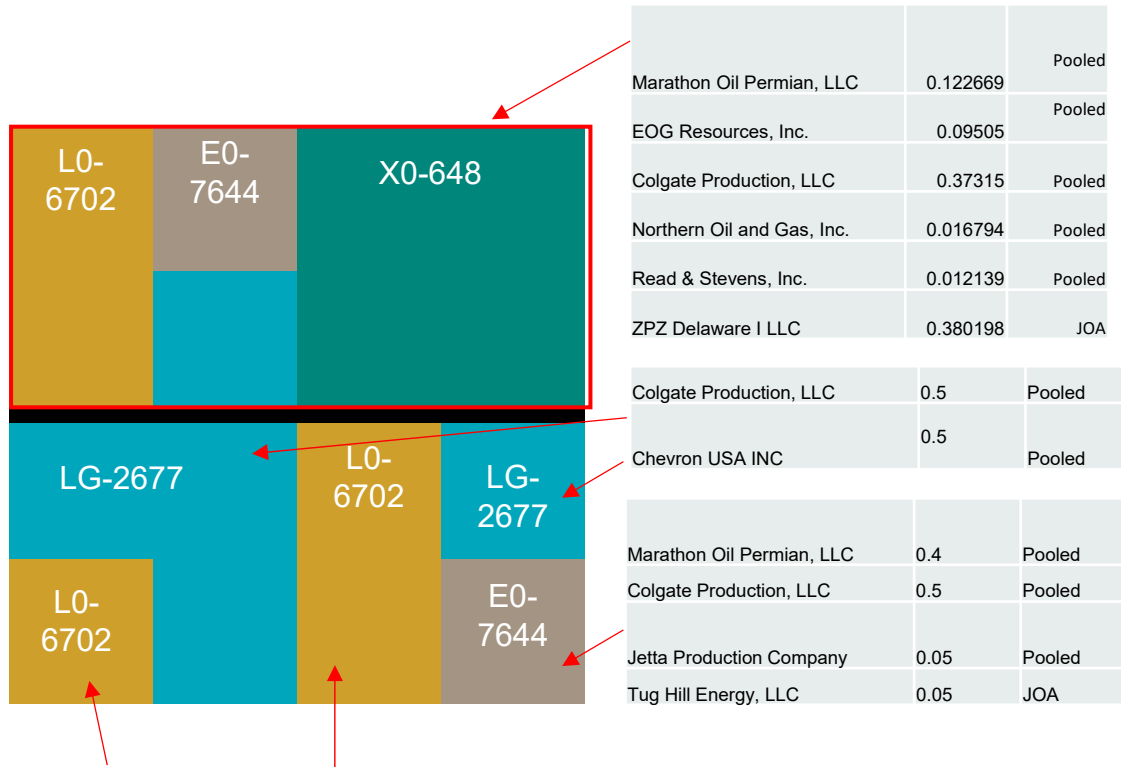

WORKING INTEREST

- N/2 N/2 Development
 - APA WI= 49.7410%
 - APA Support WI= 16.6%
 - MRO= 6.132%
 - Colgate WI 15.25%
- S/2 N/2 Development

Palmillo 29-30 Development

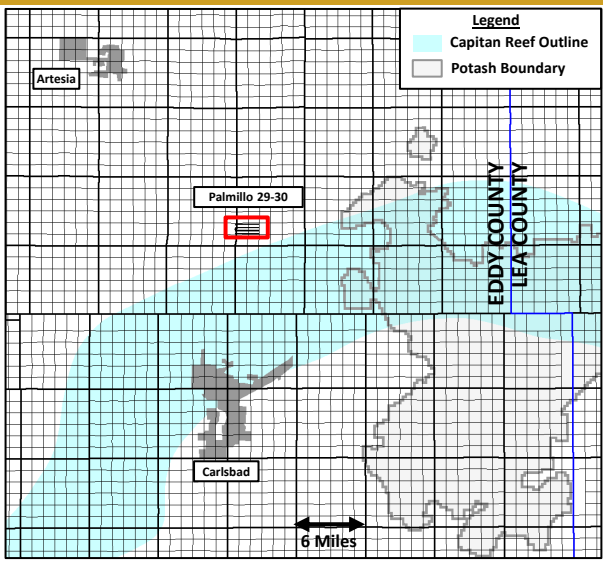

APACHE'S DEVELOPMENT AREA PREPARATION

- 3/4/2021 Scouted surface for the planned development
- 4/21/21 ARC Survey completed 4/27/2021
- staked 3 pads (16 wells) and 2 facilities
- 5/25/2021 Formerly staked linear infrastructure (lease access road, PROW corridor and above-grade electric line).
- 9/2/2021 Mailed BL applications for surveyed infrastructure and tenant relinquishments
- Temporary Water line is pending until water sourcing agreement is completed
- Secured Gas Takeaway

PALMILLO 29-30 STATE COM DEVELOPMENT

29/30-T19S-R28E Eddy Co, NM

- Palmillo 29-30 Development Planned Targets
 - (4) 2nd Bone Spring Sand
 - (4) 3rd Bone Spring Sand

Apache plans to develop sections 29 and 30 with 2 mile laterals, 4 - 2nd Bone Spring Sand wells and 4 - 3rd Bone Spring Sand wells. The laterals will be drilled off of 3 pads from West to East

PALMILLO AREA ACTIVITY

Current Bone Spring Horizontal Development

- ★ *Pالمillo 14 State 1H pilot and lateral helped characterize depositional system and targets early on*
 - *First well spudded 8/15/2014*
 - *Apache has been the most experienced and active operator in this area*
 - *36 wells drilled and producing*
 - *20 2nd Bone Spring Sand*
 - *16 3rd Bone Spring Sand*

- ★ *Lady Franklin 25 State 121H was first Bone Spring well drilled by Colgate in Delaware Basin with spud date of 3/4/2020*
 - *2nd BSS: 4 since 2020 (one previously drilled Chi Energy well acquired by Colgate)*
 - *3rd BSS: 4 since 2020*
 - *All Bone Spring wells drilled by Colgate have been left as DUCs; Currently no well results*

COLGATE ACTIVITY

Inexperienced Operator in Area

Lady Franklin 25 State 121H

- Colgate's first Bone Spring well drilled in Delaware Basin
 - Spud Date: 3/4/2020
- C-103 filed on 2/19/2020
 - Change of plans based on offset operator experience

The experienced operator Colgate References is Apache Corporation

PALMILLO DRILLING CHALLENGES

Geosteering – Example

 Focus Area Lacking Well Control

- In this area it is crucial to stay in zone, Apache has licensed seismic over sections 29 and 30
- All wells drilled since this well have been planned utilizing Seismic and were drilled 100% in sand
- We have leveraged our experience and proprietary data to optimize targeting over time

* 3rd Bone Spring Carbonate structure is a derivative product of Apache licensed data

STRATIGRAPHIC CROSS-SECTION A – A'

Datum = Top 3rd Bone Spring Sand

APACHE PALMILLO ACTIVITY OVER TIME

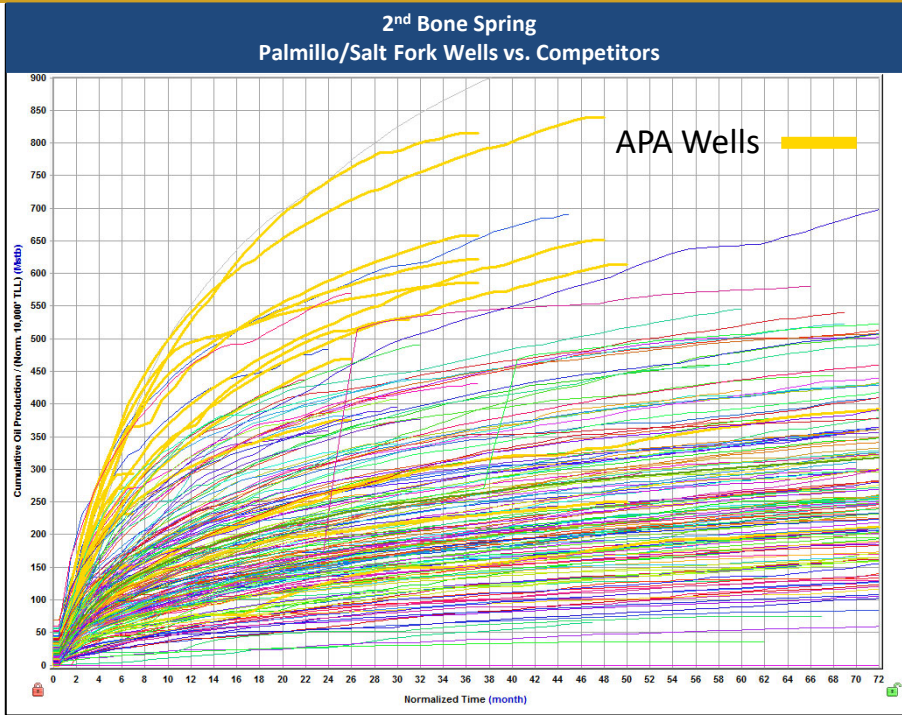

2nd and 3rd Bone Spring Sand

- ▶ Apache's experience in the Palmillo area has enabled optimization of further development
 - ▶ Improved predictability and repeatability in heterogeneous geologic setting
 - ▶ Identification of geologic parameters that drive performance
 - ▶ Target zone identification and steering
 - ▶ Inter-well spacing optimization to mitigate interference and depletion
 - ▶ Completion job optimization
 - ▶ Wellbore orientation
- ▶ Codevelop 2nd and 3rd BSS intervals
 - ▶ Operational and surface land efficiencies enable stronger economics

PALMILLO PRODUCTION RESULTS

2nd and 3rd Bone Spring Sand

- ▶ Apache consistently outperforms other operators' 2nd Bone Spring production in the surrounding areas

- ▶ Apache performance is on track with other operators in the 3rd Bone Spring and has improved with spacing and geologic learnings

PALMILLO/CAMACHO DEVELOPMENT

- ▶ 2 Landing Zones Planned
 - ▶ 2nd Bone Spring Sand
 - ▶ 3rd Bone Spring Sand
- ▶ 3 Pads (16 Wells Total)
 - ▶ Camacho 25-26 (8 wells)
 - ▶ Palmillo 29-30 (8 wells)
- ▶ 1 central tank battery located within section 25 expandability if necessary
 - ▶ 1 pad well design
 - ▶ Sim-ops savings
 - ▶ Smaller footprint

2ND BONE SPRING PERFORMANCE (2017-2020)

- (17) 2nd Bone Spring Wells Drilled
- Reduce Spud –TD days year over year
 - 34% reduction from 2017 to 2020
- Average Q4 2019/Q1 2020: 8.38 Days
- Fastest Well: 6.8 Days

2ND BSS 1 MILE \$/FT

- Avg. \$/FT: \$164
- Avg. TMD: 12,439'
- Avg. Actual Cost: \$2.04MM

2 MILE ESTIMATES: DRILLING TO TD

- Updated 2 Mile 2nd BSS: Additional ~ 3 days to Drill Lateral
- Total Spud to TD: 12 Days
- 3 Days MIRU: 3 Days TD-RR -----> 18 DOL

2 MILE - 2ND BSS COST ESTIMATES

- Intangible Cost: \$2.02MM
 - Tangible Cost: \$426M
- } → Total Cost: \$2.44MM

STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION

APPLICATIONS OF APACHE CORPORATION FOR COMPULSORY
POOLING, EDDY COUNTY, NEW MEXICO.

CASE NOS. 21727-21730

APPLICATIONS OF COLGATE OPERATING, LLC
FOR COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO

CASE NOS. 21827 & 21878

AFFIDAVIT OF BLAKE JOHNSON

Blake Johnson, of lawful age and being first duly sworn, states the following:

1. My name is Blake Johnson and I am employed by Apache Corporation (“Apache”) as a petroleum landman. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. I am familiar with the applications filed by Apache in these consolidated cases and the status of the lands in the subject area.

2. Under Case Nos. 21727-21730, Apache seeks to create and forcibly pool four 320-acre horizontal well spacing units in the Bone Spring formation underlying Sections 29 and 30, Township 19 South, Range 28 East, N.M.P.M., Eddy County, New Mexico, as follows:

- Under Case 22127, Apache seeks to create and forcibly pool a 320-acre horizontal well spacing comprised of the N/2 N/2 of Sections 29 and 30 to be initially dedicated to the **Palmillo 29-30 State Com #271H well** targeting the Second Bone Spring interval and the **Palmillo 29-30 State Com #375H well** targeting the Third Bone Spring interval.
- Under Case 22128, Apache seeks to create and forcibly pool a 320-acre horizontal well spacing comprised of the S/2 N/2 of Sections 29 and 30 to be initially dedicated to the **Palmillo 29-30 State Com #272H well** targeting the Second Bone Spring interval and the

Submitted by: Apache Corporation

Hearing Date: November 05, 2021

Case Nos. 21727-21730

Palmillo 29-30 State Com #376H well targeting the Third Bone Spring interval.

- Under Case 22129, Apache seeks to create and forcibly pool a 320-acre horizontal well spacing comprised of the N/2 S/2 of Sections 29 and 30 to be initially dedicated to the **Palmillo 29-30 State Com #273H well** targeting the Second Bone Spring interval and the **Palmillo 29-30 State Com #377H well** targeting the Third Bone Spring interval.
- Under Case 22130, Apache seeks to create and forcibly pool a 320-acre horizontal well spacing comprised of the S/2 S/2 of Sections 29 and 30 to be initially dedicated to the **Palmillo 29-30 State Com #274H well** targeting the Second Bone Spring interval and the **Palmillo 29-30 State Com #378H well** targeting the Third Bone Spring interval.

3. **Apache Exhibit D-1** contains Form C-102's in numerical order for the proposed initial wells in each of these standard spacing units. These forms demonstrate that the completed interval for each well will meet the standard setback requirements for horizontal oil wells.

4. There are no depth severances within the Bone Spring formation underlying this acreage.

5. **Slide 1 of Apache Exhibit C** is a general location map outlining the four proposed horizontal spacing units and the lateral trajectory of the initial wells. This acreage is comprised of state lands. Apache intends to initially drill two-mile laterals in the Second and Third Bone Spring Sands, with four wells in each interval. These wells will be drilled West to East from wells pads located in the E/2 E/2 of adjacent Section 25.

6. **Slide 2 of Apache Exhibit C** demonstrates that Apache currently owns over twice the working interest held by Colgate in the subject acreage and has the support of a substantial percentage of the other working interest owners. Apache has recently reached an agreement to acquire Marathon Oil Company's working interest in the subject acreage, which

will boost Apache's ownership and working interest support to over 58%. To my knowledge, Colgate only owns or controls 17.6% of the working interest in the subject acreage.

7. Slide 2 also notes that Apache intends to use the same wells pads to develop not only the Bone Spring formation underlying the subject acreage, but also the Bone Spring formation underlying Sections 25 and 26 in the adjacent Township to the West. By utilizing the same well pads for each development, we can maximize efficiency and reduce our surface impact.

8. **Slides 3, 4 and 5 of Apache Exhibit C** identify the working interest ownership in the proposed horizontal spacing units, the tracts of land comprising the proposed horizontal spacing units, and the mineral interest owners Apache seeks to pool. Apache has conducted a diligent search of the public records in the county where the property is located, reviewed telephone directories, and conducted computer searches to locate contact information for each of these mineral owners.

9. **Slide 6 of Apache Exhibit C** contains a list of thirteen working interest owners in the subject acreage that support Apache as the operator in the Bone Spring formation. This support includes experienced operators like EOG Resources and Cimarex Energy Company. To my knowledge, no working interest owner in the subject acreage supports Colgate as the operator in the Bone Spring formation.

10. **Slide 7 of Apache Exhibit C** reflects the efforts Apache has undertaken to prepare to drill not only the Palmillo 29-30 wells in the subject acreage, but also the Camacho wells in Sections 25 and 26 in the adjacent Township to the West. It reflects that Apache has scouted surface for the planned development, completed its ARC Survey, staked 3 pads for 16 wells and common surface facilities, staked linear

infrastructure (lease access road, PROW corridor and above-grade electric line), applied for business lease applications for surveyed infrastructure and tenant relinquishment, and secured gas takeaway. Apache is also in the process of securing a temporary water line pending water sourcing agreement.

11. **Apache Exhibit D-2** contains a sample of the well proposal letters and AFEs sent to the working interest owners Apache seeks to pool. The costs reflected in these AFEs are consistent with what Apache and other operators have incurred for drilling similar horizontal wells in the area in the subject formation.

12. **Apache Exhibit D-3** contains a chronology of the contacts with the uncommitted working interest owners that Apache was able to locate. In my opinion, Apache has undertaken good faith efforts to reach an agreement with the uncommitted mineral owners.

13. **Apache Exhibit D-4** contains letters from working interest owners in the subject acreage that support Apache as operator in the Bone Spring formation. These letters refer to Apache's track record of drilling and completing multiple successful lateral wells in the subject area and Apache's existing and proposed infrastructure.

14. Apache requests that the overhead and administrative costs for drilling and producing the proposed wells be set at \$8,000 per month while drilling and \$800 per month while producing. These costs are consistent with what Apache and other operators are charging in this area for similar wells.

15. I have provided the law firm of Holland & Hart LLP with the names and addresses (where available) of the mineral owners that Apache seeks to pool and instructed that they be notified of this hearing.

16. Apache Exhibits D-1 through D-4 and Slides 1 through 7 of Apache Exhibit C were either prepared by me or compiled under my direction and supervision.

FURTHER AFFIANT SAYETH NOT.

Sections 29 and 30, T19S-R28E
Eddy County, New Mexico

Dear Working Interest Owner,

Apache Corporation (herein referred to as "Apache") proposes to drill the following wells located in the referenced sections in order to sufficiently and effectively test the 2nd Bone Spring and 3rd Bone Spring formations. Further, the details and specifications of the herein proposed 2nd Bone Spring and 3rd Bone Spring wells are as follows:

Well Name:	PALMILLO 29-30 STATE COM 271H
Approx. Surface Location:	NE/4 NE/4 (Unit A) - Section 25-19S-27E
Approx. Terminus:	NE/4 NE/4 (Unit A)- Section 29-19S-28E
Objective:	2 nd Bone Spring
Approx. Total Vertical Depth:	7,085'
Approx. Total Measured Depth:	17,435'
Dry Hole Costs:	\$2,442,480
Completed Well Costs:	\$2,516,863
Equipping Costs:	\$500,000
Total Well Costs:	\$5,459,343

Well Name:	PALMILLO 29-30 STATE COM 272H
Approx. Surface Location:	SE/4 NE/4 (Unit H) – Section 25 -19S-27E
Approx. Terminus:	SE/4 NE/4 (Unit H)- Section 29-19S-28E
Objective:	2nd Bone Spring
Approx. Total Vertical Depth:	7,095'
Approx. Total Measured Depth:	17,445'
Dry Hole Costs:	\$2,442,480
Completed Well Costs:	\$2,516,863
Equipping Costs:	\$500,000
Total Well Costs:	\$5,459,343

Also enclosed is an AFE for the facility. The estimated cost of the Palmillo 29-30 facility is \$5,405,000. The Palmillo 29-30 facility will service eight (8) Bone Spring horizontal wells. Costs for the Palmillo 29-30 facility will be shared proportionally by working interest owners in the wells across the sections. An election to participate in the wells will be an election to participate in this facility with your proportionate share of the working interest and this facility AFE is not a separate election.

Apache is proposing the Operations under the terms of a modified 1989 AAPL Model Form Operating Agreement ("JOA") covering Sections 29 and 30, 19S-28E, Eddy County, New Mexico with the following general provisions:

- 100%/300% Non-consenting penalty
- Drilling and Producing Rate of \$8,000/\$800
- Apache named as Operator

Enclosed, please find in duplicate our detailed AFES for your review. Should you wish to participate in Apache's proposed tests, please signify your acceptance by returning one (1) copy of each executed election ballot and (1) copy of each executed AFE, along with your well information requirement form. If you do not wish to participate in the proposed wells, Apache is willing to discuss an acquisition of your interest, subject to final management approval and contingent on reaching mutually satisfactory terms.

If we do not reach an agreement within thirty (30) days from the date of this letter, Apache will apply to the New Mexico Oil Conservation Division for compulsory pooling of your interest into a spacing unit for the proposed well(s). Please reach out to me at the email address below if you are interested in this option.

Should you have any further questions, please contact me at blake.johnson@apachecorp.com

Sincerely,

APACHE CORPORATION

Blake Johnson
 Landman

Drilling

Notes: Drill a horizontal well to produce the 2nd Bone Spring Sand formation as follows: Preset 17-1/2" hole to 400' with spudder rig. Set 13-3/8" 48# H-40 casing and cement to surface. Drill a 12-1/4" hole to 3000'. Set 9-5/8" 40# J-55 casing and cement to surface. Drill an 8-3/4" depth of ~6800'. Drill an 8-3/4" curve at 12 DEG/100' and land at ~7600' MD, 7250' TVD. Drill a ~9800, 8-1/2" lateral section to TD of ~17500' MD, 7150' TVD. Set and cmt 5-1/2" 20# CYP-110 GB-CD casing string to 17500'. Estimated time is 3 days MIRU + 9 Days to Drill + 2 days TD-RR. Rig Rate = \$25,500K per day.

Completions

60 Stage P&P complete 10,360 ft. lateral @ 170 ft/stg 1500 #/ft. 0% RC 36 BBL/ft water @ 0.72 \$/BBL

Equipping

This AFE will provide funds to equip and produce a horizontal well. The funds requested will be used to purchase and install headers for production flowlines and gas injection flowline for the pad, installation of artificial lift, flow back for two weeks, wellhead automation, and production tree.

Drilling

Notes: Drill a horizontal well to produce the 2nd Bone Spring Sand formation as follows: Preset 17-1/2" hole to 400' with spudder rig. Set 13-3/8" 48# H-40 casing and cement to surface. Drill a 12-1/4" hole to 3000'. Set 9-5/8" 40# J-55 casing and cement to surface. Drill an 8-3/4" depth of ~6800'. Drill an 8-3/4" curve at 12 DEG/100' and land at ~7600' MD, 7250' TVD. Drill a ~9800, 8-1/2" lateral section to TD of ~17500' MD, 7150' TVD. Set and cmt 5-1/2" 20# CYP-110 GB-CD casing string to 17500'. Estimated time is 3 days MIRU + 9 Days to Drill + 2 days TD-RR. Rig Rate = \$25,500K per day.

Completions

60 Stage P&P complete 10,360 ft. lateral @ 170 ft/stg 1500 #/ft. 0% RC 36 BBL/ft water @ 0.72 \$/BBL

Equipping

This AFE will provide funds to equip and produce a horizontal well. The funds requested will be used to purchase and install headers for production flowlines and gas injection flowline for the pad, installation of artificial lift, flow back for two weeks, wellhead automation, and production tree.

Drilling

Drill a horizontal well to produce the 3rd Bone Spring Sand formation as follows: Preset 17-1/2" hole to 400' with spudder rig. Set 13-3/8" 48# H-40 casing and cement to surface. Drill a 12-1/4" hole to 3000'. Set 9-5/8" 40# J-55 casing and cement to surface. Drill an 8-3/4" depth of ~6800'. Drill an 8-3/4" curve at 12 DEG/100' and land at ~8600' MD, 8250' TVD. Drill a ~9800, 8-1/2" lateral section to TD of ~18500' MD, 8500' TVD. Set and cmt 5-1/2" 20# CYP-110 GB-CD casing string to 18500'. Estimated time is 3 days MIRU + 9 Days to Drill + 2 days TD-RR. Rig Rate = \$25,500K per day.

Completions

60 Stage P&P complete 10,360 ft. lateral @ 170 ft/stg 2100 #/ft. 0% RC 48 BBL/ft water @ 0.72 \$/BBL

Equipping

This AFE will provide funds to equip and produce a horizontal well. The funds requested will be used to purchase and install headers for production flowlines and gas injection flowline for the pad, installation of artificial lift, flow back for two weeks, wellhead automation, and production tree.

Drilling

Drill a horizontal well to produce the 3rd Bone Spring Sand formation as follows: Preset 17-1/2" hole to 400' with spudder rig. Set 13-3/8" 48# H-40 casing and cement to surface. Drill a 12-1/4" hole to 3000'. Set 9-5/8" 40# J-55 casing and cement to surface. Drill an 8-3/4" depth of ~6800'. Drill an 8-3/4" curve at 12 DEG/100' and land at ~8600' MD, 8250' TVD. Drill a ~9800, 8-1/2" lateral section to TD of ~18500' MD, 8500' TVD. Set and cmt 5-1/2" 20# CYP-110 GB-CD casing string to 18500'. Estimated time is 3 days MIRU + 9 Days to Drill + 2 days TD-RR. Rig Rate = \$25,500K per day.

Completions

60 Stage P&P complete 10,360 ft. lateral @ 170 ft/stg 2100 #/ft. 0% RC 48 BBL/ft water @ 0.72 \$/BBL

Equipping

This AFE will provide funds to equip and produce a horizontal well. The funds requested will be used to purchase and install headers for production flowlines and gas injection flowline for the pad, installation of artificial lift, flow back for two weeks, wellhead automation, and production tree.

Summary of Attempted Contacts

- Apache Corporation (“Apache”) conducted extensive title work to determine the working interest owners and other interest owners.
- Apache searched public records, phone directory, and various different types of internet searches.
- Apache sent well proposal letters to the working interest owners on or around January 25th, 2021.
- Apache proposed general terms of a Joint Operating Agreements (JOA) within the well proposal letters sent to working interest owners.
- On March 18th, 2021 Apache also mailed out the full version of the JOA to all working interest owners.
- Apache filed an application to force pool parties who had not entered in to an agreement.
- Apache’s counsel sent notices of the force pooling application to the addresses of record for the uncommitted interest owners.
- I have had multiple communications between January 25th, 2021 and today with various parties including but not limited to Colgate Production LLC, EOG Resources Inc., Cimarex Energy Co, Occidental Permian Limited Partnership (and various other Oxy entities), XTO Energy Inc, Marathon Oil Permian, LLC, Sabre Exploration Inc.
- Marathon Oil Permian, LLC and Apache Corporation have management approval to move forward with a trade. As such, Apache would secure all of Marathon’s interest in Section 30-19S-28E.
- Thirteen parties encompassing the hearings in question have agreed to support Apache to be the operator of the sections in question including Cimarex Energy Co and EOG Resources Co.
- Five parties have executed the JOA with another seven indicating they will execute our JOA.
- Apache has attempted to discuss this protested matter with Colgate Production, LLC multiple times but has failed to come to a resolution. Multiple trade offers were made, and all have been rejected.

RE: Palmillo State 29-30
T19S-R28E Sections 29 and 30
Eddy County, New Mexico

Ladies and Gentlemen:

We are working interest owner in the captioned lands and wells proposed on same. Apache has drilled multiple successful lateral wells in the immediate vicinity of the Palmillo 29- 30 wells. After meeting with the Apache staff we have confidence in their expertise along with existing local infrastructure. This will save time, money and eliminate waste.

I would be happy to discuss in further detail.

Thank you.
Steve Sell

Blake Johnson
Apache Corporation
2000 Post Oak Blvd, Suite 100
Houston, TX 77056

Mr. Johnson,

I am writing this letter to indicate my strong support for Apache Corporation to be granted operatorship of the Palmillo 29-30 State Com locations located in Sections 29 & 30, T19S, R28E in Eddy County, New Mexico. My company, Nance Resources, Inc., has a working interest in the proposed spacing unit, and we believe that, given their strong operating history and ESG record, Apache will be the best operator to drill, complete, and produce the subject wells efficiently and responsibly.

Please let me know if you need any additional information from me.

Sincerely,

A handwritten signature in blue ink that reads "Brian R. Cebull".

Re: Case Nos: 21727-21730 and 21851-21854
Hearing date: November 5, 2021
Palmillo State Com 29-30 Wells
Sec. 29, T19S-R28E
Eddy County, New Mexico

Gentlemen:

TKM Resources, LLC (“TKM”) is a working interest owner in referenced lands and the Palmillo State Com 29-30 Wells (the “Wells”) proposed in the referenced Compulsory Pooling Applications submitted by Apache Corporation. TKM is in favor of Apache’s Applications and fully supports Apache being named Operator of the Wells.

Apache has the necessary technical and operational expertise to drill and produce the Wells. They have successfully drilled multiple horizontal wells in the immediate vicinity. Furthermore, given the efficiencies of its existing local infrastructure, I believe current and future operations will be best served by Apache Corporation.

Please do not hesitate to contact me directly at 303-861-1974 or via email Steve.Marks@marksoil.net if you have any questions or concerns.

Respectfully submitted,

Stephen K. Marks
General Manager

FOR COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

CASE NOS. 21827 & 21878

AFFIDAVIT OF DREW CHENOWETH

Drew Chenoweth, of lawful age and being first duly sworn, declares as follows:

1. My name is Drew Chenoweth, and I am employed by Apache Corporation (“Apache”) as a petroleum geologist. I am familiar with the applications filed by Apache in these consolidated cases and have conducted a geologic study of the lands in the subject area.

2. I have been employed by Apache since 2017 and my responsibilities have included the Permian Basin of New Mexico. My educational background and work experience is accurately summarized in **Apache Exhibit E-1**. I am a member of AAPG and have been a member of this organization since 2008. I believe my credentials qualify me to testify as an expert witness in petroleum geology.

3. The target intervals for the initial wells to be dedicated to the horizontal well spacing units at issue are the Second and Third Sands of the Bone Spring formation. These target intervals are reflected in the type log depicted on the right of **Slide 8 of Apache Exhibit C**. This type log is from State /CB/1 well located in Section 29 and indicated on the inset map as a blue star. This type log has been utilized to create exhibits

BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. E
Submitted by: Apache Corporation
Hearing Date: November 05, 2021
Case Nos. 21727-21730

for these cases and contains gamma ray, caliper, deep resistivity, bulk density and neutron porosity tracks.

4. **Slide 9 of Apache Exhibit C** reflects Apache has been the most active operator in Township 19 South, Range 28 East and has extensive experience drilling and completing horizontal wells in the targeted Bone Spring intervals in this subject area. Our Palmillo 14 State 1H pilot hole and horizontal well (depicted by a star on the plat on the left side) was drilled in 2014 and helped characterize the Bone Spring depositional system and targets. Since that time, Apache has drilled and completed 36 horizontal wells in the Bone Spring formation in this area, with 20 horizontal completions in the Second Bone Spring Sand and 16 horizontal completions in the Third Bone Spring Sand.

5. In contrast, Colgate has not completed a single horizontal well in the Bone Spring formation in the subject area and did not commence drilling a horizontal well in this area until March of 2020. The plat on the right of Slide 9 shows Colgate's limited drilling experience in this area. Essentially, Colgate has very limited experience drilling in the Second and Third Bone Spring intervals in this area and has yet to report any production results from its efforts.

6. A great example of Apache's superior drilling experience in this area is the Form C-103 Colgate filed on February 19th of 2020 that is contained on **Slide 10 of Apache Exhibit C**. It reflects that prior to drilling its first horizontal well in this area, Colgate changed its initial surface casing design to match that utilized by an experienced operator in an adjacent section. The experienced operator referenced by Colgate is Apache.

7. A key lesson Apache learned early while drilling in the Palmillo area is that integrating depth migrated seismic into the well planning and targeting process is vital in this township where there is often a lack of well control. Apache's extensive drilling and completion experience in this area has revealed isolated nuances in the structure of the Third Bone Spring Carbonate, which is the base of the Second Bone Spring Sands. These isolated nuances are only revealed with the assistance of licensed seismic data. Realizing that staying within the Second Bone Spring target zone is especially crucial in the subject area, Apache acquired licensed seismic data over the subject area, including Sections 29 and 30. Apache has utilized that proprietary data to successfully plan and steer its wells.

8. **Slide 11 of Apache Exhibit C** contains an example of these isolated structural nuances that can impact an operator's ability to stay within the targeted zone. The structure map on the left side extends across a portion of Township 19 South, Range 28 East and is based on well control data. Using only well control data indicates that within the grey dashed circled area the structure of the Third Bone Spring Carbonate gently dips to the East. The box below this structure map demonstrates the track of the carbonate top expected within the circled area based only on well control data. The gamma ray track plotted along the wellbore is filled with cool colors indicating low gamma (carbonates) and higher gamma measurements colored as yellow to brown (sandstones/shales). The map on the right shows the result of integrating depth migrated seismic data into the structural interpretation. This data reveals a previously unresolvable, yet significant structural nose that extends into this area from the north within the grey dashed circle. The box below this structure map demonstrates the actual

track of the carbonate top within the circled area. Note that this differs substantially from what would be expected if only well control data was utilized.

9. These structural nuances within the subject area will impact the ability of an operator to stay within the targeted Second Bone Spring Sand above the Third Bone Spring Carbonate.

10. Because of the nuances that exist in the structure of the Third Bone Spring Carbonate in this area, it is important for an operator to have both experiences targeting the Second Bone Spring Sand and access to seismic data. This is especially true as operators move from drilling one-mile to two-mile horizontal wells. Apache has gained that experience over its years of drilling and completing horizontal wells in this area and has successfully integrated seismic data to stay within the Second Bone Spring Sands and out of the carbonate since discovering the existence of these structural nuances.

11. **Slide 12 of Apache Exhibit C** is a subsea structure map I created of the Third Bone Spring Carbonate, which is the base of the Second Bone Spring Sands. I have outlined and shaded Sections 29 and 30 on the structure map. Based on well control data, the regional structure of the Third Bone Spring Carbonate appears to be dipping East, Southeast. The well control data and the propriety seismic data obtained by Apache do not reveal any faults, pinch outs, or other geologic impediments to developing the Second Bone Spring Sands with horizontal wells. However, as noted above, structural nuances exist in the Third Bone Spring Carbonate that can only be observed with seismic data and must be considered when planning and drilling horizontal wells.

12. The type log on the right of Slide 12 is from a well within Section 29 depicted by a blue star in the inset map. My interpreted formation tops are shown, and

the Second Bone Spring Sandstone target is highlighted in green. Finally, the cross-section A-A' that I will be showing on the next slide is outlined on the map with a blue star.

13. **Slide 13 of Apache Exhibit C** is a stratigraphic cross section I prepared for the Second Bone Spring Sand using the logs from the five wells shown on the prior slide. The cross section is hung on the Third Bone Spring Carbonate and each well on the cross-section contains gamma ray, resistivity, and porosity logs. The landing zone for the wells targeting the Second Bone Spring Sands is depicted with a red dash line. While this cross section shows carbonate stringers and variations in thickness in the upper part of the Second Bone Spring Sands, our lower target zone is good sand that is continuous across the proposed spacing units.

14. **Slide 14 of Apache Exhibit C** is a subsea structure map I prepared off the top of the Third Bone Spring Sand interval using the same well logs. I have again outlined and shaded Sections 29 and 30 on the structure map. This slide shows the regional dip of the Third Bone Spring Sand is East, Southeast. The nuances of this target are also improved drastically with integration of seismic interpretation into the structural mapping. The well control data and the propriety seismic data obtained by Apache do not reveal any faults, pinch outs, or other geologic impediments to developing the Third Bone Spring Sands with horizontal wells. The State CB 1 is again displayed on the right with my interpreted formation tops as well as our Third Bone Spring Sandstone target highlighted in green. The cross-section A-A' is reused, but the datum and depth shown on the next exhibit has been changed to highlight the Third Bone Spring Sandstone target.

15. **Slide 15 of Apache Exhibit C** is a stratigraphic cross section I prepared for the Third Bone Spring Sand using the logs from the five wells shown on the prior slide.

Each well on the cross-section contains gamma ray, resistivity, and porosity logs. The landing zone for the wells targeting the Third Bone Spring Sand is depicted with a red dash line. This cross section demonstrates less variability in the Third Bone Spring Sand interval and that this target zone is continuous across the proposed spacing units.

16. Based on my geologic study and Apache’s extensive drilling and completion experience in this area, the Bone Spring formation underlying the subject area is suitable for development by horizontal wells and the acreage comprising the proposed horizontal spacing units is productive and will contribute proportionately to the production from the wells.

17. In my opinion, the lay-down orientation of the wells is the preferred orientation for horizontal well development in this area and has been proven by Apache to develop the subject acreage efficiently and effectively.

18. Apache’s drilling and completion experience in this area is superior to Colgate. In addition, Apache has access to the well control and seismic data necessary to understand the structural nuances in this area and successfully drill horizontal wells in the Second and Third Bone Spring Sands underlying the proposed spacing units.

19. In my opinion, the granting of Apache’s applications in these consolidated cases and the denial of Colgate’s applications are in the best interest of conservation, the prevention of waste, and protection of correlative rights.

20. Apache Exhibit E-1 and Slides 8 through 15 of Apache Exhibit C were either prepared by me or compiled under my direction and supervision.

FURTHER AFFIANT SAYETH NOT.

Apache Corporation – Delaware Basin Geologist

2017-Present

Delaware Basin North West Shelf/North West Slope – Eddy/Lea County NM (one year)

- Created detailed target maps of North West Shelf acreage. Finalized development plan reviewing regional geology
- Analysed of all non-operated well proposals with engineering team, executing on high NPV agreements
- Detailed geologic mapping of slope stratigraphy. Responsible for planning Palmillo & Camacho wells and monitoring while drilling

NAUR Exploitation Geologist I (one year); NAUR Resource Development Geologist II: Alpine High (two years)

- Responsible for picking well locations/targets, fulfilling CDCs of assigned acreage, geoprognosis creation, leading prespud, geohazard detection/avoidance, casing point depth and monitoring while drilling of 71 wells.
- Monitored 4-5 rig lines at once for several months; Monitored up to seven rigs at once.
- Collaborated with drilling to successfully eliminate liners on 14 wells saving ~\$7MM in equipment costs.
- Responsible for accurate inventory counts of 143k acres.
- Worked with land to successfully create a large pooled lease between three units allowing longer, higher NPV laterals. Pooled unit satisfied CDC with 1/3 of original wells saving \$34MM per year in CDC well costs.
- Collaborated with land, facilities and production teams to create long term development for assigned acreage.
- Designed Alpine High strategy with supervisor and presented to CEO and upper management.

Impac Exploration Services

2016-2017

Wellsite Geologist/Earth Scientist I: Midland and Delaware Basins

- Mudlogged Permian Basin wells while excelling at all aspects of Wellsite Geology and working 12-24 hour shifts.
- Performed various Geochemical analyses in Geoscience lab: XRD, XRF, Pyrolysis, Capillary Suction Time.

Chevron

2014-2016

Operations/Asset Development Geologist: McElroy and Mid-Concho Fields

- Prospected for and identified over 50 workovers that yielded above average results.
- Coordinated with team engineers and manager to review workover candidates within two-day deadline.
- Developed new step-out well locations based on a paleo-channel resolved with seismic amplitude maps.
- Analyzed well logs to improve waterflood sweep and discover bypassed oil opportunities.
- Recalculated and upgraded oil volumetrics in both fields using Petra. Strengthened interpretations using wireline, seismic, production data, scout tickets, hand-drawn maps and core analysis.
- Conceptualized new workover method using rig-less acid jobs, saving hundreds of thousands per year.

CASE NOS. 21827 & 21878

AFFIDAVIT OF SHELBY JOHNSON

Shelby Johnson, of lawful age and being first duly sworn, declares as follows:

1. My name is Shelby Johnson, and I am employed by Apache Corporation (“Apache”) as a petroleum reservoir engineer. I am familiar with the applications filed by Apache in these consolidated cases and have studied Apache’s performance in the Bone Spring formation underlying the subject area.

2. My educational background and work experience is accurately summarized in **Apache Exhibit F-1**. I am a licensed professional engineer by the state of Texas since 2019 and a member of the Society of Petroleum Engineers since 2010. I believe my credentials qualify me to testify as an expert witness in petroleum reservoir and engineering matters.

3. As reflected on **Slide 16 of Apache Exhibit C**, Apache has been drilling, completing, and producing wells in the Bone Spring formation underlying the subject area since 2014. Our current producing well count is 36 horizontal wells, with twelve wells brought online in 2021 during the COVID pandemic.

4. With the heterogeneous geology in the area, a thorough understanding of the reservoir quality is key to understanding and predicting performance. Apache's extensive drilling and completion experience in the subject area has allowed the company to improve performance and gain a thorough understanding of the reservoir quality. We understand which parameters are the key production drivers and have gained the ability to accurately geosteer and remain within the identified target zones. We have optimized our inter-well spacing to mitigate interference and depletion risks. Our spacing strategy coupled with our optimized frac design effectively captures the desired drainage area in an efficient and effective manner.

5. Apache's drilling and completion capability in the subject area is demonstrated by **Slide 17 of Apache Exhibit C**. The gold lines reflect Apache's well performance on the lateral length normalized cumulative oil plot. The plot on the left provides the production data for wells completed in the Second Bone Spring Sands underlying Township 19 South, Range 28 East and surrounding areas. The plot on the right shows the same information for wells completed in the Third Bone Spring Sands. This production data demonstrates Apache has consistently outperformed operators of wells completed in the Second Bone Spring Sands and is on par with operators of wells completed in the Third Bone Spring Sands.

6. In contrast, my review of the production records indicates Colgate has not completed any Bone Spring wells in the subject area. Colgate therefore has no production data from wells Colgate has drilled to place on these performance slides.

7. Apache has learned a significant amount from our extensive drilling and completion experience in this area, which we will be able to incorporate in future

development. Our long history in the Bone Spring formation and performance track record in the subject area provide a competitive advantage and demonstrates why working interest owners in this area prefer Apache to develop the Bone Spring formation underlying Sections 29 and 30.

8. In addition, as reflected on **Slide 18 of Apache Exhibit C**, Apache intends to use the same surface locations for the proposed two-mile Palmillo wells in Sections 29 and 30 to develop adjacent Sections 25 and 26 to the West with Apache's proposed two-mile Camacho wells. This consolidation of surface locations will not only reduce the surface footprint for the necessary facilities but provide cost savings and efficiencies for strong economic returns.

9. In my opinion, the granting of Apache's applications and the denial of Colgate's competing applications in these consolidated cases is in the best interest of conservation, the prevention of waste, and protection of correlative rights.

10. **Apache Exhibit F-1 and Slides 16 through 18 of Apache Exhibit C** were either prepared by me or compiled under my direction and supervision.

FURTHER AFFIANT SAYETH NOT.

Cumulative GPA: 3.8/4.0, Magna Cum Laude, Bachelor of Science in Petroleum Engineering

*Dwight Look College of Engineering, Harold Vance Department of Petroleum Engineering, Student and Teaching Assistant***Work Experience****Apache Corp, Houston, TX****2021-Current****Reservoir Engineer III – Delaware Basin**

- Manage field development planning and post appraise new wells
- Perform reservoir modeling with an emphasis on rate transient analysis, frac modeling, depletion considerations, linear flow parameter, and OOIP analysis
- Analyze non-op and land trade opportunities to high grade positions and maximize value

EIG Global Energy Partners, Houston, TX**2020-2021****Reservoir Engineer, Contract – Energy Private Equity**

- Evaluate investment opportunities by analyzing engineering and financial data to create economic models and business development recommendations
- Perform technical diligence related to type curves (DCA), development plans, subsurface data, surface operations, LOS, plant statements, midstream contracts
- Manage portfolio of closed deals by executing engineering analysis for post appraisals and future investment decisions

Varde Partners, Houston, TX**2020****Reservoir Engineer, Senior Analyst – Energy Private Equity – perform engineering analysis for investment opportunities****Anadarko Petroleum Corporation, The Woodlands, TX****2014-2019****Senior Reservoir Engineer – US Onshore Exploration (Permian Basin)****2017-2019**

- Execute confidential exploration programs as project engineer performing all reservoir, completions, and production responsibilities, including completion and artificial lift design and monitoring, with capital budget of \$100MM/year
- Perform risked stochastic economic analysis to commercially characterize geologic prospects with a focus in the Permian
- Prioritize and rank exploration prospects for comparison with APC's existing portfolio to determine recommendation
- Perform decline curve analysis, volumetric analysis, competitor (offset) analysis, A&D and non-op evaluations
- Manage SEC reserves reporting for exploration wells and discoveries
- Work with an integrated team of geologists, geophysicists, petrophysicists, geochemists, landmen, and corporate development on presentations and investment recommendations to upper level management

Production/Operations Engineer – Delaware Basin**2014-2017**

- Manage produced water: develop plans to satisfy short and long term disposal needs with economic evaluation; design and permits SWD wells and water infrastructure system; manage agreements with 3rd party SWD companies; perform wellwork and surface maintenance for SWDs; understand risks to injection and analyze alternatives; develop sourcing and recycling strategy for use in drilling and completions; work with multi-disciplinary team consisting of reservoir, field operations, planning, regulatory, and HSE
- Reservoir study of disposal formations using volumetrics, well tests, pressure transient analysis, and nodal analysis
- Manage non-drilling capital (NDC) budget: forecast capital for water and power infrastructure, artificial lift, wellsite retrofits, non-op projects, office construction, automation, surface land acquisitions, and recompletions
- Created database for idle wells and process for P&A; executed all high priority P&A jobs

ExxonMobil Corporation, Fort Worth, TX**Summer 2013****Reservoir Engineering Intern with XTO Energy** – created database to analyze East Texas uphole recompletion opportunities and identified top candidates for field execution; performed economic analysis and recommended projects to management**Devon Energy, Groesbeck, TX****Summer 2012****Engineering Field Intern** – conducted a natural gas liquids project comparing refrigeration plant to a wellsite Joule-Thomson (JT) Unit and recommended wellsite to pilot; daily field activities included production operations, workovers, fracs, and drilling operations**Skills & Training**

CASE NOS. 21827 & 21878

AFFIDAVIT OF TAYLOR THETFORD

Taylor Thetford, of lawful age and being first duly sworn, declares as follows:

1. My name is Taylor Thetford, and I am employed by Apache Corporation (“Apache”) as a petroleum engineer. I am familiar with the applications filed by Apache in these consolidated cases, Apache’s drilling history and Apache’s plans for subject area.

2. My educational background and work experience is accurately summarized in **Apache Exhibit G-1**. I have been a member of the Society of Petroleum Engineers since 2013. I believe my credentials qualify me to testify as an expert witness in petroleum, drilling, and engineering matters.

3. Apache was founded in 1954 and has extensive experience with oil and gas drilling worldwide and most importantly the Permian/Delaware Basin in Texas and New Mexico. Apache is the most experienced operator in the subject area which is why we believe we are the best candidate to develop the Bone Spring formation underlying the proposed spacing units using horizontal wells. Colgate has only limited horizontal drilling experience in this area and has yet to complete any of these wells.

**BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. G
Submitted by: Apache Corporation
Hearing Date: November 05, 2021
Case Nos. 21727-21730**

4. **Slide 18 of Apache Exhibit C** notes that Apache intends to utilize three well pads in the E/2 E/2 of Section 25 in Township 19 South, Range 27 East to develop Sections 25 and 26 in that township and the acreage that is the subject of these consolidated cases. This is consistent with Apache's goal to strategically design and consolidated well pads and surface facilities in this area to minimize the necessary surface disturbance. There will be a total of 16 wells drilled in both the 2nd and 3rd bone spring landing zone. Apache intends to use a single tank battery for the Palmillo 29-30 wells to further reduce the necessary surface disturbance.

5. **Slide 19 of Apache Exhibit C** notes that since 2017 Apache has drilled seventeen one-mile Second Bone Spring wells in Township 19 South, Range 28 East. This experience has enabled Apache to steadily reduce the number of drilling days by 34%. Apache can now drill one-mile Second Bone Spring wells in an average time of around 8 to 9 days from spud to TMD in the subject area.

6. **Slide 20 of Apache Exhibit C** reflects that Apache's drilling experience has allowed it to reduce the costs per well. The yellow bars represent costs per foot while the blue bars represent the actual total costs per well. Apache is averaging \$164 per foot for an average actual drilling cost of \$2.04MM for a one mile well in the Second Bone Spring Sand.

7. **Slide 21 of Apache Exhibit C** reflects Apache's estimated time to drill a two-mile Second Bone Spring well using the costs Apache has incurred for one-mile wells. Apache estimates that it will take another three days to drill the additional segment of lateral for a two-mile well. This results in an anticipated 3 days to move the rig to location, 12 days from spud to TMD and 3 days to run casing and cement the well prior

to skidding the rig to the next well for a total of 18 days of the rig on location. In contrast, the AFE's Colgate submitted to Apache indicate Colgate experiences or anticipates over 20 days for "drilling days."

8. **Slide 22 of Apache Exhibit C** provides the estimated costs to drill the proposed 2-mile Second Bone Spring wells, which are reflected in the AFE's Apache submitted to the working interest owners in the subject acreage.

9. Since 2017 Apache has drilled four 2-mile Third Bone Spring wells and has submitted AFE's to the working interest owners based on those actual costs. **Slide 23 of Apache Exhibit C** reflects that this experience has enabled Apache to steadily reduce the number of drilling days by 13%. Apache can now drill two-mile Third Bone Spring wells in an average time of around 23 to 24 days from spud to TMD in the subject area.

10. **Slide 24 of Apache Exhibit C** reflects that Apache's drilling experience has allowed it to reduce the costs per well. The yellow bars represent the cost per foot while the blue bars represent the total cost per well. Apache has averaged \$200 per foot and an average actual cost of \$3.70MM for a two mile well in the Third Bone Spring Sand.

11. **Slide 25 of Apache Exhibit C** provides the estimated costs to drill the proposed 2-mile Third Bone Spring wells, which are reflected in the AFE's Apache submitted to the working interest owners in the subject acreage. The \$2.94MM total drilling cost is less than what Apache averaged for its prior 4 wells because Apache expects efficiencies due to more wells per pad which equates to less money spent per well on rig move and location costs and utilizing knowledge learned from drilling the previous wells to reduce time on well.

12. In my opinion, the granting of Apache's applications and the denial of Colgate's competing applications in these consolidated cases is in the best interest of conservation, the prevention of waste, and protection of correlative rights.

13. Apache Exhibit G-1 and Slides 18 through 25 of Apache Exhibit C were either prepared by me or compiled under my direction and supervision.

TAYLOR S. THETFORD

Drilling Engineer

281-221-6536

taylor.thetford@apachecorp.com

PROFILE

Technology driven engineer with 7+ years of US onshore drilling experience in both unconventional and conventional plays in Texas and New Mexico. Skilled at developing and implementing new drilling programs, completing detailed cost estimates, and performing high level analytical analysis. Possesses strong communication and problem-solving skills and the ability to work independently or in team environments.

EMPLOYMENT HISTORY

❖ **Drilling Engineer, Apache Corporation** Jun 2013 — Present
Houston, TX

Drilling Engineer III

- Apr 2020 – Present
- Delaware Basin Asset Drilling Team Member
- Responsible for providing detailed drilling cost estimates and managing permitting timelines along with performing offset technical research and well design
- Lead a team of programmers in the design and implementation of cutting-edge real-time drilling software

Drilling Engineer II

- May 2018 – Apr 2020
- Permian Region Drilling Engineer – New Mexico Assets
- Plan, permit, and drill wells on both NM state and BLM land in the bone spring and wolfcamp target formations

Drilling Engineer II

- Mar 2016 – May 2018
- Special Projects: Drilling Intelligence Guide (DIG)
- Develop, deploy, and support data aggregation and advisory system to collect, store, and analyze big data from 20 operated drilling rigs to enable better drilling decisions from well structured, non-manipulated data, physics-based models, and predictive alerts.

Rotational Drilling Engineer

- Jun 2013 – May 2016
- Completed Apache’s Accelerated Development Program for drilling engineers
- Year-long rotations in Permian and US Gulf Coast regions

TECHNICAL SKILLS

Peloton WellView	DSWellPlan
Tibco Spotfire	Compass
Drillscan Wellscan	StressCheck

EDUCATION

❖ **Texas Tech University** Aug 2009 — May 2013
Lubbock, TX

Bachelor of Science, Petroleum Engineering

Minor: Mechanical Engineering

Texas Tech Presidential Scholarship Recipient

BEFORE THE OIL CONSERVATION DIVISION

Santa Fe, New Mexico

Exhibit No. G1

Re: Application of Apache Corporation for Compulsory Pooling, Eddy County, New Mexico.
Palmillo 29-30 State Com #271H & #375H wells

Dear Sir or Madam:

This letter is to advise you that Apache Corporation has filed the enclosed application with the New Mexico Oil Conservation Division.

During the COVID-19 Pubic Health Emergency, state buildings are closed to the public and hearings will be conducted remotely. The hearing will be conducted on April 8, 2021 beginning at 8:15 a.m. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: <http://www.emnrd.state.nm.us/OCD/announcements.html>.

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required by Division Rule 19.15.4.13.B to file a Pre-hearing Statement four business days in advance of a scheduled hearing. This statement must be filed with the Division, by mail at 1220 S. St. Francis Dr., Santa Fe, NM, 87505 or email at OCD.Hearings@state.nm.us, and should include: the names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact Blake Johnson, at (432) 818-1698, or blake.johnson@apachecorp.com.

Sincerely,

Kaitlyn A. Luck

Exhibit No. I
Submitted by: Apache Corporation
Hearing Date: November 05, 2021
Case Nos. 21727-21730

STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES
DEPARTMENT
OIL CONSERVATION DIVISION
SANTA FE, NEW MEXICO

The State of New Mexico, Energy Minerals and Natural Resources Department, Oil Conservation Division ("Division") hereby gives notice that the Division will hold public hearings before a hearing examiner on the following case. During the COVID-19 Public Health Emergency, state buildings are closed to the public and Division hearings will be conducted remotely. The public hearing for the following case will be electronic and conducted remotely. The hearing will be conducted on **Thursday, April 8, 2021, beginning at 8:15 a.m.** To participate in the electronic hearing, see the instructions posted below. The docket may be viewed at <http://www.emnrd.state.nm.us/OCD/hearings.html> or obtained from Marlene Salvidrez, at Marlene.Salvidrez@state.nm.us. Documents filed in the case may be viewed at <http://ocdimage.emnrd.state.nm.us/imaging/CaseFileCriteria.aspx>. If you are an individual with a disability who needs a reader, amplifier, qualified sign language interpreter, or other form of auxiliary aid or service to attend or participate in a hearing, contact Marlene Salvidrez at Marlene.Salvidrez@state.nm.us, or the New Mexico Relay Network at 1-800-659-1779, no later than **March 28, 2021**.

Persons may view and participate in the hearings through the following link:

Lawlis, his/her heirs and devisees; V-F Petroleum Inc.; Read & Stevens, Inc.; CM Resources, LLC; WPX Energy Permian, LLC; Jetta Production Company; COG Operating LLC; and Tug Hill Energy, LLC.

Case No. 21727: Application of Apache Corporation for compulsory pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order pooling all uncommitted interest owners in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal spacing unit comprised of the N/2 N/2 of Sections 29 and 30, Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico. Applicant seeks to dedicate the above-referenced horizontal spacing unit to the following proposed initial wells: (1) the Palmillo 29-30 State Com #271H well (API No. 30-015-pending), and (2) the Palmillo 29-30 State Com #375H well (API No. 30-015-pending), to be drilled from a common surface hole location in NE/4 NE/4 (Unit A) of Section 25, Township 19 South, Range 27 East, to bottom hole locations in the NE/4 NE/4 (Unit A) of said Section 29. The completed interval for each of the proposed wells will comply with statewide setbacks for oil wells. Also, to be considered will be the cost of drilling and completing the wells, the allocation of the cost thereof, the actual operating costs and charges for supervision, the designation of applicant as operator, and the imposition of 200% charge for risk involved in drilling and completing each well. Said area

is located approximately 13 miles northeast of Caspau,
New Mexico.

having any right, title, interest
or claim in the following case
and notice to the public.**

(NOTE: All land descriptions herein refer to the New Mexico Principal Meridian whether or not so stated.)

To: All pooled parties, including: Apache Corporation; Alpar Energy, Inc; AmericaWest Resources, LLC; Anthracite Energy Partners, LLC; Cheney Energy Partners, LLC; Cimarex Energy Co; CK Finance, LLC; Colgate Production LLC; Conejos Energy, LLC; Crown Oil Partners VI, LLC; Crump Energy Partners III, LLC; Currie Smith I, Ltd.; Dale A. Smith, his heirs and devisees; Daniel J Murphy, his heirs and devisees; Ellen Smith Bivins, her heirs and devisees; EOG Resources Inc; JSTM Energy Investments, LLC; Marks Oil, Inc.; Nance Resources, Inc; Occidental Permian Limited Partnership; ODS-ACS Properties, Ltd.; OXY USA INC; OXY USA WTP Limited Partnership; Sabre Exploration, Inc.; SDX Properties, Inc.; Texilvania, Ltd.; TKM Resources, LLC; True North Exploration, Inc.; V-J Energy Partners, LLC; XTO Energy Inc.; ZPZ Delaware I LLC; Chevron USA, Inc.; Marathon Oil Permian LLC; S.K. Lawlis, his/her heirs and devisees; V-F Petroleum Inc.; Read & Stevens, Inc.; CM Resources, LLC; WPX Energy Permian, LLC; Jetta Production Company; COG Operating LLC; and Tug Hill Energy, LLC.

Case No. 21729: Application of Apache Corporation for compulsory pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order pooling all uncommitted interest owners in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal spacing unit comprised of the N/2 S/2 of Sections 29 and 30, Township 19 South, Range 28 East, NMPM, Eddy County, New Mexico. Applicant seeks to dedicate the above-referenced horizontal spacing unit to the following proposed initial wells: (1) the Palmillo 29-30 State Com #273H well (API No. 30-015-pending), and (2) the Palmillo 29-30 State Com #377H well (API No. 30-015-pending), to be drilled from a common surface hole location in NE/4 SE/4 (Unit I) of Section 25, Township 19 South, Range 27 East, to bottom hole locations in the NE/4 SE/4 (Unit I) of said Section 29. The completed interval for each of the proposed wells will comply with statewide setbacks for oil wells. Also, to be considered will be the cost of drilling and completing the wells, the allocation of the cost thereof, the actual operating costs and charges for supervision, the designation of applicant as operator, and the imposition of 200% charge for risk involved in drilling and completing each well. Said area

is located approximately 13 miles northeast of Carlsbad,
New Mexico.

STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES
DEPARTMENT
OIL CONSERVATION DIVISION
SANTA FE, NEW MEXICO

The State of New Mexico, Energy Minerals and Natural Resources Department, Oil Conservation Division ("Division") hereby gives notice that the Division will hold public hearings before a hearing examiner on the following case. During the COVID-19 Public Health Emergency, state buildings are closed to the public and Division hearings will be conducted remotely. The public hearing for the following case will be electronic and conducted remotely. The hearing will be conducted on Thursday, April 8, 2021, beginning at 8:15 a.m. To participate in the electronic hearing, see the instructions posted below. The docket may be viewed at <http://www.emnrd.state.nm.us/OCD/hearings.html> or obtained from Marlene Salvidrez, at Marlene.Salvidrez@state.nm.us. Documents filed in the case may be viewed at <http://ocdimage.emnrd.state.nm.us/imaging/CaseFileCriteria.aspx>. If you are an individual with a disability who needs a reader, amplifier, qualified sign language interpreter, or other form of auxiliary aid or service to attend or participate in a hearing, contact Marlene Salvidrez at Marlene.Salvidrez@state.nm.us, or the New Mexico Relay Network at 1-800-659-1779, no later than March 28, 2021.

Persons may view and participate in the hearings through the following link:
