1. Applicant is an interest owner in the N $\frac{1}{2}$ SW $\frac{1}{4}$  Section 3 and the N $\frac{1}{2}$ S $\frac{1}{2}$  of Section 4, and has the right to drill a well thereon.
2. Applicant proposes to drill the Samsonite 3/4 B2KL Fed. Com. Well No. 1H to a depth sufficient to test the Bone Spring formation, and to dedicate the N $\frac{1}{2}$ SW $\frac{1}{4}$  Section 3 and the N $\frac{1}{2}$ S $\frac{1}{2}$  of Section 4 to the well. The well is a horizontal well, with a first take point in the NE $\frac{1}{4}$ SW $\frac{1}{4}$  of Section 3 and a last take point in the NW $\frac{1}{4}$ SW $\frac{1}{4}$  of Section 4.

5. The pooling of all mineral interest owners in the Bone Spring formation underlying the N $\frac{1}{2}$ SW $\frac{1}{4}$  Section 3 and the N $\frac{1}{2}$ S $\frac{1}{2}$  of Section 4 will prevent the drilling of unnecessary wells, prevent waste, and protect correlative rights.

**WHEREFORE**, applicant requests that, after notice and hearing, the Division enter its order:

- A. Pooling all mineral interest owners in the Bone Spring formation underlying the N $\frac{1}{2}$ SW $\frac{1}{4}$  Section 3 and the N $\frac{1}{2}$ S $\frac{1}{2}$  of Section 4;
- B. Designating applicant as operator of the well;
- C. Considering the cost of drilling, completing, and equipping the well, and allocating the cost among the well's working interest owners;
- D. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- E. Setting a 200% charge for the risk involved in drilling, completing, and equipping the well in the event a working interest owner elects not to participate in the well.

**VERIFIED STATEMENT OF ADRIANA SALGADO**

Adriana Salgado, being duly sworn upon her oath, deposes and states:

1. I am a Landman for Mewbourne Oil Company ("Mewbourne") and have personal knowledge of the matters stated herein. I have worked as a landman for almost four years. I hold a Bachelor of Arts Degree in Humanities from the University of Texas of the Permian Basin. I have 4 years of land work experience with Apache Corporation, prior to working at Mewbourne Oil Company. Collectively, I have 10 years of land work experience.

2. Pursuant to NMAC 19.15.4.12.A(1), the following information is submitted in support of the compulsory pooling application filed herein:

(a) The purpose of this application is to force pool working interest owners into the Bone Spring formation horizontal spacing unit described below, and in wells to be drilled in the unit.

(b) No opposition is expected because the interest owners being pooled have been contacted regarding the proposed well, but have failed or refused to voluntarily commit their interests to the well. All interest owners have been located.

(c) A plat outlining the unit being pooled is attached hereto as Exhibit 1. Mewbourne seeks an order approving a 240.00-acre horizontal spacing unit in the Bone Spring formation comprised of the N2S2 of Section 4 and the N2SW4 of Section 3, Township 18 South, Range 29 East, NMPM, Eddy County, New Mexico. The unit will be dedicated to the Samsonite 3/4 B2KL Fed Com #1H. There are no depth severances in the Bone Spring Formation.

(d) The parties being pooled and their interests are set forth in Exhibit 2. Their current and correct addresses are also set forth.

EXHIBIT

2

- (e) Exhibit 3 contains a summary of contacts with the interest owners, together with copies of the proposal letters sent to them and delivery receipts for each.
- (f) In order to locate the interest owners, Mewbourne examined the county records, performed internet searches, checked telephone records, and searched pertinent computer searches.
- (g) Mewbourne has made a good faith effort to obtain the voluntary joinder of the working interest owners in the proposed well.
- (h) Mewbourne has the right to pool the overriding royalty owners in the well unit.
- (i) Exhibit 4 is the Authorization for Expenditure for the proposed well. The estimated cost of the well set forth therein is fair and reasonable, and is comparable to the costs of other wells of similar depth and length drilled in this area Eddy County.
- (j) Mewbourne requests overhead and administrative rates of \$8000/month for a drilling well and \$800/month for a producing well. These rates are fair, and comparable to the rates charged by other operators for wells of this type in this portion of Eddy County. Mewbourne requests that these rates be adjusted periodically as provided in the standard COPAS. Accounting Procedure.
- (k) Mewbourne requests that the maximum cost plus 200% risk charge be assessed against non-consenting working interest owners.
- (l) Applicant requests that it be designated operator of the well.
- (m) The attachments to this affidavit were prepared by me or under my supervision or compiled from company business records.

Dear Sir or Madam,

Mewbourne Oil Company ("Mewbourne") hereby proposes to drill the referenced horizontal Bone Spring wells. The referenced wells will be drilled as stated below:

1. The Samsonite 3/4 B2NM Fed Com #1H will be at a surface location 1400' FSL & 2500' FEL in Section 3, T-18-S, R-29-E and a bottom hole location approximately 1980' FSL & 100' FWL in Section 4, T-18-S, R-29-E, Eddy County, New Mexico. We anticipate drilling to an approximate true vertical depth of 7,289 feet and an approximate measured depth of 15,078 feet. The estimated cost to casing point for this well is \$2,800,200 and estimated cost of producing well is \$6,404,800.
2. The Samsonite 3/4 B2KL Fed Com #1H will be at a surface location 1400' FSL & 2500' FEL in Section 3, T-18-S, R-29-E and a bottom hole location approximately 1980' FSL & 100' FWL in Section 4, T-18-S, R-29-E, Eddy County, New Mexico. We anticipate drilling to an approximate true vertical depth of 7,171 feet and an approximate measured depth of 14,961 feet. The estimated cost to casing point for this well is \$2,797,500 and estimated cost of producing well is \$6,401,500.

These costs are more fully detailed in the AFE enclosed herewith. To facilitate the drilling of these wells and the development of this project area, Mewbourne proposes forming a working interest unit by signing an Operating Agreement with a Contract Area comprised of the W2 of Section 3 and All of Section 4. Our Joint Operating Agreement, to follow, will contain 100%/300% non-consent penalty, \$8,000.00/\$800 drilling/producing rates, be limited to the Bone Spring formation and MOC will be listed as Operator. If you do not wish to participate in the wells, Mewbourne is interested in discussing other options for your interest.

Enclosed are duplicate originals of Mewbourne's AFEs for the wells. To make your election to participate in the proposed wells, properly execute and return the AFEs. You will also need to provide your "Well Information" requirements. As a reminder, Mewbourne's AFEs provide all participants the opportunity to opt out of the "Extra Expense Well Control Insurance" that Mewbourne purchases for each well it drills. If you do opt out, you must provide evidence that you have adequate "Well Control Insurance".

Feel free to contact me if you have any questions. I can be reached by phone at (432) 682-3715 or via email at [asalgado@mewbourne.com](mailto:asalgado@mewbourne.com).

Sincerely,  
MEWBOURNE OIL COMPANY

**SELF-AFFIRMED STATEMENT OF CHARLES CROSBY**

COUNTY OF MIDLAND

STATE OF TEXAS

Charles Crosby deposes and states:

1. I am over the age of 18, and have personal knowledge of the matters stated herein.
2. I am a geologist for Mewbourne Oil Company ("Mewbourne"), and I am familiar with the geological matters involved in these cases. I have been qualified by the Division as an expert petroleum geologist.
3. The following geological plats are attached hereto:
  - (a) Attachment A is a structure map on the base of the Second Bone Spring Sand, which is the target formation for the Samsonite and Swanson wells. It accurately reflects the structure of the base of the Second Bone Spring Sand. It shows that structure dips gently to the southeast. It also shows Second Bone Spring Sand wells in the immediate area, and a line of cross-section.
  - (b) Attachment B is a Lower Second Bone Spring Sand Gross Thickness Map, which is the completion zone of the Samsonite and Swanson wells.
  - (c) Attachment C is a cross section of the Second Bone Spring Sand. The well logs on the cross-section give a representative sample of the Second Bone Spring Sand in this area. The target zones for the wells are continuous and uniformly thick across the well units.
4. I conclude from the maps that:
  - (a) The horizontal spacing units are justified from a geologic standpoint.

EXHIBIT

3

(b) The target zone is continuous and of relatively uniform thickness across the well units.

(c) Each quarter section in each well unit will contribute more or less equally to production from the target zone.

(d) There is no faulting or other geologic impediment in the area which will affect the drilling of the subject wells.

5. Attachment D contains information from nearby Second Bone Spring Sand wells drilled in this area. The drilled and completed wells indicate that laydown wells are a reasonable method to develop the reservoir in these sections.

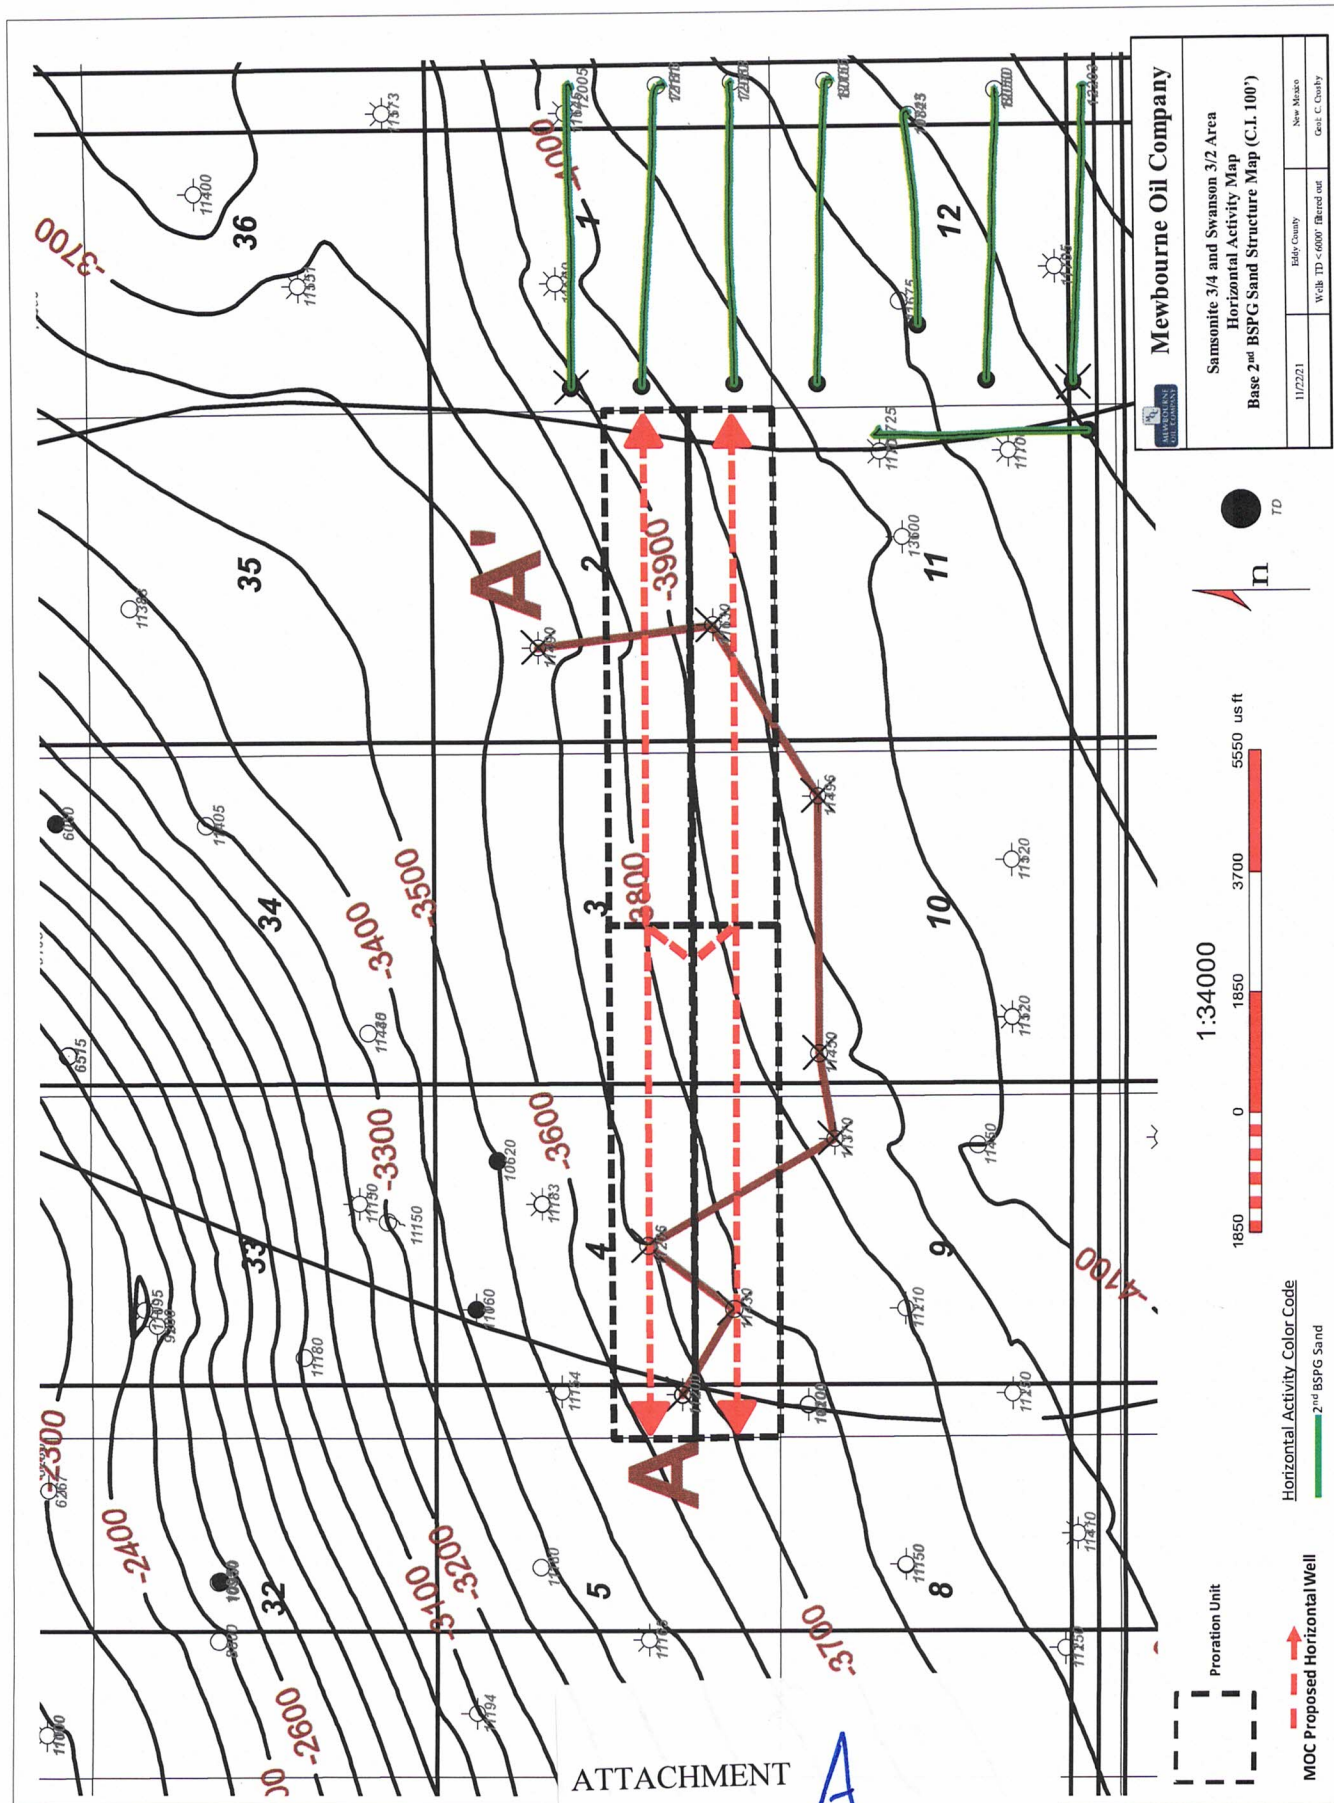

6. Attachments E-1 and E-2 contain the horizontal drilling plans for the proposed Samsonite and Swanson wells, respectfully. The producing intervals of the wells will be orthodox.

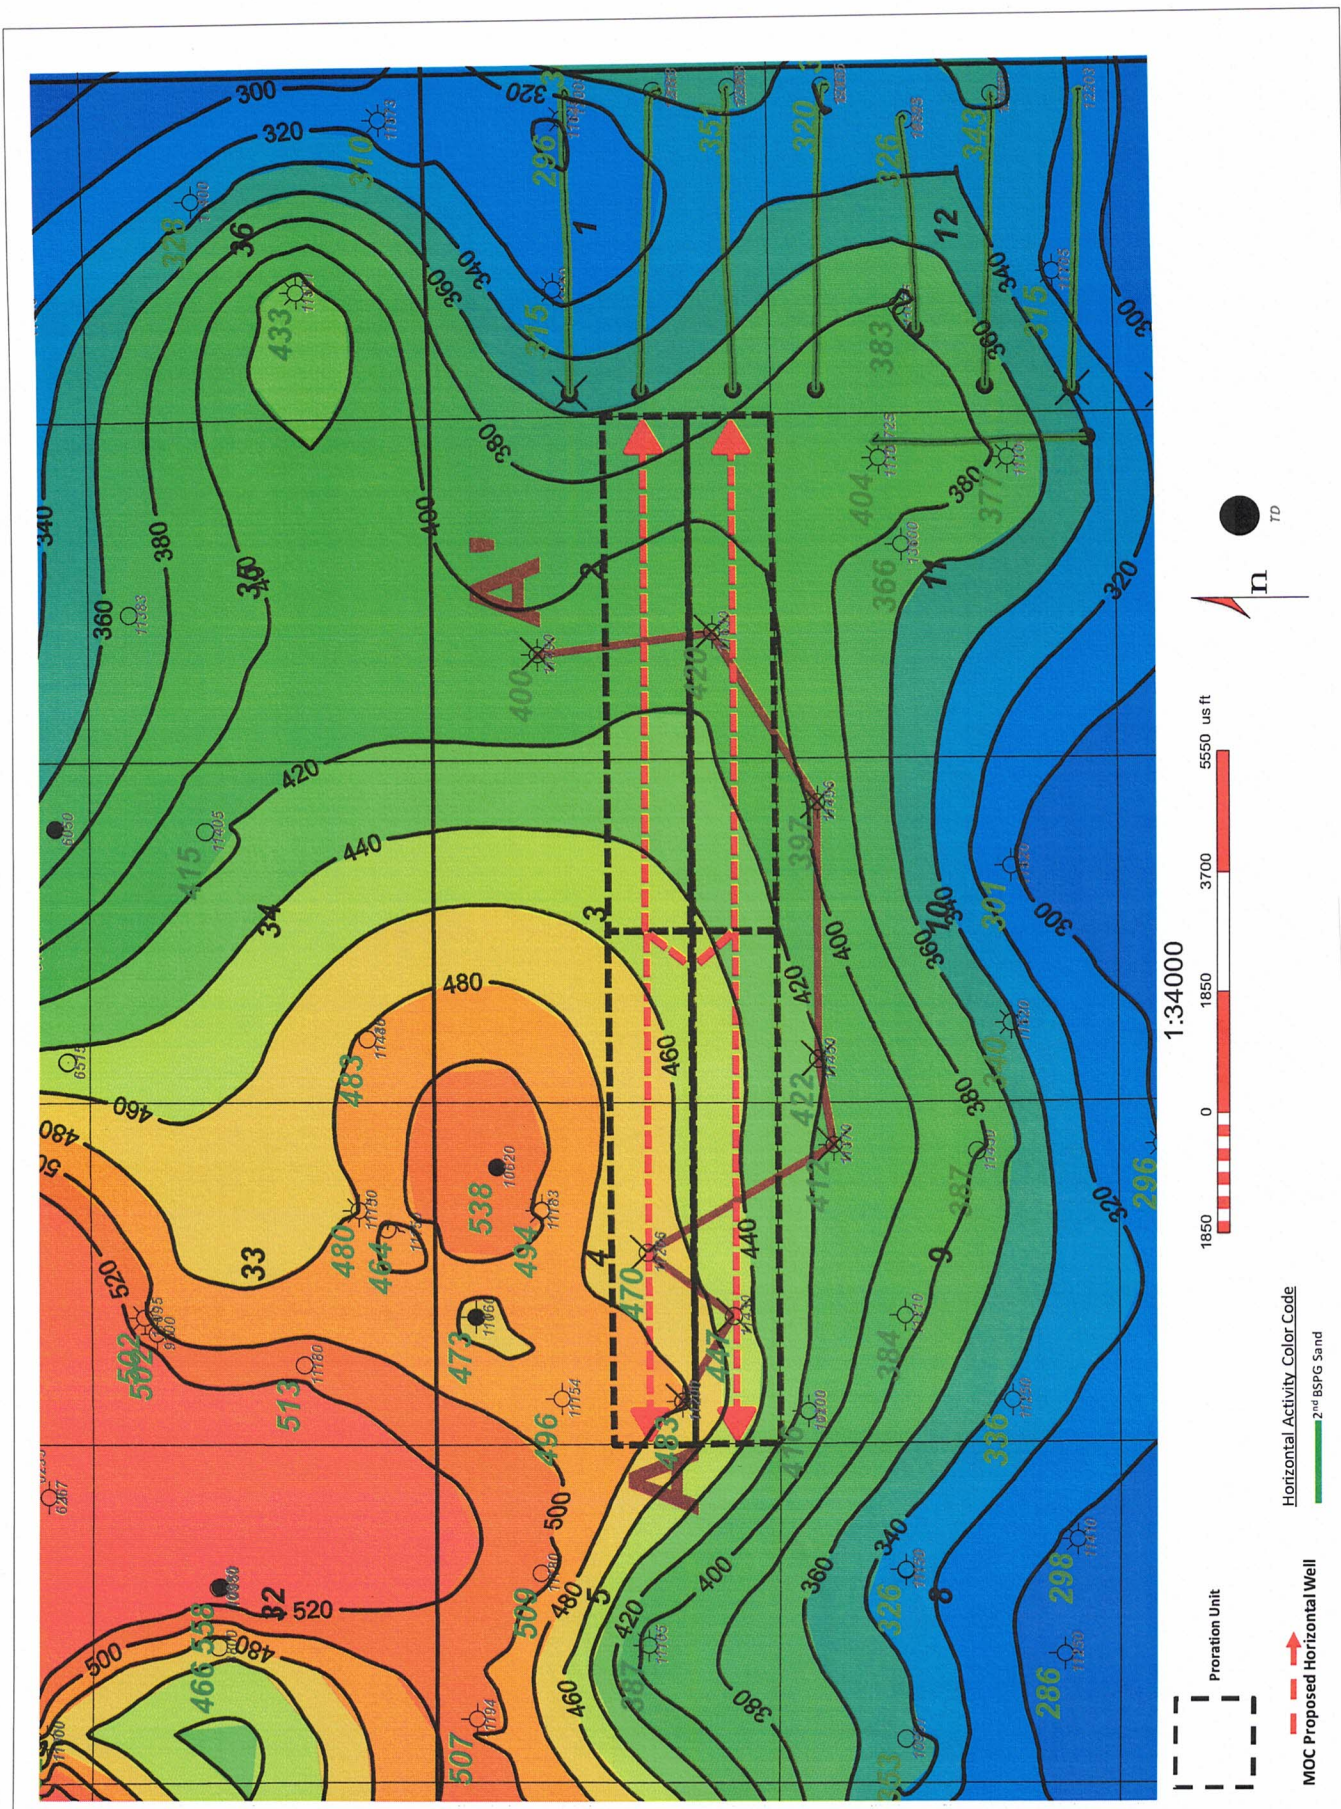

7. I understand that this Self-Affirmed Statement will be used as written testimony in these cases. I affirm that my testimony in paragraphs 1 through 6 above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date handwritten next to my signature below.
