**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATION OF DEVON ENERGY PRODUCTION
COMPANY, L.P., FOR A HORIZONTAL SPACING UNIT AND
COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22958

APPLICATION

Devon Energy Production Company, L.P., (“Devon”), OGRID No. 6137, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order (1) establishing a standard 823.92-acre, more or less, spacing and proration unit comprised of Lots 1 through 8 (equivalent to the N/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, and (2) pooling all uncommitted mineral interests in the Wolfcamp formation, designated as an oil pool, underlying said unit.

In support of its Application, Devon states the following:

1. Devon recognizes that Sections 1, 2 and 3, are rather sizable correction sections consisting of 16 lots in the N/2 of the Sections and therefore may present a number of novel questions and issues regarding the application of the Division’s rules to the unusual circumstances created by the Sections. Devon respectfully submits in Exhibit A, attached to this Application, what it proposes to be a valid and beneficial interpretation and application of NMAC 19.15.16.15B(1)(1) and related rules for establishing the N/2 N/2 of correction Sections 1, 2 and 3, consisting of Lots 1-8 of each Section (“Subject Lands”), as a standard unit. For the reasons

provided in Exhibit A, Devon respectfully submits that establishing the Subject Lands as a standard horizontal spacing unit would best serve the interest of the Division and applicants by ensuring a consistent and systematic application of the Rules to correction sections, no matter the size or number of lots, for the protection of correlative right and prevention of waste.

2. Although this Application represents Devon's preferred spacing unit and development plan, Devon has submitted concurrently (1) an alternate pooling application for the **Burton Flat 3-1 Fed State Com 621H and 822H Wells** with a spacing unit comprising Lots 1-4 of irregular Sections 1, 2 and 3; and (2) an alternate pooling application for the **Burton Flat 3-1 Fed State Com 622H Well** with a spacing unit comprising Lots 5-8 of irregular Sections 1, 2 and 3. These alternate pooling applications are provided for the Division's consideration should the Division reject the standard horizontal spacing unit proposed herein.

3. Devon is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.

4. Devon proposes and dedicates to the HSU three (3) initial wells, the **Burton Flat 3-1 Fed State Com 621H Well**; the **Burton Flat 3-1 Fed State Com 622H Well**, and the **Burton Flat 3-1 Fed State Com 822H Well**, to be drilled to a sufficient depth to test the Wolfcamp formation.

5. Devon proposes the **Burton Flat 3-1 Fed State Com 621H Well**, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location in Lot 1 of Section 1.

6. Devon proposes the **Burton Flat 3-1 Fed State Com 622H Well**, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location in Lot 8 of Section 1.

7. Devon proposes the **Burton Flat 3-1 Fed State Com 822H Well**, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location in Lot 1 of Section 1.

8. The proposed wells are orthodox in their location, and the take points and completed intervals comply with setback requirements under statewide rules.

9. Devon has sought in good faith, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the wells or in the commitment of their interests to the wells for their development within the proposed HSU.

10. The pooling of all interests in the Wolfcamp formation within the proposed HSU, and establishment of the standard spacing unit, will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

11. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Devon requests that all uncommitted interests in this HSU be pooled and that Devon be designated the operator of the proposed horizontal wells and HSU.

WHEREFORE, Devon requests that this Application be set for hearing on August 4, 2022, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

A. Establishing a standard 823.92-acre, more or less, spacing and proration unit comprised of Lots 1 through 8 (equivalent to the N/2 N/2) of correction Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico;

B. Pooling all uncommitted mineral interests in the Wolfcamp formation underlying the proposed HSU.

C. Approving the **Burton Flat 3-1 Fed State Com 621H Well**; the **Burton Flat 3-1 Fed State Com 622H Well**, and the **Burton Flat 3-1 Fed State Com 822H Well** as the wells for the HSU.

D. Designating Devon as operator of this HSU and the horizontal wells to be drilled thereon;

E. Authorizing Devon to recover its costs of drilling, equipping, and completing the wells;

F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Setting a 200% charge for the risk assumed by Devon in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

ABADIE & SCHILL, PC

Attorneys for Devon Energy Company, L.P.

Application of Devon Energy Company, L.P., for a Horizontal Spacing and Proration Unit and Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Division: (1) establishing a standard 823.92-acre, more or less, spacing and proration unit comprised of Lots 1 through 8 (equivalent to the N/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, and (2) pooling all uncommitted mineral interests in the Wolfcamp formation, designated as an oil pool, underlying said unit. The proposed wells to be dedicated to the horizontal spacing unit are the **Burton Flat 3-1 Fed State Com 621H Well**, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location Lot 1 of Section 1; the **Burton Flat 3-1 Fed State Com 622H Well**, an oil well, to be horizontally drilled from a surface location in the Lot 5 of Section 3 to a bottom hole location in Lot 8 of Section 1; and the **Burton Flat 3-1 Fed State Com 822H Well**, an oil well, to be horizontally drilled from a surface location in the Lot 5 of Section 3 to a bottom hole location in Lot 1 of Section 1. The wells will be orthodox, and the take points and completed intervals will comply with the setback requirements under the statewide Rules; also to be considered will be the cost of drilling and completing the wells and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the wells and unit; and a 200% charge for the risk involved in drilling and completing the wells. The wells and lands are located approximately 7 miles northeast of Carlsbad, New Mexico.

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

Exhibit A: A legal basis for establishing standard horizontal spacing units in expanded correction sections under the existing language and intent of the Statewide Rules

In this Exhibit A, attached to and made a part of the pooling application, the Applicant respectfully asks the Division to consider what should constitute a standard horizontal spacing unit (“HSU”) for horizontal oil wells when encountering expanded correction sections under the PLSS. The analysis in this Exhibit is provided to the New Mexico Oil Conservation Division (“Division”) for its consideration as it works through the challenges posed by such idiosyncratic sections. The Applicant respectfully submits that the spacing unit proposed in its Application be deemed a standard HSU based on a review of what constitutes a standard HSU under the Rules, which begins with the criteria set out in NMAC 19.15.16.15B(1) that directly supplants – having been adopted “[i]n lieu of” – an oil spacing unit “described in Subsection A of 19.15.15.9 NMAC” as consisting of 40 acres for a vertical well.

More specifically, NMAC 19.15.16.15B(1)(a) states that “[t]he horizontal spacing unit shall comprise one or more contiguous tracts that the horizontal oil well’s completed interval penetrates....” (emphasis added). As an example, a commonly approved standard HSU in a standard section would, and often does, comprise quarter-quarter sections consisting of Units A-D to create a 160-acre standard HSU. Such standard HSU would be accurately described under NMAC 19.15.4.9A(8) as the N/2 N/2 of said standard section. In a standard section, each “tract” of the standard HSU would consist “of a governmental quarter-quarter section...,” in compliance with the language of NMAC 19.15.16.15B(1)(a).

The challenge that arises with correction sections is the application of the specific language of this Rule to correction Lots that vary in size from governmental quarter-quarter sections, Lots which often reduce the size of the quarter-quarter section. NMAC 19.15.16.15B(1)(a) accounts for such possible variations by stating that “each [tract] of which consists of a governmental quarter-quarter section or equivalent.” (emphasis added).

In practice before the Division, applicants often encounter correction sections where the only correction is provided by Lots 1-4 across the top of the section to account for quarter-quarter sections that otherwise would be Units A-D. Common practice with such a scenario shows that these Lots 1-4 are addressed by requesting a standard HSU consisting of Lots 1-4 of the correction section and providing a legal description such as Lots 1-4 (aka the N/2 N/2) of said correction section pursuant to NMAC 19.15.4.9A(8). In this scenario, it has been the practice of the Division to deem Lots 1-4 as “equivalent” to the governmental quarter-quarter sections and approve the contiguous tracts penetrated by the well’s completed interval as a standard HSU. *See* Diagram No. 2, provided herein and attached hereto.

In the present Application for compulsory pooling, the Applicant, Devon Energy Production Company, L.P. (“Devon”), is faced with correction sections that consist of Lots 1-16 that comprise the entire N/2 of the correction section. *See* Diagram No. 3, attached hereto. As an example, one of the correction sections is Section 1, Township 21 South, Range 27 East, NMPM. The challenge is the application of the language and intent of NMAC 19.15.16.15B(1)(a) to Section 1 in a systematic and consistent manner that protects correlative rights and prevents waste pursuant to the Oil and Gas Act (“Act”) and that can be efficiently replicated for other correction sections under the PLSS.

Devon respectfully submits for the Division's consideration that the general legal description of the proposed unit be the guiding factor for determining what tracts should be deemed equivalent to governmental quarter-quarter sections for purposes of building a standard HSU in a correction section that would be equivalent, under the language of the Rules, to a standard HSU in a standard section.

Therefore, to establish such equivalency, the N/2 N/2 standard HSU of a standard section, consisting of Units A-D, should translate into using Lots 1-8 when creating an equivalent standard HSU in correction Section 1. A standard HSU consisting of Lots 1-8 of Section 1 would comprise the N/2 N/2 of Section 1, which is equivalent under the language of the Rules to the N/2 N/2 of a standard section in that it maintains a consistent and equivalent legal description in both the standard section and the correction section. *See* Diagram No. 1, attached hereto. In correction Section 1, the tracts that would constitute the basic building blocks for the N/2 N/2 standard unit of Section 1 would be blocks consisting of two stacked lots, such as Lots 1 and 8, Lots 2 and 7, Lots 3 and 6, and Lots 4 and 5. These stacked Lots used to create a N/2 N/2 standard HSU in a correction section would maintain the equivalency specified in NMAC 19.15.16.15B(1)(a).

The equivalency maintained by this approach is also illustrated by the fact that a quarter-quarter section in the N/2 N/2 of a standard section is equivalent to one-fourth (1/4) of the N/2 N/2 standard spacing unit, and the basic building block proposed herein for creating a standard HSU comprising the N/2 N/2 of correction Section 1 is also one-fourth (1/4) of the N/2 N/2 spacing unit. This approach for establishing standard HSUs in correction sections is replicable with any correction section one encounters, as the size the building blocks would be proportioned to maintain the one-fourth (1/4) equivalency in relation to the number of Lots involved, whether in

the N/2 N/2 or other legal description proposed. Furthermore, the setback requirements of 330 feet would be maintained within the unit to protect the correlative rights of the offset operators.

Devon respectfully submits that this approach would be preferable to burdening the Division with a case-by-case evaluation of what should constitute a standard HSU in a correction section each time the Division encounters the unique irregularities of a correction section with lots of various sizes. Correction Section 1, in the present case, happens to have a number of Lots that are 40 acres, the same acreage as quarter-quarter sections, but the Lots are not equivalent to quarter-quarter sections because each Lot is one-eighth of the N/2 N/2 of correction Section 1, while a quarter-quarter section by definition is one-fourth (1/4) of the N/2 N/2 of a standard section. Furthermore, Lots can vary dramatically in size and distribution depending on the correction section, and consequently, one cannot depend on a Lot always being 40 acres.

The model for approaching correction sections presented herein would provide a reliable template for addressing correction section consistently and systematically. Further, it would incorporate the principle under NMAC 19.15.15.9 and -.11 of having building blocks that include at least 40 acres, which is also reflected in the revisions provided by the horizontal rules in NMAC 19.15.16.15. The correction sections under the PLSS that are expanded beyond four lots, such as correction Section 1, which has 16 lots, would have building blocks which would encompass at least 40 acres, as required by NMAC 19.15.15.9, but would allow additional acreage as envisioned in the intent of NMAC 19.15.16.15B(1)(a) for expanded standard units that accommodate longer horizontal wells and spacing units.

Countering this proposal, one might argue that this approach would lead to larger standard units in correction sections involving lots than those typically established in standard sections involving quarter-quarter section, but from a practical viewpoint, the larger standard unit would

be proper in order to accommodate in a consistent, efficient, and reliable manner those rare instances when the PLSS itself uses correction sections to accommodates anomalies. Devon respectfully submits that the Division has the authority to apply existing Rules to address such anomalies when the inherent language of the Rule itself provides for a consistent and rational application, as proposed herein.

The only alternative approach would involve trying to fit a square peg in a round hole. The Rules do not directly address the subject of correction sections in this situation; thus, without a consistent application of the Rules based on their existing language, the Division could likely risk arbitrarily deciding whether a correction Lot is equivalent to a quarter-quarter section, and the Rules do not provide a reliable threshold for such a determination. For example, would the threshold be a reduction of 5 acres, from 40 to 35, or 10 acres from 40 to 30, or other? Since the Rules do not specify a clear threshold, the Division would be left with using an arbitrary rule of thumb on a case-by-case basis.

Such a piecemeal approach for developing a correction section would not only burden the Division with this uncertainty but would also burden the applicant trying to decide if it should describe in its pooling application a contiguous set of correction Lots as a standard or a non-standard unit. If a clear and consistent pathway is not provided by a consistent application of the Rules on which an applicant can rely, the applicant risks misidentifying the unit as standard or non-standard resulting in the burden of having to dismiss or amend the original pooling application.

The approach provided herein has a number of advantages for ensuring the protection of correlative rights and the prevention of waste and drilling unnecessary wells. First, this approach would better ensure that all of the lots of a correction section would be developed by having an

established place of each lot in a standard spacing unit no matter how irregular the Lot might be. In the example of correction Section 1, with its N/2 consisting of an unwieldy 16 Lots, an applicant might decide to develop the lots in a piecemeal fashion, such as proposing a unit across Lots 13-16 separated from another unit proposed as Lots 5-8, thereby excluding owners in Lots 1-4 and 9-12 and creating gaps in what otherwise should be adjacent units developed based on principles of uniformity for the full development of the N/2 of the correction section.

Second, creating a situation where a series of Lots in a correction section are considered a non-standard unit could significantly burden the applicant by requiring an excessive amount of additional and costly title work to identify owners in adjacent tracts outside the correction section, which otherwise would not burden the applicant when developing a standard section. Such burden may create waste through delay of development or through the applicant deciding not to develop the unit due to the irregularity creating an excessive burden. Devon's proposed horizontal unit in the attached pooling application, if rejected as a standard unit, would require additional title work covering, at a minimum, tracts in Section 6-21S-38E, Sections 36, 35, 34 and 33-20S-28E, and Section 4-21S-27E.

Currently, for example, if an applicant wants to develop the N/2 N/2 of a standard section as a standard spacing unit, the applicant can do so efficiently under the Rules, without unnecessary or excessive burden, and still protect the correlative rights of offset operators and owners by observing the proper setback requirements. Devon respectfully submits that the Division should grant an applicant the benefit of the same efficiency under the Rules when developing expanded correction sections when there is a viable application of the Rules to facilitate efficient development. Under the Act, and its Rules, a correction section should not present such obstacles

to the development of the state's natural resources when a reasonable and rational means is available for development that would prevent waste and protect correlative rights.

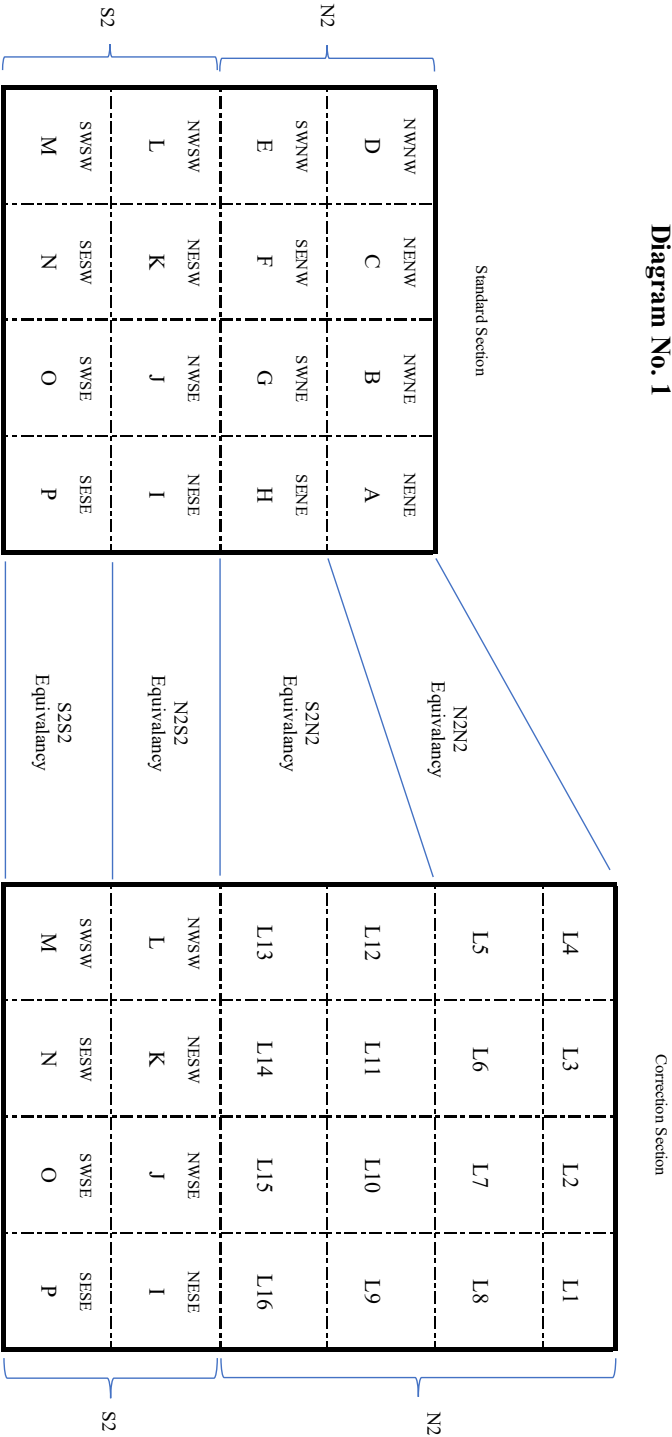

In the development plan of its pooling application, Devon is proposing what it believes should be considered, by definition under the Rules, a standard spacing unit comprised of Lots 1-8 (aka the N/2 N/2) of correction Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico. Devon respectfully submits that the approval of the proposed unit as a standard spacing unit would prevent waste through the efficient development of correction sections and protect correlative rights through the maintenance of appropriate setback requirements. The Division has the authority to recognize contiguous tracts, equivalent to quarter-quarter sections, for building standard spacing units in expanded correction sections under NMAC 19.15.16.15B(1)(a), and Devon respectfully asks the Division to exercise its authority if it should find sufficient justification based on the analysis provided herein.

Respectfully,

/s/ Darin C. Savage

Darin C. Savage

Diagram No. 1

Each QQ Section of the Standard Section is 1/8 of the N2 of the Section

Each Lot in the Correction Section is 1/16 of the N2 of the Section

Therefore, a 40 acre QQ Section in the Standard Section is not equivalent to a 40 acre Lot in the Correction Section

But, QQ Sections A-D in the Standard Section (that being the N2 N2 of the Section) is equivalent to Lots 1-8 in the Correction Section (that also being the N2 N2 of the Section)

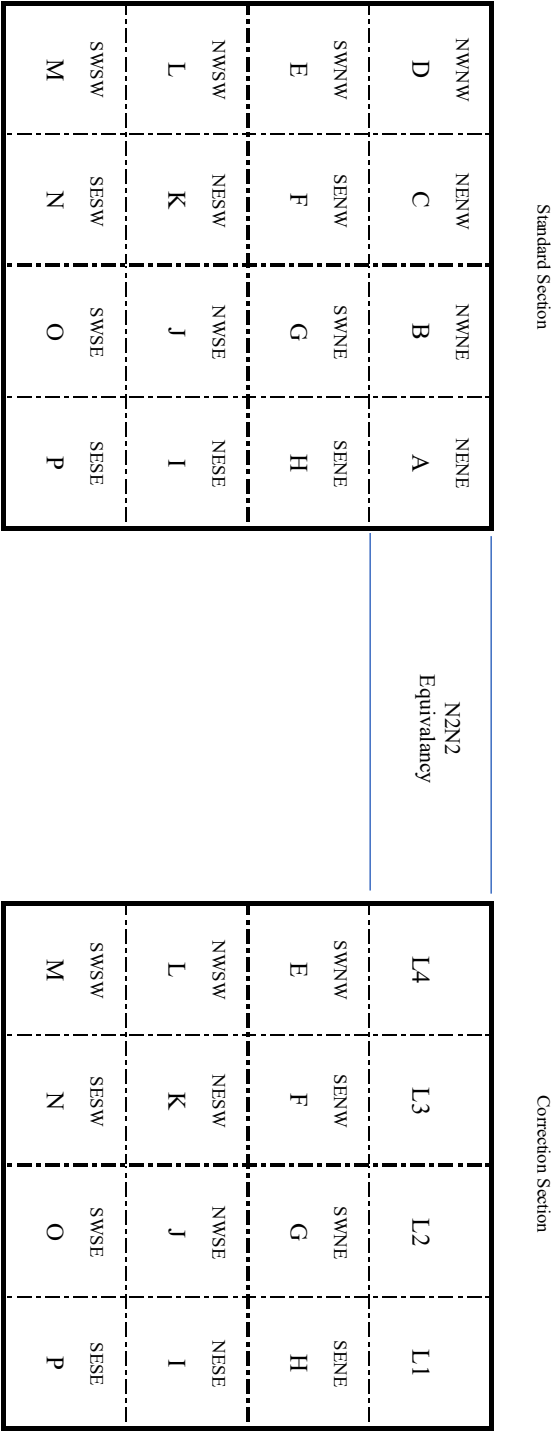

Diagram No. 2

This Diagram No 2 is an example of the common situation when there are only four correction lots (Lots 1-4) across the top of the correction. It appears to be common practice, when this particular scenario arises, to acknowledge the equivalency of Lots 1-4, as being equivalent to Units A-D in the standard section, for establishing under the Rules a standard horizontal spacing unit for the N2 N2, consisting of Lots 1-4 in the correction section, regardless of the size variations of the lots.

Diagram No. 1 herein shows how this common and established practice would be scalable and replicated to establish standard spacing units under the Rules whenever additional lots are encountered in a correction section.

Exhibit A-3: Well Proposal Letters and AFEs
Exhibit A-4: Chronology of Contacts with Uncommitted Owners

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATION OF DEVON ENERGY PRODUCTION
COMPANY, L.P., FOR A HORIZONTAL SPACING UNIT AND
COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22958

AFFIDAVIT OF ANDY D. BENNETT

STATE OF OKLAHOMA)
) ss.
COUNTY OF OKLAHOMA)

I, being duly sworn on oath, state the following:

1. I am over the age of eighteen years and have the capacity to execute this Affidavit, which is based on my personal knowledge.

2. I am employed as a Advising Landman with Devon Energy Production Company, L.P. ("Devon"), and I am familiar with the subject application and the lands involved.

3. I graduated from the University of Oklahoma with a Bachelor's degree in Business (Energy Management) in 2008. I have worked at Devon for approximately 13 years, and I have been working in New Mexico for 4 years. My credentials as a petroleum landman have been accepted by the New Mexico Oil Conservation Division ("Division") and made a matter of record.

4. This affidavit is submitted in connection with the filing by Devon in the above-referenced spacing and compulsory pooling application pursuant to 19.15.4.12.A(1).

5. Devon seeks an order (1) establishing a standard 823.92-acre, more or less, spacing and proration unit comprised of Lots 1 through 8 (equivalent to the N/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being

**EXHIBIT
A**

correction sections and therefore irregular, and (2) pooling all uncommitted ownership interests in the Wolfcamp formation [WC Burton Flat UPPER WC (Pool Code 98315)], designated as an oil pool, underlying said unit.

6. Devon recognizes that Sections 1, 2 and 3, are rather sizable correction sections consisting of 16 lots in the N/2 of the Sections and therefore may present a number of novel questions and issues regarding the application of the Division's rules to the unusual circumstances created by the Sections. Devon has respectfully submitted Exhibit A, attached to the Pooling Application herein, in which it has proposed what it believes to be a valid and beneficial interpretation and application of NMAC 19.15.16.15B(1)(1) and related rules for establishing the N/2 N/2 of correction Sections 1, 2 and 3, consisting of Lots 1-8 of each Section, as a standard unit. For the reasons provided in Exhibit A, Devon respectfully submits that establishing the Subject Lands as a standard unit would best serve the interest of the Division and Applicants by ensuring a consistent and systematic application of the Rules to correction sections, no matter the size or number of lots, for the protection of correlative right and prevention of waste.

7. Although this Application represents Devon's preferred spacing unit and development plan, Devon has submitted concurrently an alternate pooling application in Case No. 22962 for the **Burton Flat 3-1 Fed State Com 621H and 822H Wells** with a spacing unit comprising Lots 1-4 of irregular Sections 1, 2 and 3; and an alternate pooling application in Case No. 22961 for the **Burton Flat 3-1 Fed State Com 622H Well** with a spacing unit comprising Lots 5-8 of irregular Sections 1, 2 and 3. These alternate pooling applications are provided for the Division's consideration should the Division reject the standard horizontal spacing unit proposed herein.

8. Under this Case No. 22958, Devon seeks to dedicate to the horizontal spacing and proration unit the **Burton Flat 3-1 Fed State Com 621H Well**; the **Burton Flat 3-1 Fed State Com 622H Well**, and the **Burton Flat 3-1 Fed State Com 822H Well**, (APIs 30-015-pending), as the oil initial wells.

9. The **Burton Flat 3-1 Fed State Com 621H Well**, an oil well, will be horizontally drilled from a surface location in Lot 5 of Section 3 (369' FWL and 1,031' FNL) to a bottom hole location in Lot 1 of Section 1 (20' FEL and 400' FNL); with an approximate TVD of 9,097'; an approximate TMD of 24,577'; FTP in Section 3: 100' FWL, 400' FNL; LTP in Section 1: 100' FEL, 400' FNL.

10. The **Burton Flat 3-1 Fed State Com 622H Well**, an oil well, will be horizontally drilled from a surface location in Lot 5 of Section 3 (387' FWL and 2,077' FNL) to a bottom hole location in Lot 8 of Section 1 (20' FEL and 1,900' FNL); with an approximate TVD of 9,107'; an approximate TMD of 24,587'; FTP in Section 3: 100' FWL, 1,900' FNL; LTP in Section 1: 100' FEL, 1,900' FNL.

11. The **Burton Flat 3-1 Fed State Com 822H Well**, an oil well, will be horizontally drilled from a surface location in Lot 5 of Section 3 (387' FWL and 2,047' FNL) to a bottom hole location in Lot 1 of Section 1 (20' FEL and 790' FNL); with an approximate TVD of 9,518'; an approximate TMD of 24,998'; FTP in Section 3: 100' FWL, 790' FNL; LTP in Section 1: 100' FEL, 790' FWL.

12. The proposed C-102s for the wells are attached as **Exhibit A-1**.

13. A general location plat and a plat outlining the unit being pooled is attached hereto as **Exhibit A-2**, which shows the general location of the proposed wells within the unit. The

proposed wells are orthodox in their locations, and the take points and completed intervals comply with setback requirements under statewide rules.

14. The parties being pooled, the nature of their interests, and their last known addresses are listed on **Exhibit A-2** attached hereto. Exhibit A-2 shows which working interest owners have committed, and which to date have not committed, their interest to a voluntary agreement with Devon, along with a list of the overriding royalty interest (ORRI) owners and record title (RT) owners to be pooled.

15. There are no depth severances in the Wolfcamp formation in this acreage.

16. I provided the law firm of Abadie & Schill P.C. a list of names and addresses for the uncommitted interest owners shown on **Exhibit A-2**. In compiling these addresses, I conducted a diligent search of the public records in Eddy County, New Mexico, where the wells are located, and of phone directories and did internet searches to locate the contact information for parties entitled to notification. Mailings of only one WI owner (Paladin Inc. Andrew Smith President) and three ORRI owners (C. Eugene Corriher, Janet Lewis and XTO Holdings) were returned as undeliverable. Three WI owners, six ORRI owners and 1 RTO owner are listed by USPS.com as still in-transit; therefore, the locations cannot yet be confirmed for: Crosswinds Resources LLC (WI), Magnum Hunter Production Inc., C/O Cimarex Energy Co. (WI, contacted), Sieb Resources (WI), Ameripermian Holdings, LLC, Elizabeth L Cheney Irrev Trust Elizabeth L Cheney Trustee, Elizabeth L Cheney Mitchel E Cheney Family Rev Tr Alexander K Cheney TTEE, Estate Of Gwendolyn P Rutledge Alexis A Scott Personal Rep, Liberty Oil & Gas Corporation, MP Titan Flex LP, MSH Family Real Estate Partnership II, LLC, and SDX Resources Inc. Devon published notice in the Carlsbad Current Argus, a newspaper of general

circulation in Eddy County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

17. Devon has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the wells or in the commitment of their interests to the wells for their development within the proposed horizontal spacing unit. **Exhibit A-4** provides a chronology and history of contacts with the owners.

18. The working interest owners being pooled have been contacted regarding the proposed wells. If a mutually agreeable JOA is reached between Devon and another interest owner or owners, Devon requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

19. **Exhibit A-3** is a sample proposal letter and the AFEs for the proposed wells, that were sent to working interest owners. The estimated cost of the wells set forth in the AFE is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

20. Devon requests overhead and administrative rates of \$8,000/month for drilling each well and \$800/month for producing each well. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of southeastern New Mexico. Devon requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

21. Devon requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners.

22. Devon requests that it be designated operator of the unit and wells.

23. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

24. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights, and will avoid the drilling of unnecessary wells.

25. The foregoing is correct and complete to the best of my knowledge and belief.

RE: Well Proposals- Burton Flat 3-1 Fed State Com 621H, 622H
Sections 1, 2, & 3, All in T21S-R27E
Eddy County, New Mexico

To whom it may concern:

Devon Energy Production Company, L.P. ("Devon"), as Operator, proposes to drill and complete the following two (2) wells:

- Burton Flat 3-1 Fed State Com 621H as a horizontal well to an approximate landing TVD of 8,957', bottom hole TVD' of 9,097', and approximate TMD of 24,577' into the Wolfcamp formation at an approximate SHL of 1,031' FNL and 369' FWL of Section 3-T21S-R27E and an approximate BHL of 400' FNL and 20' FEL of Section 1-T21S-R27E, Eddy County, New Mexico (collectively with both proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.
- Burton Flat 3-1 Fed State Com 622H as a horizontal well to an approximate landing TVD of 8,950', bottom hole TVD' of 9,107', and approximate TMD of 24,587' into the Wolfcamp formation at an approximate SHL of 2,077' FNL and 387' FWL of Section 3-T21S-R27E and an approximate BHL of 1,900' FNL and 20' FEL of Section 1-T21S-R27E, Eddy County, New Mexico (collectively with both proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.

Devon reserves the right to modify the locations and drilling plans described above in order to address surface and subsurface concerns. Devon will advise of any such modifications.

Devon is proposing to drill the Wells under the terms of the modified 2015 AAPL form of Operating Agreement ("JOA"). The JOA will be supplied to those parties interested in participating, upon request. The JOA will have the following general provisions:

- Devon Energy Production Company, L.P. named as Operator
- 100/300% Non-Consenting Penalty
- Overhead rates of \$8,000 DWR/\$800 PWR

Please indicate your election to participate in the drilling and completion of the Wells in the spaces provided below, within 30 days of receipt, by signing and returning one (1) copy of this letter and AFE, along with your well data requirements sheet. A Communization Agreement for said Wells will be supplied for your review and execution at a later date.

EXHIBIT
A-3

Page 2

If an agreement cannot be reached within 30 days of receipt of this letter by all parties, Devon will apply to the New Mexico Oil Conversation Division for compulsory pooling of your interest into a spacing unit for the Wells, if uncommitted at such time.

Please do not hesitate to contact me at (405) 552-8002 or via email at Andy.Bennett@devon.com if you have any questions concerning this proposal.

Very truly yours,

Devon Energy Production Company, L.P.

Andy Bennett, CPL
Senior Staff Landman

RE: Well Proposals- Burton Flat 3-1 Fed State Com 822H
Sections 1, 2, & 3, All in T21S-R27E
Eddy County, New Mexico

To whom it may concern:

Devon Energy Production Company, L.P. ("Devon"), as Operator, proposes to drill and complete the following well:

- Burton Flat 3-1 Fed State Com 822H as a horizontal well to an approximate landing TVD of 9,283', bottom hole TVD' of 9,518', and approximate TMD of 24,998' into the Wolfcamp formation at an approximate SHL of 2,047' FNL and 387' FWL of Section 3-T21S-R27E and an approximate BHL of 790' FNL and 20' FEL of Section 1-T21S-R27E, Eddy County, New Mexico (referred to hereafter as the "Well"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.

Devon reserves the right to modify the locations and drilling plans described above in order to address surface and subsurface concerns. Devon will advise of any such modifications.

Devon is proposing to drill the Well under the terms of the modified 2015 AAPL form of Operating Agreement ("JOA"). The JOA will be supplied to those parties interested in participating, upon request. The JOA will have the following general provisions:

- Devon Energy Production Company, L.P. named as Operator
- 100/300% Non-Consenting Penalty
- Overhead rates of \$8,000 DWR/\$800 PWR

Please indicate your election to participate in the drilling and completion of the Well in the spaces provided below, within 30 days of receipt, by signing and returning one (1) copy of this letter and AFE, along with your well data requirements sheet. A Communization Agreement for said Well will be supplied for your review and execution at a later date.

If an agreement cannot be reached within 30 days of receipt of this letter by all parties, Devon will apply to the New Mexico Oil Conversation Division for compulsory pooling of your interest into a spacing unit for the Wells, if uncommitted at such time.

Please do not hesitate to contact me at (405) 552-8002 or via email at Andy.Bennett@dvn.com if you have any questions concerning this proposal.

Page 2

Very truly yours,

Devon Energy Production Company, L.P.

Exhibit A-4: Chronology of Contacts

All WI owners received the Well Proposals in May 2022

Owner	Timeline of Contacts/Discussion
Chevron USA, Inc.	Chevron's first email to me in mid-May 2022 after receiving the Well Proposals/AFE's; Chevron requested ownership details in late-May 2022, which I provided in a response on 5/31/2022; Chevron kept in contact with me throughout June and requested Devon's JOA form, which was provided to them on 6/30/2022; throughout July and August, Devon and Chevron have been in negotiations on edits/amendments to the JOA form, and we are still working towards finalizing a mutually agreeable JOA form that both parties can accept. Devon and Chevron mutually agreed on 8/9/2022 to continue negotiating the JOA, even after the Pooling Hearing Date, in hopes of coming to a final JOA form at some point in the near future.
Moon Royalty, LLC	Devon and Moon are committed to a JOA form that has written approval from both parties
Javelina Partners	Devon and Javelina are committed to a JOA form that has written approval from both parties
Zorro Partners, LTD	Devon and Zorro are committed to a JOA form that has written approval from both parties
Cheney Energy Partners, LLC	Devon and Zorro are committed to a JOA form that has written approval from both parties
Magnum Hunter Production, Inc.	Devon and Magnum Hunter began conversations in mid-May 2022 regarding Magnum's WI ownership, the timing of the spud/completion dates, etc. On 5/31/2022, I asked if they would be interested in signing Devon's JOA form, and on 6/6/2022, I provided a copy of the JOA. To date, we have continued to have discussions around Devon's drilling plans, but there has been no feedback/comments from Magnum related to Devon's JOA form. Devon and Magnum spoke on 7/21/2022, and mutually agreed to continue the Cases from the original docket date of 8/4/2022, to the new date of 8/18/2022, so that Magnum could continue to evaluate their options. Since that time, I have received no additional comments/requests/changes from Magnum to the JOA form.
GW Holdings, Inc. (Great Western Drilling Ltd)	Devon and GW Holdings are committed to a JOA form that has written approval from both parties
Davoil Inc.	Davoil has commented that they are committed to a JOA, as long as GW Holdings, Inc. is also committed (see comment directly above related to GW Holdings)
MRC Permian Company	Devon and MRC have been in discussions related to MRC's ownership in these Cases dating back to before the well proposals were mailed out in mid-May 2022. To date, there has been no commitment that MRC wants to enter into a JOA.
Sabinal Energy, LLC	Devon and Sabinal have been in discussions regarding entering into the Devon JOA form; as of 8/8/2022 email correspondence with Sabinal, they were discussing as a team and would get back to me very soon regarding whether they wanted to commit to a JOA or not. Devon is open to JOA, but needs final feedback from Sabinal.
*Additional Owners	*The other owners in these Cases have been largely non-responsive, likely due to the very small nature of their ownership.

Case No. 22958

AFFIDAVIT OF JOSEPH DIXON

Joseph Dixon, of lawful age and being first duly sworn, declares as follows:

1. My name is Joseph Dixon, and I am employed by Devon Energy Production Company, L.P. ("Devon") as a petroleum geologist.

2. I have testified previously by affidavit before the Oil Conservation Division ("Division") as an expert witness in petroleum geology. I hold a Bachelor's degree in Geology from Purdue University and a Master's degree in Geology from Oklahoma State University. I have been employed as a petroleum geologist with Devon since June 2013.

3. I am familiar with the applications filed by Devon in these consolidated cases, and I have conducted a geologic study of the Bone Spring and Wolfcamp formations underlying the subject area.

4. The initial targets for Devon's proposed Burton Flat 3-1 wells in the sections of 3, 2 and 1 of 21S-27E are Third Bone Spring Sandstone interval of the Bone Spring formation, and the Wolfcamp XY Sands, A and B intervals of the Wolfcamp formation.

5. **Devon Exhibit B-1** is structure map at the top of the Wolfcamp Formation, with subsea depths marked by contour intervals every 50 feet. I have outlined the proposed spacing units and identified the orientation of the initial wellbores. This exhibit shows that the top of the

Wolfcamp formation is gently dipping to the east in this area. I do not observe any faulting, pinch outs, or other geologic impediments to developing the targeted Bone Spring or Wolfcamp intervals with horizontal wells.

6. **Devon Exhibit B-2** is a gross isochore thickness map for the Wolfcamp XY, A and B members of the Wolfcamp Formation with 20' contour interval. This exhibit shows that the reservoir interval targeted by Devon's development plan is of consistent thickness across the proposed unit.

7. **Devon Exhibit B-3** is a cross section for the Bone Spring and Wolfcamp formations using the representative wells depicted on Exhibit B-2. Each well log contains gamma ray, resistivity, and porosity logs. The target interval for the initial wells are depicted on the exhibit. The cross-section demonstrates that the targeted interval is continuous across the proposed spacing units.

8. **Devon Exhibit B-4** is a gun barrel representation of the unit, and **Exhibit B-5** is a structural cross section built along the wellbore trajectory.

9. In my opinion, the West-East orientation of the proposed wells is the preferred orientation for horizontal well development in the targeted intervals in this area. The preferred well orientation in this area is West-East so that the wells run sub-perpendicular to the inferred orientation of the maximum horizontal stress. This lay down orientation will efficiently and effectively develop the subject acreage.

10. In my opinion, the granting of Devon's applications is in the best interest of conservation, the prevention of waste, and protection of correlative rights.

11. **Devon Exhibits B-1 to B-5** were either prepared by me or compiled under my direction and supervision.

FURTHER AFFIANT SAYETH NOT.

OIL CONSERVATION DIVISION**

**APPLICATION OF DEVON ENERGY PRODUCTION
COMPANY, L.P., FOR A HORIZONTAL SPACING UNIT AND
COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22959

APPLICATION

Devon Energy Production Company, L.P., (“Devon”), OGRID No. 6137, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order (1) establishing a standard 960-acre, more or less, spacing and proration unit comprised of Lots 9 through 16 (equivalent to the S/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, and (2) pooling all uncommitted mineral interests in the Bone Spring formation, designated as an oil pool, underlying said unit.

In support of its Application, Devon states the following:

1. Devon recognizes that Sections 1, 2 and 3, are rather sizable correction sections consisting of 16 lots in the N/2 of the Sections and therefore may present a number of novel questions and issues regarding the application of the Division’s rules to the unusual circumstances created by the Sections. Devon respectfully submits that in Exhibit A, attached to this Application, it proposes for the Division’s consideration a valid and beneficial interpretation and application of NMAC 19.15.16.15B(1)(1) and related rules for establishing the N/2 N/2 and/or S/2 N/2 of correction Sections 1, 2 and 3, consisting of Lots 1-8 of each Section (“Subject Lands”), as a

standard unit. For the reasons provided in Exhibit A, Devon respectfully submits that establishing the Subject Lands as a standard unit would best serve the interest of the Division and Applicants by ensuring a consistent and systematic application of the Rules to correction sections, no matter the size or number of lots, for the protection of correlative right and prevention of waste.

2. Although this Application represents Devon's preferred spacing unit and development plan, Devon has submitted concurrently an alternate pooling application for the **Burton Flat 3-1 Fed State Com 333H Well** proposed as a standard spacing unit comprising Lots 9-12 of irregular Sections 1, 2 and 3. This alternate pooling application is provided for the Division's consideration should the Division reject the standard horizontal spacing unit proposed herein.

3. Devon is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.

4. Devon proposes and dedicates to the HSU the **Burton Flat 3-1 Fed State Com 333H Well**, as the initial well, to be drilled to a sufficient depth to test the Bone Spring formation.

5. Devon proposes the **Burton Flat 3-1 Fed State Com 333H Well**, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location in Lot 9 of Section 1.

6. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under statewide rules.

7. The proposed HSU overlaps two existing spacing units with wells owned and operated by Devon, the Burton Flat Deep Unit 52H Well (API No. 30-015-40693) with a unit covering Lots 13-16 in Section 2; the Burton Flat Deep Unit 55H Well (API No. 30-015-40682) with a unit covering Lots 9-12 in Section 2; the Burton Flat Deep Unit 51H Well (API No. 30-

015-40681) with a unit covering Lots 9-12 in Section 3; and the Burton Flat Deep Unit 56H Well (API No. 30-015-40683) with a unit covering Lots 13-16 in Section 3. Devon requests approval for these overlapping units.

8. Devon has sought in good faith, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for their development within the proposed HSU.

9. The pooling of all interests in the Bone Spring formation within the proposed HSU, and the establishment of the standard spacing unit, will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

10. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Devon requests that all uncommitted interests in this HSU be pooled and that Devon be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Devon requests that this Application be set for hearing on August 4, 2022, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

A. Establishing a standard 960-acre, more or less, spacing and proration unit comprised of Lots 9 through 16 (equivalent to the S/2 N/2) of correction Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico;

B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying the proposed HSU.

C. Approving the **Burton Flat 3-1 Fed State Com 333H Well** as the well for the HSU.

- D. Designating Devon as operator of this HSU and the horizontal well to be drilled thereon;
- E. Authorizing Devon to recover its costs of drilling, equipping, and completing the well;
- F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- G. Setting a 200% charge for the risk assumed by Devon in drilling and completing the well in the event a working interest owner elects not to participate in the well.

Respectfully submitted,

ABADIE & SCHILL, PC

Attorneys for Devon Energy Company, L.P.

Application of Devon Energy Company, L.P., for a Horizontal Spacing and Proration Unit and Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Division: (1) establishing a standard 960-acre, more or less, spacing and proration unit comprised of Lots 9 through 16 (equivalent to the S/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, and (2) pooling all uncommitted mineral interests in the Bone Spring formation, designated as an oil pool, underlying said unit. The proposed well to be dedicated to the horizontal spacing unit is the **Burton Flat 3-1 Fed State Com 333H Well**, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location in the Lot 9 of Section 1. The well will be orthodox, and the take points and completed interval will comply with the setback requirements under the statewide Rules; also to be considered will be approval for the overlapping of existing units involving the Burton Flat Deep Unit 52H Well (API No. 30-015-40693) and the Burton Flat Deep Unit 55H Well (API No. 30-015-40682) in Section 2, and Burton Flat Deep Unit 51H Well (API No. 30-015-40681) and the Burton Flat Deep Unit 56H Well (API No. 30-015-40683) in Section 3, all operated by Applicant; the cost of drilling and completing the well and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the well and unit; and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 7 miles northeast of Carlsbad, New Mexico.

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

Exhibit A: A legal basis for establishing standard horizontal spacing units in expanded correction sections under the existing language and intent of the Statewide Rules

In this Exhibit A, attached to and made a part of the pooling application, the Applicant respectfully asks the Division to consider what should constitute a standard horizontal spacing unit (“HSU”) for horizontal oil wells when encountering expanded correction sections under the PLSS. The analysis in this Exhibit is provided to the New Mexico Oil Conservation Division (“Division”) for its consideration as it works through the challenges posed by such idiosyncratic sections. The Applicant respectfully submits that the spacing unit proposed in its Application be deemed a standard HSU based on a review of what constitutes a standard HSU under the Rules, which begins with the criteria set out in NMAC 19.15.16.15B(1) that directly supplants – having been adopted “[i]n lieu of” – an oil spacing unit “described in Subsection A of 19.15.15.9 NMAC” as consisting of 40 acres for a vertical well.

More specifically, NMAC 19.15.16.15B(1)(a) states that “[t]he horizontal spacing unit shall comprise one or more contiguous tracts that the horizontal oil well’s completed interval penetrates....” (emphasis added). As an example, a commonly approved standard HSU in a standard section would, and often does, comprise quarter-quarter sections consisting of Units A-D to create a 160-acre standard HSU. Such standard HSU would be accurately described under NMAC 19.15.4.9A(8) as the N/2 N/2 of said standard section. In a standard section, each “tract” of the standard HSU would consist “of a governmental quarter-quarter section...,” in compliance with the language of NMAC 19.15.16.15B(1)(a).

The challenge that arises with correction sections is the application of the specific language of this Rule to correction Lots that vary in size from governmental quarter-quarter sections, Lots which often reduce the size of the quarter-quarter section. NMAC 19.15.16.15B(1)(a) accounts for such possible variations by stating that “each [tract] of which consists of a governmental quarter-quarter section or equivalent.” (emphasis added).

In practice before the Division, applicants often encounter correction sections where the only correction is provided by Lots 1-4 across the top of the section to account for quarter-quarter sections that otherwise would be Units A-D. Common practice with such a scenario shows that these Lots 1-4 are addressed by requesting a standard HSU consisting of Lots 1-4 of the correction section and providing a legal description such as Lots 1-4 (aka the N/2 N/2) of said correction section pursuant to NMAC 19.15.4.9A(8). In this scenario, it has been the practice of the Division to deem Lots 1-4 as “equivalent” to the governmental quarter-quarter sections and approve the contiguous tracts penetrated by the well’s completed interval as a standard HSU. *See* Diagram No. 2, provided herein and attached hereto.

In the present Application for compulsory pooling, the Applicant, Devon Energy Production Company, L.P. (“Devon”), is faced with correction sections that consist of Lots 1-16 that comprise the entire N/2 of the correction section. *See* Diagram No. 3, attached hereto. As an example, one of the correction sections is Section 1, Township 21 South, Range 27 East, NMPM. The challenge is the application of the language and intent of NMAC 19.15.16.15B(1)(a) to Section 1 in a systematic and consistent manner that protects correlative rights and prevents waste pursuant to the Oil and Gas Act (“Act”) and that can be efficiently replicated for other correction sections under the PLSS.

Devon respectfully submits for the Division's consideration that the general legal description of the proposed unit be the guiding factor for determining what tracts should be deemed equivalent to governmental quarter-quarter sections for purposes of building a standard HSU in a correction section that would be equivalent, under the language of the Rules, to a standard HSU in a standard section.

Therefore, to establish such equivalency, the N/2 N/2 standard HSU of a standard section, consisting of Units A-D, should translate into using Lots 1-8 when creating an equivalent standard HSU in correction Section 1. A standard HSU consisting of Lots 1-8 of Section 1 would comprise the N/2 N/2 of Section 1, which is equivalent under the language of the Rules to the N/2 N/2 of a standard section in that it maintains a consistent and equivalent legal description in both the standard section and the correction section. *See* Diagram No. 1, attached hereto. In correction Section 1, the tracts that would constitute the basic building blocks for the N/2 N/2 standard unit of Section 1 would be blocks consisting of two stacked lots, such as Lots 1 and 8, Lots 2 and 7, Lots 3 and 6, and Lots 4 and 5. These stacked Lots used to create a N/2 N/2 standard HSU in a correction section would maintain the equivalency specified in NMAC 19.15.16.15B(1)(a).

The equivalency maintained by this approach is also illustrated by the fact that a quarter-quarter section in the N/2 N/2 of a standard section is equivalent to one-fourth (1/4) of the N/2 N/2 standard spacing unit, and the basic building block proposed herein for creating a standard HSU comprising the N/2 N/2 of correction Section 1 is also one-fourth (1/4) of the N/2 N/2 spacing unit. This approach for establishing standard HSUs in correction sections is replicable with any correction section one encounters, as the size the building blocks would be proportioned to maintain the one-fourth (1/4) equivalency in relation to the number of Lots involved, whether in

the N/2 N/2 or other legal description proposed. Furthermore, the setback requirements of 330 feet would be maintained within the unit to protect the correlative rights of the offset operators.

Devon respectfully submits that this approach would be preferable to burdening the Division with a case-by-case evaluation of what should constitute a standard HSU in a correction section each time the Division encounters the unique irregularities of a correction section with lots of various sizes. Correction Section 1, in the present case, happens to have a number of Lots that are 40 acres, the same acreage as quarter-quarter sections, but the Lots are not equivalent to quarter-quarter sections because each Lot is one-eighth of the N/2 N/2 of correction Section 1, while a quarter-quarter section by definition is one-fourth (1/4) of the N/2 N/2 of a standard section. Furthermore, Lots can vary dramatically in size and distribution depending on the correction section, and consequently, one cannot depend on a Lot always being 40 acres.

The model for approaching correction sections presented herein would provide a reliable template for addressing correction section consistently and systematically. Further, it would incorporate the principle under NMAC 19.15.15.9 and -.11 of having building blocks that include at least 40 acres, which is also reflected in the revisions provided by the horizontal rules in NMAC 19.15.16.15. The correction sections under the PLSS that are expanded beyond four lots, such as correction Section 1, which has 16 lots, would have building blocks which would encompass at least 40 acres, as required by NMAC 19.15.15.9, but would allow additional acreage as envisioned in the intent of NMAC 19.15.16.15B(1)(a) for expanded standard units that accommodate longer horizontal wells and spacing units.

Countering this proposal, one might argue that this approach would lead to larger standard units in correction sections involving lots than those typically established in standard sections involving quarter-quarter section, but from a practical viewpoint, the larger standard unit would

be proper in order to accommodate in a consistent, efficient, and reliable manner those rare instances when the PLSS itself uses correction sections to accommodates anomalies. Devon respectfully submits that the Division has the authority to apply existing Rules to address such anomalies when the inherent language of the Rule itself provides for a consistent and rational application, as proposed herein.

The only alternative approach would involve trying to fit a square peg in a round hole. The Rules do not directly address the subject of correction sections in this situation; thus, without a consistent application of the Rules based on their existing language, the Division could likely risk arbitrarily deciding whether a correction Lot is equivalent to a quarter-quarter section, and the Rules do not provide a reliable threshold for such a determination. For example, would the threshold be a reduction of 5 acres, from 40 to 35, or 10 acres from 40 to 30, or other? Since the Rules do not specify a clear threshold, the Division would be left with using an arbitrary rule of thumb on a case-by-case basis.

Such a piecemeal approach for developing a correction section would not only burden the Division with this uncertainty but would also burden the applicant trying to decide if it should describe in its pooling application a contiguous set of correction Lots as a standard or a non-standard unit. If a clear and consistent pathway is not provided by a consistent application of the Rules on which an applicant can rely, the applicant risks misidentifying the unit as standard or non-standard resulting in the burden of having to dismiss or amend the original pooling application.

The approach provided herein has a number of advantages for ensuring the protection of correlative rights and the prevention of waste and drilling unnecessary wells. First, this approach would better ensure that all of the lots of a correction section would be developed by having an

established place of each lot in a standard spacing unit no matter how irregular the Lot might be. In the example of correction Section 1, with its N/2 consisting of an unwieldy 16 Lots, an applicant might decide to develop the lots in a piecemeal fashion, such as proposing a unit across Lots 13-16 separated from another unit proposed as Lots 5-8, thereby excluding owners in Lots 1-4 and 9-12 and creating gaps in what otherwise should be adjacent units developed based on principles of uniformity for the full development of the N/2 of the correction section.

Second, creating a situation where a series of Lots in a correction section are considered a non-standard unit could significantly burden the applicant by requiring an excessive amount of additional and costly title work to identify owners in adjacent tracts outside the correction section, which otherwise would not burden the applicant when developing a standard section. Such burden may create waste through delay of development or through the applicant deciding not to develop the unit due to the irregularity creating an excessive burden. Devon's proposed horizontal unit in the attached pooling application, if rejected as a standard unit, would require additional title work covering, at a minimum, tracts in Section 6-21S-38E, Sections 36, 35, 34 and 33-20S-28E, and Section 4-21S-27E.

Currently, for example, if an applicant wants to develop the N/2 N/2 of a standard section as a standard spacing unit, the applicant can do so efficiently under the Rules, without unnecessary or excessive burden, and still protect the correlative rights of offset operators and owners by observing the proper setback requirements. Devon respectfully submits that the Division should grant an applicant the benefit of the same efficiency under the Rules when developing expanded correction sections when there is a viable application of the Rules to facilitate efficient development. Under the Act, and its Rules, a correction section should not present such obstacles

to the development of the state's natural resources when a reasonable and rational means is available for development that would prevent waste and protect correlative rights.

In the development plan of its pooling application, Devon is proposing what it believes should be considered, by definition under the Rules, a standard spacing unit comprised of Lots 9 through 16 (equivalent to the S/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico. Devon respectfully submits that the approval of the proposed unit as a standard spacing unit would prevent waste through the efficient development of correction sections and protect correlative rights through the maintenance of appropriate setback requirements. The Division has the authority to recognize contiguous tracts, equivalent to quarter-quarter sections, for building standard spacing units in expanded correction sections under NMAC 19.15.16.15B(1)(a), and Devon respectfully asks the Division to exercise its authority if it should find sufficient justification based on the analysis provided herein.

Respectfully,

/s/ Darin C. Savage

Darin C. Savage

Diagram No. 1

Each QQ Section of the Standard Section is 1/8 of the N2 of the Section

Each Lot in the Correction Section is 1/16 of the N2 of the Section

Therefore, a 40 acre QQ Section in the Standard Section is not equivalent to a 40 acre Lot in the Correction Section

But, QQ Sections A-D in the Standard Section (that being the N2 N2 of the Section) is equivalent to Lots 1-8 in the Correction Section (that also being the N2 N2 of the Section)

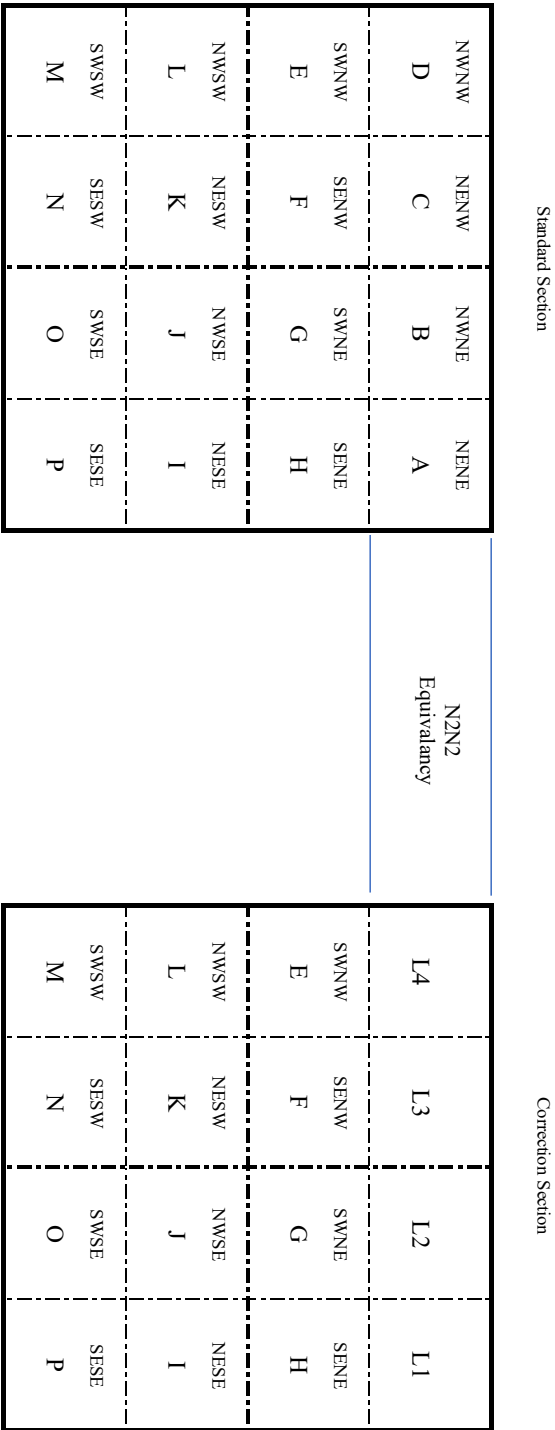

Diagram No. 2

This Diagram No 2 is an example of the common situation when there are only four correction lots (Lots 1-4) across the top of the correction. It appears to be common practice, when this particular scenario arises, to acknowledge the equivalency of Lots 1-4, as being equivalent to Units A-D in the standard section, for establishing under the Rules a standard horizontal spacing unit for the N2 N2, consisting of Lots 1-4 in the correction section, regardless of the size variations of the lots.

Diagram No. 1 herein shows how this common and established practice would be scalable and replicated to establish standard spacing units under the Rules whenever additional lots are encountered in a correction section.

COMPULSORY POOLING APPLICATION CHECKLIST

ALL INFORMATION IN THE APPLICATION MUST BE SUPPORTED BY SIGNED AFFIDAVITS

Case: 22959	APPLICANT'S RESPONSE
Date:	August 16, 2022
Applicant	Devon Energy Production Company L.P.
Designated Operator & OGRID (affiliation if applicable)	6137
Applicant's Counsel:	Darin C. Savage - Abadie & Schill, PC
Case Title:	Application of Devon Energy Production Company, L.P. for a Horizontal Spacing Unit and Compulsory Pooling, Eddy County, New Mexico
Entries of Appearance/Intervenors:	MRC Permian Company Sabinal Energy Operating, LLC Chevron U.S.A. Inc.
Well Family	Burton Flat 3-1 Fed State Com
Formation/Pool	
Formation Name(s) or Vertical Extent:	Bone Spring
Primary Product (Oil or Gas):	Oil
Pooling this vertical extent:	Exhibit B-3; 333H TVD approx 8,945'
Pool Name and Pool Code:	Bone Spring [Avalong; Bone Spring East (Code 3713)]
Well Location Setback Rules:	Standard statewide rules
Spacing Unit Size:	960 acres, more or less
Spacing Unit	
Type (Horizontal/Vertical)	Horizontal
Size (Acres)	960 acres, more or less
Building Blocks:	2 stacked lots, equivalent to 1 quarter-quarter section
Orientation:	west - east
Description: TRS/County	Lots 9-16 (equivalent to the S/2N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico
Standard Horizontal Well Spacing Unit (Y/N), If No, describe	Yes
Other Situations	
Depth Severance: Y/N. If yes, description	No
Proximity Tracts: If yes, description	No
Proximity Defining Well: if yes, description	No
Applicant's Ownership in Each Tract	See Landman Exhibit A-2
Well(s)

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATION OF DEVON ENERGY PRODUCTION
COMPANY, L.P., FOR A HORIZONTAL SPACING UNIT AND
COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22959

AFFIDAVIT OF ANDY D. BENNETT

STATE OF OKLAHOMA)
) ss.
COUNTY OF OKLAHOMA)

I, being duly sworn on oath, state the following:

1. I am over the age of eighteen years and have the capacity to execute this Affidavit, which is based on my personal knowledge.
2. I am employed as an Advising Landman with Devon Energy Production Company, L.P. ("Devon"), and I am familiar with the subject application and the lands involved.
3. I graduated from the University of Oklahoma with a Bachelor's degree in Business (Energy Management) in 2008. I have worked at Devon for approximately 13 years, and I have been working in New Mexico for 4 years. My credentials as a petroleum landman have been accepted by the New Mexico Oil Conservation Division ("Division") and made a matter of record.
4. This affidavit is submitted in connection with the filing by Devon in the above-referenced spacing and compulsory pooling application pursuant to 19.15.4.12.A(1).
5. Devon seeks an order (1) establishing a standard 960-acre, more or less, spacing and proration unit comprised of Lots 9 through 16 (equivalent to the S/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being

**EXHIBIT
A**

correction sections and therefore irregular, and (2) pooling all uncommitted ownership interests in the Bone Spring formation, [(Avalon; Bone Spring East 3713)], designated as an oil pool, underlying said unit.

6. Devon recognizes that Sections 1, 2 and 3, are rather sizable correction sections consisting of 16 lots in the N/2 of the Sections and therefore may present a number of novel questions and issues regarding the application of the Division's rules to the unusual circumstances created by the Sections. Devon has respectfully submitted Exhibit A, attached to the Pooling Application herein, in which it has proposed what it believes to be a valid and beneficial interpretation and application of NMAC 19.15.16.15B(1)(1) and related rules for establishing the N/2 N/2 of correction Sections 1, 2 and 3, consisting of Lots 1-8 of each Section, as a standard unit, and consequently, we respectfully propose that the S/2 N/2, consisting of Lots 9-16, should also be a standard unit. For the reasons provided in Exhibit A, Devon respectfully submits that establishing the Subject Lands as a standard unit would best serve the interest of the Division and Applicants by ensuring a consistent and systematic application of the Rules to correction sections, no matter the size or number of lots, for the protection of correlative right and prevention of waste.

7. Although this Application represents Devon's preferred spacing unit and development plan, Devon has submitted concurrently an alternate pooling application in Case No. 22963 for the **Burton Flat 3-1 Fed State Com 333H Well** proposed as a standard spacing unit, to the extent necessary, comprising Lots 9-12 of irregular Sections 1, 2 and 3. This alternate pooling application is provided for the Division's consideration should the Division reject the standard horizontal spacing unit proposed herein.

8. Under this Case No. 22959, Devon seeks to dedicate to the horizontal spacing and proration unit the **Burton Flat 3-1 Fed State Com 333H Well** (API 30-015-pending), as the initial well.

9. The **Burton Flat 3-1 Fed State Com 333H Well**, an oil well, will be horizontally drilled from a surface location in Lot 5 of Section 3 (387' FWL and 2,107' FNL) to a bottom hole location in Lot 9 of Section 1 (20' FEL and 2,650' FNL); with an approximate TVD of 8,945'; an approximate TMD of 24,425'; FTP in Section 3: 100' FWL, 2,650' FNL; LTP in Section 1: 100' FEL, 2,650' FNL.

10. The proposed C-102 for the well is attached as **Exhibit A-1**.

11. A general location plat and a plat outlining the unit being pooled is attached hereto as **Exhibit A-2**, which shows the general location of the proposed well within the unit. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under statewide rules.

12. The proposed unit overlaps two existing spacing units with wells owned and operated by Devon, the Burton Flat Deep Unit 52H Well (API No. 30-015-40693) with a unit covering Lots 13-16 in Section 2; the Burton Flat Deep Unit 55H Well (API No. 30-015-40682) with a unit covering Lots 9-12 in Section 2; the Burton Flat Deep Unit 51H Well (API No. 30-015-40681) with a unit covering Lots 9-12 in Section 3; and the Burton Flat Deep Unit 56H Well (API No. 30-015-40683) with a unit covering Lots 13-16 in Section 3. Devon requests approval for these overlapping units.

13. The parties being pooled, the nature of their interests, and their last known addresses are listed on **Exhibit A-2** attached hereto. Exhibit A-2 shows which working interest owners have committed, and which to date have not committed, their interest to a voluntary agreement with Devon, along with a list of the overriding royalty interest (ORRI) owners and record title (RT) owners to be pooled.

14. There are no depth severances in the Bone Spring formation in this acreage.

15. I provided the law firm of Abadie & Schill P.C. a list of names and addresses for the uncommitted interest owners shown on **Exhibit A-2**. In compiling these addresses, I conducted a diligent search of the public records in Eddy County, New Mexico, where the well is located, and of phone directories and did internet searches to locate the contact information for parties entitled to notification. Mailings of one WI owner (Paladin Inc., Andrew Smith President) and three ORRI owners (C. Eugene Corriher, Janet Lewis and XTO Holdings) were returned as undeliverable. Three WI owners, six ORRI owners and 1 RTO owner are listed by USPS.com as still in-transit; therefore, the locations cannot yet be confirmed for: Crosswinds Resources LLC (WI), Magnum Hunter Production Inc., C/O Cimarex Energy Co. (WI, contacted), Sieb Resources (WI), Ameripermian Holdings, LLC, Elizabeth L Cheney Irrev Trust Elizabeth L Cheney Trustee, Elizabeth L Cheney Mitchel E Cheney Family Rev Tr Alexander K Cheney TTEE, Estate Of Gwendolyn P Rutledge Alexis A Scott Personal Rep, Liberty Oil & Gas Corporation, MP Titan Flex LP, MSH Family Real Estate Partnership II, LLC, and SDX Resources Inc. Devon published notice in the Carlsbad Current Argus, a newspaper of general circulation in Eddy County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

16. Devon has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for their development within the proposed horizontal spacing unit. **Exhibit A-4** provides a chronology and history of contacts with the owners.

17. The working interest owners being pooled have been contacted regarding the proposed well. If a mutually agreeable JOA is reached between Devon and another interest owner or owners, Devon requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain

spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

18. **Exhibit A-3** is a sample proposal letter and the AFEs for the proposed well, that were sent to working interest owners. The estimated cost of the well set forth in the AFE is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

19. Devon requests overhead and administrative rates of \$8,000/month for drilling each well and \$800/month for producing each well. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of southeastern New Mexico. Devon requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

20. Devon requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners.

21. Devon requests that it be designated operator of the unit and well.

22. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

23. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights, and will avoid the drilling of unnecessary wells.

24. The foregoing is correct and complete to the best of my knowledge and belief.

RE: Well Proposals- Burton Flat 3-1 Fed State Com 332H & 333H
Sections 1, 2, & 3, All in T21S-R27E
Eddy County, New Mexico

To whom it may concern:

Devon Energy Production Company, L.P. ("Devon"), as Operator, proposes to drill and complete the following two (2) wells:

- Burton Flat 3-1 Fed State Com 332H as a horizontal well to an approximate landing TVD of 8,670', bottom hole TVD' of 8,825', and approximate TMD of 24,305' into the Bone Spring formation at an approximate SHL of 1,061' FNL and 369' FWL of Section 3-T21S-R27E and an approximate BHL of 1,150' FNL and 20' FEL of Section 1-T21S-R27E, Eddy County, New Mexico (collectively with both proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.
- Burton Flat 3-1 Fed State Com 333H as a horizontal well to an approximate landing TVD of 8,770', bottom hole TVD' of 8,945', and approximate TMD of 24,425' into the Bone Spring formation at an approximate SHL of 2,107' FNL and 387' FWL of Section 3-T21S-R27E and an approximate BHL of 2,650' FNL and 20' FEL of Section 1-T21S-R27E, Eddy County, New Mexico (collectively with both proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.

Devon reserves the right to modify the locations and drilling plans described above in order to address surface and subsurface concerns. Devon will advise of any such modifications.

Devon is proposing to drill the Wells under the terms of the modified 2015 AAPL form of Operating Agreement ("JOA"). The JOA will be supplied to those parties interested in participating, upon request.

The JOA will have the following general provisions:

- Devon Energy Production Company, L.P. named as Operator
- 100/300% Non-Consenting Penalty
- Overhead rates of \$8,000 DWR/\$800 PWR

Please indicate your election to participate in the drilling and completion of the Wells in the spaces provided below, within 30 days of receipt, by signing and returning one (1) copy of this letter and AFE, along with your well data requirements sheet. A Communization Agreement for said Wells will be supplied for your review and execution at a later date.

EXHIBIT
A-3

Page 2

If an agreement cannot be reached within 30 days of receipt of this letter by all parties, Devon will apply to the New Mexico Oil Conversation Division for compulsory pooling of your interest into a spacing unit for the Wells, if uncommitted at such time.

Please do not hesitate to contact me at (405) 552-8002 or via email at Andy.Bennett@dvn.com if you have any questions concerning this proposal.

Very truly yours,

Devon Energy Production Company, L.P.

Andy Bennett, CPL
Senior Staff Landman

Exhibit A-4: Chronology of Contacts

All WI owners received the Well Proposals in May 2022

Owner	Timeline of Contacts/Discussion
Chevron USA, Inc.	Chevron's first email to me in mid-May 2022 after receiving the Well Proposals/AFE's; Chevron requested ownership details in late-May 2022, which I provided in a response on 5/31/2022; Chevron kept in contact with me throughout June and requested Devon's JOA form, which was provided to them on 6/30/2022; throughout July and August, Devon and Chevron have been in negotiations on edits/amendments to the JOA form, and we are still working towards finalizing a mutually agreeable JOA form that both parties can accept. Devon and Chevron mutually agreed on 8/9/2022 to continue negotiating the JOA, even after the Pooling Hearing Date, in hopes of coming to a final JOA form at some point in the near future.
Moon Royalty, LLC	Devon and Moon are committed to a JOA form that has written approval from both parties
Javelina Partners	Devon and Javelina are committed to a JOA form that has written approval from both parties
Zorro Partners, LTD	Devon and Zorro are committed to a JOA form that has written approval from both parties
Cheney Energy Partners, LLC	Devon and Zorro are committed to a JOA form that has written approval from both parties
Magnum Hunter Production, Inc.	Devon and Magnum Hunter began conversations in mid-May 2022 regarding Magnum's WI ownership, the timing of the spud/completion dates, etc. On 5/31/2022, I asked if they would be interested in signing Devon's JOA form, and on 6/6/2022, I provided a copy of the JOA. To date, we have continued to have discussions around Devon's drilling plans, but there has been no feedback/comments from Magnum related to Devon's JOA form. Devon and Magnum spoke on 7/21/2022, and mutually agreed to continue the Cases from the original docket date of 8/4/2022, to the new date of 8/18/2022, so that Magnum could continue to evaluate their options. Since that time, I have received no additional comments/requests/changes from Magnum to the JOA form.
GW Holdings, Inc. (Great Western Drilling Ltd)	Devon and GW Holdings are committed to a JOA form that has written approval from both parties
Davoil Inc.	Davoil has commented that they are committed to a JOA, as long as GW Holdings, Inc. is also committed (see comment directly above related to GW Holdings)
MRC Permian Company	Devon and MRC have been in discussions related to MRC's ownership in these Cases dating back to before the well proposals were mailed out in mid-May 2022. To date, there has been no commitment that MRC wants to enter into a JOA.
Sabinal Energy, LLC	Devon and Sabinal have been in discussions regarding entering into the Devon JOA form; as of 8/8/2022 email correspondence with Sabinal, they were discussing as a team and would get back to me very soon regarding whether they wanted to commit to a JOA or not. Devon is open to JOA, but needs final feedback from Sabinal.
*Additional Owners	*The other owners in these Cases have been largely non-responsive, likely due to the very small nature of their ownership.

PRODUCTION COMPANY, L.P.
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO**

Case Nos. 22959, 22960

AFFIDAVIT OF JOSEPH DIXON

Joseph Dixon, of lawful age and being first duly sworn, declares as follows:

1. My name is Joseph Dixon, and I am employed by Devon Energy Production Company, L.P. (“Devon”) as a petroleum geologist.

2. I have testified previously by affidavit before the Oil Conservation Division (“Division”) as an expert witness in petroleum geology. I hold a Bachelor’s degree in Geology from Purdue University and a Master’s degree in Geology from Oklahoma State University. I have been employed as a petroleum geologist with Devon since June 2013.

3. I am familiar with the applications filed by Devon in these consolidated cases, and I have conducted a geologic study of the Bone Spring and Wolfcamp formations underlying the subject area.

4. The initial targets for Devon’s proposed Burton Flat 3-1 wells in the sections of 3, 2 and 1 of 21S-27E are Third Bone Spring Sandstone interval of the Bone Spring formation, and the Wolfcamp XY Sands, A and B intervals of the Wolfcamp formation.

5. **Devon Exhibit B-1** is structure map at the top of the Wolfcamp Formation, with subsea depths marked by contour intervals every 50 feet. I have outlined the proposed spacing units and identified the orientation of the initial wellbores. This exhibit shows that the top of the

Wolfcamp formation is gently dipping to the east in this area. I do not observe any faulting, pinch outs, or other geologic impediments to developing the targeted Bone Spring or Wolfcamp intervals with horizontal wells.

6. **Devon Exhibit B-2** is a gross isochore thickness map for the 3rd Bone Spring Sandstone member of the Bone Spring Formation with 20' contour interval. This exhibit shows that the reservoir interval targeted by Devon's development plan is of consistent thickness across the proposed unit.

7. **Devon Exhibit B-3** is a cross section for the Bone Spring and Wolfcamp formations using the representative wells depicted on Exhibit B-2. Each well log contains gamma ray, resistivity, and porosity logs. The target interval for the initial wells are depicted on the exhibit. The cross-section demonstrates that the targeted interval is continuous across the proposed spacing units.

8. **Devon Exhibit B-4** is a gun barrel representation of the unit, and **Exhibit B-5** is a structural cross section built along the wellbore trajectory.

9. In my opinion, the West-East orientation of the proposed wells is the preferred orientation for horizontal well development in the targeted intervals in this area. The preferred well orientation in this area is West-East so that the wells run sub-perpendicular to the inferred orientation of the maximum horizontal stress. This lay down orientation will efficiently and effectively develop the subject acreage.

10. In my opinion, the granting of Devon's applications is in the best interest of conservation, the prevention of waste, and protection of correlative rights.

11. **Devon Exhibits B-1 to B-5** were either prepared by me or compiled under my direction and supervision.

FURTHER AFFIANT SAYETH NOT.

OIL CONSERVATION DIVISION**

**APPLICATION OF DEVON ENERGY PRODUCTION
COMPANY, L.P., FOR A HORIZONTAL SPACING UNIT AND
COMPULSORY POOLING, EDDY COUNTY, NEW MEXICO**

Case No. 22960

APPLICATION

Devon Energy Production Company, L.P., (“Devon”), OGRID No. 6137, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, Section 70-2-17, seeking an order (1) establishing a standard 823.92-acre, more or less, spacing and proration unit comprised of Lots 1 through 8 (equivalent to the N/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, and (2) pooling all uncommitted mineral interests in the Bone Spring formation, designated as an oil pool, underlying said unit.

In support of its Application, Devon states the following:

1. Devon recognizes that Sections 1, 2 and 3, are rather sizable correction sections consisting of 16 lots in the N/2 of the Sections and therefore may present a number of novel questions and issues regarding the application of the Division’s rules to the unusual circumstances created by the Sections. Devon respectfully submits that in Exhibit A, attached to this Application, it proposes a valid and beneficial interpretation and application of NMAC 19.15.16.15B(1)(1) and related rules for establishing the N/2 N/2 of correction Sections 1, 2 and 3, consisting of Lots 1-8 of each Section (“Subject Lands”), as a standard unit. For the reasons provided in Exhibit A,

Devon respectfully submits that establishing the Subject Lands as a standard unit would best serve the interest of the Division and Applicants by ensuring a consistent and systematic application of the Rules to correction sections, no matter the size or number of lots, for the protection of correlative right and prevention of waste.

2. Although this Application represents Devon's preferred spacing unit and development plan, Devon has submitted concurrently an alternate pooling application for the **Burton Flat 3-1 Fed State Com 332H Well** proposed as a non-standard spacing unit, to the extent necessary, comprising Lots 1-8 of irregular Sections 1, 2 and 3. This alternate pooling application is provided for the Division's consideration should the Division reject the standard horizontal spacing unit proposed herein.

3. Devon is a working interest owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon.

4. Devon proposes and dedicates to the HSU the **Burton Flat 3-1 Fed State Com 332H Well**, as the initial well, to be drilled to a sufficient depth to test the Bone Spring formation.

5. Devon proposes the **Burton Flat 3-1 Fed State Com 332H Well**, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location in Lot 8 of Section 1.

6. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under statewide rules.

7. The proposed HSU overlaps two existing spacing units with wells owned and operated by Devon, the Burton Flat Deep Unit 49H Well (API No. 30-015-40707) with a unit covering Lots 1-4 in Section 2; and the Burton Flat Deep Unit 50H Well (API No. 30-015-

40758) with a unit covering Lots 5-8 in Section 2. Devon requests approval for these overlapping units.

8. Devon has sought in good faith, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for their development within the proposed HSU.

9. The pooling of all interests in the Bone Spring formation within the proposed HSU, and the establishment of the standard spacing unit, will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

10. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Devon requests that all uncommitted interests in this HSU be pooled and that Devon be designated the operator of the proposed horizontal well and HSU.

WHEREFORE, Devon requests that this Application be set for hearing on August 4, 2022, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

A. Establishing a standard 823.92-acre, more or less, spacing and proration unit comprised of Lots 1 through 8 (equivalent to the N/2 N/2) of correction Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico;

B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying the proposed HSU.

C. Approving the **Burton Flat 3-1 Fed State Com 332H Well** as the well for the HSU.

D. Designating Devon as operator of this HSU and the horizontal well to be drilled thereon;

E. Authorizing Devon to recover its costs of drilling, equipping, and completing the well;

F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Setting a 200% charge for the risk assumed by Devon in drilling and completing the well in the event a working interest owner elects not to participate in the well.

Respectfully submitted,

ABADIE & SCHILL, PC

Attorneys for Devon Energy Company, L.P.

Application of Devon Energy Company, L.P., for a Horizontal Spacing and Proration Unit and Compulsory Pooling, Eddy County, New Mexico. Applicant in the above-styled cause seeks an order from the Division: (1) establishing a standard 823.93-acre, more or less, spacing and proration unit comprised of Lots 1 through 8 (equivalent to the N/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, and (2) pooling all uncommitted mineral interests in the Bone Spring formation, designated as an oil pool, underlying said unit. The proposed well to be dedicated to the horizontal spacing unit is the **Burton Flat 3-1 Fed State Com 332H Well**, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location in Lot 8 of Section 1. The well will be orthodox, and the take points and completed interval will comply with the setback requirements under the statewide Rules; also to be considered will be approval for the overlapping of existing units in Section 2 involving the Burton Flat Deep Unit 49H Well (API No. 30-015-40707) and the Burton Flat Deep Unit 50H Well (API No. 30-015-40758) both operated by Applicant; the cost of drilling and completing the well and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the well and unit; and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 7 miles northeast of Carlsbad, New Mexico.

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

Exhibit A: A legal basis for establishing standard horizontal spacing units in expanded correction sections under the existing language and intent of the Statewide Rules

In this Exhibit A, attached to and made a part of the pooling application, the Applicant respectfully asks the Division to consider what should constitute a standard horizontal spacing unit (“HSU”) for horizontal oil wells when encountering expanded correction sections under the PLSS. The analysis in this Exhibit is provided to the New Mexico Oil Conservation Division (“Division”) for its consideration as it works through the challenges posed by such idiosyncratic sections. The Applicant respectfully submits that the spacing unit proposed in its Application be deemed a standard HSU based on a review of what constitutes a standard HSU under the Rules, which begins with the criteria set out in NMAC 19.15.16.15B(1) that directly supplants – having been adopted “[i]n lieu of” – an oil spacing unit “described in Subsection A of 19.15.15.9 NMAC” as consisting of 40 acres for a vertical well.

More specifically, NMAC 19.15.16.15B(1)(a) states that “[t]he horizontal spacing unit shall comprise one or more contiguous tracts that the horizontal oil well’s completed interval penetrates....” (emphasis added). As an example, a commonly approved standard HSU in a standard section would, and often does, comprise quarter-quarter sections consisting of Units A-D to create a 160-acre standard HSU. Such standard HSU would be accurately described under NMAC 19.15.4.9A(8) as the N/2 N/2 of said standard section. In a standard section, each “tract” of the standard HSU would consist “of a governmental quarter-quarter section...,” in compliance with the language of NMAC 19.15.16.15B(1)(a).

The challenge that arises with correction sections is the application of the specific language of this Rule to correction Lots that vary in size from governmental quarter-quarter sections, Lots which often reduce the size of the quarter-quarter section. NMAC 19.15.16.15B(1)(a) accounts for such possible variations by stating that “each [tract] of which consists of a governmental quarter-quarter section or equivalent.” (emphasis added).

In practice before the Division, applicants often encounter correction sections where the only correction is provided by Lots 1-4 across the top of the section to account for quarter-quarter sections that otherwise would be Units A-D. Common practice with such a scenario shows that these Lots 1-4 are addressed by requesting a standard HSU consisting of Lots 1-4 of the correction section and providing a legal description such as Lots 1-4 (aka the N/2 N/2) of said correction section pursuant to NMAC 19.15.4.9A(8). In this scenario, it has been the practice of the Division to deem Lots 1-4 as “equivalent” to the governmental quarter-quarter sections and approve the contiguous tracts penetrated by the well’s completed interval as a standard HSU. *See* Diagram No. 2, provided herein and attached hereto.

In the present Application for compulsory pooling, the Applicant, Devon Energy Production Company, L.P. (“Devon”), is faced with correction sections that consist of Lots 1-16 that comprise the entire N/2 of the correction section. *See* Diagram No. 3, attached hereto. As an example, one of the correction sections is Section 1, Township 21 South, Range 27 East, NMPM. The challenge is the application of the language and intent of NMAC 19.15.16.15B(1)(a) to Section 1 in a systematic and consistent manner that protects correlative rights and prevents waste pursuant to the Oil and Gas Act (“Act”) and that can be efficiently replicated for other correction sections under the PLSS.

Devon respectfully submits for the Division's consideration that the general legal description of the proposed unit be the guiding factor for determining what tracts should be deemed equivalent to governmental quarter-quarter sections for purposes of building a standard HSU in a correction section that would be equivalent, under the language of the Rules, to a standard HSU in a standard section.

Therefore, to establish such equivalency, the N/2 N/2 standard HSU of a standard section, consisting of Units A-D, should translate into using Lots 1-8 when creating an equivalent standard HSU in correction Section 1. A standard HSU consisting of Lots 1-8 of Section 1 would comprise the N/2 N/2 of Section 1, which is equivalent under the language of the Rules to the N/2 N/2 of a standard section in that it maintains a consistent and equivalent legal description in both the standard section and the correction section. *See* Diagram No. 1, attached hereto. In correction Section 1, the tracts that would constitute the basic building blocks for the N/2 N/2 standard unit of Section 1 would be blocks consisting of two stacked lots, such as Lots 1 and 8, Lots 2 and 7, Lots 3 and 6, and Lots 4 and 5. These stacked Lots used to create a N/2 N/2 standard HSU in a correction section would maintain the equivalency specified in NMAC 19.15.16.15B(1)(a).

The equivalency maintained by this approach is also illustrated by the fact that a quarter-quarter section in the N/2 N/2 of a standard section is equivalent to one-fourth (1/4) of the N/2 N/2 standard spacing unit, and the basic building block proposed herein for creating a standard HSU comprising the N/2 N/2 of correction Section 1 is also one-fourth (1/4) of the N/2 N/2 spacing unit. This approach for establishing standard HSUs in correction sections is replicable with any correction section one encounters, as the size the building blocks would be proportioned to maintain the one-fourth (1/4) equivalency in relation to the number of Lots involved, whether in

the N/2 N/2 or other legal description proposed. Furthermore, the setback requirements of 330 feet would be maintained within the unit to protect the correlative rights of the offset operators.

Devon respectfully submits that this approach would be preferable to burdening the Division with a case-by-case evaluation of what should constitute a standard HSU in a correction section each time the Division encounters the unique irregularities of a correction section with lots of various sizes. Correction Section 1, in the present case, happens to have a number of Lots that are 40 acres, the same acreage as quarter-quarter sections, but the Lots are not equivalent to quarter-quarter sections because each Lot is one-eighth of the N/2 N/2 of correction Section 1, while a quarter-quarter section by definition is one-fourth (1/4) of the N/2 N/2 of a standard section. Furthermore, Lots can vary dramatically in size and distribution depending on the correction section, and consequently, one cannot depend on a Lot always being 40 acres.

The model for approaching correction sections presented herein would provide a reliable template for addressing correction section consistently and systematically. Further, it would incorporate the principle under NMAC 19.15.15.9 and -.11 of having building blocks that include at least 40 acres, which is also reflected in the revisions provided by the horizontal rules in NMAC 19.15.16.15. The correction sections under the PLSS that are expanded beyond four lots, such as correction Section 1, which has 16 lots, would have building blocks which would encompass at least 40 acres, as required by NMAC 19.15.15.9, but would allow additional acreage as envisioned in the intent of NMAC 19.15.16.15B(1)(a) for expanded standard units that accommodate longer horizontal wells and spacing units.

Countering this proposal, one might argue that this approach would lead to larger standard units, in correction sections involving lots, than those typically established in standard sections involving quarter-quarter section, but from a practical viewpoint, the larger standard unit would

be proper in order to accommodate in a consistent, efficient, and reliable manner those rare instances when the PLSS itself uses correction sections to accommodates anomalies. Devon respectfully submits that the Division has the authority to apply existing Rules to address such anomalies when the inherent language of the Rule itself provides for a consistent and rational application, as proposed herein.

The only alternative approach would involve trying to fit a square peg in a round hole. The Rules do not directly address the subject of correction sections in this situation; thus, without a consistent application of the Rules based on their existing language, the Division could likely risk arbitrarily deciding whether a correction Lot is equivalent to a quarter-quarter section, and the Rules do not provide a reliable threshold for such a determination. For example, would the threshold be a reduction of 5 acres, from 40 to 35, or 10 acres from 40 to 30, or other? Since the Rules do not specify a clear threshold, the Division would be left with using an arbitrary rule of thumb on a case-by-case basis.

Such a piecemeal approach for developing a correction section would not only burden the Division with this uncertainty but would also burden the applicant trying to decide if it should describe in its pooling application a contiguous set of correction Lots as a standard or a non-standard unit. If a clear and consistent pathway is not provided by a consistent application of the Rules on which an applicant can rely, the applicant risks misidentifying the unit as standard or non-standard resulting in the burden of having to dismiss or amend the original pooling application.

The approach provided herein has a number of advantages for ensuring the protection of correlative rights and the prevention of waste and drilling unnecessary wells. First, this approach would better ensure that all of the lots of a correction section would be developed by having an

established place of each lot in a standard spacing unit no matter how irregular the Lot might be. In the example of correction Section 1, with its N/2 consisting of an unwieldy 16 Lots, an applicant might decide to develop the lots in a piecemeal fashion, such as proposing a unit across Lots 13-16 separated from another unit proposed as Lots 5-8, thereby excluding owners in Lots 1-4 and 9-12 and creating gaps in what otherwise should be adjacent units developed based on principles of uniformity for the full development of the N/2 of the correction section.

Second, creating a situation where a series of Lots in a correction section are considered a non-standard unit could significantly burden the applicant by requiring an excessive amount of additional and costly title work to identify owners in adjacent tracts outside the correction section, which otherwise would not burden the applicant when developing a standard section. Such burden may create waste through delay of development or through the applicant deciding not to develop the unit due to the irregularity creating an excessive burden. Devon's proposed horizontal unit in the attached pooling application, if rejected as a standard unit, would require additional title work covering, at a minimum, tracts in Section 6-21S-38E, Sections 36, 35, 34 and 33-20S-28E, and Section 4-21S-27E.

Currently, for example, if an applicant wants to develop the N/2 N/2 of a standard section as a standard spacing unit, the applicant can do so efficiently under the Rules, without unnecessary or excessive burden, and still protect the correlative rights of offset operators and owners by observing the proper setback requirements. Devon respectfully submits that the Division should grant an applicant the benefit of the same efficiency under the Rules when developing expanded correction sections when there is a viable application of the Rules to facilitate efficient development. Under the Act, and its Rules, a correction section should not present such obstacles

to the development of the state's natural resources when a reasonable and rational means is available for development that would prevent waste and protect correlative rights.

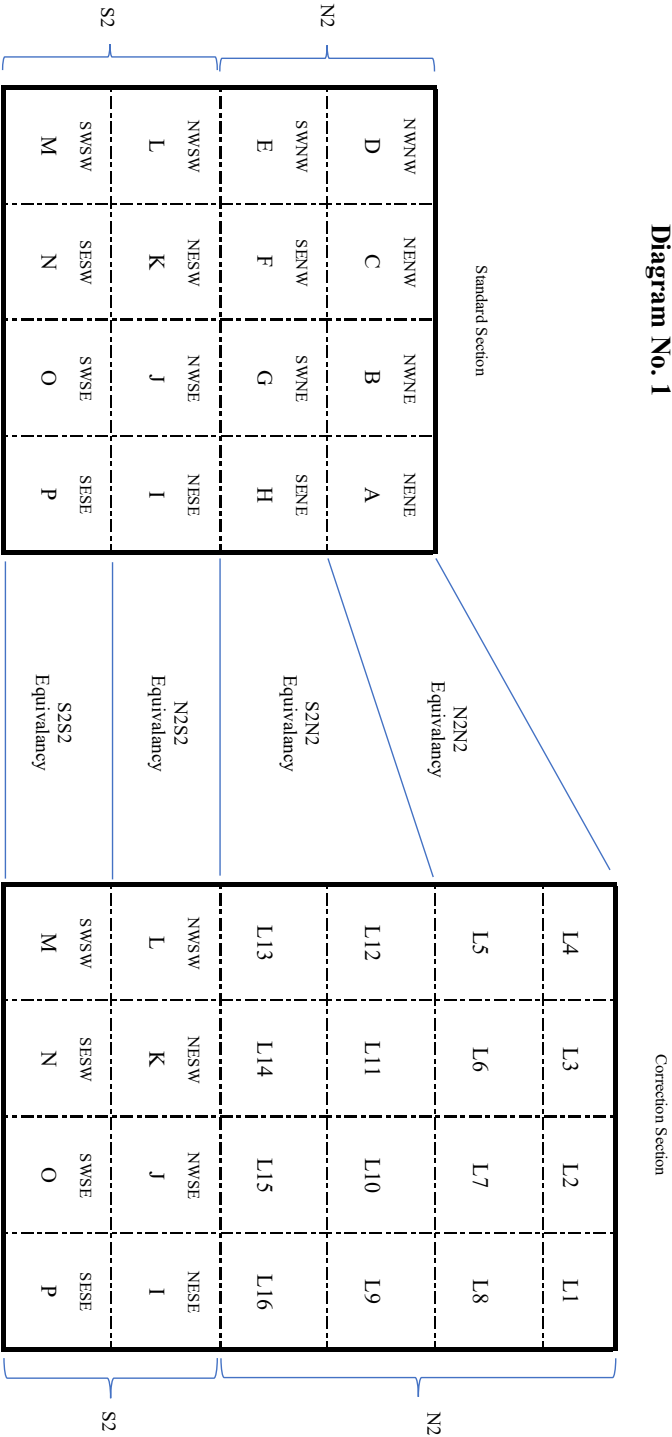

In the development plan of its pooling application, Devon is proposing what it believes should be considered, by definition under the Rules, a standard spacing unit comprised of Lots 1-8 (aka the N/2 N/2) of correction Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM Eddy County, New Mexico. Devon respectfully submits that the approval of the proposed unit as a standard spacing unit would prevent waste through the efficient development of correction sections and protect correlative rights through the maintenance of appropriate setback requirements. The Division has the authority to recognize contiguous tracts, equivalent to quarter-quarter sections, for building standard spacing units in expanded correction sections under NMAC 19.15.16.15B(1)(a), and Devon respectfully asks the Division to exercise its authority if it should find sufficient justification based on the analysis provided herein.

Respectfully,

/s/ Darin C. Savage

Darin C. Savage

Diagram No. 1

Each QQ Section of the Standard Section is 1/8 of the N2 of the Section

Each Lot in the Correction Section is 1/16 of the N2 of the Section

Therefore, a 40 acre QQ Section in the Standard Section is not equivalent to a 40 acre Lot in the Correction Section

But, QQ Sections A-D in the Standard Section (that being the N2 N2 of the Section) is equivalent to Lots 1-8 in the Correction Section (that also being the N2 N2 of the Section)

Diagram No. 2

This Diagram No 2 is an example of the common situation when there are only four correction lots (Lots 1-4) across the top of the correction. It appears to be common practice, when this particular scenario arises, to acknowledge the equivalency of Lots 1-4, as being equivalent to Units A-D in the standard section, for establishing under the Rules a standard horizontal spacing unit for the N2 N2, consisting of Lots 1-4 in the correction section, regardless of the size variations of the lots.

Diagram No. 1 herein shows how this common and established practice would be scalable and replicated to establish standard spacing units under the Rules whenever additional lots are encountered in a correction section.

Case No. 22960

Exhibit A: Affidavit of Andy Bennett, Landman
Exhibit A-1: C-102 Forms
Exhibit A-2: Ownership and Sectional Map
Exhibit A-3: Well Proposal Letters and AFEs
Exhibit A-4: Chronology of Contacts with Uncommitted Owners

Case No. 22960

correction sections and therefore irregular, and (2) pooling all uncommitted ownership interests in the Bone Spring formation, [(Avalon; Bone Spring East 3713)], designated as an oil pool, underlying said unit.

6. Devon recognizes that Sections 1, 2 and 3, are rather sizable correction sections consisting of 16 lots in the N/2 of the Sections and therefore may present a number of novel questions and issues regarding the application of the Division's rules to the unusual circumstances created by the Sections. Devon has respectfully submitted Exhibit A, attached to the Pooling Application herein, in which it has proposed what it believes to be a valid and beneficial interpretation and application of NMAC 19.15.16.15B(1)(1) and related rules for establishing the N/2 N/2 of correction Sections 1, 2 and 3, consisting of Lots 1-8 of each Section ("Subject Lands"), as a standard unit. For the reasons provided in Exhibit A, Devon respectfully submits that establishing the Subject Lands as a standard unit would best serve the interest of the Division and Applicants by ensuring a consistent and systematic application of the Rules to correction sections, no matter the size or number of lots, for the protection of correlative right and prevention of waste.

7. Although this Application represents Devon's preferred spacing unit and development plan, Devon has submitted concurrently an alternate pooling application in Case No. 22964 for the **Burton Flat 3-1 Fed State Com 332H Well** proposed as a non-standard spacing unit, to the extent necessary, comprising Lots 1-8 of irregular Sections 1, 2 and 3. This alternate pooling application is provided for the Division's consideration should the Division reject the standard horizontal spacing unit proposed herein.

8. Under this Case No. 22960, Devon seeks to dedicate to the horizontal spacing and proration unit the **Burton Flat 3-1 Fed State Com 332H Well** (API 30-015-pending), as the initial well.

9. The **Burton Flat 3-1 Fed State Com 332H Well** will be horizontally drilled from a surface location in Lot 5 of Section 3 (369' FWL and 1061' FNL) to a bottom hole location in Lot 8 of Section 1 (20' FEL and 1,150' FNL); with an approximate TVD of 8,825'; an approximate TMD of 24,305'; FTP in Section 3: 100' FWL, 1,150' FNL; LTP in Section 1: 100' FEL, 1,150' FNL.

10. The proposed C-102 for the well is attached as **Exhibit A-1**.

11. The proposed HSU overlaps two existing spacing units with wells owned and operated by Devon, the Burton Flat Deep Unit 49H Well (API No. 30-015-40707) with a unit covering Lots 1-4 in Section 2; and the Burton Flat Deep Unit 50H Well (API No. 30-015-40758) with a unit covering Lots 5-8 in Section 2. Devon requests approval for these overlapping units.

12. A general location plat and a plat outlining the unit being pooled is attached hereto as **Exhibit A-2**, which shows the location of the proposed well within the unit. The proposed well is orthodox in its location, and the take points and completed interval comply with setback requirements under statewide rules.

13. The parties being pooled, the nature of their interests, and their last known addresses are listed on **Exhibit A-2** attached hereto. Exhibit A-2 shows which working interest owners have committed, and which to date have not committed, their interest to a voluntary agreement with Devon, along with a list of the overriding royalty interest (ORRI) owners and record title (RT) owners to be pooled.

14. There are no depth severances in the Bone Spring formation in this acreage.

15. I provided the law firm of Abadie & Schill P.C. a list of names and addresses for the uncommitted interest owners shown on **Exhibit A-2**. In compiling these addresses, I conducted a diligent search of the public records in Eddy County, New Mexico, where the well is

located, and of phone directories and did internet searches to locate the contact information for parties entitled to notification. Mailings for one WI owner (Paradin Inc., Andrew Smith President) and three ORRI owners (C. Eugene Corriher, Janet Lewis and XTO Holdings) were returned as undeliverable. Three WI owners, six ORRI owners and 1 RTO owner are listed by USPS.com as still in-transit; therefore, the locations by mailing cannot yet be confirmed for: Crosswinds Resources LLC (WI), Magnum Hunter Production Inc., C/O Cimarex Energy Co. (WI, contacted), Sieb Resources (WI), Ameripermian Holdings, LLC, Elizabeth L Cheney Irrev Trust Elizabeth L Cheney Trustee, Elizabeth L Cheney Mitchel E Cheney Family Rev Tr Alexander K Cheney TTEE, Estate Of Gwendolyn P Rutledge Alexis A Scott Personal Rep, Liberty Oil & Gas Corporation, MP Titan Flex LP, MSH Family Real Estate Partnership II, LLC, and SDX Resources Inc. Devon published notice in the Carlsbad Current Argus, a newspaper of general circulation in Eddy County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

16. Devon has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for their development within the proposed horizontal spacing unit. **Exhibit A-4** provides a chronology and history of contacts with the owners.

17. The working interest owners being pooled have been contacted regarding the proposed well. If a mutually agreeable JOA is reached between Devon and another interest owner or owners, Devon requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain

spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

18. **Exhibit A-3** is a sample proposal letter and the AFEs for the proposed well, that were sent to working interest owners. The estimated cost of the well set forth in the AFE is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

19. Devon requests overhead and administrative rates of \$8,000/month for drilling each well and \$800/month for producing each well. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of southeastern New Mexico. Devon requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

20. Devon requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners.

21. Devon requests that it be designated operator of the unit and well.

22. The Exhibits to this Affidavit were prepared by me or compiled from Devon's company business records under my direct supervision.

23. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights, and will avoid the drilling of unnecessary wells.

24. The foregoing is correct and complete to the best of my knowledge and belief.

RE: Well Proposals- Burton Flat 3-1 Fed State Com 332H & 333H
Sections 1, 2, & 3, All in T21S-R27E
Eddy County, New Mexico

To whom it may concern:

Devon Energy Production Company, L.P. ("Devon"), as Operator, proposes to drill and complete the following two (2) wells:

- Burton Flat 3-1 Fed State Com 332H as a horizontal well to an approximate landing TVD of 8,670', bottom hole TVD' of 8,825', and approximate TMD of 24,305' into the Bone Spring formation at an approximate SHL of 1,061' FNL and 369' FWL of Section 3-T21S-R27E and an approximate BHL of 1,150' FNL and 20' FEL of Section 1-T21S-R27E, Eddy County, New Mexico (collectively with both proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.
- Burton Flat 3-1 Fed State Com 333H as a horizontal well to an approximate landing TVD of 8,770', bottom hole TVD' of 8,945', and approximate TMD of 24,425' into the Bone Spring formation at an approximate SHL of 2,107' FNL and 387' FWL of Section 3-T21S-R27E and an approximate BHL of 2,650' FNL and 20' FEL of Section 1-T21S-R27E, Eddy County, New Mexico (collectively with both proposed wells, the "Wells"). Enclosed for your review is Devon's AFE, indicating drilling costs, completion costs, and overall completed well costs.

Devon reserves the right to modify the locations and drilling plans described above in order to address surface and subsurface concerns. Devon will advise of any such modifications.

Devon is proposing to drill the Wells under the terms of the modified 2015 AAPL form of Operating Agreement ("JOA"). The JOA will be supplied to those parties interested in participating, upon request.

The JOA will have the following general provisions:

- Devon Energy Production Company, L.P. named as Operator
- 100/300% Non-Consenting Penalty
- Overhead rates of \$8,000 DWR/\$800 PWR

Please indicate your election to participate in the drilling and completion of the Wells in the spaces provided below, within 30 days of receipt, by signing and returning one (1) copy of this letter and AFE, along with your well data requirements sheet. A Communization Agreement for said Wells will be supplied for your review and execution at a later date.

EXHIBIT
A-3

Page 2

If an agreement cannot be reached within 30 days of receipt of this letter by all parties, Devon will apply to the New Mexico Oil Conversation Division for compulsory pooling of your interest into a spacing unit for the Wells, if uncommitted at such time.

Please do not hesitate to contact me at (405) 552-8002 or via email at Andy.Bennett@dvn.com if you have any questions concerning this proposal.

Very truly yours,

Devon Energy Production Company, L.P.

Andy Bennett, CPL
Senior Staff Landman

Exhibit A-4: Chronology of Contacts

All WI owners received the Well Proposals in May 2022

Owner	Timeline of Contacts/Discussion
Chevron USA, Inc.	Chevron's first email to me in mid-May 2022 after receiving the Well Proposals/AFE's; Chevron requested ownership details in late-May 2022, which I provided in a response on 5/31/2022; Chevron kept in contact with me throughout June and requested Devon's JOA form, which was provided to them on 6/30/2022; throughout July and August, Devon and Chevron have been in negotiations on edits/amendments to the JOA form, and we are still working towards finalizing a mutually agreeable JOA form that both parties can accept. Devon and Chevron mutually agreed on 8/9/2022 to continue negotiating the JOA, even after the Pooling Hearing Date, in hopes of coming to a final JOA form at some point in the near future.
Moon Royalty, LLC	Devon and Moon are committed to a JOA form that has written approval from both parties
Javelina Partners	Devon and Javelina are committed to a JOA form that has written approval from both parties
Zorro Partners, LTD	Devon and Zorro are committed to a JOA form that has written approval from both parties
Cheney Energy Partners, LLC	Devon and Zorro are committed to a JOA form that has written approval from both parties
Magnum Hunter Production, Inc.	Devon and Magnum Hunter began conversations in mid-May 2022 regarding Magnum's WI ownership, the timing of the spud/completion dates, etc. On 5/31/2022, I asked if they would be interested in signing Devon's JOA form, and on 6/6/2022, I provided a copy of the JOA. To date, we have continued to have discussions around Devon's drilling plans, but there has been no feedback/comments from Magnum related to Devon's JOA form. Devon and Magnum spoke on 7/21/2022, and mutually agreed to continue the Cases from the original docket date of 8/4/2022, to the new date of 8/18/2022, so that Magnum could continue to evaluate their options. Since that time, I have received no additional comments/requests/changes from Magnum to the JOA form.
GW Holdings, Inc. (Great Western Drilling Ltd)	Devon and GW Holdings are committed to a JOA form that has written approval from both parties
Davoil Inc.	Davoil has commented that they are committed to a JOA, as long as GW Holdings, Inc. is also committed (see comment directly above related to GW Holdings)
MRC Permian Company	Devon and MRC have been in discussions related to MRC's ownership in these Cases dating back to before the well proposals were mailed out in mid-May 2022. To date, there has been no commitment that MRC wants to enter into a JOA.
Sabinal Energy, LLC	Devon and Sabinal have been in discussions regarding entering into the Devon JOA form; as of 8/8/2022 email correspondence with Sabinal, they were discussing as a team and would get back to me very soon regarding whether they wanted to commit to a JOA or not. Devon is open to JOA, but needs final feedback from Sabinal.
*Additional Owners	*The other owners in these Cases have been largely non-responsive, likely due to the very small nature of their ownership.

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATIONS OF DEVON ENERGY
PRODUCTION COMPANY, L.P.
FOR COMPULSORY POOLING,
EDDY COUNTY, NEW MEXICO**

Case Nos. 22959, 22960

AFFIDAVIT OF JOSEPH DIXON

Joseph Dixon, of lawful age and being first duly sworn, declares as follows:

1. My name is Joseph Dixon, and I am employed by Devon Energy Production Company, L.P. (“Devon”) as a petroleum geologist.

2. I have testified previously by affidavit before the Oil Conservation Division (“Division”) as an expert witness in petroleum geology. I hold a Bachelor’s degree in Geology from Purdue University and a Master’s degree in Geology from Oklahoma State University. I have been employed as a petroleum geologist with Devon since June 2013.

3. I am familiar with the applications filed by Devon in these consolidated cases, and I have conducted a geologic study of the Bone Spring and Wolfcamp formations underlying the subject area.

4. The initial targets for Devon’s proposed Burton Flat 3-1 wells in the sections of 3, 2 and 1 of 21S-27E are Third Bone Spring Sandstone interval of the Bone Spring formation, and the Wolfcamp XY Sands, A and B intervals of the Wolfcamp formation.

5. **Devon Exhibit B-1** is structure map at the top of the Wolfcamp Formation, with subsea depths marked by contour intervals every 50 feet. I have outlined the proposed spacing units and identified the orientation of the initial wellbores. This exhibit shows that the top of the

Wolfcamp formation is gently dipping to the east in this area. I do not observe any faulting, pinch outs, or other geologic impediments to developing the targeted Bone Spring or Wolfcamp intervals with horizontal wells.

6. **Devon Exhibit B-2** is a gross isochore thickness map for the 3rd Bone Spring Sandstone member of the Bone Spring Formation with 20' contour interval. This exhibit shows that the reservoir interval targeted by Devon's development plan is of consistent thickness across the proposed unit.

7. **Devon Exhibit B-3** is a cross section for the Bone Spring and Wolfcamp formations using the representative wells depicted on Exhibit B-2. Each well log contains gamma ray, resistivity, and porosity logs. The target interval for the initial wells are depicted on the exhibit. The cross-section demonstrates that the targeted interval is continuous across the proposed spacing units.

8. **Devon Exhibit B-4** is a gun barrel representation of the unit, and **Exhibit B-5** is a structural cross section built along the wellbore trajectory.

9. In my opinion, the West-East orientation of the proposed wells is the preferred orientation for horizontal well development in the targeted intervals in this area. The preferred well orientation in this area is West-East so that the wells run sub-perpendicular to the inferred orientation of the maximum horizontal stress. This lay down orientation will efficiently and effectively develop the subject acreage.

10. In my opinion, the granting of Devon's applications is in the best interest of conservation, the prevention of waste, and protection of correlative rights.

11. **Devon Exhibits B-1 to B-5** were either prepared by me or compiled under my direction and supervision.

AFFIDAVIT OF NOTICE

I, Darin C. Savage, attorney and authorized representative of Devon Energy Production Company, L.P. (“Devon”), the Applicant herein, being first duly sworn, upon oath, states the following:

1. Notice of the applications and hearing in the above-reference cases was timely sent by certified mail, return receipt requested, through the United States Postal Service on July 14, 2022, to all uncommitted interest owners sought to be pooled in this proceeding. See Exhibit C-2, attached hereto. Copies of notice letters and evidence of mailing to parties are attached hereto as Exhibits C-1 and C-2. Notice was also timely served by publication in the Carlsbad Current Argus, a newspaper of general circulation in Eddy County, New Mexico, on July 20, 2022, as reflected in the Affidavits of Publication attached hereto as Exhibit C-3.

2. It is my understanding that Devon has made a diligent effort to find the names and addresses for the interest owners entitled to receive notice of the application and case herein.

Burton Flat 3-1 Fed State Com 822H Well (Case No. 22958)

Case Nos. 22960, 22959, & 22958:

Dear Interest Owners:

This letter is to advise you that Devon Energy Production Company, L.P. ("Devon") has filed the enclosed applications, Case Nos. 22960, 22959 and 22958, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of units in the Bone Spring and Wolfcamp formations.

In Case No. 22960, Devon seeks to pool the Bone Spring formation underlying Lots 1 through 8 (equivalent to the N/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, a standard unit encompassing 823.92 acres, more or less, dedicated to the above-referenced 332H Well.

In Case No. 22959, Devon seeks to pool the Bone Spring formation underlying Lots 9 through 16 (equivalent to the S/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, a standard unit encompassing 960 acres, more or less, dedicated to the above-referenced 333H Well.

In Case No. 22958, Devon seeks to pool the Wolfcamp formation underlying Lots 1 through 8 (equivalent to the N/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, a standard unit encompassing 960 acres, more or less, dedicated to the above-referenced 822H Well.

encompassing 823.92 acres, more or less, dedicated to the above-referenced 621H, 622H, and 822H Wells.

These Case Nos. 22960, 22959, and 22958 are presented to the Division as Devon's preferred horizontal spacing units. Sections 1, 2 and 3 represent unusually large correction sections with 16 Lots in the N/2 of each section. There may be an unresolved question under the Rules about what constitutes a standard horizontal spacing unit in the N/2 of such correction sections, and Devon has filed alternate applications for the possibility that the Division may view the spacing differently than that proposed in these applications. You should receive a similar notice, enclosed, of the alternate applications.

A hearing has been requested before a Division Examiner on August 4, 2022, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. However, under the COVID-19 Public Health policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: <https://www.emnrd.nm.gov/ocd/hearing-info/> or call (505) 476-3441.

You are being notified as an interest owner and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Pre-hearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact Andy D. Bennett at (405) 552-8002 or at andy.bennett@dvn.com.

Sincerely,

Darin C. Savage

encompassing 823.92 acres, more or less, dedicated to the above-referenced 621H, 622H, and 822H Wells.

These Case Nos. 22960, 22959, and 22958 are presented to the Division as Devon's preferred horizontal spacing units. Sections 1, 2 and 3 represent unusually large correction sections with 16 Lots in the N/2 of each section. There may be an unresolved question under the Rules about what constitutes a standard horizontal spacing unit in the N/2 of such correction sections, and Devon has filed alternate applications for the possibility that the Division may view the spacing differently than that proposed in these applications. You should receive a similar notice, enclosed, of the alternate applications.

A hearing has been requested before a Division Examiner on August 4, 2022, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. However, under the COVID-19 Public Health policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: <https://www.emnrd.nm.gov/oed/hearing-info/> or call (505) 476-3441.

You are being notified as an overriding royalty interest owner and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Pre-hearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact Andy D. Bennett at (405) 552-8002 or at andy.bennett@devon.com.

Sincerely,

Burton Flat 3-1 Fed State Com 822H Well (Case No. 22958)

Case Nos. 22960, 22959, & 22958:

Dear Interest Owners:

This letter is to advise you that Devon Energy Production Company, L.P. ("Devon") has filed the enclosed applications, Case Nos. 22960, 22959 and 22958, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of units in the Bone Spring and Wolfcamp formations.

In Case No. 22960, Devon seeks to pool the Bone Spring formation underlying Lots 1 through 8 (equivalent to the N/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, a standard unit encompassing 823.92 acres, more or less, dedicated to the above-referenced 332H Well.

In Case No. 22959, Devon seeks to pool the Bone Spring formation underlying Lots 9 through 16 (equivalent to the S/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, a standard unit encompassing 960 acres, more or less, dedicated to the above-referenced 333H Well.

In Case No. 22958, Devon seeks to pool the Wolfcamp formation underlying Lots 1 through 8 (equivalent to the N/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, said Sections being correction sections and therefore irregular, a standard unit

LUKE LUTHERAN CHURCH, SUDIE MARIE ADAMS, TAY-MOR ENTERPRISES INC, TER-MACK LP, TYLER TROWBRIDGE, WILLIAM EDWARD STEINMANN JR & PATRICIA ANNE STEINMANN JOINT TENANTS, WINNIE HELEN HAYES, SDX RESOURCES INC., of Devon Energy Production Company, L.P.'s application for approval of a spacing unit and compulsory pooling, Eddy County, New Mexico. The State of New Mexico, through its Oil Conservation Division, hereby gives notice that the Division Examiner will conduct a public hearing at 8:15 a.m. on August 4, 2022, at 1220 S. St. Francis, Santa Fe, New Mexico, 87505. However, under the current COVID-19 Public Health policies, the hearing will be conducted remotely online. For information about remote access and the status of the case, you can visit the Division's website at: <https://www.emnrd.nm.gov/ocd/hearing-info/> or call (505) 476-3441. Devon Energy Production Company, L.P., at 333 W. Sheridan Ave, Oklahoma City, OK 73102, seeks an order from the Division: (1) establishing a standard 823.92-acre, more or less, horizontal spacing and proration unit comprised of Lots 1 through 8 (equivalent to the N/2 N/2) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, and (2) pooling all uncommitted mineral interests in the Wolfcamp formation, designated as an oil pool, underlying said unit. Said horizontal spacing unit is to be dedicated to the following three wells: Burton Flat 3-1 Fed State Com 621H Well, Burton Flat 3-1 Fed State Com 622H Well, and the Burton Flat 3-1 Fed State Com 822H Well; the Burton Flat 3-1 Fed State Com 621H Well, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location in Lot 1 of Section 1; the Burton Flat 3-1 Fed State Com 622H Well, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location in Lot 8 of Section 1; and the Burton Flat 3-1 Fed State Com 822H Well, an oil well, to be horizontally drilled from a surface location in Lot 5 of Section 3 to a bottom hole location in Lot 1 of Section 1. The application in this Case No. 22958 is presented to the Division as Devon's preferred horizontal spacing unit. Sections 1, 2, and 3 represent unusually large correction sections with 16 Lots in the N/2 of each Section. There may be a question under the Rules about what constitutes a standard horizontal spacing unit in such Sections, and Devon has filed alternate applications in Case Nos. 22961 and 22962 for these wells should the Division view the section differently. Devon's preferred spacing unit is

the spacing differently from Devon's preferred spacing unit. The location of the wells are standard; the completed interval and first take and last take points for the wells proposed in the unit meet the Division's statewide Rules. Also to be considered will be the cost of drilling and completing the wells and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the wells and unit; and a 200% charge for the risk involved in drilling and completing the wells. The wells and lands are located approx. 7 miles northeast of Carlsbad, New Mexico.
