STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF CATAMOUNT ENERGY PARTNERS, LLC, FOR APPROVAL OF A NON-STANDARD HORIZONTAL WELL SPACING UNIT FOR A MULTI-LATERAL WELL AND COMPULSORY POOLING, SAN JUAN AND RIO ARRIBA COUNTIES, NEW MEXICO.

CASE NO. ____22973

APPLICATION

Catamount Energy Partners, LLC ("Catamount" or "Applicant") (OGRID No. 308973), through its undersigned attorneys, hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17 and § 70-2-18, for an order (a) creating a 987.58-acre, more or less, non-standard horizontal well spacing unit in the Fruitland Coal formation [Basin Fruitland Coal (Gas) Pool (Pool Code 71629)] underlying all of irregular Section 11 and the W/2 equivalent, the NE/4 equivalent and the NW/4SE/4 of irregular Section 12, Township 32 North, Range 6 West, NMPM, San Juan and Rio Arriba Counties, New Mexico, and (b) pooling the uncommitted mineral interest owners in this proposed non-standard horizontal well spacing unit. In support of its application, Applicant states:

- 1. Applicant is a working interest owner in the proposed horizontal well spacing unit and has the right to drill thereon.
- 2. Applicant seeks to initially dedicate the above-referenced spacing unit to the **Navajo Lake 32-6-11 No. 1** well, a multi-lateral horizontal well to be drilled from a surface location in the NE/4 SE/4 (Unit I) of Section 10 with a completed horizonal wellbore and three laterals that commence in the W/2 W/2 of irregular Section 11 and extend to bottom hole locations

¹ The border of San Juan and Rio Arriba Counties is located within Section 11.

in the NE/4NE/4 equivalent (Lot 1), the NW/4 SE/4 (Unit J) and the SE/4 SW/4 (Unit N) of irregular Section 12.

- 3. Applicant seeks approval of the non-standard spacing unit to accommodate development under Navajo Lake, to address the land configurations associated with irregular Sections 11 and 12, to address unleased federal acreage in the NE/4SE/4 and the S/2SE/4 of irregular Section 12, and to minimize cost and surface disturbance.
- 4. Division rules allow multiple laterals of a horizontal well to be dedicated to the same spacing unit when they are to be in the same pool or formation. *See* NMAC 19.15.16.15.B(7)(a).
- 5. Applicant has sought and been unable to obtain voluntary agreement for the development of these lands from all the interest owners in the subject spacing unit.
- 6. Approval of this application will allow Applicant to obtain a just and fair share of the oil and gas underlying the subject lands, will avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on August 4, 2022, and, after notice and hearing as required by law, the Division enter an order:

- A. Approving the non-standard horizontal well spacing unit;
- B. Pooling all uncommitted interests in the horizontal spacing unit;
- C. Approving the initial multi-lateral horizontal well in the spacing unit;
- D. Designating Applicant as the operator of this spacing unit and the horizontal wells to be drilled thereon;

- E. Authorizing Applicant to recover its costs of drilling, equipping, and completing the well;
- F. Approving the actual operating charges and costs of supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- G. Imposing a 200% charge for the risk assumed by Applicant in drilling and completing the well against any working interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

HOLLAND & HART LLP

ATTORNEYS FOR CATAMOUNT ENERGY PARTNERS, LLC.

STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION

APPLICATION OF CATAMOUNT ENERGY PARTNERS LLC, FOR APPROVAL OF A NON-STANDARD HORIZONTAL WELL SPACING UNIT FOR A MULTI-LATERAL WELL AND COMPULSORY POOLING, SAN JUAN AND RIO ARRIBA COUNTIES, NEW MEXICO.

CASE NO. 22973

SELF-AFFIRMED STATEMENT OF DENISE GREER

- 1. My name is Denise Greer and I am employed by Catamount Energy Partners LLC ("Catamount") as a Senior Landman. I am familiar with the application filed in this matter.
- 2. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. My credentials in petroleum land matters have been accepted by the Division and made a matter of record.
- 3. Catamount seeks an order (a) creating a 987.58-acre, more or less, non-standard horizontal well spacing unit in the Fruitland Coal formation [Basin Fruitland Coal (Gas) Pool (Pool Code 71629)] underlying all of irregular Section 11 and the W/2 equivalent, the NE/4 equivalent and the NW/4SE/4 of irregular Section 12, Township 32 North, Range 6 West, NMPM, San Juan and Rio Arriba Counties, New Mexico, and (b) pooling the uncommitted mineral interest owners in this proposed non-standard horizontal well spacing unit.
- 4. The proposed non-standard spacing unit will be initially dedicated to the **Navajo Lake 32-6-11 No. 1** well, a multi-lateral horizontal well to be drilled from a surface location in the NE/4 SE/4 (Unit I) of Section 10 with a completed horizonal wellbore and three laterals that BEFORE THE OIL CONSERVATION DIVISION

BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. A

Submitted by: Catamount Energy Partners, LLC

¹ The border of San Juan and Rio Arriba Counties is located within Section 11.

Hearing Date: August 04, 2022 Case No. 22973 commence in the W/2 W/2 of irregular Section 11 and extend to bottom hole locations in the SE/4NE/4 (Unit H), the NW/4 SE/4 (Unit J) and the SE/4 SW/4 (Unit N) of irregular Section 12.

- 5. Catamount Exhibit A-1 shows the location of the subject acreage, the proposed non-standard spacing unit, and the trajectory of the proposed multi-lateral horizontal well. The subject acreage straddles the Colorado and New Mexico state line and includes acreage under the Navajo Lake. The blue north-south meandering line is the border between San Juan County and Rio Arriba County. The proposed spacing unit is outlined in yellow and includes two existing gas spacing units outlined in purple, each dedicated to an existing vertical well identified in the SW/4 NW/4 and the NW/4 SW/4 of irregular Section 11. The proposed multi-lateral well is shown with green lines emanating from the surface hole location identified by dark blue circle in the E/2 E/2 of Section 10. The first take point for the proposed well is shown with a blue circle in the NW/4 SW/4 of Section 11 and the subsequent green lines depict the approximate location of the three perforated laterals extending into Section 12.
- 6. The proposed non-standard spacing unit is comprised of leased and unleased fee lands. There are no ownership depth severances in the Fruitland Coal formation underlying the proposed spacing unit.
- 7. The non-standard spacing unit is configured to accommodate development under the Navajo Lake, to address the unique land configurations associated with irregular Sections 11 and 12, to minimize cost and surface disturbance, and to exclude the unleased federal acreage in the NE/4SE/4 and the S/2SE/4 of irregular Section 12. Under my supervision and direction, a consultant for Catamount, attempted to have discussions on the unleased federal tracts with the Bureau of Land Management (BLM) in both the Santa Fe and Farmington, New Mexico offices. Acreage appears never to have been leased. I instructed my counsel to provide notice of this

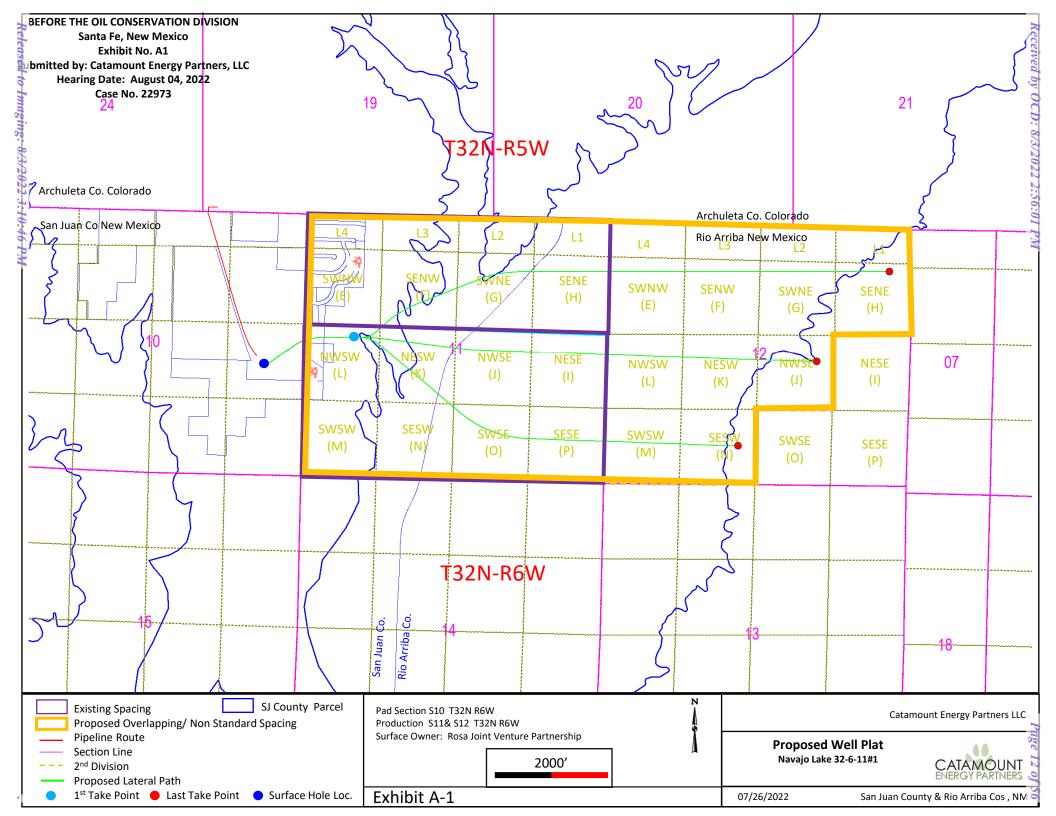

hearing to the BLM as the only mineral owner affected by the proposed non-standard horizontal well spacing unit.

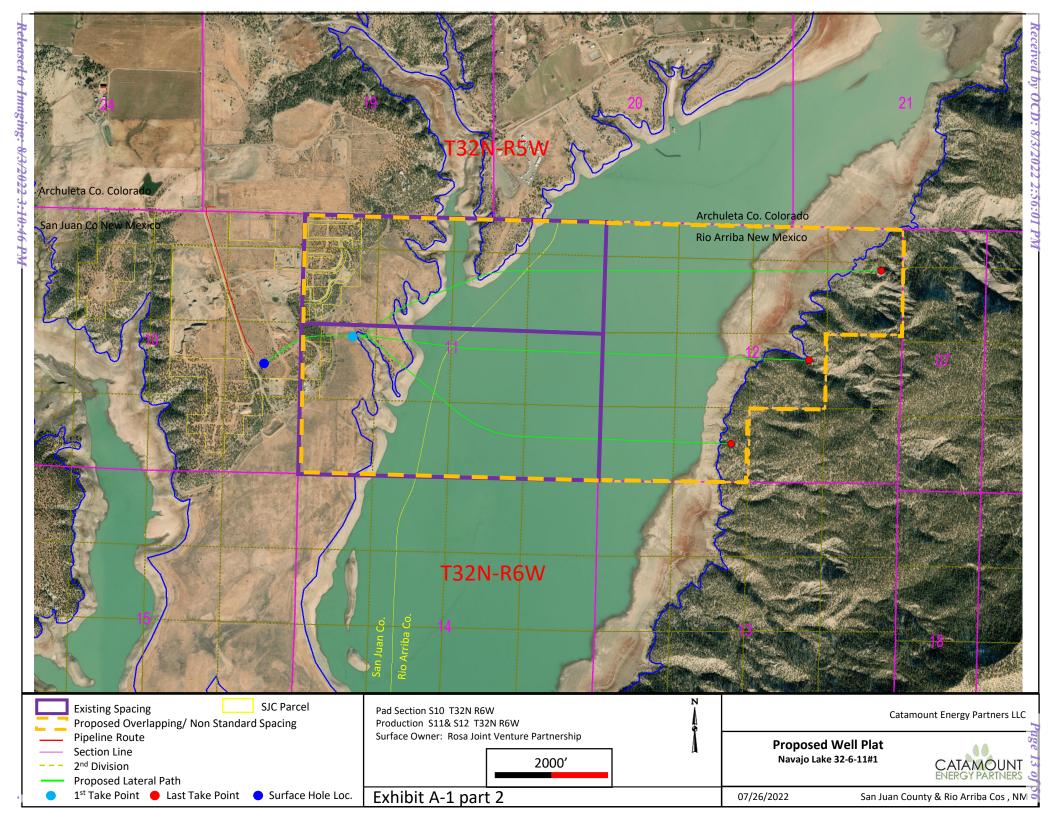

- 8. **Catamount Exhibit A-2** contains the draft Form C-102 for the proposed multilateral horizontal well.
- 9. **Catamount Exhibit A-3** identifies the tracts of land comprising the proposed non-standard spacing unit, the percentage of the known mineral interest owners in each tract and the mineral ownership in the proposed spacing unit. It demonstrates Catamounts owns over 56% of the working interest in the subject acreage. The mineral owners that Catamount seeks to pool are identified in red, which includes unleased mineral owners, non-probated estates, and "uncommitted" working interest owners that are listed separately.
- 10. **Catamount Exhibit A-4** contains a sample of the well proposal letter that I sent to the mineral owners that the company was able to locate. Since the issuance of this letter, the location of the northernmost lateral has been moved south to the S/2 N/2 equivalent of irregular Section 12 to comply with the standard setbacks required by the Division's statewide rules for horizontal wells in gas pools.
- 11. This well proposal letter also includes notice of the existing and proposed overlapping spacing units. No objection to the overlapping spacing unit has been received.
- 12. The well proposal letter included an AFE for the proposed well. The AFE reflects that costs that Catamount anticipates to drill and complete this multi-lateral horizontal well, and is based on Catamount's experience as an Operator in the San Juan Basin, and bids received for services and materials.

- 13. **Catamount Exhibit A-5** contains a chronology of the contacts with the mineral owners that Catamount has been able to locate and seeks to pool. It reflects that Catamount has undertaken good faith efforts to obtain voluntary joinder of these owners in the proposed well.
- 14. Catamount seeks approval of overhead and administrative costs at \$14,000/month while drilling and \$1,400/month while producing. These costs are consistent with what Catamount and other operators are charging in this area for more standard horizontal wells.
- 15. I provided the law firm of Holland & Hart LLP with the names and addresses of the uncommitted mineral owners that Catamount has been able to locate and instructed that they be provided notice of the hearing on Catamount's application. In compiling these addresses, Catamount conducted a diligent search of all public records in the counties where the acreage is located, consulted phone directories, and engaged in computer searches.
- 16. **Catamount Exhibits A-1** through **A-5** were either prepared by me or compiled under my direction and supervision.
- 17. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

FURTHER AFFIANT SAYETH NOT.

> RE: Navajo Lake 32-6-11 1 well

> > T32N-R6W, N.M.P.M.

Sec 11: All

Sec 12: W/2, NE, NWSE

San Juan and Rio Arriba Counties, New Mexico

Catamount Energy Partners LLC (Catamount) plans to drill the Navajo Lake 32-6-11 1 well (the "Well") in the above-referenced 987.58-acre spacing unit and will be filing for a Non-Standard Spacing Unit with the New Mexico Oil Commission Division (NMOCD) for this multi-lateral horizontal well.

Our records indicate that you own a 12.632126% working interest in the oil and gas mineral estate in the proposed unit and Catamount hereby offers you the option to participate in the drilling and completion of the Well. Should you elect to participate in the Well, Catamount is proposing the enclosed Joint Operating Agreement ("JOA") for your review and execution. Your interest may change once we receive a formal title opinion.

Enclosed please find the Authority for Expenditure ("AFE") which identifies the estimated costs of drilling a pilot hole, the 3 laterals and completing this multi-lateral Well. The costs set out in the enclosed AFE are an estimate, and actual costs may be higher or lower. Approval of the AFEs constitutes your approval of the actual cost of the drilling and completion operations as well as your agreement to pay your proportionate share of the actual costs of drilling, completing, and operating the Well.

To assist in your decision, some general and approximate information with respect to the Navajo Lake 32-6-11 1 well is set forth below:

Surface Location: Township 32 North, Range 6 West, N.M.P.M.

Section 10: NESE (Unit I) (approximately 1830'FSL, 353' FEL)

Township 32 North, Range 6 West, N.M.P.M. Spacing Unit:

Section 11: All

Section 12: W/2, NE, NWSE

Formation: Fruitland Coal

Pilot Hole: Estimated TD (TVD): 2905.0

> 2468' FSL, 1160' FWL Sec 11-T32N-R6W Estimated First Take Point:

> Estimated Last Take Point: 2468' FSL, 1261' FWL Sec 11-T32N-R6W

> > BEFORE THE OIL CONSERVATION DIVISION

Lateral #1: Estimated TD (TVD): 2712.0'

Estimated First Take Point: 2452' FSL, 1265' FWL Sec 11-T32N-R6W Estimated Last Take Point: 2333' FSL, 1630'FEL Sec 12-T32N-R6W

Lateral #2: Estimated TD (TVD): 2712.0'

Estimated First Take Point: 2535' FSL, 1220' FWL Sec 11-T32N-R6W Estimated Last Take Point: 330' FNL, 330' FEL Sec 12-T32N-R6W

Lateral #3: Estimated TD (TVD): 2712.0'

Estimated First Take Point: 2368' FSL, 1260' FWL Sec 11-T32N-R6W Estimated Last Take Point: 660' FSL, 2337' FWL Sec 12-T32N-R6W

Total D&C AFE: \$3,413,757 Your Estimated Share of D&C AFE: \$423,306

The proposed Joint Operating Agreement (JOA) contains our proposed overhead Drilling Overhead Rate of \$14,000.00 per month and Producing Well Overhead Rate of \$1,400.00 per month. The non-consent penalty is 300%.

The new spacing unit will overlap 2 existing vertical well spacing units. The Miller 32-06 11 #1 is located in the SWNW (Unit E) of Sec 11, T32N-R6W, with a spacing unit consisting of Lots 1-4, S/2N/2, being 232.80 acres. The Carnes 32-6 11 #1 well is located in the NWSW (Unit L) of Sec 11, T32N-R6W, with a spacing unit of consisting of the S/2 of Sec 11, T32N-R6W. Both wells will continue to produce under their current spacing units. Working interest owners can object by providing written notice of their objection to Catamount within 20-days of the mailing of this letter under NMAC 19.15.15.12.B and 19.16.16.15.B(9).

You have 30 days from receipt of this letter to execute the proposed Joint Operating Agreement or reach another voluntary agreement for the development of this acreage. Should you elect to participate in the drilling and completion of the Well, please return a signed AFE and a copy of this letter, with your election indicated in the space provided below. If no agreement is reached within the 30-days, Catamount will initiate proceedings with the Division to force pool your leasehold interest.

We look forward to receiving your response, and should you have any questions, please do not hesitate to call or email the undersigned.

Sincerely,

CATAMOUNT ENERGY PARTNERS LLC

Denise R Greer

Summary of Communications

Navajo Lake 32-6-11 1 well

- 1. June 9, 2022 well proposal letter, AFEs, and Operating Agreements were sent certified mail, return receipt requested to owners listed on Exhibit A-3.
- 2. Email correspondence has taken place with numerous owners regarding our proposal.
- 3. Since June 14, 2022, 24 packages have been returned and we have attempted to locate new addresses, by contacting relatives and online searches. If a different address was located, the proposal was re-sent to the owners.
- 4. We have also attempted to call each owner that has not responded and left messages.

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF CATAMOUNT ENERGY PARTNERS LLC, FOR APPROVAL OF A NON-STANDARD HORIZONTAL WELL SPACING UNIT FOR A MULTI-LATERAL WELL AND COMPULSORY POOLING, SAN JUAN AND RIO ARRIBA COUNTIES, NEW MEXICO.

CASE NO. 22973

SELF-AFFIRMED STATEMENT OF RUSTY KELLY

1. My name is Russell Kelly, and I am employed by Catamount Energy Partners LLC ("Catamount") as a petroleum geologist. I am familiar with the application filed by Catamount in this matter, and I have conducted a geologic study of the Fruitland Coal formation underlying the subject area.

2. This is my first time testifying before the New Mexico Oil Conservation Division. Catamount Exhibit B-1 outlines my education background, my relevant work history and my participation/membership is professional associations. I believe that my credentials quality me to testify as an expert in petroleum geology.

3. Catamount's proposed multi-lateral horizontal well targets the Fruitland Coal Formation underlying the Navajo Lake in irregular Sections 11 and 12, Township 32 North, Range 6 West, NMPM, San Juan and Rio Arriba Counties, New Mexico. Due to the limited drilling locations, the proposed well will be drilled from a surface location in the NE/4 SE/4 of Section 10 and proceed east, branching into three laterals that are spaced to initially develop the Fruitland Coal Formation under Sections 11 and 12.

4. **Catamount Exhibit B-2** contains a structure map for the Fruitland Coal Formation with contour intervals every 20 feet. I have outlined the proposed spacing unit with an orange

Case No. 22973

dashed line and depicted the general location of the well and lateral paths in Sections 11 and 12. This exhibit shows that the Fruitland Coal Formation is gently dipping down to the south. I do not observe any faults, pinch outs, or other geologic impediments to developing the targeted formation with multi-lateral horizontal well.

- 5. Catamount Exhibit B-3 shows the location of the well logs in relation to the spacing unit that I used to create a stratigraphic cross section of the Fruitland Coal Formation. I chose these logs because they penetrate the targeted intervals, are in ideal locations to demonstrate the geologic nature of the Fruitland Coal Formation, and are of good quality and contain gamma ray, and bulk density logs. Where Bulk density logs are unavailable, Compensated Neutron logs where available, have been substituted. In my opinion, these well logs are representative of the geology in the area.
- 6. **Catamount Exhibit B-4** is a stratigraphic cross section of the Fruitland Coal Formation using the representative wells depicted on Exhibit B-3. Each well log contains gamma ray, Bulk Density or Compensated Neutron logs. The targeted interval for the initial well is depicted with a red line. The cross-section demonstrates that the targeted interval is continuous across the proposed spacing unit.
- 7. The laydown orientation of the proposed multi-lateral horizonal well is appropriate because the face cleats (primary natural fractures in the Fruitland Coal) are predominately north-south in orientation and the laterals will be drilled perpendicular in an east-west orientation, to allow the laterals to contact the maximum number of cleats and provide for the most efficient drainage.

- 8. In my opinion, the orientation and spacing of the proposed multi-lateral well will efficiently and effectively develop the subject acreage, and the granting of Catamount's application is in the best interest of conservation, the prevention of waste, and protection of correlative rights.
- 9. Catamount Exhibits B-1 to B-4 were either prepared by me or compiled under my direction and supervision.
- 10. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

FURTHER AFFIANT SAYETH NOT.

PROFESSIONAL PROFILE

Experienced senior geologist with over 20 years of diverse industry experience with continually increasing roles of responsibility. Proficient and value focused in exploration, development, and operations geology roles.

EXPERIENCE

CATAMOUNT ENERGY PARTNERS- Denver, Colorado

Co-Founder & Sr. Vice-President

(2012-Present)

- Developed prospects to extended Fruitland Formation horizontal play to the north and east of historical trend. Resulted in acreage acquisition and drilling of successful wells
- Evaluated acquisitions within company's high graded prospect fairways. Resulted in both successful and unsuccessful bids on multiple properties

SAMSON RESOURCES COMPANY - Denver, Colorado

Geology Team Lead, Williston Basin

(2012)

- Analyzed Sanish member and the Lower Bakken Shale in Divide Co. ND
- Evaluated Middle Bakken and Three Forks play potential in Sheridan Co. MT
- Developed an in house development geology team to support multiple rig drilling program

SAMSON RESOURCES COMPANY - Denver, Colorado

Asset Team Lead, San Juan Basin Team

(2010-2011)

- Supervised Asset team that consisted of engineers, landman, and geologists
- Led program to add additional acreage and develop additional locations in the Northern San Juan
 Basin Fruitland play
- Mentored early-career geologists, geology intern, and technicians

SAMSON RESOURCES COMPANY- Denver, Colorado

Sr. District Geologist, Denver Office

(2008-2010)

- Developed Niobrara Oil Prospect in Rio Arriba County NM. Utilized archived core data to analyze source rock potential, refine facies model, and better understand mechanical stratigraphy and how it related to natural fracturing. Work resulted in the acquisition of 20,000 acres
- Mapped Niobrara and Frontier formations across the Axial Arch and Sand Wash Basin of Colorado.
 Drilled wells on existing acreage, developed prospects, and directed new acreage acquisition.
 Used newly acquired core and log data to improve fracturing and develop a new stratigraphic model in the Niobrara
- Identified multiple over-pressured cells in the Niobrara in multiple Rocky Mountain Basins to guide prospecting efforts
- Advanced Mancos Shale gas prospect in the Northern San Juan Basin. Continued earlier work to better understand porosity and the relationship to thermal maturity.
- Mentored early-career geologists

BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. B1
Submitted by: Catamount Energy Partners, LLC
Hearing Date: August 04, 2022
Case No. 22973

SAMSON RESOURCES COMPANY- Denver, Colorado

Geologist & Sr. Geologist, San Juan Basin Team

(2005-2007)

- Mapped Fruitland Formation coals and Pictured Cliffs formation sandstones. Developed horizontal prospects utilizing new stratigraphic interpretation that transformed an area of historical vertical drilling into a horizontal play. Received intra-company recognition and awards for working across many disciplines to change previous paradigm
- Worked closely with reservoir engineers to construct a realistic reservoir model to facilitate transition from vertical to horizontal development in new areas of the field
- Led efforts to develop a OGIP model using core and cuttings. Allowed for an additional 150 high return drilling opportunities in an existing field

SAMSON RESOURCES COMPANY- Tulsa, Oklahoma

Associate Geologist, Upper Gulf Coast Team

(2004)

- Utilized well logs and 3-D seismic to map Yegua Formation Sandstones in Jasper and Newton Cos.
 TX. Developed multiple prospects which were leased subsequent to my transfer to Denver office
- Utilized well log and core data to map Miocene sandstones in Livingston field, Polk County TX on existing acreage. Identified infill locations, resulting in high rate of return drilling opportunities
- Apprenticed with Sr. Geologist on deep expanded Yegua Trend exploration in Liberty and Hardin Cos. TX

SAMSON RESOURCES COMPANY- Tulsa, Oklahoma

Associate Geologist, Arkoma Basin Team

(2002-2004)

- Mapped Atoka-aged turbidite channels and fan complexes and proposed infill and extension locations
- Mapped the Cromwell Sandstone in the vicinity of Centrahoma field, led to a new discovery and successful field extension program
- Functioned on G&G team that acquired 160 Sq. miles of new 3-D seismic data along the Choctaw fault over thrust complex. Shoot aided in successfully imaging in complex triangle zone and led to additional drilling opportunities
- Developed prospects in structurally complex Atokan and Morrowan-aged sandstones in Conway Co AR

TEXAS KEYSTONE INCORPORATED- Pittsburgh, Pennsylvania

Staff Geologist, Appalachian Basin Team

(2001-2002)

- Served as development geologist for continuous, multi-rig drilling program in the Upper Devonian Sandstones of Western Pennsylvania.
- Evaluated Upper Devonian Sandstones on existing and offset acreage in order to identify infill locations and make recommendations for bolt-on acreage acquisition
- Performed wellsite geology work on Oriskany Sandstone and Trenton Black River Limestone exploration wells in West Virginia, Pennsylvania, and New York
- Mapped Clinton/Medina Sandstone and Bass Island Dolomite reservoirs in western NY and proposed extension locations

EDUCATION

Ohio University, Athens, Ohio

VIA CERTIFIED MAIL CERTIFIED RECEIPT REQUESTED

TO: ALL INTEREST OWNERS SUBJECT TO POOLING PROCEEDINGS AND AFFECTED BY THE PROPOSED NON-STANDARD HORIZONTAL WELL SPACING UNIT

Re: Application of Catamount Energy Partners, LLC, for Approval of a Non-Standard Horizontal Well Spacing Unit for A Multi-Lateral Well and Compulsory Pooling, San Juan and Rio Arriba Counties, New Mexico: Navajo Lake 32-6-11 No. 1 well,

Ladies & Gentlemen:

This letter is to advise you that Catamount Energy Partners, LLC, has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on August 4, 2022, and the status of the hearing can be monitored through the Division's website at http://www.emnrd.state.nm.us/ocd/.

Due to the remodeling of the state building where the New Mexico Oil Conservation Division is located, hearings will be conducted remotely beginning at 8:15 a.m. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: https://www.emnrd.nm.gov/ocd/hearing-info/.

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Denise Greer at (720) 484-2351 or at dgreer@catamountep.com.

Sincerely,

Michael H. Feldewert

BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. D
Submitted by: Catamount Energy Partners, LLC
Hearing Date: August 04, 2022
Case No. 22973

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION SANTA FE, NEW MEXICO

The State of New Mexico, Energy Minerals and Natural Resources Department, Oil Conservation Division ("Division") hereby gives notice that the Division will hold public hearings before a hearing examiner on the following case. During the COVID-19 Public Health Emergency, state buildings are closed to the public and Division hearings will be conducted remotely. The public hearing for the following case will be electronic and conducted remotely. The hearing will be conducted on Thursday, August 4, 2022, beginning at 8:15 a.m. To participate in the electronic hearing, see the instructions posted below. The docket may be viewed at https://www.emnrd.nm.gov/ocd/hearing-info/ or obtained from Marlene Salvidrez, at Marlene.Salvidrez@state.nm.us. Documents filed in the case may be viewed at https://ocdimage.emnrd.nm.gov/lmaging/Default.aspx. If you are an individual with a disability who needs a reader, amplifier, qualified sign language interpreter, or other form of auxiliary aid or service to attend or participate in a hearing, contact Marlene Salvidrez at Marlene Salvidrez@state.nm.us, or the New Mexico Relay Network at 1-800-659-1779, no later than July 24 7022

Persons may view and participate in the hearings through the following link:

Case No. 22973: Application of Catamount Energy Partners, LLC, for Approval of a Non-Standard Horizontal Well Spacing Unit for A Multi-Lateral Well and Compulsory Pooling, San Juan and Rio Arriba Counties, New Mexico. Applicant in the above-styled cause seeks an order (a) creating a 987.58-acre, more or less, non-standard horizontal well spacing unit in the Fruitland Coal formation [Basin Fruitland Coal (Gas) Pool (Pool Code 71629)] underlying all of irregular Section 11 and the WW2 equivalent, the NE/4 equivalent and the NW/4SE/4 of irregular Section 12. Township 32 North, Range 6 West, NMPM, San Juan and Rio Arriba Counties, New Mexico, and (b) pooling the uncommitted mineral owners in this proposed non-standard horizontal well spacing unit. Applicant seeks to initially dedicate the abovereferenced spacing unit to the Navajo Lake 32-6-11 No. 1 well, a multi-lateral horizontal well to be drilled from a surface location in the NE/4 SE/4 (Unit I) of Section 10 with a completed horizonal wellbore and three laterals that commence in the W/2 W/2 of irregular Section 11 and extend to bottom hole locations in the NE/4NE/4 equivalent (Lot 1), the NW/4 SE/4 (Unit J) and the SE/4 SW/4 (Unit N) of irregular Section 12. Also, to be considered will be the cost of drilling and completing the multi-lateral horizontal well, the allocation of the cost thereof, the actual operating costs and charges for supervision, the designation of applicant as operator, and the imposition of 200% charge for risk involved in drilling and completing the well. Said area is located approximately 19 miles northeast of the town of Navajo Dam, New Mexico. #5334206, Daily Times, July 13, 2022
