APPLICATION OF READ & STEVENS, INC. FOR APPROVAL OF AN OVERLAPPING HORIZONTAL WELL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.

CASE NO. 23524

APPLICATION

Read & Stevens, Inc. ("Applicant"), through undersigned attorneys, hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order (a) approving a standard 320.95-acre, more or less, overlapping horizontal well spacing unit in the Bone Spring formation comprised of the Lot 4, SW/4 NW/4 and the W/2 SW/4 of Section 3, and the W/2 W/2 of Section 10, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico, and (b) pooling all uncommitted mineral interests in this overlapping horizontal well spacing unit. In support of its application, Read & Stevens, Inc. states:

- 1. Applicant is a working interest owner in the proposed overlapping horizontal spacing unit and has the right to drill thereon.
- Applicant seeks to designate Permian Resources Operating, LLC (OGRID No.
 372165) as the operator of the proposed overlapping horizontal spacing unit.
- 3. Applicant seeks to initially dedicate the above-referenced overlapping horizontal spacing unit to the proposed **Riddler 3-10 Federal Com 111H**, **Riddler 3-10 Federal Com 121H**, and **Riddler 3-10 Federal Com 122H** wells, all to be horizontally drilled from a surface location in Lot 3 of Section 3 to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 10.

- 4. This 320.95-acre horizontal well spacing unit will overlap the following existing horizontal well spacing unit covering portions of the subject acreage:
 - 160.95-acre, more or less, horizontal well spacing unit comprised of the W/2 W/2 of Section 3, Township 20 South, Range 34 East, dedicated to the North Lea 3 Fed Com #4H (API: 30-025-42684).
- 5. Applicant has sought and been unable to obtain voluntary agreement for the development of these lands from all interest owners in the subject spacing unit.
- 6. The pooling of interests will allow Applicant to obtain a just and fair share of the oil and gas underlying the subject lands, avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on June 1, 2023, and, after notice and hearing as required by law, the Division enter an order:

- A. Approving the overlapping horizontal well spacing unit and pooling all uncommitted interests therein;
- B. Designating Permian Resources Operating, LLC as operator of this overlapping horizontal spacing unit and the horizontal wells to be drilled thereon;
- C. Authorizing Applicant to recover its costs of drilling, completing, and equipping the wells;
- D. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

E. Imposing a 200% penalty for the risk assumed by Applicant in drilling and completing the wells against any working interest owner who does not voluntarily participate in the drilling of the wells.

- 6. Read & Stevens is the designated operator in the above-referenced existing horizontal well spacing units. Therefore, **Read & Stevens Exhibit A-1** includes a sample of the notice letter mailed to the other working interest owners in both the new and existing spacing units. Exhibit A-1 also includes a diagram depicting the newly proposed spacing units in relation to the existing spacing units.
- 7. **Read & Stevens Exhibit A-2** contains a draft Form C-102 for the wells in these overlapping spacing units. These forms demonstrate that the completed interval for each of the wells will comply with statewide setbacks for oil wells. The exhibit shows that the wells will be assigned to the Teas; Bone Spring (58960).
- 8. **Read & Stevens Exhibit A-3** identifies the tracts of land comprising the overlapping horizontal spacing units, the ownership interests in each tract, and a recapitulation of the Riddler 3-10 Unit ownership. The interest owners that Read & Stevens seeks to pool are highlighted in yellow. Exhibit A-3 also includes the title record holder that Read & Stevens seeks to pool, where applicable. The subject acreage is comprised of federal lands.

- 9. **Read & Stevens Exhibit A-4** contains a sample of the well proposal letter and AFE for each well that was sent to owners with a working interest. The costs reflected in the AFE are consistent with what Read & Stevens and other operators have incurred for drilling similar horizontal wells in the area in this formation.
- 10. Read & Stevens requests that the overhead and administrative costs for drilling and producing the proposed wells be set at \$8,000 per month while drilling and \$800 per month while producing. These costs are consistent with what other operators are charging in this area for similar wells.
- 11. **Read & Stevens Exhibit A-5** contains a general summary of the contacts with the uncommitted interest owners. As indicated in the exhibit, Read & Stevens has made a good faith effort to locate and has had communications with the majority of the parties that it seeks to pool in these cases in an effort to reach voluntary joinder. In my opinion, Read & Stevens has undertaken good faith efforts to reach an agreement with the uncommitted interest owners.
- 12. Read & Stevens has provided the law firm of Holland & Hart LLP with the names and addresses of the parties that Read & Stevens seeks to pool and instructed that they be notified of this hearing. Read & Stevens has conducted a diligent search of all public records in the county where the property is located, reviewed telephone directories, and conducted computer searches to locate contact information for each interest owner.
- 13. **Read & Stevens Exhibits A-1 through A-5** were either prepared by me or compiled under my direction and supervision.
- 14. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be

used as written testimony in these cases. This statement is made on the date next to my signature below.

RE: Communitization Agreements – Riddler 3-10 Federal Com

Sections 3 & 10, T20S-R34E Lea County, New Mexico

Dear Owner:

In anticipation of the drilling and completion of the wells listed below, Permian Resources Operating, LLC respectfully requests your review and approval of the enclosed Communitization Agreements covering the relative spacing unit/contract areas in the Bone Spring and Wolfcamp formations.

- Riddler 3-10 Fed Com 111H, 121H, 122H
- Riddler 3-10 Fed Com 112H, 123H, 124H
- Riddler 3-10 Fed Com 113H, 125H, 126H
- Riddler 3-10 Fed Com 114H, 127H, 128H

At your earliest convenience, please execute and notarize **three (3) copies** of the signature and acknowledgement pages for the **four (4)** Communitization Agreements enclosed and return all sets to my attention at the address listed below.

As noted in the previously provided Joint Operating Agreement, all working interest and override royalty information is subject to final rendering of Drilling and Division Order title opinions.

Furthermore, please note that the two-mile 1st and 2nd Bone Spring development will involve forming overlapping spacing units over the presently existing one-mile 3rd Bone Spring production (being the North Lea 3 Federal Com 1H-4H, and the North Lea 10 Federal 1H & 2H). No impacts to exist production are expected.

Due to the number of working interest owners we are receiving an abnormally large number of inquiries. If you have any questions concerning these, email will likely be the best way to reach me at Travis.Macha@permianres.com.

Sincerely,

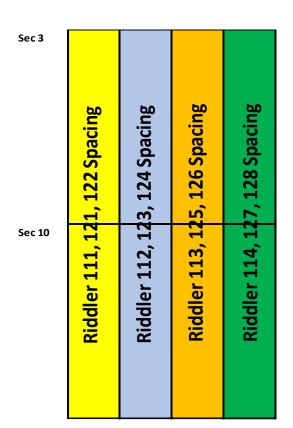

PERMIAN RESOURCES OPERATING, LLC

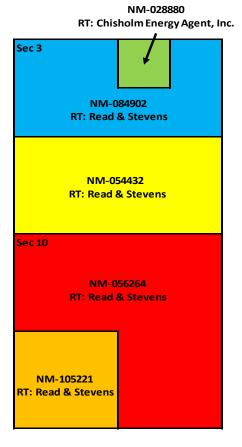

Travis Macha Senior Landman

The locations, TVDs, and targets are approximate and subject to change dependent on surface or subsurface issues encountered. These locations do fall within an approved potash drill island, so any surface changes remain subject to BLM approval. Permian is proposing to drill these wells under the modified terms of the 1989 AAPL Operating Agreement and a form of said Operating Agreement is enclosed. The Operating Agreement has the following general provisions:

- -100%/300%/300% non-consent provisions
- \$8,000/\$800 drilling and producing rates
- Permian Resources Operating, LLC named as Operator

Note that communitization agreements for each spacing unit shall be sent in a separate mailing.

Please indicate your election to participate in the drilling and completion of the proposed wells in the space provided below. Please sign and return one copy of this letter, a signed copy of the proposed AFE, and your geologic well requirements.

In the interest of time, should we not reach an agreement within thirty (30) days of the date of your receipt of this letter, Permian will apply to the New Mexico Oil Conservation Division for compulsory pooling of your interest into a spacing unit for the proposed well. If you do not wish to participate, Permian would be interested in acquiring your interest in the subject lands which is subject to further mutually agreeable negotiation.

Thank you for your time and consideration, if you have any questions at all, please don't hesitate to contact me at 432.400.1037 or by email at travis.macha@permianres.com

Respectfully,

Travis Macha

APPLICATIONS OF READ & STEVENS, INC. FOR APPROVAL OF AN OVERLAPPING HORIZONTAL WELL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.

CASE NOS. 23524-23527

SELF-AFFIRMED STATEMENT OF IRA BRADFORD

- My name is Ira Bradford. I work for Permian Resources Operating, LLC ("Permian") as a Geologist.
- 2. I have previously testified before the New Mexico Oil Conservation Division ("Division") as an expert witness in petroleum geology matters. My credentials as a petroleum geologist have been accepted by the Division and made a matter of record.
- 3. I am familiar with the applications filed by Read & Stevens, Inc. ("Read & Stevens") in these cases, and I have conducted a geologic study of the lands in the subject area.
 - 4. Read & Stevens has targeted the Bone Spring formation in these cases.
- 5. Read & Stevens Exhibit B-1 is a regional locator map that identifies the Riddler project area, in proximity to the Capitan Reef within the Delaware Basin, for the Bone Spring horizontal spacing units that are the subject of these applications.
- 6. Read & Stevens Exhibit B-2 is a cross section location map for the proposed horizontal spacing units ("units") within the Bone Spring formation. The approximate locations of the proposed units are outlined in blue. Existing producing wells in the targeted intervals are represented by solid lines. This map identifies the cross-section

Released to Imaging: 5/30/2023 4:49:42 PM

running from A-A' with the cross-section well names and a black line in proximity to the proposed wells.

- 7. **Read & Stevens Exhibit B-3** is a subsea structure map that I prepared for the First Bone Spring Sand formation, with a contour interval of 50 feet. The structure map shows the Bone Spring gently dipping to the Southeast. The Bone Spring structure appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the spacing units. This map also shows the relative location of the four proposed First Bone Spring Sand wells as dashed green lines, as well as the offset producers as solid green lines.
- 8. **Read & Stevens Exhibit B-4** is a subsea structure map that I prepared for the Second Bone Spring Sand formation, with a contour interval of 50 feet. The structure map shows the Bone Spring gently dipping to the Southeast. The Bone Spring structure appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the spacing units. This map also shows the relative location of the eight proposed Second Bone Spring Sand wells as dashed orange lines, as well as the offset producers as solid orange lines.
- 9. **Read & Stevens Exhibit B-5** is a stratigraphic cross-section that I prepared displaying open-hole logs run over the Bone Spring from the representative wells denoted from A to A'. For each well in the cross-section, the exhibit shows the following logs: gamma ray, resistivity, and porosity. The target intervals are labeled and marked. The logs in the cross-section demonstrate that the interval is continuous across each spacing unit.
- 10. **Read & Stevens Exhibit B-6** is a gun-barrel diagram showing the proposed development of the First Bone Spring Sand and Second Bone Spring Sand in the Riddler 3-10 Fed Com Unit with the individual pooled units outlined in blue.

- 11. In my opinion, standup orientation of the proposed wells is the appropriate orientation for horizontal well development in this area because it is near perpendicular to the maximum horizontal stress of the area.
- 12. Based on my geologic study, the Bone Spring formation underlying the subject area is suitable for development by horizontal wells and the acreage comprising the proposed spacing units will contribute more-or-less equally to the production from the wellbores. I have not identified any geologic impediments to drilling horizontal wells in the area of the spacing unit proposed.
- 13. In my opinion, horizontal drilling will be the most efficient method to develop this acreage, to prevent the drilling of unnecessary wells, and to result in the greatest ultimate recovery, and that approving Read & Stevens's application will be in the best interest of conservation, the prevention of waste, and protection of correlative rights.
- 14. **Read & Stevens Exhibits B-1 through B-6** were either prepared by me or compiled under my direction and supervision.
- 15. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in these cases. This statement is made on the date next to my

signature below.

Ladies & Gentlemen:

This letter is to advise you that Read & Stevens, Inc. has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on June 1, 2023, and the status of the hearing can be monitored through the Division's website at https://www.emnrd.nm.gov/ocd/.

The hearing will be conducted on June 1, 2023, beginning at 8:15 a.m. Due to ongoing construction and associated space limitations at the Wendell Chino Building, Parties, Counsel for Parties, and the public are encouraged to attend/participate via the Webex Meeting platform. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: https://www.emnrd.nm.gov/ocd/hearing-info/.

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Travis Macha at (432) 400-1037 or travis.macha@permianres.com.
