Case Nos. 22235 - 22240

SELF-AFFIRMED STATEMENT OF CHARLES CROSBY

COUNTY OF MIDLAND)
) ss.
STATE OF TEXAS)

Charles Crosby deposes and states:

1. I am over the age of 18, and have personal knowledge of the matters stated herein.
2. I am a geologist for Mewbourne Oil Company ("Mewbourne"), and I am familiar with the geological matters involved in these cases. I have not testified before the Division as a petroleum geologist.
3. In these cases Mewbourne seeks to pool, collectively, all of Sections 1 and 2, Township 20 South, Range 28 East, NMPM as to both the Bone Spring and Wolfcamp formations.
4. The following geological plats are attached hereto:
 - (a) Attachment A is a structure map on the base of the Second Bone Spring Sand. It shows that structure dips gently to the east. It also shows Second Bone Spring wells in the area, and a line of cross-section.
 - (b) Attachment B is a Second Bone Spring Sand Gross Thickness Isopach, which is the target zone for some of the proposed wells.
 - (c) Attachment C is a cross section of the Second Bone Spring Sand. The well logs on the cross-section give a representative sample of the Second Bone Spring Sand in this area. The sand is continuous and uniformly thick across the well units Second Bone Spring Sand.
 - (d) Attachment D is a Third Bone Spring Sand Gross Thickness Isopach, which is the target zone for some of the proposed wells.

EXHIBIT

3

(e) Attachment E is a cross section of the Third Bone Spring Sand and Upper Wolfcamp. The well logs on the cross-section give a representative sample of the subject zones in this area. The zones are continuous and uniformly thick across the well units in the Third Bone Spring Sand and the Upper Wolfcamp.

(f) Attachment F contains top of the Wolfcamp structure maps applicable to the Third Bone Spring Sand and Upper Wolfcamp. Structure dips slightly to the east-southeast.

5. I conclude from the maps that:

(a) The horizontal spacing units are justified from a geologic standpoint.

(b) The target zones are continuous and of relatively uniform thickness across the well units.

(c) Each quarter-quarter section in each in the Bone Spring and Wolfcamp well units will contribute more or less equally to production from the target zones.

(d) There is no faulting or other geologic impediment in the area which will affect the drilling of the subject wells.

6. Attachment G contains information from Second and Third Bone Spring Sand, and Wolfcamp, wells drilled in this area. Laydown wells are the preferred orientation for wells in this area.

7. Attachment H contains the horizontal drilling plans for the proposed wells. The producing intervals of the wells will be orthodox.

8. I understand that this Self-Affirmed Statement will be used as written testimony in these cases. I affirm that my testimony in paragraphs 1 through 7 above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date handwritten next to my signature below.
